

## Here's Gist Of Rent Bill Just Signed

### 15 Per Cent Increase Allowed with Lease

Kodak people who are renters or landlords will be interested in clauses of the new bill to continue federal rent control. The President signed it Monday.

Under the bill, effective July 1, all federal rent control is to end Mar. 1, 1948. New York State, however, has its own rent law which automatically took over previously when federal controls lapsed for a time.

Of major interest to all is the clause allowing rent raises. The new measure allows a 15 per cent increase if both the tenant and landlord agree to a lease running until Dec. 31, 1948, at the higher rent figure.

All that is necessary after both agree to the increase and sign the lease is to file a copy of the lease with the area office of the Housing Expediter. Then the increase becomes legal and rent control officials cannot raise or lower the rent.

#### Their Alternative

However, if the tenant does not wish to protect himself with a long lease at a higher rent, or if the landlord does not wish to tie up his property on the same basis, they can continue as at present until Mar. 1, 1948. After that date the landlord can set the rent at any figure he can get or require the tenant to move.

In the event that a tenant signs an 18-month lease under the new law and then leaves or is evicted for cause by the landlord, then the landlord can enter into a new lease with another tenant, to run until Dec. 31, 1948, at not more than 15 per cent above the ceiling prevailing on July 1, 1947.

#### Some Controls End

Rent control ends as of July 1, 1947, on some types of dwellings. This applies to new houses—those built after Feb. 1, 1947—and new apartments. Also rent control is dropped for all hotels, motor courts and tourist homes under provisions of the bill.

Restrictions end for many newly altered or converted houses and apartments. This means buildings on which major alterations were completed on or after Feb. 1, 1947. To qualify for decontrol a building must be so altered or remodeled as to increase the number of housing units.

There will be no rent ceiling, under the bill's provisions, on houses not rented before. They state that control does not affect houses which were not rented for living quarters between Feb. 1, 1945, and Jan. 31, 1947. Thus, if the owner had lived in the house during that period he is not affected by rent ceilings and can set the amount.

Veterans of World War II still must be given a 30-day priority in buying new homes being built for sale or renting new houses and apartments, but a nonveteran may contract to have a house built as the veterans' 30-day priority does not apply in such a case.

Under the new law a Federal Housing Expediter is to be appointed and also advisory boards in various areas who will act under his jurisdiction. The names of the

(Continued on Page 4)

## Recordak Gives Bank a Lift

**Swift and Sure**—Ray M. Gidney, left, president of the Federal Reserve Bank of Cleveland, watches while George L. McCarthy, president of Recordak Corp., a Kodak subsidiary, demonstrates one of the new "Duplex Recordaks" being installed in Cleveland and other cities served by that Federal Reserve District.

## Play It Safe Over Holidays By Correcting Car's Defects

The July 4th holiday weekend begins tomorrow and that's the signal for motorists to "hit the road" for the lakes and mountains, for picnics and trips to the golf course.

It's a time, too, when a concerted effort is being made in the city's industrial plants to reduce the number of traffic fatalities and injuries. Sponsoring the campaign is the Automobile Club of Rochester with the co-operation of plant safety directors and the Rochester Industrial Editors' Association.

Carelessness of drivers and defective operational parts of the automobile are cited by safety officials as among the most flagrant causes of accidents.

With the increase in the flow of traffic on the highways it's a good time to make a firm resolution to keep alert when you are behind the steering wheel. Keep your eyes and thoughts on the road and have a care for the other driver and the pedestrian. And above all "Take It Easy"—that's the slogan of the current safety effort.

This is a good time, also, to consider whether your car is a potential cause of an accident. Ask yourself about these five points.

1. **Brakes**—Do they need adjustment? How about the hand brake?
2. **Lights**—Do any bulbs need replacing? Are headlights focused and aimed properly? What's the condition of tail and stop lights?
3. **Tires**—Are they all in safe condition? (Consider cuts, fabric breaks and excessive wear.)
4. **Windshield Wipers**—Do they

operate satisfactorily? Do the blades need replacing?

5. **Horn**—Does it operate easily and when you need it?

Well, how does your car stack up? If any corrections or repairs are needed it will pay you well to see to them now.

## 60 Recordaks Speed Federal Bank Tasks

A battery of 25 microfilming machines, newest of the postwar models, designed and produced at Hawk-Eye, is photographing thousands of checks daily in the Federal Reserve Bank of Cleveland.

This recent installation in the Cleveland bank's check collection department was the first of its kind in the country.

A total of 60 machines was shipped from Hawk-Eye for use in Cleveland, Cincinnati and Pittsburgh, all within the jurisdiction of the Cleveland Federal Reserve District.

The "Duplex Recordaks," so named because they photograph the front and back of bank checks simultaneously, were produced by Kodak for the Recordak Corp., a Kodak subsidiary.

Checks are reduced photographically by 35 diameters in the machine which "files" both front and back images of more than 10,000 checks on each 100-foot roll of 16-mm. film.

#### 430,000 Checks Daily

"With these new machines, and others like them soon to be installed in our Cincinnati and Pittsburgh branches, we shall be able to photograph an average of 430,000 checks a day," President Ray M. Gidney of the Federal Reserve Bank of Cleveland said in officially accepting the 25 machines from George L. McCarthy, president of Recordak.

"All checks in transit, except local and government card checks, from now on will be microfilmed," President Gidney added, "and with these film records in our fireproof vaults, we will be in a position to provide the best possible service to our member banks."

"We expect to eliminate most of the headaches and extra cost which result ordinarily from the loss of checks in transit. Should a mail pouch filled with checks disappear en route, we can now obtain facsimile prints of the lost checks from the microfilm record. Best of all, these will be complete copies showing both face and back of each check."

Several months ago, Gidney recalled, a shipment of 3906 checks with a face value of \$554,304 was lost between Cleveland and Akron. So far, all but 45 of these checks

have been traced and honored by the banks which last endorsed them. But the job of tracing them required 1000 work hours and a cost of \$2100.

Microfilming of checks eliminates this loss of time and money. The exposed and processed film is simply sent to the local Recordak processing laboratory and facsimile prints made of both sides of every check—a service the Federal Reserve Bank renders without charge to the member banks.

McCarthy invented modern microfilming in 1928 when he was a bank official in New York. Banks at that time had difficulty protecting themselves against fraud since all canceled checks were returned to the customers. Constantly faced with this problem he conceived the idea of photographing checks.

His first machine was patented and ordered by several New York

(Continued on Page 4)

## Fire Away, Folks! Big Contest's Open

Yes, folks, the big summer contest is on—the KODAKERY Photographic Awards, that is!

The amateur photographers are going to come into their own in this contest for they will be in one class and the advanced photographers in another.

Duplicate awards will be made in each class with a total of \$200 to be earned by the winners. First award in each of the classes will be \$25, with \$15 for second, \$10 for third and 10 of \$5 each.

Snap your pictures now and send in the prints as soon as possible. Be sure to mark on the back your name, address, plant, department and especially the class in which the print is entered—amateur or advanced.

All Kodak people and members of their immediate families, except members of the KODAKERY staff, are eligible.

## EK Plates Picture Atomic Fission

In pace with the Atomic Age, Kodak has announced special new "nuclear track" plates—supersensitive to electrical charges carried by atomic particles—for use in nuclear physics research.

By using the plates, scientists can picture actual atomic fission and study the action of highly charged nuclear particles.

#### Four Kinds of Plates

There are four types of plates—one for recording tracks of alpha particles; one for high-energy alpha particles and protons; another for recording fission on individual atoms, and one having an emulsion impregnated with an element such as lithium or uranium.

When a highly charged particle speeds into the emulsion, a dotted line of affected silver grains is produced. When the plate is developed the track is identifiable. From the length and curvature of the track and the grain-spacing along it, in-

formation is obtained as to the particle's speed, energy and other characteristics. It is also possible to determine if the particle is a proton, alpha particle or heavily

charged nucleus.

Actual fission was recorded when one of the plates, first bathed in uranium nitrate, was exposed to slow neutrons from a radium-beryllium source. A neutron, striking a uranium atom in the emulsion, brought about the fission which was recorded on the plate as the track of two new atoms. (See picture.)

#### Trace Particles

The new plates are designed to record tracks of individual nuclear particles, rather than to record density due to over-all exposure to radioactivity.

Nuclear track plates are continuously sensitive and can record permanently isolated acts of particles over a period of time and provide for recording of a great deal of scientific data with simple, inexpensive equipment.

Here's the birth of an atom. White streak marks splitting of uranium atom on a new Kodak fission plate.

**Student of the Stars**—Dr. Bart J. Bok, left, director of Harvard University's observatories, examines the reciprocity sensitometer in the Park's Physics Lab with the aid of Dr. Robert N. Wolfe, KP physicist. With the instrument it is possible to produce a range of exposure times and intensities.

## Photos Widen Horizons In Astronomy Studies

Photography is playing an increasingly important part in astronomical research, according to Dr. Bart J. Bok, assistant director of observatories at Harvard University, who paid a recent visit to Kodak Park's Research Laboratories.

By using special coated plates, the astronomer can more effectively carry out observations in different regions of the sky, he said, adding that he is at present actively engaged in studying the brightness and color of stars in globular clusters.

On a vacation from Harvard which will take him across the country, he plans to visit approximately 20 observatories in various parts of the United States, culminating in a trip to the Mt. Wilson sky laboratory. At Kodak Park he studied the latest developments in photographic materials. Dr. Bok also will visit other industries to

observe advances in optical and other precision instruments.

A graduate of the University of Leyden in Holland, he joined the Harvard faculty in 1929.

## Glasses Save Man's Sight

Does it pay to wear safety glasses at work? You can get a definite answer to this question from Harland Kornbau, F.D. 6, Kodak Park.

Harland was among those who recently attended a showing of "Your Richest Gift," a movie pointing out the value of eye protection in industry.

It must be a convincing picture, for Harland, after seeing it through, was reminded that his own glasses still were in the locker and had been for several weeks. He felt better after putting them on before returning to his duties in Bldg. 65. Later, while engaged in a canvas stripping operation, a piece of the stripping snapped back and struck him directly across the eyes. The force of the blow broke his goggle frames and he suffered minor cuts above and below the eyes but the eyes themselves were uninjured.

"Take it from me, safety glasses are no good unless they're worn," he said. "I intend to make full-time use of mine from now on."

**Harland Kornbau**  
... he learned a safety lesson

## Eating Habits Differ Here, Swiss Claims

The eating habits of Americans, while they are developed to a high degree, still lack the finality of their European cousins. That's the sage observation made by Marcel Wrambrodt of the Park's Cafeteria who came to America from his native Switzerland.

"Over there the people eat whatever is on the menu. In America they are extremely critical of the cooking and frequently ask for something not on the menu," the newcomer to the U.S. said.

The 24-year-old Swiss lad was a chef at Sursum Sanatorium in Davos-Platz, a hospital in the Swiss Alps, where he served throughout World War II. He is now in this country through the personal efforts of a Rochesterian, Howard D. Curtis, whom he befriended during the war.

### Aided to Border

Curtis, an Eighth Army officer, was shot down by German airmen and interned in Switzerland. With the aid of Marcel, who risked a stiff jail sentence for abetting a prisoner's escape, he was outfitted with civilian clothing, a bicycle, and later accompanied to the French border. Several times they were almost caught, saved only by Marcel's ability to speak French.

When he returned to the United States after the war, Curtis remembered his benefactor and decided to bring him to this country to live. After negotiating with the immigration authorities for more than two years, he was able to effect his transfer to the U.S.A. Although his parents are dead, he has a brother living near Berne.

**Marcel Wrambrodt**  
... discusses eating habits

## Bond Drive Set for July

A nationwide campaign for U.S. Savings Bond buying is being sponsored this month by the U. S. Treasury Department and Kodak is cooperating by offering its people an opportunity to participate.

During the campaign Kodak folks may increase their payroll deductions for bond purchases, they may open new accounts or buy the bonds outright.

Although there will be no individual solicitations, Kodak Office and Camera Works men and women may go to the Eastman Savings and Loan Association's main office, and for Kodak Park folks the facilities of the Savings and Loan branch are offered. Hawk-Eye people wishing to participate may see Harley Smith in the Industrial Relations Dept.

The slogan for the Treasury Department's latest campaign is "Ee'e's and Security," with emphasis on payroll purchases of bonds.

### Photo Patter

## You Can Get Swell Shots From the Sky on July 4

**Sky Spectacle**—Shooting pictures of Fourth of July fireworks displays like the one shown above is surprisingly easy. All you need is a camera having time exposure elements. Set it on a solid foundation, such as a tripod, and fire away.

It used to be, 15 years or so back, that the Fourth of July was celebrated by the booming of cannon crackers, the loud, explosive bursts of "torpedoes." The kids were out of bed by seven and on the street, their cap pistols popping.

Today, however, many localities have banned such activities. A "safe and sane" Fourth is the rule. Fireworks have become a community affair, generally consisting of lavish displays of skyrockets, Roman candles or pinwheels sometime after dark.

Such pyrotechnics offer a wonderful opportunity for your camera—a chance to make pictures of startling beauty with a maximum of ease. For snapshots of fireworks at night are among the simplest types of pictures to take and can be made with any camera which permits time exposures.

Probably the best way of picturing fireworks overhead is to use a tripod or some other sturdy support for your camera. However, this is not essential. All that is absolutely necessary is to set your camera on "time," point it at the portion of sky where the rockets or bombs are bursting, and open your shutter. Since the black sky will not affect your film, the shutter may be left open—or closed

and reopened if desired—to catch a number of successive bursts on the same piece of film.

Today's picture, for example, was made in this way—using a time exposure with a lens aperture of f/8. Here, since the flood-lit buildings were included, it was necessary to gauge the length of exposure to be sure the buildings would be visible in the print. But where all that's being shown in a picture is the bursts of fireworks themselves—the tracery and patterns of lights against the sky—exposure is less critical.

### Jim Christy Named By Advertisers' Group

Jim Christy of KO Advertising was elected a director of the National Industrial Advertisers' Association at the group's silver anniversary conference in Milwaukee which ended June 18.

Just prior to the convention, he had been named president of the local chapter.

"F 4.5 at 1/250th!"

(T. M. Reg. U.S. Pat. Office)

Test your knowledge with the questions below. Grade 10 for each question. If you score 60 you're "super"; 50—you are still remarkable; 40—not bad at all; 30—time to brush up!

(Answers on Page 4)

- What is Platinol?  
(a) Platinum coating for expensive camera parts  
(b) A Kodak enlarging paper  
(c) A plating process used on Kodascopes
- If you are using Plus-X film to take a picture of near-by people at the beach in bright sunlight and with a clear sky, what is the normal exposure?  
(a) 1/100 second at f/16  
(b) 1/25 second at f/8  
(c) 1/50 second at f/16
- What is a fixed focus camera?  
(a) One with the lens set permanently to focus at the best average distance  
(b) One with an f/4.5 lens  
(c) A folding camera
- Are beaded screens suitable as reflectors for taking informal home portraits?  
(a) Yes  
(b) No
- What is the weight of the Kodak Reflex without carrying case, lens cap or flash attachment?  
2 pounds    4 pounds    6 pounds
- Approximately how many have signed up for the KPAA Boys' Softball Program this year?  
600    900    1300    2000

## 2 Men Celebrate 40th Year, 19 to Observe 25th Milestone

Two 40-year men head a long list of Kodak Parkers who will observe important service anniversaries during July.

They are Thomas H. Quigley, Film Storage, and John J. Duffy, Roll Coating.

Nineteen people will qualify for membership in the Pioneers' Club by virtue of completing 25 years with the Company. They are John S. Denham, P.S. Emulsion; Frank H. Bartran, F.D. 1; Clyde Burchard, Film Storage; Berlyn M. Werley, E&M; Leland S. Whitcomb, Accounting; Wayne M. Wall, Wage and Salary Administration; Chester M. Vogt, P. S. Ctg.; Frank E. Leising, Laundry; Albert J. Alliet, Box; Charles H. Steele, Purchasing; George G. Duryea, Paper Mill; John P. Farrell, Testing; Peter Hogan, Baryta; Helen Schairer, Management Office; Stanley J. Coe, Garage; James P. McKenna, Machine Shop; Edward Copenhagen, F.D. 3; Earold C. Jewett, Mfg. Experiments, and Percy H. Stevens, E&M.

**Keep Old Zip**—John Duffy, left, Roll Coating, and Tom Quigley, Film Storage, who will complete 40 years with Kodak this month, pose on the shuffleboard court in Bldg. 28 at the Park.

## Park Man Dies

Edward Drexel, Machine Shop, died Saturday, June 21. He started at the Park in March 1936 in the Machine Shop. He had been out ill since June 9.

## Filipino Wins New Honors, Seeks Doctorate at Harvard

Scholastic attainments come easy to Alfredo P. Catedral of the Park's Ciné Processing Dept.

Adding to his other laurels, the young Filipino, who received his master's degree in education at the University of Rochester commencement on June 16, has been given a scholarship for doctorate study at Harvard University. It was granted by the American Baptist Foreign Mission Society.

Alfredo Catedral

Catedral already holds a Bachelor of Science in Education degree from Northeast Missouri State Teachers College, a Master of Arts degree from the University of Missouri, and a Bachelor of Divinity degree from Colgate - Rochester Divinity School.

In 1937 he returned to the Philippines to become dean of the School of Theology of Central Philippine College, a Baptist mission college. The school was destroyed during the war but following its restoration in 1945 he was made director of the college department. He will attend Harvard in the fall and upon completion of his studies plans to return to his native land.

## Park's Railroad Pushes Westward To Open Up New Lands for Future

Kodak Park's growing railroad system added another link on June 23 when official ceremonies, marked by the driving of a "gold" spike, celebrated completion of a new one-mile section of track at Kodak West.

The addition to the rail service makes available approximately 160 acres of Kodak Park property for future development and increases the total length of its track to 11½ miles. Forty-four acres of this new area have been leased to DPI for expansion in their program of manufacturing vitamin concentrates. Half of the new one-mile railroad was installed on DPI property to be used to deliver manufacturing materials to their new plant.

### Underpass Built

Several difficulties were encountered by the engineers who labored on the project. To begin with, a bridge had to be built on Mt. Read Boulevard to permit the tracks to go under the highway. Then, because the track level is 25 feet below the ground grade, close to 75,000 cubic yards of earth had to be moved. Heavy spring rains made a morass of the excavation and sewers had to be installed to remove water from the subway.

The first New York Central connection to the Park from its Charlotte branch was installed at the Ridge Road gate in 1907. Plant expansion, west of Dewey Avenue, brought about another direct connection with the New York Central in 1919. In 1922, the development of KPX brought about a junction with the Baltimore and Ohio Railroad. It is interesting to note that every expansion of the Park's railroad system has entailed the construction of a new bridge and subway.

### Those in Charge

Under the supervision of Harry W. Eustance, civil engineer, Elwood Dobbs, project engineer, designed the track layouts for KPM and DPI, while Albert E. Medland, assistant engineer, supervised installation of tracks. Bill Perkins, Yard Dept. foreman and KP railroad chief, Bill Southcott and Harry Sparreboom, also of the Yard, handled other problems.

**The Last Spike**—It was quite a ceremony the other day when the last spike—of "gold"—was driven in the new mile section of railroad track at Kodak West. E. D. Dobbs, assistant engineer, welds the hammer on the spike held by Bill Perkins, Yard Dept. foreman. Others standing in front of the engine, from left, are A. R. Eckberg, general superintendent of Eng. and Maint.; H. W. Eustance, civil engineer; C. H. Brown, general superintendent of Service Depts.; Bill Southcott, Yard Dept. foreman; E. W. Davis, assistant superintendent of the Yard Dept.; A. E. Medland, assistant engineer, and Harry Sparreboom, Yard Dept. On the engine, from left, James Powers, J. D. Saunders, Yardmaster Ed Green and Arthur Breach, all of the Yard Dept.

## Here's Good Tip On Lost, Found Articles

If you have any lost or found articles to report, you may save time by going first to the Cashier's Office in Bldg. 26 and not to the KODAKERY Office in Bldg. 28. This service is now concentrated in one area for the convenience of Park people who may identify and reclaim lost articles or turn them in for future disposal.

Those who wish to advertise lost and found items are invited to make use of the classified ad columns in KODAKERY.

## It's a Joke, Son!

Two privates paused to puzzle over a dead animal.

"It has two stripes," said one private.

"That settles it," said the other private. "It's either a corporal or a skunk."

She: "Don't you think that clever men make excellent husbands?"

He: "My dear, clever men don't become husbands."

DAFFYNITION: Blotter—Something you look for while the ink dries.

## It's in the Park: Coast-to-Coast in Bantam Car . . . Cardboard 'Cake' Feast for Folks in Britain . . . 40-Year Fete for Ida

**WALTER GRUNST**, Roll Coating, attended the recent state convention of the Military Order of the Purple Heart in Troy, N.Y. . . . Girls of the 6th floor, Printing Dept., entertained

**Virginia Tomkiewicz** at dinner recently before she left the Company to take up domestic duties. . . . **Charles Hanley**, Export Billing, is recuperating after a recent operation. . . . Spirited activity featured the annual picnic of the X-ray Sheet Film Dept., in Thursam's Grove, June 21. While Inspection and Wrapping took the ball games, "Rit" Rittenhouse copped top honors in the shoe race. Other field events winners were **Virginia Doane**, Al Little, **Bob Walters**, **Harold King**, **Alice Vragel**, **Fred Salt**, **Grace Tell**, **Ruth Calitree**, **Leroy Wilson** and "Herb" **Bieber**. . . . **Helen Sass**, Machine Shop, was tendered an informal party in her department recently when her associates presented her with a radio and silver candlesticks, as well as a handsome cake. Helen, who married **Warren Ayers**, Bldg. 30, two weeks ago, is now on her wedding trip. . . . **Arthur "Whitey" Arnold**, Roll Coating, who recently completed 25 years with Kodak, has fully recovered after his operation. He expects to return soon. . . . **Lloyd Hubbard**, Bldg. 49, was a member of the cast which presented "January Thaw" at the opening of the Pittsford Summer Theater June 26.

At the annual meeting of the Keystone District of the Otetiana Council of the Boy Scouts of

America, **Henry Parker**, Safety, was elected vice-chairman. He first was associated with the advisory board on the health and safety committee. . . . **Ingwald Olson**, Roll Coating Development Div., who was married on June 21 in Bethesda, Md., was feted by his associates at a stag dinner held at Nine Mile Point Hotel June 17. . . . **Katherine Smith**, Kodascope Dept., left by plane on June 13 for a visit to England and Scotland.

Helen Sass Ayers cuts her cake.

. . . **Stanley Schieven** and **Robert Tetamore**, junior draftsmen in the Engineering Dept., Bldg. 23, recently received diplomas from the Rochester Institute of Technology in Industrial Equipment Design. They are the first postwar graduates of this course which is required in co-ordination with the Park's Drafting training program. . . . **Stuart Silver**, Bldg. 30, who married **Jean Hayes** of Ciné Processing recently, is a student at the Baptist Seminary in Louisville, Ky. He is the son of **Earl Silver**, Messenger Service. . . . **Matt Little**, Ridge Construction, has received a card from **George Cooper**, Draft-

ing, and **Wally Taylor**, F.D. 2, who recently motored to California in a new Crosley Bantam. The boys report a fine trip all the way. . . . Members of the Kodascope Dept. held a steak roast at Durand-Eastman Park on June 17. Close to 50 persons attended the event featured by a baseball game. . . . **Horace Smith**, former personnel supervisor of the Roll Coating Dept., who recently left the Company because of ill health, has been visited by several of his former associates in recent weeks. . . . Friday the 13th held its jinx over three members of the Wood Cellulose team in the West Kodak Noon-Hour loop recently. Getting the bumps in a rough fray were **John Rosequist**, **Alex Walker** and **Harvey Butts**.

**Joe Orlando**, Machine Shop, likes birthdays but is willing to skip the cake. When, on June 7, his associates honored him by presenting him with a fancy work of art, it didn't mean a thing to his appetite. It seems that the "cake" had a cardboard base and was heavily frosted with a lather of soap flakes. **Darrow Potts** "baked" the specialty. . . . **James Martin**, who recently retired from the Roll Coating Dept., is planning a trip to his old home in England. Aware of the food shortage in the British Isles, Jim is taking about 300 pounds of supplies with him, including two canned hams which

will be the main course at a grand reunion of friends and relatives. He plans to fly back to the States in the fall. . . . Recent brides in the X-ray Sheet Film Dept. were **Doris Merchant** and **Betty Herr**. Both received gifts from their associates. . . . **Dr. Max Herzberger**, Research Laboratories, was named recently to the governing board of the Rochester Chess and Checker Club. . . . More than 150 active and retired members of the Box Dept. assembled at the Melody Lane on June 24 to pay their respects to **Ida Delles** who recently completed 40 years of service with the Company. Entertainment was furnished by talent from the Dept. . . . We hear that **Harold Dunk**, Machine Shop, has lost faith in automobiles. After pointing out the excellent mileage which he has been getting in his car, he was seen being pushed to a gas station on June 20. . . . Round and square dancing featured the dinner party of the Organic Research Laboratory, Bldg. 59, at Ridgmont Golf Club on June 20. Favors for each of the ladies included a corsage of gardenias and a pair of earrings. Serving on the committee in charge of the affair were **Delbert Reynolds**, **John Van Campen**, **Thomas Laakso** and **Pat McGee**. **Dr. William Kenyon**, assistant superintendent of the Organic Research Lab, gave a short talk during which he introduced several new members in the department.

**Get Dietitians' Diplomas**—C. F. Hutchison, KP executive, presents diplomas to the eight graduates of Kodak's Dietitian Training Program as Wintress Murray, second from left, Kodak nutrition adviser, watches. Members of class, left to right: Marjorie Blackwood, of Woodbury, N.J.; Gloria Kelly, Burlington, Iowa; Helen Ryan, Rochester, N.Y.; Marie Vouaux, Milford, Pa.; Joan Livesay, Waynesboro, Va.; Eileen Kunc, Lenora, Okla.; Jane Decker, Walden, N.Y., and Geraldine Gowen, North Loup, Neb. Joan and Jane are joining KP's dietetic staff; Helen will do vacation relief work in Kodak's cafeterias and Medical Department.

## 60 Recordaks Go to Banks

(Continued from Page 1)

banks. About that time, Kodak became interested and formed the subsidiary organization, Recordak Corp., with McCarthy, to promote the full possibilities of microfilming.

"The new duplex machine," McCarthy said, "is a culmination of dreams I have had for years, and to see its first installation in the Fourth District of the Federal Reserve System is a gratifying climax to many years devoted to its invention and development."

### Pre-war Project

"We were working on this machine before the war, and only now are able to offer it to the public. This marks a new period in Recordak history and is a fitting contribution to banking and other fields as we begin our 20th year of business."

As demonstrated, the unique machine photographs both sides of documents at the same time and as fast as a clerk can insert them. Two mirrors reflect both sides of the check to a third mirror which reflects them into the camera lens.

The machine will also endorse the checks as they leave the machine, saving an extra job in most banks. The endorser is designed on an entirely new principle. Known as the "roving" type, it moves from side to side and endorses each succeeding check in a different location. Indistinct impressions caused by overlapping endorsements are thereby reduced. This "Duplex Recordak" also

(Questions on Page 2)

1. Platino is a fast enlarging paper made by Kodak.
2. When using Plus-X film to take a picture of near-by people at the beach in bright sunlight with a clear sky, the normal exposure should be 1/50 second at f/16.
3. A fixed focus camera is one with a lens fixed permanently to focus at the best average distance. This usually is from 15 to 20 feet, but everything from 8 feet to infinity is kept reasonably sharp. Box cameras are examples.
4. No. Beaded screens, normally used for motion picture and slide projection, are not suitable as reflectors because they reflect most of the light back toward the light source.
5. The Kodak Reflex, minus lens cap, carrying case and flash attachment, weighs 2 pounds.
6. More than 2000 have signed up for the 1947 KPAA Boys' Softball Program.

stamps the face of the check, a proof that it has been photographed. This saves photographing a second time should stacks of checks, already recorded, get mislaid. It also proves to the out-of-town bank that these checks were recorded on film by the Federal Reserve Bank in Cleveland.

## EK Graduates 8 Dietitians

Many positions are open to the eight students graduated yesterday from Kodak's Dietitian Training Program.

The numerous positions offered the graduates, showing the critical shortage in skilled dietitians, were cited by Wintress Murray, Kodak nutrition adviser and supervisor of the course, at the graduation exercises held in the KO Girls' Lounge. She is national co-chairman of a recruiting program for the American Dietetic Association.

The girls who were awarded their American Dietetic Association pins at the ceremony were the first to complete the year's course at Kodak. Prior to this, 18 had finished 10-month dietetic internships.

C. F. Hutchison, KP, comptroller of film and plate emulsion for the U.S. and Canada and member of the U. of R. board of trustees, presented the girls with diplomas from the Company. In addressing them he pointed out that they "are faced both with opportunity and challenge in a world that is increasingly alert to the part played by sound nutrition in mental and physical health."

Marjorie Blackwood responded for the graduates.

On July 11 a new class of eight girls will begin studying at the Company's local plants and DPI.

## Rent Control Bill Signed by Truman

(Continued from Page 1)

board for this area undoubtedly will be published when they are appointed.

These boards will have considerable power in the matter of the application of the law in unusual cases. Should questions arise as to the proper application of the law in any case, it is suggested the local board be consulted.

## Lab Girl Calls Alcatraz 'Home,' Finds Life Beside Prison Walls Restricted but Still Pleasant

Home to Pauline Wheeler of the San Francisco Laboratory is on Alcatraz, where she is a respected resident of one of the most publicized islands in the world.

There, Pauline lives in comparative quiet in the shadows of the grim walls that imprison the country's hardened criminals whose exploits have been emblazoned across the front pages of the nation's newspapers.

Her husband, Jerry, is a guard or correctional officer on "The Rock," and with their four-month-old child, the Wheelers have been residing there for six weeks. They are members of a community of men, women and children whose lives do not differ much from families in any rural area, she says.

Some restrictions govern the lives of these folks among the U.S. Federal Penal personnel on Alcatraz. But Pauline, who is a typist at the San Francisco Lab, finds many phases of life among these 70 families on "The Rock" most interesting.

She commutes to the mainland on a government boat which makes round trips on a two-hour schedule. She is allowed personal visitors, four or five at a time, and such guests are also afforded transportation by the government boats. On arrival the boats are met by buses, which deliver the guests to the home of their hosts, and on occasion take them on tours of the grounds surrounding the prison. The grounds themselves are landscaped and form gardens for the residents; permission can be obtained from prison authorities to cut flowers for the homes when special occasions warrant.

Living conditions, Pauline has discovered, are far more favorable

economically than on the mainland. All the necessities of life can be obtained from the government store at cost; milk and laundry are delivered daily by prisoners assigned to deliveries, who are escorted at all times by fully armed guards. Garbage, too, is collected by the inmates, but the housewife is forbidden to use newspapers for disposal or to place any newspapers or printed matter in the disposal units. Newspapers are strictly prohibited for the inmates.

### Recreational Facilities

Food and water are brought to the island by boat, but there is a strongly-enforced regulation against the possession or use of any alcoholic beverages. Recreational facilities, including tennis courts, children's playgrounds, pool tables and a bowling alley, to mention a few, are provided, but the companionship of pets of any description is positively "taboo." Movies, when available, are shown inside the prison proper, but the penal personnel sees them separately.

Families of the men employed at the prison are never, under any circumstances, allowed to speak to the inmates, not even to the trustees who make their daily deliveries of laundry and milk. At least, says Pauline, that does away with an argument with the milkman or laundryman, but it also rules out the usual friendly "good morning." Even a nod of recognition is against regulations.

Pauline frequently has noticed, however, that prisoners will gaze for a long time at children playing around their homes, and on several occasions she has seen them stop to smile at her four-month-old baby taking his sun bath on the lawn.

Pauline Wheeler

**They Know Color**—These five Kodakers, shown above with one of their teachers, today completed a five-week concentrated course on fundamentals of light and color, color photography, color sensitometry and color colorimetry. From left are Ed White, of the New York Office of the Motion Picture Film Dept.; Don Ritchie, Canadian Kodak; Norwood Simmons, of the Hollywood Office of the Motion Picture Film Dept.; Teacher Bob Morris of the Photographic Training Dept.; Don Spring, Canadian Kodak, and Ed Warncke, New York Office of the Motion Picture Film Dept.

## It's Really a Small World

Just how small the world is was proved in Pittsford recently. A South American couple, Dr. and Mrs. Miguel Mosqueira, stopped at a tourist house in the small town. When the landlady learned their home was in Argentina, she asked Mrs. Mosqueira to phone her neighbor three doors away. "He's a fellow countryman of yours," she said.

Axel Hornos' phone rang at 10 p.m. The couples met—only to find that Axel and Mrs. Mosqueira had been introduced once before. She had become associated with an advertising agency in Buenos Aires just as Axel was leaving it to join Kodak's Advertising Dept. in Rochester.

Mrs. Mosqueira then recalled she had met another Kodaker, one

Armin Baltzer, on a plane flying over the Andes from Buenos Aires to Chile.

Hornos told the couple they could meet Baltzer the next day by coming to KO's Export Dept.

The following morning, Baltzer had just missed his regular bus and was waiting for another near his Pittsford home when he heard a car slow down, a voice call, "Mr. Baltzer; aren't you Mr. Baltzer?" Mrs. Mosqueira had spotted him on the street and brought him to the Office where they also had a reunion.

**Bound for Banks**—Sixty "Duplex Recordaks" have been shipped by Hawk-Eye for use in Cleveland, Cincinnati and Pittsburgh Federal Reserve Banks. The new microfilming machines photograph the front and back of bank checks simultaneously. In the above photo, taken at H-E as one shipment was being loaded, from left: Jack O'Dea, Frank Sciaratta, Mike LiMuti and Ray Mikel. The machines are designed and produced at H-E.

# AS A MEASURE FOR HEALTH...

## For Beauty

Leafy green and yellow vegetables help most to give that beautiful, smooth complexion you're looking for. Have one or more servings a day.

## For Sound Teeth

Strong bones and sound teeth are owed to milk and milk products. You need a pint of milk a day or its equivalent in cheese or ice cream servings.

## For Cold Prevention

Citrus fruits or tomatoes are the best armor you could have for fighting off colds. Have at least one serving daily. Lots more if you feel cold symptoms.

## For Plenty of Pep

Activity energy comes from potatoes and similar vegetables and fruits. There's a long list of them and no excuse for lack of energy because of lack of them!

## For Steady Nerves

Be ready to handle things as they come; fight that tired feeling, and don't be over-ready to "fly off the handle." Bread and cereals are the answer.

## For Strong Muscles

Meat, eggs, fish and poultry are what build up those muscles, whatever your age. You need two generous servings a day. Dried peas, beans may substitute.

## For Sharp Vision

What's more important than good eyesight, whether working or playing? Butter and margarine are best aids to better vision.

# EAT A SQUARE LUNCH

**Y**OU'VE heard about "the American Way—Three Squares A Day"—but how "square" is each of YOUR three daily meals? Take your lunch, for instance. Sure its edges aren't rounded?

There's a reason for eating lunch, you know: your body needs the nourishment due it after four or five hours of activity. You can tell this easily—you're probably plenty hungry, come noontime!

There's no point to wasting your lunch hour, though, by just "grabbing" a sandwich and a cup of coffee. In the first place, you'll be hungry in a couple of hours; and in the second place, you haven't eaten enough healthful foods.

You know what these necessary foods are, and for convenience' sake, we've illustrated above what

they'll do for you. Actually, they're the famous "Basic Seven," the food elements essential to the body DAILY for best health and least sickness. If you're as careful about what goes on inside you as you are about the clothes you wear, you already make it a point to include something from each food group every day. You wouldn't start on a hike with one shoe on, one shoe off—so don't travel through a day minus one of the equally important nourishment essentials your system is calling for.

There's an old adage—"We are what we eat." If you're eating poorly balanced meals, that may well be the reason you're not feeling up to par.

Food serves three main purposes:

1. Provides energy and heat so we can live, work, play.
2. Builds, maintains bones, teeth; repairs body cells.
3. Regulates life functions and keeps the body machine running smoothly.

Different types of food substances work together in accomplishing these purposes. You've heard about them often: PROTEIN, which builds and repairs tissues; MINERALS, which play a vital part in building bones, teeth, blood,

muscles, organs and tissues, as well as acting as body regulators in affecting heart, muscle, nerves and cell activities. VITAMINS, minute chemical substances, take part in maintaining normal growth, health and reproduction.

All foods are ENERGY GIVERS, but concentrated carbohydrates (cereals, breads and sweets) and fats (butter, margarine, oils, meat fats and shortening) give us more energy than others. The amount of energy foods needed daily depends on the kind and amount of work and play you have each day. These foods should be eaten daily—but in moderation. If your exercise does not use them up, you'll gain weight! Remember, medical and nutri-

tion authorities insist that for best "performance" of your body machine, you should eat one-third of your day's food at breakfast, one-third at lunch and one-third at dinner. Concentrate on your lunches—for your health's sake, make a conscious effort to select from the menu at noon a meal which helps as well as fills!

Packed lunches can be a pleasant surprise if you follow the Basic Seven Food Groups. Instead of the same old routine, plan to pack a variety of sandwiches (meat, fish, cheese, poultry or eggs), a raw vegetable, fruit (either raw or canned, packed in paper cups), milk, and some extra-special delicacy each day.

## Women About Kodak

# 'I Love a Parade'... Leading a Band, Says Kodak Office Drum Majorette

CARTWHEELS, backbends—these are some of the feats which Alice Merry, KO Circulation, performs as she wields her drum majorette's baton in parades. Her baton also does acrobatics

**Majorette Struts** — Alice Merry, right, is ready to lead Albion's American Legion Post Band in any parade. The costume she wears was made by Bobbie Jones, left, also of KO Circulation, and Bobbie's mother.

in her fingers. It will twirl a neat figure eight, and when it goes up in the air it lands in her hands to the beat of the music behind her.

She's usually found at the head of Albion's American Legion Post Band. The other night she led the band in the parade to open the Firemen's Carnival in her hometown. She's to lead them again in the firemen's parade in Brockport and neighboring towns. Her big hope is to lead the band in the American Legion parade in New York this fall.

Alice has been twirling the baton since she first joined her high school's band.

Her newest costume, white satin with gold trim, a high hat with fluffy white pom-pom, and puttees were all made for her. Bobbie Jones, also of KO Circulation, and her mother designed and sewed the outfit.

Several of her department friends drove to Albion the night of the parade to watch Alice.

Grace Mann, Ruth Kirk, Bobbie Jones, Shirley Smith, Theda Rittwage, Kay Keane, Betty Starkweather, Helen LeBacon and Marge Beahon made up the KO group.

Visiting national parks is on the summer schedule of Emma Schaefer, Dept. 63 (Myles), and Gertie Roth, Dept. 63 (Geiger). For two years the scenery of the national parks has attracted the Camera Works girls to hike and camp in the great out of doors. They have visited Smoky Mountain National Park in Tennessee and Isle Royal

Gertie Roth, left, and Emma Schaefer

Park, an island in Lake Superior.

On July 4 this pair of tourists, accompanied by another girl, will start on their annual auto trip "out West." Cities do not appeal to the girls so they will avoid them as much as possible in traveling the Northern Route to reach their first goal, Yosemite National Park in California. After seeing the wonders of Yosemite, they will continue to Sequoia National Park and then on to the Grand Canyon of Arizona where, by mule pack, they will proceed to the bottom of the canyon to spend several days.

Emma Marra, who entered military service in 1943 from Hawk-Eye's Dept. 70, has returned to the St. Paul Street plant after more than three years' service with the WACs.

She went through her basic training at Ft. Devens, Mass., and was given further specialized training at the United Radio Television Institute in Newark, N.J. She was later transferred to Hobbs Army Air Field, N. Mex., where she remained for close to two years as an instrument flying training instructor.

When the airbase in New Mexico was deactivated in October, 1945, Emma was transferred to Kelly Field, Texas, where she remained for the balance of her time in the service. She has been back at Hawk-Eye since April and is attached to Dept. 82.

Father: "The man who marries my daughter gets a prize."

Private: "May I see it, please!"

## Betty Earns B. A. Back from WAC

A college diploma was awarded a KO girl at the June exercises of the U. of R. She's Betty Vrla, an economics major.

Betty had spent two years in KO Tabulating when she decided she wanted a college education.

She began at the U. of R. four years ago, carried a full schedule, worked at KO three afternoons a week during the winter and full time all summer. Besides this, she was active in the university's Spanish, Glee and Newman Clubs.

Just before graduation she took a trip to New York with several classmates to celebrate. Now she's back at KO again full time with that hard-earned diploma.

Betty Vrla

"Lo, Fred. Fishin'?"

"Naw, drownin' worms."

## Snared . . . Paired . . . Heired

### Engagements . . .

**KODAK PARK**  
Myrtle Smith, KPAA Office, to William Ellsworth, Ridge Construction.  
Fern Stier, Mfg. Expts., to Robert Proctor.  
Mary Finucan, Roll Film Slitting, to Ray Almsworth.  
Betty Lou Dawes, Roll Film Slitting, to George Koehler, Emulsion Melting.

**CAMERA WORKS**  
Anna Stahl, Dept. 45, to Alfred Lidfeldt.  
Mary Anne Moran, Dept. 16 (NOD), to Richard Lanpher.  
Theresa Procopio, Dept. 63, to Sam Russo.  
Dorothy Dunham, Dept. 65, to Roy Nixon.  
Dept. 10, to Anne Achilles.  
Dept. 14 (Bldg. J), to Albert Turchetti.  
Ann Abel, Dept. 76, to Ken Ernisse.  
Helen Podslady, Dept. 51, to Joseph Wantke.

**HAWK-EYE**  
Gloria Socia, Dept. 47, to Robert Masten, Dept. 29.  
Jane Roth, Dept. 22, to Irving Wellert, Camera Works.  
Florence Shinkus, Dept. 25, to Robert Benzon.  
Helen Brennan, Dept. 61, to Harold O'Connell.

**KODAK OFFICE**  
Marion Higgins, Rochester Branch Order, to William Fullam.  
Jane Naylon, Rochester Branch Order, to Art Miller.  
Helen Mandell, Editorial Service Bureau, to Lyle Kirkmire.

### Marriages . . .

**KODAK PARK**  
Clara Brown, Wage Calculation, to Victor E. Wilkins.  
Edna Lestort, Time Office, to Louis Ruggeri.  
Florence Bacon, Time Office, to Fred Herman.  
Doris Handike, Payroll Prep., to Robert Mackey.  
Florence Rosenbaum, Wage Calculation, to Marvin Friedman.  
Jean Hayes, Cine-Kodak Processing, to Stuart Silver, Bldg. 30.  
Christine Beckwith, Sheet Film Packing, to William Schultes.  
Jean Tougher, to Frederick Montcrieff, Mfg. Expts.  
Fay Hazelwood, Bldg. 23, to Ingwald Olson, Roll Coating Development.

**CAMERA WORKS**  
Florence Turchetti to Al Morabito, Dept. 63.  
Peggy Leary, Dept. 72, to Raymond Owen.  
Sara Wollinski, Dept. 83 (NOD), to Charles Pollito, Dept. 2 (NOD).  
Estelle Romanyshyn, Dept. 14 (Bldg. J), to Dan Shurgot.  
Betty Thomas, Dept. 83 (NOD), to Joseph Nuzzo.  
Shirley Bedford, Dept. 91 (NOD), to Gerald Mattys, Dept. 44.  
Jane Heeg, Dept. 63, to Don Swarthout, Dept. 66.  
Wilma Yagnow, Dept. 63, to Frank Long, Kodak Park.  
Jane Hockenbury, Dept. 95, to Milton Miller.  
Margaret Greene

to Ed Kindig, Dept. 60. . . Bernece May Hayes to Clayton Arnold, Dept. 60.

**KODAK OFFICE**  
Phyllis Brightman, Film Processing Service, to Carl Rote, Kodak Park.  
Lillian Simpson, Mail and File, to Bud Solbert.  
Barbara Frost, Finishing, to Sammy Steinberg.  
Virginia Drews, Tabulating, to Arthur Tadio.  
Margaret Phelan, Tabulating, to Robert Pearson.  
Betty McDonald, Sales, to Charles Heinrich.  
Shirley Mae Mitchell to Alan Lloyd, Rochester Branch Stock Sec.  
Betty Drain, Record Room, to Francis Webster.

### Births . . .

**KODAK PARK**  
Mr. and Mrs. Alphonse Causyn, a son.  
Mr. and Mrs. Clarence Holtz, a daughter.  
Mr. and Mrs. Tim Mulcahy, a daughter.

**HAWK-EYE**  
Mr. and Mrs. Walter Plecinski, a daughter.

**CAMERA WORKS**  
Mr. and Mrs. George Parker, a daughter.  
Mr. and Mrs. Louis Bauer, a daughter.  
Mr. and Mrs. Joseph Duncan, a daughter.  
Mr. and Mrs. Ernest Schramm, a son.  
Mr. and Mrs. Morris Berry, a son.

Evelyn Mayer, left, and Doreen Johnson pose with their favorite mounts.

## Pair of Park Girls Choose Bridle Path for Recreation

Quite "sold" on the merits of horseback riding are Doreen Johnson, Roll Coating, and Evelyn Mayer, Accounting, both of Kodak Park. They have been boot-and-saddle devotees since their respective childhood days, and point with pride to their ability astride.

Doreen, KODAKERY correspondent in her department, has been riding horses ever since her childhood days in Cheltenham, England, where the cry of "tally-ho" is as familiar as "play ball" to the natives over here.

Doreen has ridden to hounds and can take a mount over the hurdles with ease, but since coming to the U.S.A. as a war bride she prefers to ride in the accustomed manner. The only difficulty she experienced, she says, was the change in saddles. After becoming used to the English-style seat, she had the time of her life last summer at a dude ranch in Peekskill, N.Y., where she spent many anxious and back-breaking hours mastering the Western saddle.

Evelyn has nothing to say in explanation of her fondness for horses except that she has been riding for 25 years, a record that speaks for itself.

The girls met at the Pine Tree Stables just two weeks after Doreen came to this country, and immediately became fast friends. They now manage to ride at least one evening a week. Doreen tried to interest her husband in straddling a horse but after three or four attempts he gave it up as a bad job.

"He would much rather drive on a golf course," she quips.

## Make 'em Yourself

Summer and bright, cool cottons go hand in hand. Add this plaid gingham hat to your wardrobe and, for emphasis, a pair of matching gloves. Deep-crowned bonnet frames the face with turned-back cuff, and a self bow trims the back.

Patterns for the bonnet are available free from your KODAKERY Office. The gloves are not included, but are made easily from a commercial pattern.

## 'Shoot the Works' on July 4

For holiday festiveness, shopping in town, an afternoon tea, any other social engagement, you'll want a dress that is cool, neat and has that sophisticated look. Perfect for this time of year is the black-and-white print modeled by Bea Lynn, Film Emul. Melting, KP. The snappy little bolero over a plain black top and peplum skirt add to its smartness. From McCurdy's.

## The Market Place

KODAKERY ads are accepted on a first-come, first-served basis. Department correspondents in each Kodak Division are supplied with ad blanks which, when your ad is typed or printed on them in 25 words or less, are put in the Company mail addressed to "KODAKERY," or handed in to your plant editor. All ads should be received by KODAKERY before 10 a.m., Tuesday, of the week preceding issue. HOME PHONE NUMBERS OR ADDRESSES MUST BE USED IN ADS. KODAKERY reserves the right to refuse ads and to limit the number of words used. Suggested types are: FOR SALE, FOR RENT, WANTED, WANTED TO RENT, LOST AND FOUND, SWAPS. KODAKERY READERS ARE ASKED TO PLACE ADS ONLY FOR THEMSELVES AND HOUSEHOLD—NOT FOR FRIENDS OR RELATIVES. TO DO THIS IS TO DENY SPACE TO THE PEOPLE OF KODAK FOR WHOM THIS SPACE IS RESERVED.

### FOR SALE

**AUTOMOBILE**—1941 Chevrolet. 411 Platt St. after 5:30 p.m.  
**AUTOMOBILE**—1941 Chrysler, 4-door sedan. 96 Kenilworth Terr.

**Make Good Showing** — Pictured above are two doubles combinations that have been showing well for Kodak Office in Industrial Tennis League. From left, Hugh Scheffy and Gene Johnson, No. 2 team; Jim Archibald and Al Clair, No. 1. It's KO's first venture in local league competition, and the Office netters are making strong bid for first division despite fact that they entered without benefit of pre-season drills, filling a league vacancy.

## Mike Farrell's Dodgers Win First-Half Noon-Hour Race

In a race that went right down to the wire, Mike Farrell's Dodgers tripped the Yankees, 4-1, last Tuesday to nose out Jack Connolly's club for the first-half championship in the KPAA Lake Avenue Noon-Hour League.

"Shifty" Gears' wildness, plus two timely triples by George Beane and Don Bender, accounted for all four Dodger tallies in the first inning. The veteran Ray Thomas meanwhile set down the Yankees with comparative ease to best Gears, the Yank hurler.

In the playoff of another postponed game, Jim Gallagher's

Giants defeated the Birds, 5-3. Final first-half standings:

	W	L	T	Pts
Dodgers	6	2	4	16
Yankees	6	3	3	15
Giants	4	4	4	12
Birds	2	9	1	5

## Resler, Robeson Win KO Meet

Chuck Resler and Shurlee Robeson, taking full advantage of the latter's 35-stroke handicap, annexed low net honors with a 68 card in the KORC Mixed Handicap Golf Tournament last Friday.

Touring the nine-hole route in 110, the pair subtracted a 42 handicap. Resler was spotted seven strokes.

Walt Narog, with a 37, and Lois Patchen, who posted a 44, won low gross honors. Forty-four KORC men and women competed.

Three couples tied for second in low net competition, each turning in 69's. They were Walt Narog-Jane Moriarty, Ruth Massing-Bill Arsenault and John Van Dusen and Mary Nugent.

Blind bogey awards were won by Edith Lenhard, Glenn Mentch and Lynn Brown. Prizes for birdies went to Pete Culross, who had two, and Shurlee Robeson.

## KP Golfers Await July 12 Tourney

Hopeful that rain won't mar the occasion as it did last month in LeRoy, Kodak Park golfers are anxiously awaiting the second KPAA links event of the season, scheduled for the Lake Shore Country Club Saturday, July 12.

Because Lake Shore will not be able to accept tourney starters after 11 a.m., the number of entries that can be accepted is limited. This necessitates acceptance in the order filed at the KPAA.

Entry blanks are now available at the KPAA Office, Bldg. 28, and must be submitted no later than Wednesday noon, July 9. The entry fee is \$1.25, with prizes going to handicap winners in three classes.

Ted Kelly posted a 72 to snare low gross honors in the second tourney last summer.

# Kaypees Retain Major Lead Despite Loss to CW's Mayer

While Ed (Ironman) Mayer, CW's classy chucker, managed to snap their five-game victory string last week Kodak Park came back strong to bag two more victories and retain first place in the Major Industrial Softball League pennant race. After bowing to Camera Works on Tuesday, 2-1,

the Kaypees subdued Ritters on Thursday and Hawk-Eye on Saturday.

In his next outing Mayer didn't fare so well, dropping a decisive verdict to Gleason, 5-1. His CW mates managed to collect but five hits off the Gleason pitcher. George Sundt relieved Mayer in the sixth.

In the June 24 upset Mayer limited the Kaypees to two hits. His CW mates manufactured the winning run in the bottom half of the seventh on Red Haight's walk, a single by Bill Lawrence and an error. Ken Busch was on the mound for the Park nine, and while he gave up only five hits, allowed one run in the second inning, which, combined with the last inning miscue, proved his downfall.

### Castle Clouds 'Em

Hawk-Eye not only lost a 9-3 game to Grafex June 25, but the services of Shortstop Angelo Sulli. It was in this game that Sulli suffered a broken leg.

"Shifty" Gears bagged his fourth victory of the campaign June 26, as the Kaypees trounced Ritter, 7-1. Tommy Castle, with a triple and homer, and Bill Finucane, who hit for the circuit with two on, led the Kodak Park attack.

Castle's two-run homer paced the Park outfit in their June 28 8-0 shutout of Hawk-Eye. Busch came back strong after his loss to CW, working a sparkling four-hit game.

	W	L	G	Pts
Kodak Park	10	2	Grafex	5 6
Balco	9	3	Camera Wks.	4 6
Gleason	8	4	Delco	3 7
Ritter	7	5	Hawk-Eye	2 8
Products	6	6	Taylor	2 10

### GAMES NEXT WEEK

Monday, July 7 — Gleason vs. Hawk-Eye, 8:15 p.m.; Rochester Products vs. Kodak Park, 9:30 p.m.

Tuesday, July 8 — Taylor vs. Bausch & Lomb; Ritter vs. Grafex.

Wednesday, July 9 — Kodak Park vs. Gleason, 8:15 p.m.; Delco vs. Camera Works, 9:30 p.m.

Thursday, July 10 — Grafex vs. Bausch & Lomb; Taylor vs. Hawk-Eye, 9:30 p.m.

Mayer

## KPAA Hole-in-One Test Set; Kremble Named Boys' Coach

KPAA members, including the fairer sex, will have an opportunity to shoot for attractive prizes when the KPAA stages a "hole-in-one" contest at the Lake Avenue athletic field for one week beginning Monday, July 14. Contestants will tee off thrice daily: 8 to 9 a.m., 11:45 a.m. to 1:15 p.m., and 4:30 to 5:30 p.m. On Monday and Friday the closing hour will be extended to midnight. Individual scores will be computed on a point basis to be determined from the five tries allowed each entrant. Trophies will be awarded top winners in both classes, it was announced. Additional details will be announced next week.

It's one tough break after another for the H-E Major nine this season. Manager Charlie Bauer has lost the services of Angelo Sulli, his star third baseman, for the remainder of the season. The youthful Hawk-Eye veteran, filling in at shortstop for John Bonacci in the game against Grafex last week, suffered a broken right leg when he fell over a Grafex runner, who slid into second.

George (Hack) Kremble, second baseman for the Kodak Park Majors and veteran of the Kaypees' 1936 and 1940

world's championship teams, has been added to the coaching staff of the KPAA Boys' Softball Program. Kremble's appointment brings the staff total to 11, with another instructor yet to be named. The record enrollment of more than 2000 boys

necessitated enlarging the staff, according to "Spike" Garnish. Some interesting statistics furnished by Garnish reveal that there will be 17 leagues with a

Kremble

**Citizen of Day** — Clayt Benson, above, KPAA executive secretary, was honored by Radio Station WHEC last week. On its "Journal of the Air" program the station named Benson "Citizen of the Day" for his outstanding athletic promotional work at Kodak Park.

total of 136 teams. There will be 28 games played daily, 140 weekly and a total of 980 during the season. Originally the various leagues were scheduled to use five diamonds, but two more at Aquinas will be pressed into service.

## Habes Shoots Low Gross, Two Hit H-E Blind Bogey

Bud Habes toured Lake Shore Country Club's 18-hole layout in 78 strokes to capture low gross honors in the first HEAA golf tournament of the season last Saturday, June 28.

George Cragg and Dick Rahn came up with net 72's to claim first prize in blind bogey competition. Other blind bogey prizes went to Mike Gunn, Herm Koopman, John Byrne, John Swenholt, Jim McEneaney, Bill Hutchings, Ray Wiegand, Harvey Brown, John Easterly and Will Basel.

## Cage Coach Jack Brightman Named to KPAA Office Staff

The appointment of Jack Brightman, Kodak Park's Major Industrial League basketball coach, to the KPAA Office staff has been announced by the KP Industrial Relations Dept. Brightman,

who assumed his new duties June 23, will assist Joe Minella in the promotion of KPAA sports and social programs as well as in the organization of many other activities in the new recreation building.

A native of England, Jack came to this country in 1914, starting at the Park as a messenger boy in 1915. He subsequently joined the Purchasing Dept., Bldg. 26, and has since seen service in the Carbon Paper Laboratory, Bldg. 14; Testing, Bldg. 26; Emulsion Coating, Bldg. 29; Roll Film, Bldg. 25, and Sundries, Bldg. 48.

Brightman

He began his Kodak Park sports career in 1916. In 1918 he was named to the Park team and played on it until 1933. He was also a member of the KP soccer eleven which at one time enjoyed a national reputation as one of the best in the land. After playing with the team from 1920 until the sport was discontinued, he turned his full attention to basketball.

### Won Eight Titles

As coach of the Major Dusties, Jack has succeeded in developing some of the best quints ever to represent the Park. Under his capable direction the Kaypee cagers have annexed eight Industrial League titles in 11 seasons of play. The club also has competed in eight YMCA tourneys, winning four and finishing in the runner-up spot twice.

Softball occupied Jack's attention for a short time. He has participated in the KPAA Lake Avenue Noon-Hour loop, and also has served as a player-manager in the twilight circuit. Although no longer a court performer himself, Jack likes to recall the days when he pastimed against such stellar opposition as the Buffalo Orioles and the famed New York Celtics.
