

Kodak Ltd. Hums Along Despite Shortage Snags

The manufacture of Kodak products in England and France, despite trying shortages of labor and equipment, is going on apace. So declared Dr. C. E. Kenneth Mees, Company vice-president,

Dr. C. E. K. Mees

who recently returned to his desk in the Research Laboratories, Bldg. 59, after several months abroad.

"Kodak Limited right now is a very busy place," Dr. Mees reported. "Naturally, over there as here at home, the supply cannot meet the demand. Most of its production is devoted to X-ray and movie film and what little supply of roll film is available is being rigidly rationed."

Lack of equipment is retarding the development of color photography in England, Dr. Mees added, although a capable research staff, under the direction of E. R. Davies, has been active through the war.

Attends London Congress

In addition to visiting the Harrow plant, Dr. Mees attended the International Congress of Chemists in London, the first convocation of the group since 1941. The London Society, oldest in the world, observed its centennial this year.

While conditions in the British Isles leave much to be desired the situation in France is even more serious, he said. "In spite of this, our plant is doing a splendid job. Labor in France, as in England, is scarce, almost every type of work being held under strict government regulation."

While abroad, Dr. Mees also conferred with Kodak sales representatives in Holland.

the KODAKERY Office, 343 State St., Rochester 4, N.Y.

There are two classes in the summer contest—one for amateurs and the other for advanced photographers. There will be identical awards in each class—a total of \$200 for winners in both classes. Best picture in the opinion of the judges in each class receives \$25, second gets \$15 and third, \$10. Then there are 10 awards of \$5 each, besides 25 Merit Certificates.

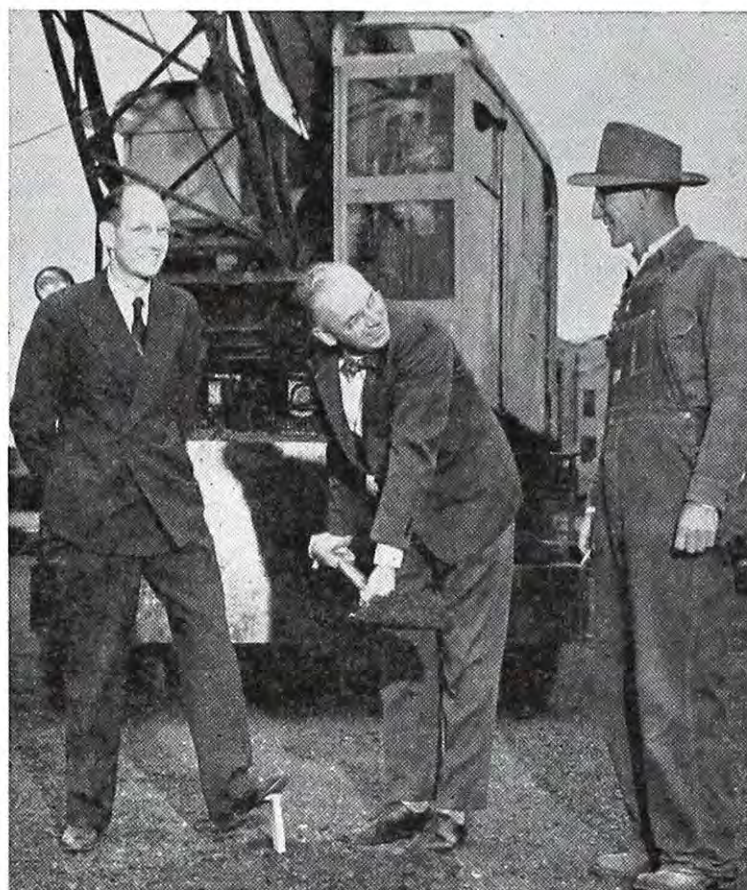

Got a Winner Among Snaps?

Have you ever looked at a group of snapshot winners and remarked: "I've got prints that would beat any of those?"

Maybe you're right, but how are you going to find out if you don't enter them in competition? You can do it now, too, for KODAKERY's big summer snapshot contest is tailored for all amateurs.

It's fun to find out how your snapshots stack up against those of other competitors. And it's a swell feeling when you have a winner, and cash besides.

Don't put off sending in your snapshots for you may find that time has run out and you will have missed your chance. For you see, the deadline for the summer contest, covering July and August, is midnight of Aug. 31. That means that you have only a little more than two weeks to get them in to

Birth of Lab Unit — Dr. C. F. H. Allen, assistant superintendent of the Synthetic Organic Research Lab at Kodak Park West, turns the first shovelful of earth for the new addition at Bldg. 129. At left is Dr. C. V. Wilson of the lab and John Crumley, a construction foreman, is at the right. Steam shovel waits signal.

EK Begins Lab Annex For KPW

New Addition to Double Capacity of Bldg. 129

Construction of a north addition to the Synthetic Organic Research Laboratory, Bldg. 129, was begun recently at Kodak Park West by building crews.

The addition, which will measure 61x116 feet, will be an extension at right angles to the present structure, making the finished building L-shaped. When completed it will provide additional laboratory accommodations for 20 research men, thus doubling the present capacity of Bldg. 129. The Synthetic Organic Research Laboratory, celebrating its 10th birthday this fall, had supplied 14,282 specimens of organic chemicals for research purposes and had received 75 publications of its work as of July 1.

Also under construction in Kodak West is a multiple laboratory to replace one of the original units now being used by the Synthetic Chemistry Laboratory opposite Bldg. 117. This new unit will be a one-story building.

Canada Gets Kodak Exhibit

(Picture on Page 4)

One of the biggest displays ever prepared by the Exhibits Division of the Kodak Advertising Dept. is en route to Toronto, Canada, for the first Canadian National Exhibition since the war. It was prepared here for the Canadian Kodak Co. Ltd., at Toronto.

Fred Hodgson and George Londerville of the Exhibits Division will set up the Kodak section in the Manufacturers' Building in the Canadian National Exhibition Park on the outskirts of Toronto in preparation for opening of the 16-day program on Aug. 22.

The Canadians have been at work for months refurbishing their buildings and the grounds of the park in preparation for revival of the exhibit in which Kodak will have a colorful part. The exhibit, which runs through Sept. 6, attracts hundreds of thousands from Canada and the United States.

The 72-by-14-foot Kodak exhibit, which has been in preparation for some time by a staff of 10 under direction of A. D. "Dex" Johnson, was shipped by truck.

In one of the main areas of the big Manufacturers' Building, the Kodak exhibit will give a general cross section of photography for the amateur and professional. The part for the professionals will be divided into portrait and commercial work. Color as well as black-and-white photography will be emphasized. Color transparencies, 30x40 inches, will be one of the high points of the display. Bordering the transparencies will be some of the best color print work and there will be a section for black-and-white prints. Another part of Kodak's exhibit will be devoted to industrial photography.

Cameras and other photographic equipment are being supplied by the Canadian Kodak Co. Ltd.

Many Request Free Copies Of Lovejoy Memorial Book

Many requests for a free copy of the book prepared as a memorial tribute to the late Frank W. Lovejoy are coming to the KODAKERY Office daily. Since many Kodak people were on vacation when the last coupon appeared, another one is published below for their use and for others who may have overlooked the original one.

The 64-page book, which is due for publication in September, is written in a light and easy style that makes for good reading.

Between the covers is a story that encompasses Mr. Lovejoy's association with the Company and beyond, for he was a man of great foresight in diversified interests

and fine community spirit. The tale goes back to his boyhood days in Concord, N.H., and carries through his career that was studded with great achievements in the industrial world. Ever in his mind was the welfare of Kodak people, and his accomplishments for their benefit are related in the course of the story.

Words of Wisdom

A man who shunned the lime-light, Mr. Lovejoy made few speeches, but the excerpts from them in the book contain advice to youngsters and older folks which is as valuable today as when the words were spoken.

The book will be distributed to Kodak men and women of 10 years' service and over and to retired Kodakers. Those with less than 10 years of service may have it upon request.

If you wish a copy without charge fill out the accompanying coupon promptly and send it to KODAKERY at 343 State St.

Auditorium Reopens At State Street Aug. 18

Something new has been added in the refurbished auditorium at State Street which will reopen Monday, Aug. 18.

Movable basketball stands have been provided for use in a new KO departmental league which is to get under way in the fall.

The entire auditorium has been cleaned and reconditioned and the floors have been refinished.

F. W. Lovejoy Book

I would like to receive a free copy of the book on the life of the late F. W. Lovejoy.

Pictures Spring to Life When You Inject People

Pepper-Upper — There's just a single live figure in the foreground of this snapshot but it certainly adds interest to this street scene. Think how many pictures lack that added touch because the setting is barren of people.

HAVE YOU EVER noticed the differences in people? Some are vibrant, exciting, full of life—and others are boring, dull, and uninteresting. Well, just as there are differences in people, there are differences in pictures, too. Some pictures—the kind that win contests, and are accepted for salons—are good at all times. Others aren't worth a second glance. Why? Answer that question and you'll come close to the secret of good picture taking.

Actually, there may be several answers—and good ones, too. But there's one thing you'll find true about most fine pictures: **THEY CONTAIN PEOPLE!** That's important because, nine times out of ten, pictures that contain people—whether the figures are the center of interest or not—have three strikes on those in which people are lacking. That's because they add life, human interest and a feeling of action to any scene. So why not include people in your pictures?

The average city view, for example, usually looks like a "deserted village" if it fails to con-

tain people. And the same is true of country scenes. The average amateur landscape picture—whether it features a farm, the mountains, or a bit of seashore—invariably would be improved if a person was included in the foreground—and preferably looking into the scene.

Sometimes when you're picture taking you'll find people just where you want them to make your picture complete. Often you'll have to place them in position to make your picture the way you want it.

There's a story they tell around the camera clubs which may help to illustrate this point. It seems that a very famous photographer—let's call him Dr. X—had just been lecturing on composition. He had carefully pointed out that by including people in scenic views it is possible to add a center of interest to the picture. And he had strongly suggested that every

Valuable Picture — This unusual picture of deer feeding on the Scottish moors was taken about 1902 by Thomas Spence, father of John Spence, a member of the Emulsion Research Laboratory at Kodak Park. A photographer and pharmacist in the small town of Fort William, Spence had the Kodak agency in the area and made a hobby of photographic art. He waited three days to get the herd together in the mountainous terrain. The picture proved to be so popular that it netted the elder Spence a small fortune. One of the prints was purchased by King Edward VII for display in Buckingham Palace, according to John Spence.

2 CW Flyers Build Aerial Camera To Snap Pictures from Light Plane

Teamwork between the pilot and the photographer is highly essential in good aerial photography. Guy Aydlett of Dept. 60 declared in discussing an aerial camera he made in his home workshop in his spare time.

John Bailey, also of the same department, and Guy have been flying together for some time and did quite a bit of aerial photography last summer with a borrowed camera. The results so fascinated them that they decided to acquire an outfit of their own.

They became interested in War Surplus cameras but soon discovered they were not too well adapted for use in small planes. Changing such a camera to suit their needs would be as much work as building a new one, they agreed, so the idea of constructing one soon became a reality.

Weights Six Pounds

Securing a suitable lens and with power tools in his own home, Aydlett produced a camera which weighs about six pounds and is 14 inches long. It's as easy to handle as a ground camera, says Aydlett.

The camera body is made of kiln-dried pattern pine and mahogany, covered with saddle leather, the trim being finished in satin aluminum alloy. It has an f/4.5, 7½-inch focal length aerial lens and shutter speeds of 1/125, 1/250 and 1/500. Cut film, plates, film packs or roll film can be used in taking pictures 3¼x4¼. The shutter setting and release are accom-

plished without removing the hand from the right-hand grip. A folding view finder is on top and interchangeable filters can be used.

Both Bailey and Aydlett are flyers as well as amateur aerial photographers and have worked together in perfecting the camera and taking pictures with their homemade outfit.

Then in the period following the lecture when various club members were "oh-ing" and "ah-ing" over the great man's work, an exuberant lady exclaimed, "Oh, Doctor, weren't you lucky to find a person in precisely that spot!"

"Lucky, my eye," the great man explained. "That's Mrs. X."

(Answers on Page 4)

- What is the correct technique for taking panorama shots with a Ciné-Kodak?
 - Move the camera in a zigzag pattern until you take in the entire scene.
 - Swing the camera slowly and smoothly from the least to the most important part of the scene.
 - First move the Ciné-Kodak vertically and then horizontally.
- The average number of Kodakers who dine daily in the Company's cafeterias in Rochester is:

9000	13,000	18,000	28,000
------	--------	--------	--------
- What is the weight of the Kodak eye-level tripod?

2 pounds	6 pounds	13 pounds
----------	----------	-----------
- How can light spots be eliminated in a print?
 - By erasing them with gum rubber.
 - By using Kodak Spotting Colors to match the density and texture of the part of the print in which the spot occurs.
 - By pasting special colored spots over the light area to match the print.
- The amount earned by Kodak suggesters in the first six periods of this year totaled:
 - \$19,421
 - \$36,109
 - \$54,158
- Name the Kodak Park golfer who won the trophy in the KPAA Hole-In-One Tournament recently.
 - Carl Christ
 - Gus Pappas
 - Jack Shea

Aerial Team — Guy Aydlett, left, holds the light aerial camera which he and John Bailey, right, both of Dept. 60 at Camera Works, produced for taking pictures from small planes. They made the camera to fit their needs when others proved too bulky.

plished without removing the hand from the right-hand grip. A folding view finder is on top and interchangeable filters can be used.

Both Bailey and Aydlett are flyers as well as amateur aerial photographers and have worked together in perfecting the camera and taking pictures with their homemade outfit.

Race tracks with horses in action and the exciting crowds make interesting pictures, Aydlett said. Passing planes, airports, interesting agriculture ground patterns and attractive-looking estates with winding drives and walks also appeal to the photographic eye of these flying camera men who have produced many beautiful pictures.

Big Gathering Fetes Ward, Presents Gifts at Brook-Lea

Some 130 associates and friends of Erwin Ward, administrative supervisor of the Film Quality Control Dept., attended the farewell dinner party held in his honor at Brook-Lea Country Club on Aug. 5. The genial Park member is retiring after 35 years' service with the Company.

Guest speaker following the dinner was Don McMaster, Kodak vice-president, who recalled his early association with Ward and paid tribute to his work in related fields of photography. Also at the speakers' table were Lincoln Burrows, retired Emulsion Coating Dept. superintendent; Charles F. Hutchison, comptroller in the Film and Plate Emulsion Dept.; Otto Cook, general superintendent of Film Manufacturing Depts.; Ivar N. Hultman, EK vice-president; Clarence L. Wynd, assistant

to the general manager of Kodak Park; Neil S. Kocher, assistant general superintendent of the Film Depts., and William J. Klem.

Harry Paddock made the gift presentations which included a new 16-mm. movie projector, a copy of "Highlights and Shadows," Kodak documentary film, and a book containing autographs of scores of Ward's friends. Jack Schaeffer led the group in a short program of songs.

With the guest of honor were Mrs. Ward, a son, Erwin, and two sons-in-law, Worthe Clark and John Otto.

Farewells to Ward — Scores of friends of Erwin Ward, some of whom were his associates when he joined Kodak Park 35 years ago, were on hand last week to honor him at a dinner party at Brook-Lea Country Club. Ward is retiring from the Company. Harry E. Paddock, left, assistant superintendent in charge of Film Waste Control Dept., presents a Kodascope to Ward. At right is Lincoln Burrows, retired superintendent of the Emulsion Coating Dept. Other gifts were presented to the guest of honor.

Moonlight Cruise—Songs and music, combined with lots of laughter, floated over Lake Ontario when some 300 KPAA girls and their guests enjoyed a moonlight cruise on July 30. Aboard ship are, at left, Doris Cooper, Elizabeth Poquette, Marie

Foasby and Peg Wilson. 1. to r., playing the alarm clock game. In the second picture from left, Wally Stein of the KP Time Office provides music with her accordion for the songfest. Waving farewell are, left to right, Ed and Ade Perkins, Jean Flesch and Elmer Kirchessner. At

the extreme right a group visits the pilothouse where Neil Oliver of the ship's crew is polishing up the helm. His visitors are, from left, Bob Walsh, Enid Tuley, Thelma Irving and Ed Weisenbeck. A picnic supper was served to the cruise guests while they watched a beautiful sunset.

It's in the Park

40-Year Pin for Andy Schell ... Canoe Dunks Ex-Sailor

More than 100 friends and associates of A. J. (Andy) Schell, Film Planning and Record Dept., gathered at Ridgemont Golf Club on July 31 to celebrate his 40th anniversary with Kodak. Following the presentation of a 40-year pin by George Oest, Andy received a wrist watch from his associates. . . . Eloise Richardson and Ruth Canne of Wage Calculating spent last week at Wigwassen Lodge, Muskoka Lake, in Ontario, Canada. . . . The Photographic Theory Dept. of the Research Laboratories, Bldg. 59, held a yachting party on Lake Ontario July 30. A picnic lunch was served aboard by Dr. James Lu Valle. Fourteen persons, including wives of members, attended the outing. . . . Malcolm Cramer, Power Dept., is taking a good ribbing after his recent marine experience at Conesus Lake. Mal, a former MM/1c in the Navy, was leisurely paddling his canoe and recalling for his wife some of his experiences while aboard a destroyer. Came a lull in the conversation, some seat changing and—plop. Two girls camping nearby came to their rescue. . . . Milton Darcy, Stores Office, Bldg. 49, co-owner with his brother of Cedar Springs Park in Wheatland, N.Y., is spending most of his spare time at the 50-acre tract which includes 20 natural springs, a swimming pool, the site of an old Indian village, a nature conservatory, three cabins and a lodge. Both Milt and his brother served in World War II. . . . Pvt. Jack A. Burns, formerly of the Roll Coating Dept., has arrived at Fort Dix where he will pursue a course in basic training. Before joining the Army, he was a student at Charlotte and Edison Tech High School. . . . Grace Ogenbene, X-ray Sheet Film, was tendered a surprise kitchen shower by her friends on July 25. Grace is moving into her new home Aug. 2. . . . In anticipation of autumn clambakes, Bill Church, Don Barnes, Charlie Edwards, Harry Hale and George Gaist, of the Power Dept., gathered at the home of George Garnham to help erect a pavilion. . . . Vacation plans of Betty Frey, also of the Power Dept., were upset at the last moment by an emergency operation. She is recovering nicely.

Elwyn Plummer, Ciné Processing Dept., recently was elected to the Executive Council of Boy Scouts in the Monroe County area. He will handle the club section of the Oetiana group. . . . A farewell dinner party for Al Wadsworth of Branch Shipping, Bldg. 33, who retires Sept. 1 after 37 years of service, was held at Doud Post on July 30. Frank Dugan, Kodak Office, made the gift presentations with Jack Schaeffer serving as master of ceremonies. . . . When Walter Shaw, Cafeteria, goes fishing, he usually comes back with the proof. This time it was 18 hefty pickerel which Walt, his wife, Lavina, and his daughter, Mary Ann, caught in the waters around the Thousand Islands. . . . Jack Brightman, KPAA Office, recently prevented a disaster when he visited the School 41 diamond and found two small boys sawing through the wooden beams which support the clubhouse. . . . Al Page, Distilling, was guest of honor at the Dutch Mill on July 24 when a party marking his 40 years of service with Kodak was given by his associates. Among the gifts presented to the veteran were a bowling ball, bag and shoes, a box of fishing tackle, and a box seat for the remaining Red Wing games. In attendance were members of Al's bowling team, all of whom belong to the KP Pioneers' Club and have bowled together for 28 years. John Folwell, superintendent of the Chemical Plant, presented Al with his 40-year service pin. James Kiggins was chairman of the affair.

Al Page receives congratulations from his friends at party marking his 40th year with EK. From left, Dick Baybutt and John Folwell, Bldg. 46; Neil Kochoer, Bldg. 26; Page and Earl Graham, Distilling.

Storm Ends As 300 Begin Lake Cruise

A violent electric storm, which sent torrents of rain down on homeward-bound Kodak Parkers on July 30, failed to dampen the enthusiasm of some 300 KPAA girls and their escorts who attended the moonlight cruise on Lake Ontario. The storm abated before the boat left the dock and all aboard enjoyed a beautiful sunset.

Following a picnic supper served on board, an orchestra under the direction of Bill O'Brien, Bldg. 12, played for dancing. Winners of a jitterbug contest, which brought out some lively competition, were Patricia Rote, Portrait Sheet Film, and Donald Maeder, Bldg. 6. A variety of novel games, with prizes going to the winners, enlivened the evening's program. Among those who participated with success were Julia Chiara, Roll Film Pkg.; Marion Bowman, Reel Mfg., and Kay Blodget, Cafeteria.

The group returned at 11 p.m.

Abetting his scientific knowledge in true scholarly fashion is Dr. C. E. K. Mees, Kodak research director and vice-president, who reads Russian photographic literature in its original text. Another student of Russian is John Nothnagle jr., Ciné Processing Dept., who is imbibing a 15-hour course weekly at the University of Rochester where he is a junior.

A huge turnout featured the annual Shop-Office steak roast of the Emulsion Coating Dept., Bldg. 29, on July 19 at Hickory Grove, Webster. Ken Wadman's Shop team defeated Charlie Lombard's Office softballers by a healthy margin and repeated the success in the tug-of-war event. It was a sad day for Fred Rice who decided to bury his slacks after being pelted by a "ripe" egg in the egg-throwing contest. Serving on the committee in charge were Warren Stephens, Office, and Gene Lennon and Fred Thiem, Shop.

John L'Homedieu, Export Shipping, who specializes in horticulture, called to tell KODAKERY readers that the tree growing atop Bldg. 120 in Kodak West is not an example of pollen dissemination by the wind. John claims that an original twig or seed somehow became rooted in a dirt-filled crevice.

Death Claims 3 Men, 43-Year Veteran

William Weyraugh, Accounting Dept., Bldg. 26, died Wednesday, July 30. He had been out ill since last May. Weyraugh had been with the Company 43 years, starting in March 1904. Two brothers are at Kodak Park, Arthur, Office Equipment, Bldg. 2, and Harry, Garage. Walter Thomson, Time Office, died Thursday, July 31. He was on vacation at the time of his

\$10,644 Awarded at KP For 7th Period Ideas

Pattern for \$600 Award—William Copenhagen of the Metal Shop designed a scribing device for use in laying out sheet metal patterns and received \$600 for idea.

Topped by a record \$2000 award, Kodak Park suggesters cashed in to the tune of \$10,644 during the seventh period ending July 12, according to the Suggestion Office.

Of that amount, \$3309 was paid out in additional awards to 107 men and women for suggestions approved in the fourth, fifth and sixth periods of 1946. A total of 450 adoptions was chalked up for the seventh period, with 51 women sharing in the awards.

In addition to the \$2000 check, awarded to Gerald A. Bentley of the Paper Mill (see KODAKERY, July 31), several other Park men were recipients of sizable sums. Highest of these was \$600 which went to William Copenhagen of the Metal Shop for designing a scribing device used in laying out sheet metal patterns. This eliminates the need for drawing plans for various types of duct sections.

Equal awards of \$250 went to Herbert Dean, F.D. 7, and Jerry Camille, Roll Coating. Dean devised a fixture for use in the assembly of cork pipe covering which protects large outside pipes. This saves installation time and makes it possible to assemble the pipe covering in the shop. Dean received \$300 for an idea approved in the fifth period. Camille suggested that the panes of glass used in film casting machines be mounted in rubber instead of putty. This

simplifies installation and removal of the glass.

An idea proposing a procedure which insures accuracy in the handling of emulsions for color products earned \$200 for George Erath of Film Emulsion Melting.

Three men earned \$100 awards. They are Thomas Goodwin, Roll Coating; Jerome Verstraete, Cotton Washing, and Fred Alexander, Ciné Processing. A possible source of dirt has been eliminated by the adoption of Goodwin's suggestion for a different type of felt filter.

Reduces Loss by Leakage

Verstraete proposed the insertion of a rubber gasket and sleeve in the spouts used for filling tanks, thereby reducing the loss of stock due to leakage. Alexander's winning suggestion concerns the use of a device for "jumping" 16-mm. film from one rack to another in a film processing machine.

Gerard Dittman, F.D. 5, was awarded \$75 for adapting a rubber cup to star drills, used to drill holes in concrete, in such a way as to catch concrete dust resulting from the drilling operation.

Among those receiving high additional awards were H. Thomas Mahle, Finished Film Supplies, and James B. Thomas, Machine Shop, with \$250 each, and Eleanor Schroeder, Imitation Leather, Bldg. 34, who received \$200. Mahle's original suggestion involved a different method of printing packing notices while Thomas' idea eliminated the need for writing separate budget orders for locksmith work. Eleanor recommended a combination of the inspection and winding of plush ribbon used in making EK products.

Royalty Visits Kodak Print Display at London Gallery

Views Pictures Taken on Trip

Kodak Ltd. was honored recently when the King and Queen and Princess Elizabeth visited its gallery in Regent St. to view an exhibition of photographs taken on their tour of South Africa.

About 100 prints were on display, many of them enlarged to 30 by 40 inches in size, made by Kodak Ltd.'s processing department from negatives loaned by the London Times. It afforded the first opportunity for the royal party to view a comprehensive collection of pictures taken on their trip.

King George, a keen amateur photographer and cinematographer, showed a deep interest in the display and discussed technical points with A. E. Amor, director and works manager of Kodak Ltd. The King and H. S. Carpenter, managing director of Kodak Ltd., found much in common to talk about in regard to the pictures. Carpenter also had visited South Africa and was familiar with many of the scenes.

The King was most enthusiastic about the Kodachrome transparencies which were on display.

Interested — King George, left, discusses one of the prints with H. S. Carpenter, managing director of Kodak Ltd. The royal party greatly enjoyed the display.

Many Viewers — Here's a general view of the gallery during the royal visit. Note King and Princess in foreground talking over some of the exhibit.

Color — The King and Queen are shown here looking over some of the Kodachrome transparencies with A. E. Amor, director and works manager, Kodak Ltd. The three pictures here are reproduced through the courtesy of the London Times.

Kodak Camera Club Presents Watches To 4 for Year's Photographic Achievements

Handsome wrist watches were recently presented to three Kodak Camera Club members for top achievement in pictorial photography. They are Leon Forgie and Bruce L. Kelley of Hawk-Eye and Louis J. Parker of Kodak Office.

Forgie was the club's first Master Pictorialist, accomplishing his goal in 1946 in monochrome, and is now nearing a similar award for color work. Parker copped his award for excellence in print making last spring and is the new chairman of the club's honors committee. Kelley is the first and only Master Pictorialist in the Color Section at the present time and is serving on the color committee next season.

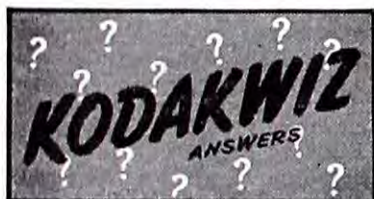

Simultaneously with the watch awards, bronze, silver, and gold medals were mailed to other participants in the club's long-range Merit Award System. Recipients

Timely Shot — Shown admiring the watches they received from Kodak Camera Club for their pictorial accomplishments are, from left, Leon Forgie, Lou Parker and Bruce L. Kelley.

of the medals were H. Lou Gibson, KO; Betty D. Haithwaite, KO; Margaret R. Paprocki, KO; Louis J. Parker, KO; Leon C. Forgie, H-E; Bruce L. Kelley, H-E; W. Arthur Young, H-E; Harriette D. Archer, KP; Charles H. Coppard, KP; Joseph B. Hale, KP; John G. Mulder, KP; Clarence J. Meteyer, KP; Alton J. Parker, KP; Ralph H. Sutherland, KP, and Roy L. Wood, KP.

It is again pointed out that any member of the Kodak Camera Club is eligible to participate in the Honors System. A table of points has been devised to cover all types of shows and four levels of awards are possible. Included are local contests as well as national competitions. For further information address an inquiry to the Kodak Camera Club, Bldg. 4.

(Questions on Page 2)

- When taking panorama shots or "panning" with a Ciné-Kodak the correct technique is to move it slowly and smoothly from the least important to the most important part of the scene and then hold it on that scene for a moment.
- About 28,000 Kodakers daily patronize the Company cafeterias in Rochester.
- The Kodak eye-level tripod weighs 2 pounds.
- Light spots in a print can be eliminated by using Kodak Spotting Colors to cover the light area in such a way that it will exactly match the texture and density of the surrounding part of the print.
- Kodak suggesters earned a total of \$54,158 on their approved ideas in the first six periods of this year.
- Gus Pappas, Ciné Processing Dept., won the trophy in the recent KPAA Hole-In-One Tournament, scoring 8 points.

Park Man Flies to England On 29th Anniversary at EK

It's a small world after all, says Walter Evans of the Park's Sensitized Paper Packing Dept., who celebrated his 29th anniversary with the Company by taking a trip to his native England.

All Aboard — Mr. and Mrs. Walter Evans are shown boarding their plane at Shannon, Eire, on their trip to England, which "sold" Walt on traveling by air.

Accompanied by his wife, Florence, a former member of the N.C. Spooling and Cut Sheet Dept., Bldg. 6, he flew overseas, returning on a Constellation airliner of Pan-American World Airways.

While in London, the Evanses visited St. Paul's Cathedral, Westminster Abbey, Buckingham Palace, Windsor Castle, and other points of historic interest. They also viewed the extensive bomb damage wrought during World War II. Horace West, general superintendent of Kodak's Harrow factory and a frequent visitor to Rochester, personally conducted the pair through the plant and later inquired as to the health of G. T. Lane, H. T. Ireland, and his many other friends at Kodak Park. Walt and his wife also found time to call on the Mokler family whose three daughters—Jean, Maureen and Shirley—were "Kodakids" during the war. Jean was in Bldg. 6 while living in Rochester.

Although he drove 8373 miles on a round trip to the West Coast last summer, Walt is convinced that nothing beats traveling by air.

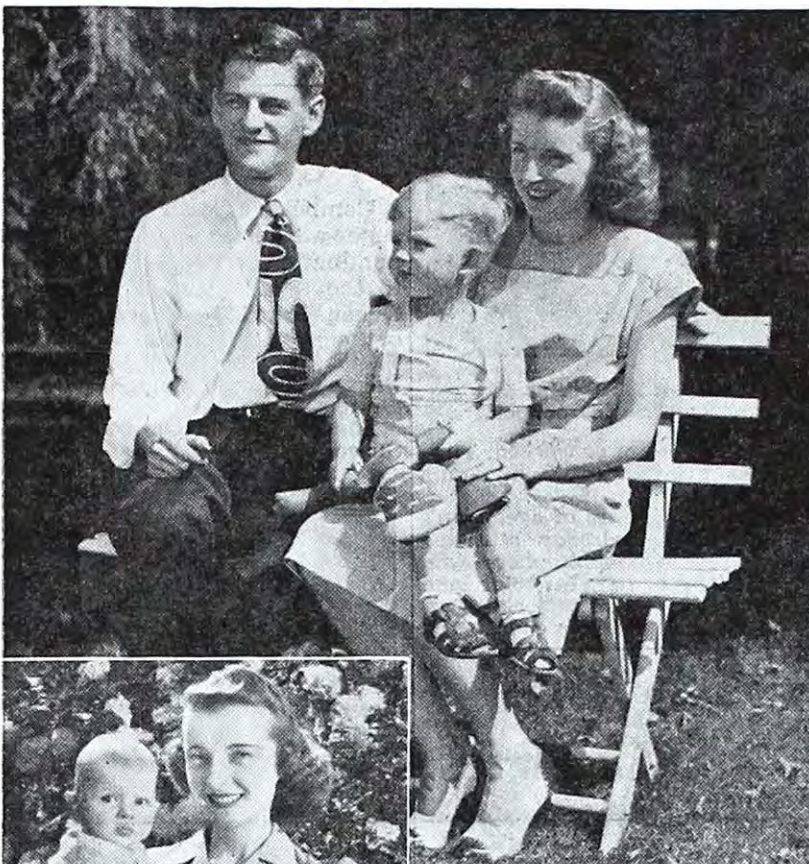

"We left London at 12:30 p.m. on July 23 and opened the door of our home on Ridge Road West the following day just as the Park's whistle sounded at 1 p.m. Even considering the five hours' time difference, that's speed," he says.

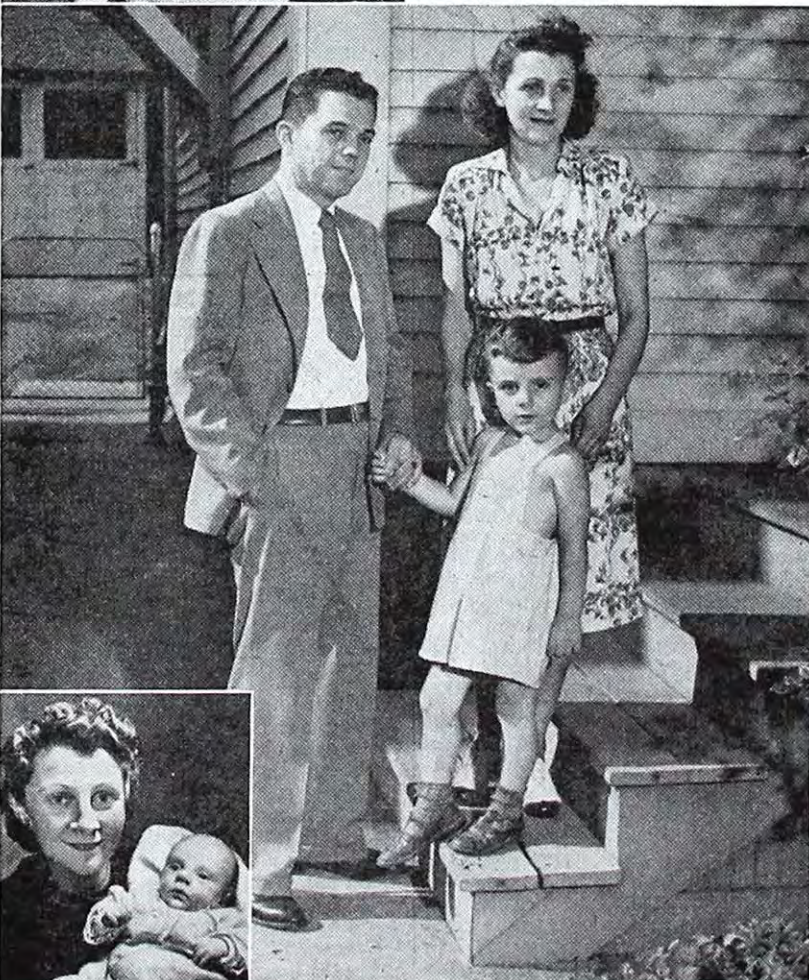

Canadian Exhibit — Mary Alice Hughes and Robert C. Locker of the KO Advertising Dept.'s Exhibits Division check the layout with the Company's completed display which is headed for Canada. It will be a part of the Canadian National Exhibition staged on the Toronto Fair Grounds, Aug. 22 to Sept. 6.

V-J Plus Two Years...

Two years ago today it was V-J Day, 1945, end of the war with Japan. Cheering and weeping, the whole country celebrated. The end of family separations was in sight. During the last two years of the war KODAKERY, in an effort to lessen somewhat the miles dividing Kodak servicemen and their families, made and published each week mother-and-baby pictures, designed to introduce to the father his baby born while he was overseas. A serviceman receiving his KODAKERY sporadically, in bunches, as mails went in wartime, opened it to see looking out at him his wife and the new addition to their family. Sometimes he saw the picture in Italy, Africa, France, Hawaii, the islands of the Pacific, Alaska, aboard a Navy craft—anywhere military duty had called him. And now, two years later, KODAKERY presents a few of these families—father home, infant-in-arms pretty big and frisky now—the family a unit once more.

The Easterlys — Introducing the Easterly family, together again. Bill, now of H-E Dept. 77, met young Billy photographically before they actually got together, for he was in the Philippines when the baby was born. It was there he received KODAKERY's picture of Billy and his mother (inset).

Nothing Like India — Marvin Bachofer, KO Finishing Dept., gets quite a kick out of being back home with his wife and little son, Dave, now three and a half. He first met Dave in KODAKERY (inset), for when the boy was born Marvin was in India. Marv's wife is the former Marion Sorg of Kodak Office.

Marine at Home — Howard Johnston, KP Kodacolor Dept. ex-Marine, came home from the wars to find his daughter, Karen (right), a big girl—she's 2½ now—while her sister, Barbara, (left) is five. Inset, Karen and her mother, while Howard was overseas.

Meet the Pennellas — Tony Pennella, H-E Dept. 33, first saw a picture (inset) of his wife and new little daughter, Elaine, when a KODAKERY caught up with him on convoy duty in Rio de Janeiro. Elaine is on the right; at left is Patty, four and a half.

Big Boy Now — The little Jimmy (with his mother, above) that Dick Dunn, KP Time Office, first met in a KODAKERY photograph while he was in the Philippines, has been doing some growing since. At right, the Duns are reunited — Dick, Jimmy, now 2½ and Dick's wife, the former Kay Ischinger of H-E.

Two Quartettes — (Left) Inset: Judy Brennan and her mother when Daddy Tom, of Camera Works Dept. 56, was in Panama. Above: The Brennans in 1947: Judy, now 2½, Tom sr., his wife and little Tommy. (Right) Bill Heuer, of KO's Shipping Dept., came back from the Army to find little Gail (inset), the blonde angel shown on his knee in the picture above. Bill's wife holds Gary, who's four now.

Girls Favor Pretty Hankies, Easy to Trim

Lazy daisies, French knots, satin stitch, cross stitch, outline stitch. . . Trim your own handkerchiefs with these simple embroidery stitches as explained in the leaflet currently available free from your plant KODAKERY Office.

One yard of 36-inch-wide linen will make nine handkerchiefs, 12 inches square—so it's a pastime not only productive but economical as well.

"Black Bottom Pie" is the unusual title of a very smooth dessert which Margaret Dietz, of Bldg. 42, Kodak Park, here offers KODAKERY readers.

BLACK BOTTOM PIE

Crust:
14 graham crackers
6 tbs. melted butter

Roll out graham crackers very fine. Mix melted butter well with crumbs, and pat out evenly on a deep 10-inch pie plate. Chill thoroughly in refrigerator.

Filling:

1 tbs. gelatin
4 tbs. cold water
2 c. milk
½ c. sugar
1 tsp. salt
¼ c. cornstarch
4 eggs
1 tsp. vanilla
1½ sq. melted chocolate
¼ tsp. cream of tartar
¼ tsp. salt
½ c. sugar

Soak gelatin in cold water and set aside. Scald milk and combine with sugar, salt and cornstarch and cook in double boiler over simmering water, stirring occasionally, for 20 minutes or until custard coats spoon. Then add to this the well-beaten yolks of the four eggs.

Margaret Dietz

Women About Kodak:

Horses—Bev Draws, Rides, Collects 'em

Horses have held a fascination for Beverly Brady of Hawk-Eye's Timekeeping Dept. for as long as she can remember.

At the early age of four she can recall her parents taking her to amusement parks in the Rochester area, where she would ride ponies by the hour. By the time she was 13 she was an accomplished rider, and her interest in riding and horses in general has been growing ever since.

Not content with merely riding, Beverly also draws and collects pictures and statues of horses as well. While a freshman in high school, she became interested in drawing and turned to her equestrian hobby for subjects. Rodeos offered the Hawk-Eye girl an opportunity for a variety of action drawings, something she enjoys even more than actually riding. These drawings are generally done in 8x10 rough sketches with the finished product turned out in charcoal at her leisure. Some of these sketches have been given to rodeo people or anyone interested in horses, while Bev has her own collection of about 30 sketches at her home.

Besides drawing her favorite animal, she also has a shelf filled with 40 or 50 figurines. The "exhibit" was started by one received as a souvenir of Old Orchard Beach, Me.

Remove from heat, add vanilla.

Take out one cup of the custard, add melted chocolate to it and beat well with egg beater. When cool, pour into cooled crust and set aside to chill.

While remaining custard is still hot, blend in the soaked gelatin and cool.

Make a meringue by beating four egg whites, adding cream of tartar and salt; gradually beat in ½ cup sugar until meringue is very stiff. While the cooling custard-and-gelatin mixture is still smooth and soft, fold in meringue.

As soon as chocolate custard has set, cover with fluffy custard and chill until firm.

When top custard layer is set, spread surface with whipped cream topping:

½ pt. whipping cream
3 tbs. confectioner's sugar
1 teaspoon vanilla

Chill. Sprinkle with grated sweet chocolate before serving. Serves 6.

Beverly Brady

3 Kodak Girls Get Beauty Crowns, Compete for 'Harvest Queen' Title

A threesome of Kodak's girls will vie with other duly-elected beauty queens of Monroe County this fall for the honor of "Harvest Queen" of the county. The annual event, taking place this year at the new Henrietta Fair Grounds, culminates a series of summer elections held in Monroe County towns.

Already announced in KODAKERY (July 17 edition) was the queenship of Carolyn Yackel, of the Kodacolor Dept. at Kodak Park, chosen to represent the town of Greece. A recent graduate of John Marshall High School, Carolyn is the daughter of Carl Yackel, KP Bldg. 23; she also has a brother, D. Carl, who is a member of the Industrial Laboratory, Bldg. 23, at the Park.

Jean's Queen In Brockport

The second Kodak Park girl to be nominated as a Monroe County "Harvest Queen" selection, Jean McPhillips, Ciné Reel and Film Pack, Bldg. 48, isn't the least bit perturbed. She's only hoping that "the luck of the Irish" which has brought her this far will see her through to victory.

Jean, who lives in Brockport, was chosen winner Aug. 1 over 11 other contestants and describes this business of becoming a "queen" as the hardest ordeal imaginable. To begin with, she says, you need iron nerves and a sunny disposition and neither comes easy when you try to force it. "Beauty may be only skin deep," she says, "but that's plenty as far

Jean McPhillips
... Queen of Brockport.

as the judges are concerned. They just won't be hurried when making a decision."

Twenty-one years of age, Jean's comeliness has already attracted several Park photographers who have snapped her in color and black and white for pictorial competitions. She likes to model and

would welcome a career in fashions on some leading magazine.

Although she is only a candidate for the "Harvest Queen" role, her Brockport admirers have already installed her as a heavy favorite. She has been feted at luncheons, a tea, and a fashion show, and wears jewelry presented to her by her fans. When, this fall, she takes her place at the ball and pageant which features the Monroe County Fair, she hopes that, unlike Cinderella, her fondest dreams of childhood may all come true.

Dolores Chosen By Greece Folks

Competing with ten other super-attractive lassies for the nomination as Gates' candidate to the Monroe County Harvest Queen Festival—and coming out on top—is quite an honor. That's just what has happened to Dolores Ritter of Camera Works' Shutter Dept.

The election of Gates' Harvest Queen took place July 24 at the

Dolores Ritter
... Gates Queen.

annual Gates-Chili Volunteer Firemen's Carnival. The following night Dolores and her alternate led the carnival parade. The final contest for the title of "Harvest Queen" will, she feels, be an event worth waiting for!

Dolores came to CW shortly after she left Benjamin Franklin High School. She is a member of the Teutonia Liedertafel, a German singing society. She is proficient at cooking and likes swimming, tennis and bicycling.

Cream Cheese Sandwich
Chicken Salad Sandwich on
Whole Wheat Bread
Pickles
Raw Carrot Strips
Apple
Milk

*BANANA BREAD

Yield: 1 loaf—5x9 inches
¼ c. fat
¾ c. honey
1 egg, beaten
¾ c. bran
1½ c. flour
2 tsp. baking powder
½ tsp. salt
½ tsp. soda
½ c. chopped nuts
1 c. mashed bananas
Cream fat, beat in honey and egg; add bran. Sift dry ingredients and mix in nuts. Add dry ingredients to the creamed mixture alternately with the bananas. Bake in a greased loaf pan for one hour in a 350-degree oven.

Luscious Biscuits, Muffins, Waffles, Cakes—Add Calories, Help You to Steadier Nerves

Mmmmm—smell those hot bran muffins just out of the oven—or the tantalizing odor of a loaf of warm banana bread. "Cereal" includes a large number of foods—bowls of steaming oatmeal or

Cream of Wheat with dates; crisp prepared cereals topped with fresh berries in season; griddle cakes or golden waffles served with melted butter and real Vermont maple syrup; light breads (biscuits and muffins) with butter and jam or jelly; cakes, cookies, pies and an endless variety of yeast breads.

Cereals and cereal products constitute the most economical source of food energy available—which is a point worth remembering in these times of high living costs.

They should not supply more than their share of the daily food intake but certainly can make a valuable contribution to good nutrition. If you are a man six feet tall, weighing 180 pounds, and your occupation demands heavy manual work, then your need for carbohydrate or cereal food is greater than the daily requirement of a woman five feet two, weighing 115 pounds, who sits at a desk job all day. Her program demands a relatively small energy expenditure.

The amount of cereals and other carbohydrate foods included in your daily diet should be determined on the basis of the amount of food energy required by you as an individual each day. Most Americans include too much carbohydrate in their diet, so you are likely to find that you should reduce the quantity of cereals or cereal products you are eating, rather than add more.

Check your weight regularly to be sure you are not overeating. Those extra pounds have a sly way of slipping up on you—before you realize it, you have a few unwanted bulges here and there.

Cereals are known primarily for the starch or carbohydrate that they contribute to the diet. In addition they are a source of thiamin and riboflavin (two of the B vitamins), calcium, phosphorus, iron, and incomplete protein in small but significant amounts. Whole grain cereals and breads supply

the same amount of calories or food energy as white bread or refined cereals. Whole grain cereals and breads, if included in a reduction diet program, are included because they usually give a greater amount of other nutrients such as iron and the B vitamins—not because of a difference in the caloric content.

There are three classifications of cereals which might well be defined. Whole grain bread or cereal is a grain product which is left in its natural state—that is, it has not been processed to remove the bran or endosperm. These parts of the grain contain valuable nutrients (iron, protein, vitamin B.)

A restored cereal is one made from a grain or portion of one or more grains to which have been added sufficient amounts of thiamin, niacin and iron to bring the amount of these nutrients up to the normal level.

During the last war enriched cereals made their appearance—vitamins and minerals were added in quantity greater than the normal original whole grain levels. In some cases nutrients which were not present in significant amounts in the original grain have been added to the product. Enriched cereals and cereal products are still available for consumer use.

KODAKERY ads are accepted on a first-come, first-served basis. Department correspondents in each Kodak Division are supplied with ad blanks which, when your ad is typed or printed on them in 25 words or less, are put in the Company mail addressed to "KODAKERY," or handed in to your plant editor. All ads should be received by KODAKERY before 10 a.m., Tuesday, of the week preceding issue. HOME PHONE NUMBERS OR ADDRESSES MUST BE USED IN ADS. KODAKERY reserves the right to refuse ads and to limit the number of words used. Suggested types are: FOR SALE, FOR RENT, WANTED, WANTED TO RENT, LOST AND FOUND, SWAPS. KODAKERY READERS ARE ASKED TO PLACE ADS ONLY FOR THEMSELVES AND HOUSEHOLD—NOT FOR FRIENDS OR RELATIVES. TO DO THIS IS TO DENY SPACE TO THE PEOPLE OF KODAK FOR WHOM THIS SPACE IS RESERVED.

It's a Joke, Son!

He kissed her in the garden,
 It was a moonlight night;
 She was a marble statue,
 He was a wee bit tight.

He — "The bank has returned your check."
 She — "Isn't that wonderful? What shall we buy with it this time?"

The new cook asked her mistress:
 "Where bane your son? I not be seeing him lately."
 "My son," replied her mistress proudly, "has gone back to Yale. I miss him dreadfully, though."
 "Yah, I know yoost how you feel. My brother is been in yail six times already."

Sports Roundup

Joe Hurts Finger . . . KO Eyes Bowling Year; Walts Return . . . Mary Alice Runner-Up

"Jetball" Joe Witzigman will be absent from the mound for the Kaypees for at least three weeks, the result of a broken finger on his pitching hand, received while playing in a Sunday morning league. Four stitches were taken in the injured digit. . . . One of the best tennis matches of the Dusty League season is slated for Wednesday, Aug. 20, pitting Phil Michlin and company against the league-leading Kodak Park court team. Three members of the Kaypee racquet wielders — John Schilling, Newt Shearer and Joe Rorick — were among the starters in the city singles championships at the Tennis Club of Rochester.

Witzigman

With all the hot weather and everything, it seems a bit unseasonal, but nevertheless, the KO National League bowlers have

Office Golfers Set for Sept. 6

The final golf tournament of the season for the Kodak Office men is scheduled for Sept. 6 at Churchville instead of at Ridgemont as originally planned.

The meet will settle the Office championship which has turned into a two-man affair—Pete Culross, last year's champ, and Jimmie Forgense. The two tied for 84's in the first meet at LeRoy and got identical 86's at Lake Shore. George Yeoman's, whose 85 won low gross at Lake Shore, did not participate in the LeRoy meet.

slated their first meeting of the year the latter part of this month to select teams. Don Spitale, league proxy, is calling the meeting of league officers and captains. . . . Herm Koopman of Hawk-Eye finished in seventh spot in the T-U Hole-In-One golf tourney. He got a nine, one point behind the leaders, in the first round and in the shootoffs wound up in seventh. Playing off with Bill Rizzi, Herm and his opponent got 2's in the first shootoff, tied with 5's on the second and finally won out 8-3. . . . Carl Christ and John Barhite of the Park are taking bows for the excellent showing in the star packed Monroe Invitation golf tourney. Barhite copped top honors in the fifth flight.

The two Walts—Maslanka and Drojarski—out of action for most of the regular softball season, looked good to H-E softball fans in the Hawks' lineup for the City Tournament. . . . Ruth White, Kaypee softball and basketball star, will enter Brockport State Teachers College this fall to major in physical education. She recently completed a lifesaving course at the YWCA and served as a water sports instructor at the U. of R. this summer. . . . The Park's Dorothy Fox finished sixth in the women's division of the T-U Hole-In-One test. After tying with two others with 5's, Dottie carded a two in the playoffs.

Dept. 42 Keeps Record Clean

Dept. 42, defending champion in the H-E Intraplant Softball League, kept its record unblemished last week although it had two close calls.

After battling to a 2-2 tie with the Estimators, the Dept. 42 gang nosed out Recordak, 8-7. The tie game went 10 innings before being called. Hugh Marks, on the mound for the Estimators, limited his opponents to four hits, one of them a circuit clout by Al Moony. Charlie Hryunak was touched for 5 bingles, one a game-tying double in the seventh by Walt Drojarski. Dept. 42 scored their eight runs in the first frame and then staved off a Recordak rally for the victory. The game brought out the largest crowd of the season, due to the keen rivalry between the two teams. The "jockeying" of Coaches Burt Oakes and Jack Kowalski was almost as entertaining as the game.

The Memos clinched a tie for second by turning back Dept. 10 by a 10-1 count.

Dept. 32 triumphed over Dept. 10 by an 8-6 score, a three-run rally in the last of the sixth turning the trick. After dropping their first three tilts, Dept. 32 came back strong to win five out of six and wind up the year with a 5-4 record.

Pitcher's Home Run Wins For Shipping in KO Loop

Shipping took sole possession of first place in the Kodak Office Softball League when they nosed out Rochester Branch while Repair took the measure of the Office. Paul Mastrella was the hero

of the Shipping-Branch affair, which the Shippers took by a 2 to 1 count. Not only did Paul limit the Branch to two hits but clouted the game-winning home run in the last of the seventh. Mastrella also hung up 11 strikeouts. John Morton of the Branch was in rare form, also, allowing but two hits.

Repair took the measure of the Office in a wild slug-ging match, 17 to 16. Prior to this

Mastrella

Credit for being one of Hawk-Eye's staunchest softball fans goes to Bob Glennon who rarely missed a Major League encounter and is on hand at Seneca Park for most of the Intraplant League tilts. . . . And, speaking of the Intraplant League — there has been some mighty hot pitching this year. Gene Santucci's no-hit masterpiece, of course, was the highlight but, Al McCoy, Charlie Hryunak and Al Gruner turned in one-hitters and there have been a number of two- and three-hit tilts.

Glennon

Mary Alice Pegnam of Kodak Office finished second in the Second Flight of the Women's Rochester District Golf Association Tournament, being nosed out in the final match by Jane Howe, 2 and 1.

Bill DeHollander was one of several Kaypee nimrods who took part in the National Trap and Skeet Championships in Syracuse last weekend. . . . "Chuck" Jennings, twirler for the Bldg. 29 Shop team in the KPAA Twilight loop, realized a long-standing ambition last week when he turned in a no-hit, no-run performance against the Sensitometry softballers, winning 8-0. . . . Jim Gallagher's Kaypee Major League champs downed Mike Farrell's Dusty League outfit, 5-0, in a noon-hour exhibition at the Lake Avenue field on Aug. 6. Hurlers Harold "Shifty" Gears, Ken Busch and George Lint took their turns on the mound for the champs, with Joe Snook and Howie Neidermeier dividing pitching duties for the Dusties.

KPAA Planning Final Golf Meet

The third and final handicap KPAA golf event of the season will be held at Lake Shore Saturday morning from 6:30 to 11 o'clock. Prizes will be given for the best scores in each of the three divisions entered, based on the Caulkins system of handicapping. A tourney for KPAA girls is listed for Lake Shore on Aug. 18.

DPI Cold Turkeys	0	6	For.	163

Ed Siebert and Art Newcomb tied for top average of 24, 145 points each.

One Away — Phil Kling of West Webster is out at third and Gerry Rauber, Kaypee Dusties' third-sacker, throws to second to try for a double play. Dusties won, 14-1.

Kaypee Majors, Dusties, CW Majors Score Wins

Three Kodak teams advanced another notch in the City Softball Tournament last week while two others dropped by the wayside.

Kodak Park's Majors pounded out a 13-0 triumph over Pfau-dlers. Shifty Gears and Ken Busch allowed but three hits while their mates were collecting 14, three of them by Beane, Woodhall and Dick for extra bases.

Camera Works' Majors shut out Gleasons, 4-0, behind the one-hit twirling of Ed Mayer. He fanned four and issued but one free pass.

The Kodak Park Dusties scored a lopsided win over West Webster, 14-1, with Snook tossing a neat three-hitter. His mates pounded two WW hurlers for 15 safeties.

Hawks Lose Thriller

Bowing out in a thrilling 8-7 game was the Hawk-Eye Major League outfit. Delco was the victor. The Hawks took a commanding lead on the strength of a six-run spurge in the fourth but the Delcos evened the count and tallied a singleton in the last of the seventh for the win.

Camera Works' Dusties bowed to the Russers, 18-0, the winners scoring in every frame but one. The Cameras were able to garner but five hits and committed six mis-plays.

Scores by innings:
Hawk-Eye . . . 0 1 0 6 0 0 0 — 7 5 1
Delco . . . 0 0 1 1 1 2 1 — 8 10 0
