

**Honors for Kodak—**  
Ray Balousek, right foreground, presents to George Helberg, left, of EK a plaque from the Photographic Specialists of Detroit for outstanding service by the Company's Kodachrome Processing Div. The plaque is shown at right.

## Kodak Group Wins Honors

"Outstanding service" has won for the Kodachrome Processing Division of the Company an unusual and highly valued honor.

The Dec. 17 meeting of the Photographic Specialists of Detroit—a group of about 100 leading commercial and industrial photographers of the area—was highlighted by the presentation of a plaque to the division in honor of its outstanding service.

The presentation was made by Ray Balousek, president of the group, to George Helberg in behalf of the 638 members of EK's Kodachrome Processing Division at Kodak Park and Kodak Office.

"Kodachrome Processing Service," read the citation, "has been a 'job well done.' During the war period of shortages and the post-war period of more shortages, the service that has been given deserves recognition."

The presentation came as a complete surprise both to Helberg, who has been in contact with many members of the Photographic Specialists, and to the Company. When invited, Helberg was assured that no speechmaking was expected of him. Instead, he found himself guest of honor and official recipient on behalf of Kodak.

## Dr. Sheppard Retires at EK

Dr. Samuel E. Sheppard, one of the world's best known photographic scientists, has retired after 35 years with Kodak Research Laboratories.

His work in photography began while he was a student in London in the early 1900's. Most notable was his research on gelatine and sensitizing dyes. Dr. Sheppard also made such discoveries as a way to use powdered coal as fuel for submarines and the electroplating of rubber coatings on non-organic materials.

### Research on Gelatine

Of great importance to present-day photographic quality is Dr. Sheppard's work on gelatine. In the early use of gelatine to make photographic emulsions, results were unpredictable.

Dr. Sheppard and his associates made a major discovery when they found that the sensitizing action of gelatine for silver bromide was affected by the presence in gelatine of sulphur compounds. These were derivatives of mustard oil, presumably derived from the food of animals. They then devised ways of improving the standardization of such emulsions. With this knowledge manufacturers were able to make film of a more uniform quality.

By discovering a number of compounds which increased the sensitivity of film in various parts of the spectrum, Dr. Sheppard contributed further to the knowledge of sensitizing emulsions.

Born in England in 1882, Dr. Sheppard began specializing in photography when a chemistry student at the University College of London. He obtained his doctor of science degree in chemistry in

(Continued on Page 4)

# Highlights of '47 Show Progress in Many Fields

The year of 1947 faded into oblivion at the stroke of midnight Dec. 31 but on its pages penned by Father Time were numerous achievements by Kodak and its people. Some of these accomplishments will work for the benefit of mankind for many new years of the future.

## Herman C. Sievers' Death Closes Long Kodak Career

From store manager to vice-chairman of Kodak's board of directors is the story of Herman C. Sievers—a story which came to a close in death on Dec. 19, following a lengthy illness.

Mr. Sievers retired from the Company just a little more than a year ago because of ill health, ending a Kodak career that extended over 44 years.

The Kodak stores organization was his first love, and his business life was devoted to building up this phase of the business. He maintained his deep interest and pride in the operation of the stores and kept in close touch with them even when he succeeded to higher responsibilities with the Company.

### Joined EK in 1902

He joined Kodak back in 1902 when the Company purchased a photographic stock house in Sioux City, Iowa, of which he was manager. A year later Mr. Eastman called Mr. Sievers to Omaha to help negotiate the purchase of the Robert Dempster Company, a photographic supply house. When the transaction was completed, Mr. Eastman made Mr. Sievers president of the new company and manager of the store in Omaha. In 1904 he became manager of the Eastman Kodak Stores in Chicago, holding that position for 21 years. In 1915 he assumed an advisory capacity in the guidance of all other retail stores owned by Kodak, and in 1920 all the Company's retail subsidiaries in the U.S. and Canada came under his supervision. In 1929 he left Chicago to make his headquarters here.

### Widely Traveled

A man of marked vigor, Mr. Sievers traveled all over the country to inspect property under consideration for store or branch locations and many times personally handled leasing or purchasing negotiations.

He became an authority in the field of store operation because he was thoroughly familiar with every detail. His long experience and success in the Company's selling activities brought his appointment as EK sales manager in '32.

In 1934 he became a vice-president in charge of sales and advertising. In the latter capacity he not only was responsible for the advertising and sale of Kodak products in the United States, but generally supervised sales in foreign countries as well. A keen advocate of studying things firsthand, he made extensive tours through Europe, visiting Kodak units in England and on the Continent.

Mr. Sievers was elected to the board of directors in 1935, and in 1945 became its vice-chairman.

Funeral services were held Sunday, Dec. 21, at St. Paul's Episcopal Church, with Company officials and Company directors serving as honorary pallbearers. Burial was in Minneapolis in his native Minnesota. He was born in

Herman C. Sievers

1872 on a farm near Amboy, Minn.

"The death of Mr. Sievers brings grief to many Kodak people," said T. J. Hargrave, Company president, in tribute to the former Kodak executive.

"He served the Company faithfully and competently for 44 years in many capacities, but the record of his positions, impressive by itself, does not adequately measure his true achievements. Mr. Sievers virtually lived and breathed Kodak and in that total service he displayed at all times the wisdom, skill and virtue of a great executive, inspired by the kindness and sympathy of a true friend. Both within and without our organization, his passing will leave memories of highest esteem and affection."

In the laboratories where scientists conduct their research with the aid of test tubes and gadgets strange to the laymen, new isotopic concoctions were brought forth to assist in medical studies for improving the health of man.

From the development departments and laboratories came many new products—projectors, papers and films and improvements in cameras. And the thousands of people in the plants, offices and stores helped to put these products in the hands of the public to use them for pleasure and profit.

Kodak folks won recognition from the government, from photographic societies and other groups for their accomplishments. Two of Kodak's plants—Hawk-Eye and Camera Works—won special awards in a statewide safety contest and other departments received recognition for their efforts to safeguard their people.

### New Buildings Progress

It was a year that saw physical expansion of the Company, with construction going ahead where materials permitted. New sections of the recreation building at Kodak Park and the Color Print Service Bldg. were opened and the new water intake system put into use.

Preparations were disclosed for making the George Eastman House a center for instruction and demonstration of the art and science of photography from its beginning. Company sales soared to new totals in the year and earnings by people with ideas reached record proportions in the history of Kodak's Suggestion System.

For each and every Kodaker the year wound up with the good news that the board of directors voted a Wage Dividend of \$11,650,000, largest in the Company's history. It will be shared by 50,000 members of Kodak in the Western Hemisphere. And that number is a new record, too.

Let's take a look at the highlights of 1947 chronologically:

January—T. F. Pevear is named assistant general sales manager of

(Continued on Page 4)

## John P. Newbury Named Eastman Gelatine Manager

Appointment of John P. Newbury as general manager of Eastman Gelatine Corp., Peabody, Mass., has been announced by Albert Goodhue, president of that company, who also has been its general manager.

Newbury has been assistant general manager since Eastman Gelatine was formed and became a part of Kodak back in August 1930. In February 1935 he was made a director of that company, and became a vice-president in February 1943.

He joined Eastman Gelatine's predecessor, the Crystal Gelatine Plant of the American Glue Company, in February 1915, shortly after receiving his degree in chemical engineering at Massachusetts Institute of Technology in the class of 1914. He began as a chemist and in 1918 was made superintendent of the gelatine division. In 1928 he was made general superintendent of the gelatine and glue division and retained that position until the gelatine interests of the American Glue Company were purchased by Kodak.

J. P. Newbury

Eastman Gelatine has 372 employees and is one of Kodak's two sources of gelatine, the other being the Kodak Park gelatine plant.

### Bonus Assist for Vets

Kodak is assisting its World War II veterans in filing applications for the N. Y. State Veterans' Bonus, which started Jan. 1.

Application blanks are available at each of the plants and Office—from the veterans' coordinator, Bldg. 99, Kodak Park; Industrial Relations Dept. at Camera Works, NOD and Hawk-Eye, and from the Personnel Dept. at KO.

The Company also is providing for EK veterans photostat service in supplying full-size copies of discharge papers which must accompany the application. Notary public service also is available.

Families of deceased veterans are advised to seek the assistance of the local Veterans' Information Bureau or the Red Cross in obtaining necessary information on applications.

## Hard Hats Save 2 at KP 4 Road Men End Service With Kodak

**Lifesaver** — Leon Dowd Jr., right, shows to Tom Wright, assistant safety director at KP, the shattered safety helmet which Dowd was wearing when a 4-pound bar fell 20 feet and struck him on the head. The hard hat took the shock. Dowd escaped injury.

Leon Dowd Jr. of the E&M Field Division 9 is thanking his lucky stars that he's a firm believer in wearing a safety helmet on construction jobs. Dowd was assembling boiler tubes in the

in the course of construction at the Power Plant. He leaned out past the building line while maneuvering the wire. Just then a 3 by 4 by 3 piece of planking hurtled down and struck him on the head, splitting his helmet. Thomas escaped injury.

The bar smashed the outer shell of Dowd's "hard-boiled" hat. Momentarily stunned by the blow, Dowd escaped injury. He credited the safety hat with preventing serious injury and perhaps saving his life.

Lyle J. Thomas, also of F.D. 9, is another confirmed subscriber to the protective values of the hard helmet. Here's why:

Lyle was wiring wood bumper blocks to columns to protect them

## Exams Slated For Diploma

Kodak men and women who for some reason or another did not or could not complete the required four years of high school attendance may now take an examination to qualify for a New York State High School Equivalency Diploma, recently established by the State Education Department.

Regardless of the amount of previous schooling, the Equivalency Diploma will be issued if satisfactory scores are attained on the tests. It is recognized as the legal equivalent of a high school diploma and can be accepted by employers and training agencies as such.

### Where to Get Forms

Application forms may be obtained from any high school in the state or by writing to the State Education Department, Division of Examination and Testing, Equivalency Testing Program, 353 Broadway, Albany 7, N.Y.

Kodak people who pass the examination are urged to bring their Equivalency Diploma in to their Personnel or Employment Dept. so that their employment record may be credited.

## Best of Snapshots Displayed in Bank

Eighty-two prize winners in the 1947 Newspaper National Snapshot Awards, sponsored annually by Kodak, are now on display at the Lincoln-Rochester Trust Co. In addition to the 12 major prize winners, including the \$1000 Grand Prize winner, and 70 winners of \$50 awards in the nationwide competitions, there is a display of excellent color prints.

The Newspaper National Snapshot Awards pictures were viewed by more than a half-million people in December when they appeared in the Grand Lounge of the Radio City Music Hall in New York City following the national judging in Explorers' Hall of the National Geographic Society, Washington. The exhibit will be shown through Jan. 23.

## 4 Road Men End Service With Kodak

Four veteran members of Kodak's road force retired Jan. 1, it is announced. They are Eugene A. Moore and Francis C. Fitzpatrick, Company salesmen, and Edgar R. Nichols and Scott A. Anderson, technical representatives.

The four are guests of honor at the annual salesmen's meeting here this week. Longest Company service record of the four is held by Edgar R. Nichols, technical representative for the paper division. Nick entered the photographic field in 1899 at the O. W. Chase Studio in St. Johnsbury, Vt., at a salary of \$1.25 a week. In 1902 he owned his own studio in Bristol, Vt., but forsook that to join Kodak on May 14, 1906. He has been Kodak's representative in Pittsburgh for the succeeding 41 years.

Gene Moore joined the Company 38 years ago as Boston salesman and all his experience has been right in the city of Boston. Before coming to Kodak he had been with the Andrew J. Lloyd Co. from 1896 to 1904, and then spent three years with the Pinkham and Smith Co. In 1907 he joined Artura Photo Paper Co., and two years later, Kodak.

### 38 Years for Anderson

Iowa has been the territory for Scotty Anderson since he joined the Company 38 years ago. Experienced in studios in Cleveland and as a demonstrator with American Aristotype Co., he came to Kodak as a technical representative for the paper division Feb. 25, 1909.

Salesman "Fitz" Fitzpatrick got his photographic start in the photo department of Wanamaker's, in New York. On Mar. 17, 1913, he joined the Company as salesman for Brooklyn, Long Island and lower Manhattan. Later he concentrated on the first two until transferring to Syracuse in 1925. In 1936 he shifted to Pittsburgh, where he is still located. He has been with the Company 34 years.

### Photo Patter

## Leading Lines Attract Eye To Heart of Snapshots

**Eye-Catchers** — The strong, dramatic lines of the railroad tracks in this snapshot catch the eye and lead it directly to the center of interest. Recognize the tall building?

Just as most movie ads have a picture of a luscious lady to attract and hold the eye, so should good snapshots have an "eye-catcher." This can be the line of a road, the banks of a river or brook, the sidewalk of a city street, or any one of a score of other things — including action, direct or implied — which will catch the eye and "lead it into" the picture.

Look at today's illustration. The

### Striking Example

This illustration, of course, is a rather striking example, but it was chosen to illustrate as dynamically as possible a very important rule of good picture composition. That is, always arrange your composition so that it has a definite center of interest, and so that all attention will be drawn to that point just as forcefully as possible.

The next time you're shooting landscapes, street scenes or architectural subjects, study your potential composition critically. See if there are any lines that will lead to the heart of the picture. If there are, perhaps you can make the picture more forceful by changing your point of view. Sometimes a change of viewpoint — even as little as 10 or 15 feet — will alter entirely the dramatic quality of a picture.

### 2 Alternates

If there aren't any lines leading into the picture there are two other possibilities — either place a person in the foreground and have him or her looking into the picture in such a way that the eye is carried in toward the heart of the picture, or arrange the composition so that any action in the picture is leading into the scene.

For example, in picturing a spacious scene from a cliff or high building, pose someone in the foreground looking out over the scene. Or, if shooting a football game, photograph the action so that the players move toward the far side of the picture rather than the near side, and you'll achieve the same results.

The trick of leading the eye into a snapshot is an easy one to learn and to apply. It takes a little conscious thought and concentration but it's well worth the effort.

"Your wife has had a strange expression on her face lately."

"Yeah. She is trying to resemble her latest photograph."

## Graphic Arts Session Jan. 18 To Draw Leading Experts

More than 50 nationally known technical people in the graphic arts industry will come to Rochester Sunday, Jan. 18, for a meeting of the Rochester Technical Section, Photographic Society of America.

### Gardner to Speak

Richard W. Gardner of EK's Graphic Arts Dept. is one of five speakers chosen by John McMaster of the same department, and the section's program chairman, to discuss topics featuring all branches of the graphic arts. Dick will speak on "Fundamentals of Photomechanical Reproduction."

Dr. Mark Ellington, president of the Rochester Institute of Technology, will discuss "A Program of Research and Development for the Graphic Arts Industry" at the evening session in the Chamber of Commerce.

### Others on Program

Others who will be on the afternoon program with Gardner are: Michael Bruno, Lithographic Technical Foundation, "Control of Tone Reproduction in Photomechanical Processing"; Clyde Huntington of R. R. Donnelley and Sons Co., who will talk on color correction, and Herman Freund, Intertype Corporation, "The History of Photographic Typesetting."

On Monday the visitors will be guests of Kodak. They will inspect a special historical exhibit, part of which later will be on display in the George Eastman House. After lunch at Kodak Office they will visit RIT. The day's program will be concluded with a tour of Kodak Park.

## Guards Save Lab's Payroll

"Payroll Guards Foil Robbery" read the newspaper headlines following the attempted holdup of the \$30,008 payroll for the Chicago Processing Laboratory.

Two armed guards, employees of the Brinks Express Co., were delivering the money to the lab Dec. 19 when they were surrounded suddenly by five gunmen. The robbers covered them with a pair of shotguns and a pistol and seized the money bag.

The guards, however, opened fire and the robbers fired back. One of the guards wrested the money bag away at close quarters during the exchange of fire, and the hold-up men jumped into their car and raced away.

A police squad car, cruising nearby, chased the robbers but in an exchange of shots the squad car's radiator was damaged and the bandits again made their escape. But the payroll was delivered, as usual!

## Bill Falconer Named To N. Y. Stores Post

William Falconer has taken over his duties as assistant to the manager of the New York Stores.

Falconer, who has been in charge of the 23rd St. Store, New York, which specialized in Graphic Arts, has been transferred to the new main store at West 39th St., where Graphic Arts and Professional Sales are now located.

T. M. Reg. U.S. Pat. Office.

Test your knowledge with the questions below. Grade 10 for each question. If you score 60 you're "super"; 50—you are still remarkable; 40—not bad at all; 30—time to brush up!

(Answers on Page 4)

- How many years ago was the trademark "Kodak" coined by Mr. Eastman?  
35    50    60    88
- How can one prevent camera movement when holding the camera to take pictures?  
(a) Balance the camera on one knee to steady it.  
(b) Hold the camera against the body, if it has a reflecting viewfinder, or against the head if it has an eye-level finder. Take a deep breath and hold it before you release shutter.  
(c) Snap the shutter quickly before you have an opportunity to move the camera.
- What is halation?  
(a) A halo effect caused by reflection of rays of light from the back of the negative.  
(b) Negative whose surface is pitted due to an overabundance of light striking it.  
(c) Negative which turns out completely black after processing due to lack of sufficient light striking it.
- How many Kodak people in Rochester will share in the Wage Dividend to be paid next March?  
17,000    23,000    34,000
- What is one of the latest large-scale uses of Tenite tubing?  
(a) In construction of huge smoke chimneys for industrial plants.  
(b) It is used in piping to carry gas into homes.  
(c) It is used for making tubular skates.
- How many teams are playing in the Kodak Interplant Basketball League?  
2    4    8    16

**Pioneers' Dinner** — Hundreds of members of the Pioneers' Club of Kodak Park gathered recently for their annual dinner program. It brought together active and retired people with 25 and more years of service for a renewal of friendships in an

evening filled with fun, fellowship and good food. At left, Lillian LaBar, Bldg. 26, left, and Laura McNaughton are greeted by Frank Walch, president of the Pioneers' Club. In center, l. to r., I. N. Hultman, EK vice-president and assistant general manager of KP; C. K. Flint, EK vice-

president and general manager of Kodak Park, and Perley S. Wilcox, chairman of the EK board of directors, and G. T. Lane, assistant manager of KP. In picture at right are, l. to r., Fred Pringle, John Pembroke and H. J. Knowlton.

### It's in the Park

## Parties Enliven Yule Season ... It Wasn't 'Shifty,' Mrs. Scott

Ray Schutt and Bernie Reeves, F.D. 4, walked off with top honors in the KPAA's first of a series of noonhour pinocle tournaments, registering 14,060 points. Gene O'Brien and Bill Lechner, F.D. 8,

A couple of smart pinocle players are Ray Schutt, left, and Bernie Reeves.

placed second with 13,230 points. Hazel Luce, Paper Mill, is back after a month's vacation in Florida which included a short stay in Key West. Shirley Newton, formerly of the Paper Mill Office and now a registered nurse, accompanied her. Joe Mahan, retired member of the Paper Mill, recently paid his first visit to the plant since leaving the Company. The Girls' Club of Bldg. 48 recently held its annual Christmas party at Mike Conroy's. Belle Ford, Harriet Keegan and Marge Daggar were in charge of arrangements. Another large throng turned out for the Christmas fete held Dec. 20 at Barnard Grill by members of the Paper Mill. Bob Gell headed the committee in charge. David Blide, Earl Rowley, Ray Lutz and Edward Draver of the Sundries Mfg. supervisory staff were guests of honor at a party held recently at the Old Corner House. Gifts were presented. James Dalton, also of Sundries, has taken over new duties in the Spooling Dept., Bldg. 25.

Frances McGregor has been added to the KODAKERY staff in Color Control, Bldg. 65. Louis Gerhardt, Bldg. 23, served as chairman of the committee which handled arrangements for the first annual Christmas dance of the Engineering Dept. held in Doud Post on Dec. 12. In addition to dancing and door prizes, an entertainment was presented and a buffet lunch was served. Nine fathers were "crowned" in the Cotton Washing Dept. during the past year. The new floorwalkers are Anton Argus, Dale Whitman, Ed Bischoff, James Magee, Warren Braden, Clarence Baldwin, Harvey Walters, William Mastin and Luigi Burge. Doris Jenkins has been added temporarily to the KPAA Office staff in new Bldg. 28. Her husband, Russell, is in the Engineering Dept., Bldg. 23. "Rocky" Scott, the "Mr. Happy" of the Cafeteria Dept., tells one about his wife that flatters Harold (Shifty) Gears of the KPAA Office. Walking up to a well-dressed, bespectacled gentleman in the lobby of the RKO Palace Theater recently, Mrs. Scott addressed him with "Hello, Shifty." Getting an indifferent stare in return, she was about to form her own opinion of the popular softball ace when someone politely informed her that the young man in question was the equally renowned Tommy Dorsey, one of America's outstanding dance orchestra leaders.

Frances McGregor

When Fred Walker and Jim Hough of Roll Coating recently took in a "turkey shoot" at a local range, it was their wives who came home with the loot. A 25-year-service anniversary party for Agnes Sheehan and Sarah Mears, X-ray Sheet Film, was held at the Dutch Mill on Dec. 4. Herb Bieber, departmental foreman, presented the girls with wrist watches on behalf of their associates. Recently confined to his home by illness was Sherman White of the Roll Coating Dept. Della Winkler, Film Planning and Record, all aglow with the excitement of her recent vacation in Florida, lost additional interest in these parts when she received a parking ticket from the local police for invading a restricted zone. The Southern Tier wilds smiled on Ralph Slocum, Roll Coating, who bagged his deer on the opening day of the fall season. Dr. Nathan Francis, Medical Dept., attended the annual convention of the American Academy of Allergy in St. Louis, Mo., recently. Girls of the Reel

Agnes Sheehan, left, and Sarah Mears receive wrist watches presented by Herb Bieber, X-ray Sheet Film.

Mfg. Dept. held their Christmas party at Ridgmont Golf Club on Dec. 17. Laura Smith and Eleanor Steehler completed the arrangements, with Annie Flanagan leading the singing.

Margaret Haines and Pat Kintz, Time Office, attended the New Year's Eve formal at the Chamber of Commerce. Clarence Stilson and Fred Writz, Machine Shop, have returned to their duties after undergoing operations. William Daggar, formerly of the E&M Dept., writes that he has been appointed manager of the FHA Loan

## 10 at KP End Long Service In New Year

Seven members of the Machine Shop are included on the list of 10 Park people who retired from active duty on Jan. 1.

They are Frank J. Fink, Victor G. Knittel, Arthur H. Scales, Lewis E. Barnes, Eben Church, Max A. Einkenkel and Adolf Leyrer. The others are Dr. Samuel E. Sheppard, Research Laboratories; Izola H. MacDonald, Roll Film, and Charles M. Froelicher, Film Emulsion.

Fink joined Kodak in 1909, serving as a tool room foreman at Hawk-Eye. In 1924 he transferred to Camera Works where he took over foreman's duties in the Ciné-Kodak Machine Room. After a two-year leave of absence from 1934 to 1936, he came to the Experimental Dept. at Kodak Park and has been in the Machine Shop for the past 11 years.

### Joined EK in 1913

Dr. Sheppard has been associated with Kodak since 1913 (see Page 1) while Knittel started at the Park in 1916 after spending two years at Camera Works. Scales has been a Machine Shop regular since 1915. Mrs. MacDonald has been in the Roll Film Dept. since 1918, Barnes starting in the Machine Shop in 1919. The latter plans to occupy his celery farm near Sodas. Froelicher came to Kodak Park in 1919. Church, after more than 24 years of service, is looking forward to a winter vacation in the South.

Two other Machine Shop members, Einkenkel and Leyrer, started in '34 and '36 respectively and are looking forward to leisure hours.

## 40-Year Man, 2 Others Die

Three Kodak Park men, one a 40-year member, died in December.

Anthony Andriatch, who retired in 1945 after 40 years with the Company, died Dec. 20, 1947. He joined the Film Emul. Coating Dept. in 1905 and remained with that department until his retirement.

When Andriatch joined KP there were only a few buildings and a few thousand people at the Park. He saw it grow to its present impressive size. Meantime he became a member of Pioneers' Club.

Edward E. Schmidt, Plant Protection Dept., died suddenly Dec. 17, 1947. He started in the Laundry on Aug. 26, 1925, and was transferred to the Plant Protection Dept. on Apr. 28, 1940.

Wilfred Simpson, Ciné-Kodak Processing Dept., died Dec. 23, 1947. He had been out ill since Dec. 12. Simpson started with the Company Apr. 26, 1944, in the 16-mm. Dept.

Dept. of the First National Bank of Phoenix, Ariz. Now residing at 334 N. 16th St., in Phoenix, Bill is anxious to hear from his Kodak Park friends. A sister, Margaret, is a member of the Printing Dept.

## 472 Ideas Click at KP, Earn \$5891 for Period

**'Happy New Year'** — You can bet it was just that for George Kliment of Roll Coating Finishing Dept. for he received a check for \$700 which he earned in the 12th period on a suggestion on finishing wheels used on film coating machines.

With members of the Ciné Processing, Paper Mill, Roll Coating and E&M Depts. leading the way, Kodak Park suggesters made one of their best showings of the year during the 12th period which ended Nov. 29, according to the Suggestion Office.

Of the 499 suggestion ideas reviewed 472 were adopted and a cash total of \$5891.50 paid out. Among the winners were 62 women, the third largest number recorded since Jan. 1, 1947.

The highest award of the period, a check for \$700, went to George Kliment of Roll Coating Finishing whose idea, involving the finishing of wheels used in film coating machines, has effected a saving in time and material. The procedure involves the use of different type buffs than those formerly used. His previous high award was \$20.

### Earns \$300

Ralph Moore of Film Emulsion Coating was awarded \$300 for a suggestion concerning an improved operating technique on a film emulsion coating machine.

Peter Boerjan, Sundries Manufacturing, chalked up his fifth winning suggestion, the adoption of which increased the capacity of ovens used for baking some of the items produced in the department. He received \$135.

Two Baryta members, Donald B. Thomson and Gordon G. Berg shared a \$75 award for a modification of a suggestion regarding change in the method formerly used to ship rolls of coated paper.

Walter Doescher of the Metal Shop received his first award, a check for \$75 for proposing a change in the design of some processing equipment which is being manufactured in the Metal Shop. It saves material and welding time.

Checks for \$60 went to William J. Fraser, Hollywood Processing Station; Harry E. Yost, Paper Mill; Walter E. Moshier, Reel Manufacturing; Herman A. Zeitvogel,

Printing, and jointly to Josephine Lasaponara and Shirley Cutaker, also of Printing.

Fraser's idea pertains to the installation of a crank to facilitate focusing of a color print mechanism. By changing the position of one of the rolls in a paper-making machine Yost developed a better operating condition.

The operation of a metal baler was improved by Moshier's suggestion while Zeitvogel's idea, relating to negative albums, recommended the elimination of some material. The Lasaponara-Cutaker duo also scored on an improvement in making negative albums.

Winners of \$50 were Lucian Smith, Film Emulsion Coating; Lawrence Fess, 16-mm. Processing; Archibald Hayes, Ciné - Kodak Processing; Edward Amish, Plant Protection; Clarence Beebe, F.D. 3; John Bagne, Machine Shop; Alfred C. Walker, E&M Planning; Jack Holloway, F.D. 3; Daniel Tomlinson, E&M Shop Management; Smith Dole, Machine Shop, and Edwin Warren, E&M Planning.

A total of \$181 was also paid to suggesters in Kodak's Processing Stations in Chicago, Flushing and Hollywood.

## Smokes on KPAA Stage Show, Too

The second smoker of the winter season will be held Jan. 16 in the auditorium of old Bldg. 28 for male members of the Kodak Park Athletic Association. An interesting variety of movie and stage fare is being prepared and another full house is expected.

Last month's show drew a capacity turnout with many retired Park men who are life members of the KPAA as guests of honor.

## 1948 Outlook Pictured At Sales Meet

The Kodak outlook for 1948, as it shapes up from facts and figures assembled by the Company, was pictured for 60 EK salesmen gathered here this week.

James E. McGhee, vice-president and general sales manager, introduced Dr. A. K. Chapman, vice-president and general manager, who welcomed the group. Marion B. Folsom, Company treasurer, spoke on "What's Ahead in 1948." E. R. King of the Statistical Dept. discussed the expected production for the year.

Most of the meetings are being conducted at 283 State St., where the Tuesday morning session featured talks by McGhee, Ted Peavey, Horace Thomas, Bill Barr and Lynn Galloway. The salesmen also visited the plants.

Some of the conference sessions were conducted by W. S. Allen, M. H. Donahoe Jr. and Fred Welsh.

On Wednesday morning a presentation was given by the Advertising Dept. concerning 1948 plans.

Speakers today were Glenn Mentch, head of the Sales Service Dept.; Thomas J. Craig, who discussed the Repair and Film Processing Service Depts., and N. A. Van De Carr and C. R. Resler, whose topic was Professional Sales. This evening the sessions will be summarized by McGhee, N. B. Green and J. W. Scott.

K. O. Richardson will speak on photofinishing equipment tomorrow and Horace Thomas will introduce a sound motion picture produced by the Informational Films Dept.

The annual banquet is slated tomorrow night with McGhee as toastmaster. Brief talks will be given by Perley S. Wilcox, chairman of the boards of EK and TEC; A. Stuber, EK vice-president in charge of sales and advertising; Dr. Chapman, and T. J. Hargrave, Company president.

**Explorers** — The wife of Bradford Washburn, pictured atop Mt. McKinley with her explorer husband, will address Kodak Park Foremen's Club Tuesday night, Jan. 13.

## EK Foremen List Explorer

"Seven men and one woman reached the roof of North America today, attaining the 20,270-foot peak of Mt. McKinley to climax 'Operation White Tower.'"

So read a newspaper account dated June 10, 1947, and announcing to the world that, for the first time in history, a woman, Mrs. Bradford Washburn, had scaled the summit of towering Mt. McKinley in Alaska.

Mrs. Washburn comes to Rochester on Jan. 13 to address the Kodak Park Foremen's Club at John Marshall High School. Her lecture on "Operation White Tower" will be illustrated with color pictures taken on the very top of the continent.

A well-balanced stage show will precede the lecture, and music will be furnished by Frank Skultety's orchestra. Dinner will be served in the new Bldg. 28 cafeteria beginning at 5 p.m.

## George Eastman House Board Names Officers

Preparations for the setting up of the George Eastman House Inc. were given impetus recently with organization of its board of trustees and executive committee.

The educational institute is being established as a memorial to George Eastman and will exhibit the progress of the art and science of photography.

James E. Gleason, head of the Gleason Works here, and a close friend of Mr. Eastman, was named chairman of the board of trustees and chairman of the executive committee. Charles F. Hutchison of Kodak Park was elected board vice-chairman.

### Mees Heads Trustees

President of the board of trustees is Dr. C. E. K. Mees, EK vice-president and director of research for Kodak. One of the world's leading authorities on photography, Dr. Mees will keep a guiding hand on the new institute in its formative stages.

Other board officers are Dr. Albert D. Kaiser, city health officer, vice-president; Raymond N. Ball, president of the Lincoln-Rochester Trust Company, treasurer, and Sherman Farnham, secretary.

On the executive committee are T. J. Hargrave, Kodak president, Dr. Albert K. Chapman, Kodak vice-president and general manager; Alan Valentine, president of the University of Rochester, and M. Herbert Eisenhart, president of Bausch & Lomb Optical Company. Mr. Gleason is an ex-officio member of the committee.

At the organization meeting presided over by Mr. Hargrave as temporary chairman, the original charter from the New York State Board of Regents was presented.

One of the first official acts of the board was the adoption of resolutions accepting transfer of the George Eastman House and contributions offered by Kodak for operation of the educational institute. It is expected to be opened within two years.

**Receives RPS Medal** — Presentation of Great Britain's Royal Photographic Society 1946 Progress Medal was made last week to John G. Capstaff, second from right, head of Kodak's Research Laboratories' photographic department. Making the presentation was Dr. F. J. Tritton, second from left, RPS president. Others participating in the ceremony at Kodak Park were Don McMaster, left, EK vice-president and assistant general manager, and Dr. C. J. Staud, right, director of the Research Laboratories. Announcement of the award, made last April, marked the sixth time a Kodaker has been recipient of the award.

## Dr. Sheppard Retires at KP

(Continued from Page 1)  
1906 for a thesis on formation of the latent photographic image and the chemistry of development. The research and thesis were done jointly with Dr. C. E. K. Mees, Kodak vice-president, who obtained his graduate degree at the same time. He has been a lifelong friend and associate of Dr. Sheppard in photography.

Published in 1907 as "Investigation on the Theory of the Photographic Process," the thesis is a photographic classic known to workers in this field simply as "Sheppard and Mees."

After completing studies on the continent, Dr. Sheppard in 1910 joined the research staff of the photographic firm of Wratten & Wainwright, which was directed by Dr. Mees.

In 1913 the Kodak Research Laboratories were newly organized by Dr. Mees, and Dr. Sheppard came to Rochester, joining the lab staff. In 1920 he became head of the department of physical, inorganic and analytical chemistry of the lab and the next year was placed in charge of development of Eastman X-ray screens. Later he organized Kodak's department for manufacturing the X-ray screens.

Dr. Sheppard served as acting director of the laboratories in 1922 and 1923 during Dr. Mees' absence in Europe. In 1942 he was appointed assistant director of research.

At one time or another Dr. Sheppard has investigated nearly every aspect of the photographic process. He has published some 250 scientific papers and several books, including "Gelatin in Photography," and "Silver Bromide Grain of Photographic Emulsions." He holds, either alone or with co-authors, some 90 patents dealing chiefly with photographic products and processes.

His research achievements have gained for him wide recognition. An honorary fellowship in the

voted by the board of directors. It will be shared by 50,000 Kodak men and women of the Western Hemisphere. . . . Ideas spawned in the minds of Kodakers pile up a total of \$89,325.20 earnings on suggestions in 10 periods of 1947.

**December** — Special Eastman Kodak photographic plates, with fast emulsions, go to Palomar to boost "seeing power" of new 200-inch telescope for use in probing universe. . . . Herman C. Sievers dies little more than year after retirement as vice-chairman of Kodak's board of directors. . . . "Kodak," world-famous trademark, coined 60 years ago by George Eastman.

(Questions on Page 2)

1. George Eastman coined the trademark "Kodak" 60 years ago last month.
2. To prevent camera movement in hand-held snapshots hold the camera against the body if it has a reflecting viewfinder, or against the head if it has an eye-level finder. Draw a deep breath and hold it an instant before you release the shutter. Squeeze the exposure lever gently—don't punch it!
3. Halation is a halo effect around a bright object. It is caused by reflection of rays of light from the back of the negative. All Kodak films now are treated to prevent halation.
4. About 34,000 Kodak members in Rochester will share in the Wage Dividend to be paid next March.
5. One of the latest large-scale uses of Tenite tubing is in replacing steel gas pipes to carry the gas into homes from the street mains.
6. There are four teams entered in the Kodak Interplant Basketball League. They represent Kodak Park, Camera Works, Hawk-Eye and Kodak Office.

Dr. Samuel E. Sheppard

Royal Photographic Society was awarded to him in 1926 and in 1928 he received the Society's Progress Medal and the Hurter and Driffield Medal. The Photographic Society of Stockholm and the American Chemical Society also awarded medals to him and in 1946 he was elected an honorary fellow of the Photographic Society of America, its highest honor.

## EK Progress in Many Fields Cited in 1947

(Continued from Page 1)

Kodak and Thomas M. Connors becomes manager of EK's New York Branch. Gerould T. Lane was appointed assistant manager of Kodak Park. . . . Second Annual National High School Photographic Awards announced. . . . Kodak Brasileira discloses plans for new finishing lab. . . . Eastman Savings and Loan lists assets of \$14,758,135 for '46, a new record.

**February**—Commercial photographers hear of Kodak Durol, new film developer. . . . Larry Peck of Camera Works starts off first period with suggestion that nets a neat \$1000. . . . The Master Model Kodaslide Projector makes bow at Cleveland convention. . . . Adolph Stuber and Marion B. Folsom named to Kodak's board of directors. . . . EK supplies "heavy" nitrogen to aid in medical research. . . . Hollywood Lab begins printing Kodachromes.

**March**—Kodak board of directors recommends to stockholders a 5 for 1 split of the common stock. . . . Camera Works and Hawk-Eye receive special safety awards in statewide contest. . . . Company distributes \$8,100,000 Wage Dividend, the largest in the history of Kodak, to 48,800 in the Western Hemisphere. . . . Kodak Employee Benefits costs reach a new high of \$24,121,985 for 1946.

**April**—Kodak rapid-processing machine joins in quick news coverage demonstration. . . . New technique of electronic sealing of transparent boxes exhibited. . . . John G. Capstaff receives Progress Medal from Great Britain's Royal Photographic Society.

**May**—Company reports consolidated sales totaling \$71,500,000 for the first quarter of 1947. . . . Stockholders authorize 5 for 1 stock split. . . . TEC ends operation of government-owned plant at Oak Ridge, Tenn. . . . CW's Edward Lauterbach completes 50 years with Kodak. . . . James A. Jackson of KP sets new mark with \$1500 for an initial award on a sugges-

tion. . . . Kodak directors re-elect officers. . . . EK scientists produce richer Carbon 13.

**June**—\$34,274.15 paid on accepted suggestions in first four periods of 1947. . . . Kodak Ortho Stripping Film disclosed to trade at newspaper publishers' convention. . . . Robert O. Henry of KP ties all-time high of \$1500 for suggestion award. . . . KP announces million-dollar refrigeration plant being constructed. . . . T. J. Hargrave, EK president, is named by President Truman as executive chairman of the Army-Navy Munitions Board. . . . Public hears of plans for George Eastman House, Inc., a center of instruction and demonstration of the art and science of photography. . . . Donald McMaster becomes vice-president and assistant general manager of Company. . . . J. Michael Conner of Baltimore, Md., wins grand prize in National High School Photographic Awards.

**July**—EK offers 22 fellowships and TEC six to educational institutions. . . . Kodascope Eight-90, new 8-mm. projector, incorporates many new features. . . . Ed Ochrim comes up with \$1250 idea award, tops for Hawk-Eye. . . . Savings of ES&L members hit high of \$14,664,331, midyear report shows. . . . Frank W. Lovejoy book written as memorial tribute. . . . Company's annual report earns citation.

**August** — Up and up go idea awards, with Gerald A. Bentley of KP setting new record with \$2000 check. . . . Lab annex construction begins at KPW. . . . Kodak sales in Western Hemisphere for first half of year total \$153,581,750. That's 29 per cent ahead of same six periods of '46. . . . Kodak Ektacolor, that new negative color film, and new Kodak Master View Camera 4x5 unveiled before Photographers Association of America in Chicago. . . . Dr. Cyril J. Staud becomes new director of Kodak Research Lab.

**September**—Carrousel conveyor

ups output of Baby Brownie at Camera Works. . . . And now it's a woman! Elizabeth Freeh of KP hits the jackpot with a \$2000 idea to set new high mark for women and tie the best record of the men. . . . Flip of switch sends water flowing through Kodak's new 75-million-gallon intake pipe laid a mile and a half out into Lake Ontario. . . . And here's the highest for the year—an award of \$2500 for a single suggestion—shared by Leo Braun and Fred Greenfield of NOD. . . . KP finds faster way to make silver nitrate crystals. . . . Dr. E. K. Carver steps up to new post of technical assistant to KP's general manager. . . . Scores of EK men and women completing 25 years with the Company in 1947 collectively celebrate their anniversaries at EK dinner.

**October** — New line of papers and chemicals introduced under the name of Kodagraph for photocopying. . . . Frank Haddleton of KP becomes second 50-year man in '47. . . . Velite paper allows safe handling in normal room lighting. . . . Smart new Kodaslide Projector Model 1A and handy Kodak Photo Flasher ready for trade. . . . John Mulder and Earl Esty of KP are elected Associates of the Photographic Society of America. . . . CW produces 16-mm. motion picture camera for recording television programs on film. . . . Eastman High-Speed Camera reveals fly's secret of flight never before known to man.

**November** — First edition of Commercial Camera Magazine goes to commercial photogs. . . . Recordaks installed by two city banks to speed their work. . . . Ralph H. Talbot of KP named Fellow Member of the Society of Motion Picture Engineers. . . . B. M. Brown of TEC and Harold Baker, EK safety director, taken by death. . . . EK designs "photographic memory" for Navy. . . . Biggest news of the month was the \$11,650,000 Wage Dividend, largest in EK's history, which was

## '47 Picture Review

THE YEAR 1947 saw lots of interesting things happen around Kodak: new honors, new products, new records made. For example: the all-time high in individual suggestion awards was set and tied when two KP folks came in for \$2000 apiece. Elizabeth Freeh (1), Roll Film Spooling, and Gerard Bentley (2), Paper Mill, topped all previous suggesters. . . . (3) In April the new main cafeteria in Bldg. 28 opened in Kodak Park. With its 10 branch cafeterias, it serves 22,000 people daily. . . . (4) One of the year's many interesting guests at Kodak was Lt. Gen. Jimmy Doolittle, shown with his host, EK Vice-President Edward Peck (Ted) Curtis. . . . (5) President Truman joined the ranks of famous camera fans when he received a Kodak from the White House News Photographers' Association. . . . (6) Alfred Landucci, president of Kodak-Pathé, brought greetings from French film makers when he dropped in for the 25-year dinner in September. . . . (7) The year brought forth many new Kodak products including the new 16-mm. motion picture camera for recording television broadcasts. . . . (8) Safety in Company plants reached a new high in 1947. Plant safety directors display some of the awards won: Camera Works topped all with highest number of accident-free man-hours in the state; Hawk-Eye was second. . . . (9) PSA honors this year went to KP's John Mulder, left, and Earl Esty, center, elected Associates. They're being congratulated by Glenn E. Matthews. . . . (10) Kodak's Wage Dividend in 1947, the largest since the plan was set up in 1912, amounted to \$8,100,000. Arthur Spacher and Florence Stomczewski prepare checks for distribution. . . . (11) In June the establishment center for the world was announced. . . . (12) The K.P.A.A. boys' softball program last summer was bigger than ever, with 2100 youngsters participating. Here Tommy Castle, left, and Dennis Murray go over matters with the young athletes.

**That New Look!**—A ruffle here and a bow there can change your dresses surprisingly soon to the very newest lines. And there are easy ways to introduce your entire wardrobe to the latest in suit, coat and party dress lines for this new year.

## Fashion Theme for '48— 'Skirts—Going Down!'

The look-of-'48 that is so new may be achieved with your present wardrobe by following four basic outlines in style. Three of the easy ways to change to the new look apply to your dresses and one is a hint for your coats.

**At Home**—To Priscilla Pratt, KO's Accounting Dept., her favorite chair is her piano bench where she is able to practice and enjoy her music.

## KO's Pianist— Priscilla Pratt

Chords, scales and runs have been practiced for 18 years by Priscilla Pratt, a piano student for that time.

The KO Accounting Dept. girl, who on occasion has accompanied concert singers, expects soon to begin even more advanced courses at the Eastman School of Music.

She's perfectly at home playing the music of the three B's—Bach, Beethoven and Brahms—but her favorite is Liszt's Etude in B-Flat Major. Off the record, she confesses to playing boogie, too.

Priscilla, who is from Corning, does not confine her artistry to the piano, however. She does water colors, portraits and charcoal drawings. At present, she's busy painting entries which she hopes will hang in the Finger Lakes Exhibit.

**Simple Elegance**—If the mood is festive, then the answer for your after-five occasion is this dress in soft Bur-Mil faille crepe woven of Koda acetate rayon and worn by this beautiful TEC model.

*Snared* . . .  
*Paired* . . .  
*Heired* . . .

# To the Women of EK— 'Hints, News, Fun!'

Among the gay social events for Kodak women recently was a luncheon held at the Triton Hotel. Marjorie Johnson and Shirley Knights were guests of the Engineering Dept. staff, Bldg. 23, in honor of the marriages of the two girls. Both received beautiful crystalware. In charge of arrangements were Carol Schlesinger, Mary O'Brien and Betty Tripp.

Catherine LaRosa, KP Roll Film Verichrome Spooling Dept., was guest of honor at a prenuptial party held recently at Lorenzo's. Catherine was presented with lovely glassware.

**HINTS THAT SAVE!** Pound cakes that have become dry may be sliced and toasted . . . delicious! . . . Toasted cake crumbs make ideal topping for other desserts like ice cream and puddings. . . A yummy pudding for chill winter evenings that warms everyone and is tempting, too, is this:

1 3/4 cups muffin or biscuit crumbs

3/4 cup diced cooked apricots  
1/2 cup apricot juice

Mix the above ingredients together thoroughly. Place this mixture in four greased custard cups or a small casserole. And for a real treat cover with this topping:

1/2 cup crumbs  
1/2 cup brown sugar

Mix thoroughly and sprinkle on the pudding mixture. Bake in moderate oven, 350 degrees F., for 30 minutes. Yield: 4 delicious servings.

## WOMAN'S SPORT NOTE

KP's Edna Usselman rolled a beautiful new high to 233 the other night. Congratulations, Edna! That's wonderful. Just shows the gals can really do it. Edna posted the record score while bowling with Kodak Park's team in the Rochester Women's Dusty loop.

## Lost . . . And Found!

New Year's Eve afternoon won't be forgotten by Noreen Dunn, KO Sales. She lost her engagement ring—a Christmas present—and got it back.

As she admired its sparkle and replaced it on her fourth finger after washing her hands, it suddenly flipped from her fingers and slipped down the sink's small overflow hole.

A rush call to KO Maintenance brought the fix-everything men, who removed the drain and retrieved the ring.

**KNOW YOUR SKIN?** Did you know that your skin has two sides? You must cleanse the inside as well as the outside to have a clear, peaches-and-cream complexion. These are the steps: 1. Dip washcloth in hot water; then press against your face. 2. Without dry-

**Gingham Pets**—Sally Parks, Repair Office, began making red-checked dogs, lambs, colts and cats for a church bazaar, but they proved so popular and her KO friends had so many requests that she has kept right on making them as gifts.

ing, cover entire surface with cold cream; massage lightly. 3. Remove cream carefully with tissues. 4. Splash on cold water. 5. Pat on skin freshener with cotton pad wrung out in cold water. That's it, and your skin will show the result!

**TEACUP HOBBY**—Demitasse cups and saucers and rare teacups hold a fascination for Rita Callan of Hawk-Eye's Superintendent's Office. Rita can think of nothing better than browsing through antique shops or attending auctions in pursuit of her favorite hobby.

It all started about six years ago when a friend gave her a teacup and saucer of pink china with a lovely rose pattern running through it. To this was added a demitasse cup and saucer set that was made in England in the blue and white design that is so characteristic of English china.

From time to time, Rita has picked up a number of rare pieces in antique shops and at auctions, while her friends have also added to her collection over the past years. Her favorite is a demitasse cup with a four-leaf-clover pattern that belonged to her great-grandmother.

**Tea for Two**—Rita Callan, left, shows Olga Paulyni some of the antique teacups and demitasse sets in her collection. Rita is holding a demitasse cup which was made in China, one of her favorites. Both girls are at Hawk-Eye.

## The Market Place

KODAKERY ads are accepted on a first-come, first-served basis. Department correspondents in each Kodak Division are supplied with ad blanks which, when your ad is typed or printed on them in 25 words or less, are put in the Company mail addressed to "KODAKERY," or handed in to your plant editor. All ads should be received by KODAKERY before 10 a.m., Tuesday, of the week preceding issue. HOME PHONE NUMBERS OR ADDRESSES MUST BE USED IN ADS. KODAKERY reserves the right to refuse ads and to limit the number of words used. Suggested types are: FOR SALE, FOR RENT, WANTED, WANTED TO RENT, LOST AND FOUND, SWAPS. KODAKERY READERS ARE ASKED TO PLACE ADS ONLY FOR THEMSELVES AND HOUSEHOLD—NOT FOR FRIENDS OR RELATIVES. TO DO THIS IS TO DENY SPACE TO THE PEOPLE OF KODAK FOR WHOM THIS SPACE IS RESERVED.

### FOR SALE

AFGHAN—Hand crocheted. Also black seal fur coat, size 36-38; navy taffeta housecoat, size 16-18. Glen. 1595-W.

AMPLIFIER—Five-tube suitcase type, \$20. 61 Niagara St., Cul. 5580-W, after 5:30 p.m.

AUTOMOBILE—1932 Plymouth coupe. 7 Daisy St., Apt. 2, Glen. 4264-W, evenings.

AUTOMOBILE—1935 Plymouth coupe, \$325. Carey, Elm St., Lima 63-L-4.

AUTOMOBILE—1936 Chevrolet coach, radio, heater, 264 Avis St., Glen. 5317-R before 2 p.m. Saturday or Sunday.

AUTOMOBILE—1936 Chevrolet, master coach. Cul. 2545-W.

AUTOMOBILE—1936 Chevrolet master coach, heater. Char. 2210-M after 6 p.m.

AUTOMOBILE—1936 Dodge sedan, \$175. Cul. 2077-R.

AUTOMOBILE—1936 Ford coupe, 5 new tires, radio, \$300. Glen. 6391-M after 6 p.m.

AUTOMOBILE—1936 Oldsmobile, 2-door sedan. Cul. 5023-J.

AUTOMOBILE—1936 Oldsmobile, heater, radio. Also Snyder ski boots, size 8½. 252 Gates St., Apt. 103, Vets Housing, off Lyell Ave.

AUTOMOBILE—1936 Pontiac sedan, \$300. 370 Eastman Ave.

AUTOMOBILE—1936 Terraplane coupe. Also Simmons studio couch. J. Aubry, Ontario 3915.

AUTOMOBILE—1937 Ford coach model 60. 140 Electric Ave., Glen. 5644-W.

AUTOMOBILE—1937 Ford Tudor, \$350. Glen. 5834-W.

AUTOMOBILE—1937 La Salle, 4-door sedan, complete with radio and heater, low mileage. Glen. 5675-M.

AUTOMOBILE—1937 Plymouth coupe. 46 Needham St., after 5:30 p.m.

AUTOMOBILE—1937 Plymouth 4-door sedan. Mon. 0860-J.

AUTOMOBILE—1938 Ford. 187 Lincoln St. after 6 p.m.

AUTOMOBILE—1938 Plymouth tudor sedan, \$625. 148 Boxart St., Char. 0755-R.

AUTOMOBILE—1939 Ford coupe, \$475. Texaco Station in Penfield.

AUTOMOBILE—1939 Plymouth, radio, heater. 105 Sterling St. after 6 p.m.

AUTOMOBILE—1940 Dodge, 2-door sedan. 368 Driving Park Ave. after 5 p.m.

AUTOMOBILE—1940 Ford coupe. 194 Magee Ave. after 5:30 p.m.

AUTOMOBILE—1940 Ford 4-door sedan, radio, heavy. 433 Britton Rd. after 5:30 p.m.

AUTOMOBILE—1940 Pontiac sedan. Alvin Gurslin, 64 North Ave., Greece.

AUTOMOBILE—1941 Chevrolet special de luxe. 280 Selye Terr., Glen. 7614-J between 9-11 a.m.

AUTOMOBILE—1941 Ford super de luxe coupe, heater, \$875. 1800 Lake Ave., KP ext. 7227.

AUTOMOBILE—1941 Ford deluxe convertible, gasoline heater, \$1175. Hill. 3308.

AUTOMOBILE—1947 Ford, gray super de luxe. St. 4738.

AUTOMOBILE—1947 Oldsmobile hydro-matic. Glen. 1050-W, between 6-7 p.m.

AUTOMOBILE—Ford V 8, tudor, radio, heater, \$350. Glen. 5834-W.

AUTOMOBILE HEATER—Main 3008-W, after 6:30 p.m.

BED—Cherry maple, complete, with matching dresser. Glen. 6720-W after 6 p.m.

BEDSPREAD—Crocheted, rose pattern, full size. 43 Averill Ave.

BEDSPREAD—Murray Bay, hand-woven, natural color, linen, double bed size. Glen. 6930-J.

BICYCLE—Boy's, 28" Roadmaster. Char. 2455-J.

BICYCLE—Girl's, 28". Also girl's ice skates, size 7. Main 0049 after 5 p.m.

BICYCLE—Girl's, 24", balloon tires, fully equipped. 183 California Dr., Greece, after 6 p.m.

BIRD CAGE—Also standard, \$7.50; davenport, \$10; combination stroller wicker baby carriage, \$5. 54 Elder St.

BOWLING BALL—Manhattan, conventional grip. A. Maupin, Hill. 2953-W.

BREAKFAST SET—Seven-piece, black-and-white chrome porcelain top, \$50. 34 Fifth St.

# Park, CW Win Interplant Openers

## Winners Clash In Feature Tilt Next Monday

Pre-season favorites came through as expected Monday night in the newly-formed Kodak Interplant Basketball League when Kodak Park's powerful aggregation brushed aside Kodak Office, 49-29, and Camera Works swamped Hawk-Eye, 50-20.

Jack Ellison, who finished with 14 points, got the Kaypees off to a 16-6 first-quarter lead, connecting five times on a series of short shots and lay-ins in the opening minutes. Of the six other KP cagers contributing points, Harry Horn, the set-shot specialist, was high with 10.

### Mason Paces Losers

At half-time Jack Brightman's veteran squad held a 34-11 advantage over the newly-organized KO outfit. Ken Mason, Office forward, tallied 12 points for a losing cause. KO trailed 38-23 at the three-quarter turn.

Starting slow, Bernie Messmer's CW cagers grabbed a 9-3 lead in the opening canto of the nightcap. Once Johnnie Coia got rolling, however, there was no stopping the Cameras, who increased a 21-13 half-time margin to 38-19 in the third stanza.

Coia bagged 15 points to beat Felix (Tony) Soler, the Hawk-Eye hotshot for individual scoring honors. Soler had 13. Bruce Milliman (8) and Bill Maslanka (7), shared runnerup honors for the winners.

Next Monday, Jan. 12, KO faces H-E at 7:30, and the undefeated CW and KP quintets clash in the nightcap. Games are played in the KO Auditorium.

## Bldg. 23 Notches 7th Straight in KP Loop

**Horn Has It** — Guarded closely by Jim Arnold, KO center, Harry Horn attempts to pass ball to a teammate in Kodak Interplant season's opener Jan. 5 at KO Auditorium. Behind Arnold is Jim Buignan, KO. No. 14 is Jim O'Neil. Kodak Park won, 49-29.

## Film Emulsion Also Retains Perfect Mark

Annexing three victories since Dec. 15, Gord Anderson's defending championship Bldg. 23 outfit ran its undefeated skein to seven games in the KPAA Departmental Basketball League. Also adding three wins to its record, Film Emulsion made it six in a row to stay on the heels of Bldg. 23 in the red-hot National scramble.

Bldg. 30-West copped three holiday contests to go out in front in the American division chase.

Led by the capable floor work of Wilson Pask, Phil Hutton and Dick Phillips, Bldg. 30 pinned a 59-37 defeat on the Emcos. Pask meshed 18 points, while Hutton and Phillips garnered 14 apiece. In stopping the Power quint, 49-25, Hutton found the hoops for 16 points as Pask tallied 15. On Dec. 29 it was Hutton again who stole the spotlight, chalking up 12 points as his team defeated Emulsion Research, 39-28.

Harry Horn's Industrial Engineering five earned a tie for the runner-up spot by upsetting Bldg. 12, 50-20, as Pete Day hit for 20 points to lead the attack, Doug Labudde finding the range for 18.

### 23 Thumps Emcos

In the National division, Bldg. 23 topped the Emcos, 47-30, to notch their seventh straight win. Bill Tomkiewicz sparked the defending champs with 14 points. Don Brown's 16-point skein looked best for the losers.

Harry Treize dunked 7 throws from the floor to net 14 points and lead Film Emulsion to a 52-36 triumph over Bldg. 58. Syd Gamlen and Tom Page led the scoring attack as Engineering stopped Bldg. 58, 45-25, to haul down a third-place berth, having downed Synthetic Chemistry, 34-27, earlier.

Bldg. 14 racked up its first win of the campaign by registering a 40-30 decision over the Cafeteria. Don Strand compiled 14 points to top the scoring for the evening. In another close game, Mount Norris' Power outfit edged Industrial Engineering, 46-40, with Roy Kubitz posting 15 points.

Standings as of Dec. 29:

National Division			
	W	L	W L
B-23	7	0	B-12 3 4
F.E.	6	0	Emcos 2 3
Eng.	5	2	Power 3 5
B-58	4	2	B-14 1 5
American Division			
	W	L	W L
B-30	5	2	Emul. Res. 1 4
Ind. Eng.	3	3	Messenger 0 7
Syn. Chem.	3	3	Cafeteria 0 7

## Houser Rolls 277 Singleton

For the second time this season George Houser, CW kegler, found himself knocking at the door of bowling's hall of fame on Dec. 26, but due to a light hit in the seventh frame had to be content with a blistering 277. Earlier in December, Houser, who rolls for the Duos in the CW No. 1 League, posted a 268 singleton.

In his most recent bid for a perfect game George had six consecutive strikes, left three standing in the seventh, picked the spare, and struck out.

High scores during the holidays:

### HIGH SINGLES

George Houser, CW No. 1.....	277

## Undefeated Dept. 49 Quint Continues Hot Pace at CW

There's no stopping those Dept. 49 basket snipers in the CW Intraplant League! Caging 10 points, Johnnie Coia paced his 49ers to a 30-21 win over Dept. 11 Dec. 17 for their sixth successive victory.

Dept. 66 and Dept. 25 notched victories to remain deadlocked for second place. Lipman (Red) Haight and Warren Wilson scored 10 points apiece as 66 swamped Dept. 23, 42-13. George Kiefer's 25 outfit handed Woodworth-Smith its sixth straight setback, 30-26. Bruce Milliman and Dick Spiegel canned four fielders each for 16 points toward the winners' total.

Coia retained the league's individual scoring leadership with his 10-point contribution in the Dept. 49 triumph. League standings:

	W	L		W	L
Dept. 49	6	0	Dept. 11	3	3
Dept. 25	4	2	Dept. 23	1	5
Dept. 66	4	2	WW-Smith	0	6

### GAMES WEDNESDAY, JAN. 14

8 p.m.—Dept. 23 vs. Dept. 11  
9 p.m.—Dept. 49 vs. WW-Smith  
10 p.m.—Dept. 66 vs. Dept. 25

### LEADING SCORERS

### INTRAPLANT BASKETBALL

Monday, Jan. 12, KO Auditorium:  
7:30 p.m.—KO vs. H-E; 8:30 p.m.—KP vs. CW. No admission charged.

## CW Kegler Picks 7-10 The 'Hardest' Way

So you think the 7-10 split is hard to pick?

Well, you've really never picked the 7-10 until you've done it the way Frank Tarantello, CW kegler, did it Dec. 13. Frank did it on his first ball, rolling at a full rack of pins. The other eight pins remained standing. Tarantello came up with the freak shot while rolling with the Bantams in the CW Saturday League.

**High Single**—Highest individual single game of the season to date for Kodak women is the 233 rolled recently by Edna Usselman, KP keglerette. Edna posted the record solo while bowling with the Kaypee girls in the Industrial League.

## Stock, Office Win KO Tilts

Rochester Branch Stock and the Office Penpushers, co-leaders in the KO Intraplant Basketball

Frantz

League, fashioned their fifth victories in the final pre-holiday session. Stock squeezed out a 40-37 decision over the hapless Repair Fixers, and the Office quint rallied in the 4th to best Shipping 51-40.

Art Frantz peppered the baskets for 21 points as Stock won. Close behind in the point-production was Bobby Clarke with 14. Don Defendis snagged 13 for the losers, who made it a fight from the outset.

Ken Mason registered 17 points and was ably assisted by Dick Mayberry (14), and Jim Arnold (11), as the Penpushers throttled Shipping in a ding-dong battle. Chuck Arnone (11) sparked the Vets' attack which netted them 12-6 and 34-33 leads at the first and third quarter intermissions.

**GAMES, WEDNESDAY, JAN. 14**  
5:45 p.m.—Penpushers vs. Repair.  
6:45 p.m.—Stock vs. Shipping

## Odds and Ends

Joe Minella, of the KPAA staff attended the Eastern District ASA commissioners' conference in New York last weekend. The state softball commissioner will attend the national Amateur Softball confab in Houston, Tex., Jan. 16-18.

George Gustat, KPAA Friday B-8 kegler who rolled three consecutive 148 games, has been admitted to membership in the ABC Triplicate Club.

The KPAA Gun Club will play host to the Jan. 11 shoot of the Finger Lakes Skeet League. As a result the club's regular shoot on that date has been cancelled, according to Warren Stephens.
