

New Sales Training Center To Assist Dealer Personnel

Practice Session — The type of demonstration of selling methods that will be given sales personnel of Kodak dealers at the new Sales Training Center, 285 State St., is illustrated here by Director Howard Kalbfus, right, for Receptionist Shurlee Robeson and Walter Chappelle, former salesman in the Wisconsin area.

Remodeling work has been completed on the first floor of the Wright and Alexander Building for the new Kodak Sales Training Center. Purpose of the school, according to James E. McGhee, EK vice-president and general sales manager, is to train sales personnel of Kodak dealers in latest photographic selling practices.

The new school has been set up under supervision of Howard F. Kalbfus of the Sales Dept. so that all types of instruction can be given with maximum participation of trainees. Kalbfus is director of the Center with Walter Chappelle assisting. Chappelle, a veteran photographer and salesman, was brought in from the Wisconsin territory to assist in the preparation of the school's program and to aid in the photographic sales training. Receptionist and secretary at the Center is Shurlee Robeson, formerly of the Advertising Dept.

Modern Center

The Center is modern throughout and its curriculum is being fashioned to accommodate groups of 20 to 25 in the training classes expected to begin in May.

Special patented ceilings have been installed to provide correct acoustics. On the State Street side is office space for the director, and the receptionist's desk borders a lounge area where the trainees may relax between instruction periods. The lounge area is furnished in a modernistic motif with a color scheme of green and gray.

Model Store

Just beyond the lounge is a model store equipped with Kodak products to provide the setting for dramatization of selling methods in which trainees will participate.

Second portion of the school is a large classroom of the conference type, with long tables and a special projector setup that includes a built-in screen. This room will be used for lectures, visual aid instruction and discussion periods.

There is a spacious work area in the rear of the school with three darkrooms for processing negatives. And bordering this area is a big printing room with a central developing sink around which trainees may gather for discussions and demonstrations.

ES&L Member Savings Up 2½ Millions in 1947

Hit All-Time High Of \$15,663,897 In Year

Savings of members of the Eastman Savings and Loan Association showed an increase of \$2,628,552 during 1947 to reach a new high of \$15,663,897, according to the Association's annual report which appears on Page 5. Assets of the ES&L also attained a new high of \$17,578,941.

The Association's strong financial condition is reflected by the surplus, reserves, etc., amounting to \$1,242,072, approximately 8 per cent of members' savings. With cash and government bonds amounting to \$7,937,895, the Association appears to have adequate resources to meet the demand of Kodak members for mortgage and home modernization loans in the years to come.

The 27,097 members of the ES&L received \$327,703 in dividends during the year on their accounts, compared with \$268,584 paid to 22,730 members in 1946, an increase of 22 per cent. Current annual dividend rates are: Installment share accounts, 3½ per cent; income share accounts, 2½ per cent; and savings share accounts 1¾ per cent.

Savings & Loan Year-End Summary

	1947	1946	Change
Income	\$562,393	\$496,364	up 13.3%
Expenses	178,600	157,954	up 13.1%
Net profit.....	383,793	338,410	up 13.4%
Dividends paid or credited to members.....	327,703	268,584	up 22 %
To surplus, reserves, etc.....	\$ 56,090	\$ 69,826	down 19.7%

Gross income for the year increased 13 per cent to \$562,393, compared with \$496,364 last year. Of the total, 58 per cent was returned to shareholders, 32 per cent was paid out for wages and expenses of operation and 10 per cent was added to surplus, reserves, etc.

Although gross income for the year increased, the amount credited to reserves, surplus, etc., of \$56,090 was down from the \$69,826 in 1946. This decline was due to the larger amount paid in dividends and to a rise of \$20,646 in expenses brought about chiefly by an increase of \$18,436 in wages, payroll taxes and wage dividends.

Investment in Bonds

Due to the substantial increase in members' savings during the past few years, a higher proportion of funds has been invested in government bonds which yield less on the average than the dividend

rates paid by the Association on members' accounts.

During last year, 577 Kodak people received assistance in purchasing homes through ES&L mortgage loans amounting to \$2,430,400, slightly above 1946. This brought the number of mortgages on the Association's books to 2780 and raised the total amount to \$9,169,612. Since its founding, the ES&L, through its mortgages, has helped a total of 5438 people purchase their homes. The Association anticipates another heavy volume of mortgage business during 1948 and its report reveals its financial readiness to fill the qualified needs of Kodak people.

The popularity of Modernization Loans through the ES&L soared to new heights during 1947, showing an increase of 127 per cent over 1946. The 825 loans, amounting to \$325,806, covered many types of home modernization, repair and refurbishing. Kitchens in many Kodak homes were given that "new look," new roofs were put on, rooms were added, homes were painted inside and out, and many other jobs were done with Modernization Loans.

Quick Service

The ES&L is especially proud of the quick service it is able to give its people on these loans, many times having the check ready the same day the loan application is made. The convenience of payroll deduction payments is another feature which has made the loans

What About Kodak's Stockholders?

How Many Are There? Who Are They? Where Do They Live?

By Bob Lawrence
Editor of KODAKERY

I was reading through the Company's recent survey of its stockholders last week and discovered a lot of interesting things.

First of all, I was surprised at the number of women holding Kodak stock. They constitute 46 per cent of the stockholders and hold 30 per cent of the common stock.

The study shows that there are 45,622 Kodak stockholders—44,250 holding 12,380,065 shares of common stock and 1372 with 61,657 shares of preferred stock. The stockholders come from all walks of life. Many of them you see every day — mechanics, clerks, secretaries, carpenters, school-teachers, ministers, bankers, doctors—yes, and housewives. The stock is widely distributed — no one person owns as much as 1 per cent of the common shares.

Since the number and holdings of preferred stockholders are rela-

tively small, hereafter in our statistics we'll deal only with the common stock.

Here are those figures on the women stockholders. There are 20,279 of them and they hold 3,662,300 shares, compared to 13,363 men with 2,464,969 shares. There are 2613 joint holders—principally husbands and wives—with 195,096 shares.

I found, too, that the Company's stock provides an important source of income to institutions—mainly universities, churches and similar organizations — 431 of which own 670,183 shares. So, indirectly, Kodak's dividends make sizable contributions to the nation's educational and social systems.

Whether you own stock yourself or not, you are probably an "indirect" stockholder if you have any insurance policies or if you have any money in investment trusts or other financial institutions. There are 151 insurance companies holding 302,220 shares. There are 1257 other stockholders, such as investment trusts, brokers, banks and other financial concerns, which invest the money of thousands of small investors in the stock of many companies. This group holds 3,018,336 shares. Trusts and estates, numbering 6156, own 2,067,086 shares. These, too, represent several thousand people.

So, you see, while the Company lists 45,622 stockholders, actually

there are several thousand more who "indirectly" hold stock, because in that 45,000 an insurance company, a bank, an investment trust, etc., is listed as a single stockholder when really it represents many individuals.

Kodak men and women owning

\$3500 in Awards Offered In High School Photo Contest

High school students of the country will be shooting for a share of the \$3500 in cash in the Third Annual National High School Photographic Awards opening Feb. 2. Sponsored by Kodak, the competition will end May 7. Top winners later will be chosen by these judges: Julien Bryan, internationally known photographer and lecturer; C. Scott Fletcher, president, Encyclopaedia Britannica Films Inc., and Kenneth W. Williams, manager of EK's Photographic Illustrations Division.

Grand prize in this year's competition, which has the approval of the Contest Committee of the National Association of Secondary School Principals, again will be \$500. This award, along with a \$100 first prize in one of the classes, will bring the total cash awards for the best picture in the competition to \$600.

Eligible for the Awards will be pictures taken since the close of last year's contest, which was on May 15, 1947. They must be entered in one or more of the five classes. In each class there will be a first prize of \$100, a second of

\$50 and a third of \$30. One of the five first prize winners also will be the \$500 Grand Prize winner.

Other Awards

In addition to the 16 major prizes, 75 awards of \$10 each and 270 awards of \$5 each will be given, irrespective of class—a total of 361 awards.

The contest is open to any student attending daily any of the high school grades from the 9th to 12th, inclusive, in a public, parochial or private school within the continental limits of the United States.

Entry forms may be obtained from high schools and photographic dealers or by writing direct to National High School Photographic Awards, 343 State St., Rochester 4, N.Y.

Only black- and -white prints

2 EK Scientists Chosen For Academy Honors

Signally Honored — Dr. Gertrude Kornfeld and Dr. Thomas H. James of the staff of Kodak Research Laboratories read scroll naming them to Fellowship in the New York State Academy of Sciences. Outstanding work by both toward advancement of sciences resulted in their election to the select group.

Two members of the staff of Kodak Research Laboratories—Dr. Thomas H. James and Dr. Gertrude Kornfeld—have been honored by election to Fellowship in the New York Academy of Sciences, for outstanding work toward the advancement of science, Dr. C. J. Staud, director of the laboratories, announces.

They have conducted extensive research in photographic chemistry in the laboratories' department of photographic theory.

Election to Fellowship is a distinguished honor of the Academy, conferred only upon a limited number of the active members who, in the opinion of the Academy's Council, have done unusual scientific work.

Dr. James, a graduate of the University of Colorado, joined Kodak in 1936 as a chemist and was appointed a research supervisor in 1944. He does research in the theory of development and latent image formation and in the mechanism of reactions of developing agents. In 1946 he received the Henderson Award from the Royal Photographic Society of Great Britain for his research on photographic development.

Dr. Kornfeld, a native of Prague, obtained her doctor's degree from Prague University in 1915. She became a member of the faculty of Berlin University in 1928, teaching kinetics of chemical reaction and photochemistry. In 1933, with

the advent of Hitler, she left Germany and taught at universities in England. Later she went to Vienna on a fellowship grant from the American Association of University Women and in 1937, with the help of the Association, came to America, joining EK's staff in research on photochemistry.

T. M. Reg. U.S. Pat. Office
Test your knowledge with the questions below. Grade 10 for each question. If you score 60 you're "super"; 50—you are still remarkable; 40—not bad at all; 30—time to brush up!

(Answers on Page 4)

1. A Nashville, Tenn., department store is using photography to relieve the tediousness for women beauty shop patrons beneath the hair dryers by:
 - (a) Providing cameras so that they can snap pictures of each other.
 - (b) Installing a movie projector and providing regular programs of short subjects.
 - (c) Lining the walls with illuminated color transparencies.
2. What photographic group recently honored the EK Kodachrome Processing Div. for outstanding service?
 - (a) Photographic Specialists of Detroit.
 - (b) Color Cameramen of America.
 - (c) Photographic Society of Iraq.
3. How can one remove developer stains from darkroom trays?
 - (a) Use Kodak Tray Cleaner.
 - (b) Use coarse sandpaper.
 - (c) Soap the outside, allow to stand five hours, then wash off.
4. Including the amount to be paid in March, what is the total in Wage Dividends since the plan was inaugurated in 1912?

\$23,000,000	\$39,000,000
\$37,300,000	\$88,500,000
5. Name the Kodak product which is adding to the attractiveness and durability of women's shoes.
 - (a) Tenite.
 - (b) EK Gel-Lacquer.
 - (c) Shoefilm.
6. Name the Kodak skater who won the Eastern States championship recently.

"WELL, SEE YOU LATER."
... like heck you will. If you don't quit stepping out from between parked cars, you may never see him again!

Photo Patter

Flash Photography Much Simpler With Synchronized Shutter Hookup

One of the greatest improvements in cameras in the past few years has been the introduction of the synchronized "flash" shutter—"built-in flash," as it is called. The need for synchronizing shutter and flash arises from the fact that light from a flash bulb lasts for a fraction of a second and that the shutter must be open at the very instant the light from the lamp is brightest.

Prior to the synchronized flash shutter this was accomplished by a flash gun—a combined battery holder, reflector and synchronizing unit. Such flash guns were bulky, not inexpensive and sometimes prone to get out of adjustment.

Boon to Snapshooters

It's little wonder then that built-in synchronization took the picture-takers by storm. With the synchronizer built into the shutter all that is needed for flash pictures is a flash holder consisting of a reflector and battery case.

Now flash photography—once chiefly used by press photographers—has been brought within reach of all. As a result many people ask about flash exposures.

To aid in computing such exposures, "guide numbers" are assigned to flash lamps. These numbers vary with lamps of different types and with films of different speeds. They also vary with the shutter speed which you select.

Despite these variables it's easy to use the guide numbers and to get the proper exposure. Packed with the film is a printed slip which gives the guide number for

Babe in a Bath—Here's a swell shot by synchronized flash, properly exposed by using the guide numbers packed with each roll of film. You can make pictures like this.

the two types of flash lamp generally used by most amateurs.

In using these numbers select your shutter speed. Look in the table for the number which appears under this shutter speed with the type of lamp you're using. Then divide this number by your lamp-to-subject distance. The answer tells the lens aperture you should use for good exposure.

For example, suppose you are using an SM lamp—one of the walnut-sized ones. You're shooting from 10 feet and your shutter speed is 1/100. The guide number for 1/100 with your film and an SM lamp appears in the table as 80. Since you're shooting from 10 feet, you divide 80 by 10 and get 8. So f/8 is your aperture. And that's all there is to it.

Sales Group Sets Divisions

EK Sensitized Goods Sales now is composed of four divisions, according to an announcement made by James McGhee, vice-president and general sales manager.

Frank L. Andrews is general manager of Sensitized Goods Sales, and Frank Oberkoetter is manager of the newly formed Professional Color Sales Div. Manager of the Professional Film Sales Div. is J. Winton Lemen.

Victor W. Hurst will continue as manager of the Graphic Arts Sales Div., and K. O. Richardson is manager of the Professional Paper and Photofinishing Sales.

Andrews also will have general supervision of all Sensitized Goods Sales Div. technical representatives, and the Professional Sales Studio and Lab.

Seven Come Eleven—Their 11th anniversary and their first reunion were celebrated recently by this septet who joined EK as a trainee group in July 1936. During the sales conference, the group met at the University Club for dinner. The two seated in the front row are Wes Burlingame, left, KO Sales Service, and Fred Welsh, KO Sales. The five in the rear row are, left to right, Rufus Wesson, KP Nitrate Cine Stock Dept.; Dick Holz, KO Package Design; Bill Campbell and Bill Bowman, Company salesmen in Texas, and Don McConville, KO Industrial Relations.

Photography Traces Path Of Radioactive Elements

That photography is of tremendous value in recording the action of radioactive elements was shown at the recent Chicago convention of the American Association for the Advancement of Science, in a Kodak exhibit.

Radioactive elements give off particles which can be measured by electrical means or can produce images on photographic material, explained Bill Swann, KO Industrial Photographic Sales Div. Pictures of tissues of animals treated with radioactive iodine, phosphorus and carbon were displayed in the Kodak exhibit.

Another section of this exhibit dealt with the photographic emulsion's use as one of the physicist's tools for registering and recording individual nuclear events. A

charged particle passing through the emulsion will strike some of the silver grains, making them developable. When the emulsion is developed, the "struck" grains show the trail of the particle.

Disintegration Shown

One picture exhibited showed this atomic disintegration of an atom in the photographic emulsion by high energy deuterons.

Charlie Foster, also of Industrial Photographic Sales Div., made and explained the section of the exhibit featuring Ektachrome photomicrography of crystals photographed under polarized light.

Walter Litten of KO Advertising also attended this convention.

Tidiness Stressed To Prevent Fires In Factory, Home

Good housekeeping, in the factory as in the home, plays an elementary role in reducing fire hazards, Allen L. Cobb, safety director of Kodak Park, pointed out recently. He addressed more than 100 building superintendents, engineers and maintenance personnel attending the first session of the Fire Protection and Safety Institute in the Chamber of Commerce, sponsored by the Rochester Safety Council.

The removal of any one of the three factors essential to combustion—heat, oxygen and fuel—prevents or halts a blaze, Cobb said. In addition to reviewing methods of preventing and extinguishing fires in public buildings, factories and homes, he outlined the elimination of danger from noxious fumes, pressure tanks such as steam boilers, explosions, gasoline, gas leaks and other hazards.

Wearin' Your Safety Shoes? They Offer Best Protection

Following the recent expansion of its distributing facilities located on the second floor of the E&M Stores Dept. in Bldg. 49, Kodak Park people are being encouraged to take advantage of the opportunity to equip themselves with safety shoes as a precaution against injury.

A capable fitter is on hand at all times to recommend safety shoes to suit every occupation, it was pointed out.

Since the operation of the safety shoe program, the Park's Safety Dept. has accumulated in its files many records of instances in which safety shoes have played an important part in preventing serious injury. A steel toe cap gives reinforced protection.

The case of Basil Duffy, F.D. 9, affords a typical example of how much safety shoes can mean to one engaged in shop duties. An overhead crane, being used to move

some heavy expansion joints, knocked off one of two scaffold planks which were lying across the crane rails. As Duffy was assisting underneath the crane, one end of the falling plank struck the steel toe of the safety shoe he was wearing, splitting the metal toe cap. Severe and possible permanent injury might have resulted if he had worn ordinary shoes.

Although the wearing of safety shoes is not compulsory, the Safety Dept. encourages all Kodak Park members to consider their use whenever and wherever possible.

Saved by a Shoe— Basil Duffy, F.D. 9, inspects broken shoe that was struck by plank he is holding. Safety shoe prevented possible serious injury.

Merit Certificate Awarded to Duder

Edward Duder, Kodacolor Maintenance, Bldg. 65, recently was awarded the British Legion Certificate of Merit in recognition of his services to the local branch as a blood donor and also in honor of his service in the U.S. Navy.

Ed served with the British Navy in World War I and held the rank of chief petty officer in the U.S. Navy in World War II. Presentation of the award was made by Cecil Lansbury, Kodacolor Processing, Bldg. 65, who commands the Rochester Branch of the British Legion.

Patient—"Will I know anything when I come out from under the ether?"

Nurse—"Well, that's expecting an awful lot from an anesthetic."

\$5061 Awarded for Ideas at Park On 563 Adoptions in Final Period

Paper Mill, Ciné Processing, Roll Coating and E&M Depts. led the pack as KP suggesters completed their most successful year in the Suggestion System, this year celebrating its 50th anniversary. A total of \$5061 was paid out for 563 adopted ideas during the 13th period ending Dec. 27, while the plant's Suggestion Committee reviewed a record number of 582 suggestions. This brings to more than \$88,000 the cash awards made to Park men and women since Jan. 1, 1946.

A check for \$100, paid to Henry Spindler of the Paper Service Dept., topped all other awards for the period. His idea concerned the establishment of predetermined standards for controlling the quality of Baryta coated paper. The new method insures uniformity and is much simpler than that previously employed.

J. B. Herring, F.D. 3, received \$90 for a suggestion which also applies to the Baryta Dept. He devised a valve reseating tool which is being used instead of machining valve seats in making repairs.

The Park's ace suggester, Harry Yost of the Paper Mill, maintaining his consistent success, boosted his earnings by \$110 with two adoptions. The first, which merited \$75, had to do with a change in the method of making paper which results in a more accurately controlled width. The second, awarded \$35, is an improvement on the technique of installing wires on one of the paper making machines. This is accomplished by the use of a beam and chainfalls.

John Donnelly, Microfilm Processing, Bldg. 6, received \$60 for an improvement on a machine used for cleaning 35-mm. film

Best Ideas on Baryta— Henry Spindler, left, of Paper Service Dept. received \$100 for an idea and J. B. Herring, F.D. 3, was awarded \$90 in the 13th period at KP. Spindler's idea was on Baryta coated paper and Herring's applied to the Baryta Dept. Two women received awards of \$50 each.

more efficiently and with less risk of damage to the film.

Checks for \$50 went to Howard Doohan, Receiving; L. J. Wilson, Roll Coating Finishing, Bldg. 43; J. F. Corcoran, Roll Coating; Margaret Daggar, Printing; Irene Rife, Roll Film Spooling, and E. H. Williams, Kodacolor Paper Print Processing.

Two women suggesters, Margaret Daggar and Irene Rife, were rewarded for their ideas. Margaret's resulted in a more efficient layout of packing and shipping printed material and Irene's brought simplification of the recording of individual operators' production tickets.

New Card Room

To relieve congestion in the Bldg. 57 cafeteria, a card room has been set up in the basement of the building and will be open daily, Monday through Friday, from 11:30 a.m. to 1:30 p.m., to all users of the cafeteria.

Approximately 20 tables are available and smoking is permitted. The cafeteria balcony, heretofore not available for eating purposes, has been added to the cafeteria's dining facilities. The new card room is under supervision of the KPAA.

It's in the Park: Kudos for Kenyons . . . A 'Cat-Tale' from Tony . . . Carl's Jeep Wouldn't Peep . . . Cuddeback Holds Cash

The Industrial Engineering Dept., Bldg. 12, expects to be amply represented in the columns of KODAKERY what with a quartet of newshounds to supply the coverage. They are Tom Brogan, Tony Field, "Win" Gordon and Bill Jones. . . . Bill Lechner and Gene

Four new correspondents for KODAKERY in the Industrial Engineering Dept., Bldg. 12, insist that they're going to get news—or else. From left, Bill Jones, Irwin Gordon, Tony Field and Tom Brogan.

O'Brien, F.D. 8, runner-up team in the KPAA's first noon-hour pinocle tournament, broke into the news again last week when they finished with consecutive totals of 880 during one of their scheduled contests, taking two of three games from their opponents. . . . Friends and associates of Fred Ofshlager, 16-mm. Stock, Bldg. 12, extend their deepest sympathy upon the recent death of his wife. . . . Just returned from a honeymoon in Pennsylvania is Peter Tuttle, Yard Dept. . . . Bill Fladd, Bldg. 12, is recovering from a recent operation. . . . As relaxation from his new duties in the Color Control Dept., Bldg. 65, Lloyd Smith, formerly of the Research

Laboratories, has taken up oil painting. Judging from a sample of his work recently exhibited to the office staff, his artistic efforts have a definite eye appeal. . . . Messenger Service headquarters has been moved from Bldg. 2 to a first-floor location in the northeast corner of Bldg. 5.

Roland Broadhurst, who retired from Machine Shop duties two years ago, contends that a man is safer when on the job. Hospitalized three times since leaving the Company, Roland suffered his fourth setback recently when he was shaken up in a bus accident. . . . Two public telephone booths are available to folks within the

Park area. They are located in the new service dining room, just off the main hallway. . . . The Kenyons, Homer, of Silver Nitrate, Bldg. 46, and his wife, Ellen, Kodacolor, Bldg. 65, who were among this area's leading blood donors during World War II, gave their 26th and 22nd pints respectively last week at inaugural ceremonies of Rochester's Red Cross Blood Bank program.

A bad case of mistaken identity caused Tony Hargrave of the Printing Dept., Bldg. 48, no end of embarrassment. While driving along a highway near Webster recently, he spotted a black animal which darted ahead of his car and disappeared in a culvert. Leaving a companion on guard, Tony went home for his gun, prepared to bag what he thought was a fox. Under the watchful eye of a deputy sheriff who had stopped to watch the proceedings, our hero flushed his quarry only to find that it was a badly frightened black cat. . . . Joel Thornhill, Film Emulsion, a captain in the 898th AAA, Battery C, N.Y. National Guard, is hunting for a clerk for his Guard outfit.

Dottie Bergstrom, Time Office, has replaced Helen Moore as KODAKERY correspondent. Helen is now living in Troy, N.Y.

"Raintree County," by Ross Lockridge Jr., is the latest addition to the KPAA lending library. . . . When Carl Goldenschuh, Machine Shop, recently purchased a jeep station wagon, he didn't pay too much attention to the instructions which came with it. The first day he drove it to the plant he arrived late, held up by a balky engine.

Bob Brady, Printing, started the new year off by welcoming a

bouncing baby boy, born Jan. 1. . . . And it's a baby daughter, Lynn Ellen Holden, for Ray Holden of the Industrial Studio, Bldg. 6. Sev-

est scholastic standing during his freshman and sophomore years. His wife, Thelma, is a member of the Suggestion Office staff, Bldg. 2.

Here's Alex Loria with the 8-point buck he bagged in Pennsylvania.

eral of Ray's pictures illustrated the pages of KODAKERY during the past year. . . . Ed Rizzo, Printing, will be a baritone soloist at the vocal concert to be presented by the Italian Cultural Society at Cutler Union of the University of Rochester, Sunday evening, Feb. 8.

Alex Loria, Printing Dept., brought down an eight-point buck on his year-end hunting trip in Pennsylvania. . . . Edward Wallace, payroll supervisor in the Time Office, has returned to his desk after two months' absence because of illness. . . . Marge Bliet, Film Office, is mastering the rudiments of comptometer operation during her spare time. . . . Richard Cuddeback, Recovery Dept., a junior at the University of Rochester, was installed recently as treasurer of Tau Beta Pi, national honorary engineering society. Dick also received the annual chapter scholarship award given by the American Institute of Chemical Engineers to the member attaining the high-

Herb Hanse, KODAKERY's genial correspondent in the Machine Shop Office, was served a special "sardine can dinner" during an interlude in the annual Christmas party held by members of the office staff at Colonial Inn. Music was furnished by Tom Lyons, Vince Carroll, Joe Rice and Charlie Loveland. Bill Cowgill was in charge of the affair, assisted by Otto Heiligenman as song leader. Herb, incidentally, was marooned recently by heavy snows in Long Island while visiting his daughter. Dr. Leo J. Tanghe, Bldg. 46, gave an illustrated lecture on "Mushrooms of Monroe County" at the Eastman Building, Prince Street, last evening. The Rochester Academy of Science sponsored the event. Dave Willis and Eddie Gardner, Time Office, are among those flying regularly with the Air Corps Reserve. . . . Don Martin, who recently joined the Tabulating Dept., was a member of the Kenyon College golf team which copied the Ohio Conference title. Last summer Don assisted the pro at Ridgemont Golf Club.

Herb Hanse bravely faces his "tinned" bill of fare at Yuletide dinner.

History in Making—When graphic arts technical experts gathered at KO Monday, they showed much interest in the historical exhibit in the Graphic Arts Studio. Examining the first color reproduction made in the U. S. are Lewis Trayser, vice-president and production manager of Curtis Publishing Co.; F. J. Tritton, president of the Royal Photographic Society of Great Britain and technical manager of E. S. & A. Robinson Ltd., Bristol, England; Victor W. Hurst, manager of Kodak's Graphic Arts Div.; Ernest E. Jones, president of Graphic Arts Corp. of Ohio and chairman of the Lithographic Technical Foundation's research committee; Herman Freund, chief engineer of Intertype Corp.; and John McMaster, of Graphic Arts Sales.

ES&L Savings Graphic Arts Exhibit Viewed Up 2½ Millions By 75 Technical Experts

(Continued on Page 1)

so popular. Increased activity of the Association during the year is emphasized by an increase of 19 per cent in members' accounts, excluding savings bonds accounts; an increase of 35 per cent in window transactions, and a 42 per cent boost in checks issued to members. At the present rate, the ES&L monthly payroll deduction items would amount to 1,337,400 transactions annually. To handle this ever-increasing volume of work, the Association has 34 people on its active staff, three of whom were added during the latter part of the year.

Branch at Park

The Kodak Park Branch, the Association reports, has played an increasingly important part in the progress of the ES&L, and, in giving prompt service to Kodak Park people, accounted for about half of the Association's loan and account activity.

Camera Works and Kodak Office were served directly by the ES&L main office.

Through the assistance of Harley Smith and Marie Hartleben of the Hawk-Eye Industrial Relations Dept., the ES&L was able to offer Hawk-Eye people better service on their accounts and for the most part to eliminate the necessity of individual trips to State Street for ES&L banking purposes. Ed Kohler, Jennie Stevens and Bernice Martin of Navy Ordnance Division; Shirley Corrigan and Stanley Bell of DPI, and Katherine Chadwick of Camera Works Special Products, performed the same service for members of their divisions.

Photomechanical reproductions dating from 1837 to 1909 are on exhibit in KO's Graphic Arts Div. Studio this week and next. They are part of the collection which finally will be on display in George Eastman House. The exhibit is open to all Kodakers from 11:30 a.m. to 2 p.m. daily.

At the invitation of Victor W. Hurst, manager of the Graphic Arts Div., 75 nationally known technical people in the graphic arts industry saw the exhibit on Monday. These people, in Rochester to attend Sunday's meeting of the Rochester Technical Section, Photographic Society of America, spent the day as guests of Kodak. Dr. Walter Clark, head of the Black-and-White Photography Dept. of the Kodak Research Lab, is largely responsible for the assembly and annotation of this graphic arts historical exhibit.

Old Method Shown

Samples of collotype and other forms of photomechanical reproduction antedating the use of the crossline screen are exhibited along with early examples of process color.

The beauty of some of these reproductions compares favorably with representative work of today, but the latter processes have the necessary advantage of high speed and volume production.

A display of modern photomechanical processes also is being set up in the studio.

What About Stockholders?

(Continued on Page 1)

Company stock number 1661, holding 201,260 shares.

Where do Kodak stockholders live? Well, you'll find them in every state, the territories and in at least 30 foreign countries. There are 916 stockholders, owning 131,570 common shares, who live outside the U.S.

45,622 Hold Stock

Despite the fact, however, that Kodak has grown into a worldwide organization, it is still pretty much of a "home-town" enterprise so far as stockholders are concerned. Nearly 22 per cent of the stockholders, owning a little more than a fourth of the stock, live in Monroe County. In fact, the 9639 Monroe Countians not only outnumber any other geographical group, but they also hold the most shares—3,235,686.

Well, that's just about the picture, and now for a brief "recap." There are 45,622 people who own Kodak stock (with additional thousands who share in its dividends indirectly), a large part of whom are women; they live all over the world, the greatest number in Monroe County.

Photo Contest Opens Feb. 2

(Continued on Page 1)

may be entered in the competition. The picture area should not exceed seven inches in the longest dimension. The prints should not be mounted, but the pictures can be trimmed or cropped in printing. No art work, coloring, multiple printing or retouching is permitted.

The pictures must have been taken by the person under whose name they are submitted, but they need not have been developed and printed by him or her. Any make of camera or film may be used and either indoor or outdoor shots are eligible.

Entries will be judged on the basis of general interest and appeal. Photographic excellence or technique, while important, will not be the deciding factor.

Eligible students may enter pictures in any or all of the five classes, which are:

School Projects—Pictures of classroom, assembly hall and general school activities; laboratory, shop, and domestic science projects; fine arts activities, student government and club procedures.

People, young or old—Informal portraits, or pictures of people engaged in any activity such as sports, games, hobbies, recreations and occupations.

Scenes and Still Life—To be judged for pictorial appeal, ranging from landscapes, marine views, historical spots, street scenes and pictures of buildings to "table tops" or miniature arrangements, flowers, bric-a-brac, etc.

Animals and Pets—Interesting portrayals of household pets (cats, dogs, birds), horses, farm animals, zoo animals, forest wildlife, etc.

Babies and Small Children—Characteristic expressions, moods and activities of babies and small children, cute traits, serious or humorous. Adults may appear if not the principal interest.

Students are not limited to one entry. They may send in as many pictures as they wish during the contest period but an entry blank must accompany every picture or batch of pictures sent in. All entries must be mailed to the National High School Photographic Awards, 343 State St., Rochester 4, N.Y., and postmarked before midnight, May 7, 1948.

"I'm afraid John isn't going to propose very soon."

"What makes you think that?" "Well, he gave me a perfectly huge box of stationery yesterday and it has my present initials on it."

Kodak Camera Club News

Members and guests of the Kodak Camera Club are expected to fill the old Bldg. 28 auditorium at Kodak Park to capacity Wednesday evening, Feb. 4, when Arthur A. Moulton, noted traveler, lecturer and musician, presents his outstanding color movie, "Guatemala Interlude."

Tickets for the affair may be obtained free of charge at the Camera Club, Bldg. 4, KP, or from John Doyle, CWRC Office; Cap Carroll, HEAA Office, or Harry Irwin, KORC Office.

The club's photographic courses got under way Jan. 12 with some 158 students enrolled in 9 classes.

While many prospective members will have to wait until the spring term which begins Apr. 12, registrations are being taken for several subjects. Among the new courses to be offered are Nature and Close-up Photography, Photo Orientation, Retouching, and Press and Photo-Journalism. For further information, call ext. 2385.

... Ed Edmondson, Bldg. 29, has left for Florida where he plans to build a cottage on Key Largo and enjoy a little deep-sea fishing.

... K.C.C. Vice-President Ken Brenner, Bldg. 23, recently returned from a business junket to Green Bay, Wis., where, he reports, zero weather is taken for granted.

Arthur Moulton

(Questions on Page 4)

- To relieve the tedious minutes women spend beneath the dryers in its beauty parlor, a Nashville, Tenn., department store has installed a movie projector and now provides regular programs of short subjects.
- The Photographic Specialists of Detroit recently presented a plaque to the Kodachrome Processing Division of EK for outstanding service.
- Developer stains can be removed from trays by using Kodak Tray Cleaner TC3.
- The total amount of Kodak Wage Dividends, including the amount to be paid in March, is \$88,500,000 since the plan was begun in 1912.
- EK Gel Lacquer is being used as a coating on the wooden heels of women's shoes. It has proved to be very durable and adds to the appearance of the shoes, manufacturers report.
- Tony Callipare of Camera Works recently won the Eastern States skating championship at Saratoga Springs.

First of 7 Sportsmen's Shows Slated for Boston Jan. 31

Approximately two million sportsmen throughout the U.S. are expected to view Kodak's exhibits at seven Sportsmen's Shows scheduled before May 9. For the first time since the war, the exhibit will travel to West Coast shows.

The two exhibits required to cover the tour are built around the theme "Your camera becomes a color camera when you load it with a Kodak color film." Picture-taking equipment and color materials for the amateur photographer are a main part of the displays, featuring color shots of hunting, fishing and outdoor activities.

Show Color Movies

In the show for the eastern cities, a reel of unusual wild-life movies in color will be projected continuously.

The New England Sportsmen's and Boat Show will open the season on Jan. 31 in Boston. Other opening dates scheduled are Feb. 7 for the St. Louis Sports, Travel and Boat Show; Feb. 14, National Sportsmen's Show in New York's

Grand Central Palace; Feb. 27, International Sports, Travel and Boat Show on Chicago's Navy Pier; Mar. 27, Northwest Sports, Travel and Boat Show in Minneapolis; Apr. 8, Southern California Sportsmen's and Vacation Show, in Los Angeles; and Apr. 30, the San Francisco Sports, Travel and Boat Show.

Sales Service members Ev Moses, Frank Wakeley, Red Chesterman, Bob McPherson, Ray Toolan, Lou Parker, Frank Lloyd, Chuck Kinsley, Don Ryon, Gene Johnson, Norm Salmons and Dave Dean will divide up in attending one or more of the shows.

Installation of the exhibits will be handled by Fred Hodgson of Advertising's Exhibits Div.

Salesmen in the near-by areas also will be "on duty" at the exhibit.

Tower Topic—"There's cold in them thar hills," or words to that effect, could be what Bradford Washburn, left, is telling Dr. Walter Clark, KP, of the Research Laboratories' photographic department. The famous explorer, who recently spoke before the Foremen's Club, points out the route of his most recent ascent of Mt. McKinley, Washburn, whose topic was "Operation White Tower," is now en route to China where he plans to investigate reports of a mountain said to be higher than Mt. Everest.

MARCH OF DIMES

FIGHT INFANTILE PARALYSIS

JANUARY 15-30

The ES&L Reports...

Modernization Loans...
1947 was a big year for property improvement among Kodak home owners, and during the year 825 Modernization Loans were made by the ES&L, totaling \$325,806 for every kind of a repair and modernization job from cellar to attic.

Mortgages...
577 Kodak folks during 1947 financed the purchase of homes through ES&L mortgages totaling \$2,430,400, bringing to 2780 the number of mortgages on ES&L books and putting total amount up to \$9,169,612.

EASTMAN SAVINGS AND LOAN ASSOCIATION Annual Financial Statement Assets and Liabilities as at Dec. 31, 1947

ASSETS	Dec. 31, 1947	Dec. 31, 1946
First mortgage loans.....	\$ 9,169,612.06	\$ 7,918,108.36

Disposition of net income:		
Added to surplus.....	\$ 19,000.00	\$ 17,000.00
Added to undivided profits	37,090.42	52,826.34
Total disposition of net income.....	\$ 56,090.42	\$ 69,826.34

The accuracy of the accompanying statements is insured by a program of audit which subjects the accounts of the Association to an unusually thorough review. In addition to the work of the staff auditor, employed by the Association for the purpose of carrying on a continuous audit of the accounts, there is also a yearly audit by representatives of the New York State Banking Department, another audit by certified public accountants made at the direction of the directors of the Association, and a series of audits and checks carried on by an auditing committee composed of representatives of the three Rochester plants and Kodak Office.

Dividends...

Members of the ES&L continued to get high returns on their money, collecting \$327,703 in dividends during the year. This brings to \$4,397,232 the amount paid out in dividends on members' accounts since the ES&L was chartered.

Deposits...

Savings of ES&L members reached a new high of \$15,663,897 during the year, an increase of 20 per cent over 1946. More Kodak folks than ever put more of their money into ES&L accounts, which reached a new high of 34,957.

Activity...

1947 was marked by increased activity for the ES&L, with window, check and payroll deduction transactions soaring to record highs. To handle this heavy volume of business, operating expenses amounted to \$178,600 for the year.

U. S. Bonds...

In accord with its policy of keeping members' savings in investments having the maximum amount of security, the Association now has \$7,681,875 of its funds invested in U. S. Government Bonds.

Assets...

The ES&L is larger now than at any time since it came into existence, and during 1947 its assets reached a new peak of \$17,578,941. Its strength is emphasized by the reserves, surplus and undivided profits amounting to \$1,242,072.

It's Catch as Catch Can . . . With Leap Year Here Again

Leap year comes but once in every four. Yes, girls, Mrs. Roosevelt has her "Day," Cole Porter his "Night and Day," but we, the nubile, female population, have 366 days to assert our rights.

Three hundred and sixty-six Sadie Hawkins days! It shouldn't take this long, however, before popping the question. Indeed, as suitresses (female suitors), we mustn't surprise the unsuspecting male. Let's take our time about this thing.

Approaches Suggested

Extensive research in behalf of the single maiden has been compiled by this writer. The bulk of suggestions which follow have been gathered from two sources . . . books bearing weight and personal observation.

1—Invite the "little man" (stolen from the phrase "little woman") to dinner and the movies. This is aggressive, but guaranteed to be well received. You have lured him into a pleasant state of mind. He's had a wonderful time and didn't have to deduct "entertainment" from this week's budget.

2—Number two suggestion is less obvious. "Let him chase you, until you catch him," is the advice of one marital expert. Of course, if he doesn't chase you, Dr. X's theory falls completely short of your situation.

3—To catch him unaware, sug-

gest he try Bloxo shaving cream. Men all over the country have been heard groaning "I'm engaged, I use Bloxo, I've been trapped."

Groundwork laid, pop the question! Kneeling for the occasion definitely is frowned upon. Something subtle is suggested. For example, "I know where there's a darling furnished apartment for \$50 a month," or, if you're sure of yourself, "May I file my unpaid bills with your unpaid bills?"

Kegler with 233 Misses Classic

"This is the first year in the past four I didn't sign up for the Times-Union Classic," was the disappointed note sounded by Dorothy Hughes last week. And, this is the first year in the past four she would have qualified for the tournament, told the kegler, who on the night of Jan. 8 turned in a score of 233 in her CW league.

Five days later, Marge Sale, KP, topped her score by two points. Marge bowls with the Kodakettes, Girls' 16-Team, of the KPAA.

H-E Newcomer Truck Farmed With Parents

Genevieve King, a newcomer to Hawk-Eye's Final Inspection Dept., knows a thing or two about scientific truck farming, and well she might, for until a few months ago, Genevieve was knee-deep in spinach, cabbage, celery and other garden vegetables on her parents' 70-acre farm in Irondequoit.

Being a member of the so-called "weaker sex" proved no deterrent for the Hawk-Eye girl to pitch in and do her share of the work with the rest of the family. "Early in March," says Genevieve, "we would start working in the field and would continue, rain or shine, right through November." Her chores along with her father and brother included such things as planting, weeding, spraying, harvesting, trimming and packing.

A graduate of Irondequoit High, the H-E newcomer still helps out on the farm on weekends and lists as her favorite hobby a study of the scientific innovations in the field of truck farming.

New Bowlers 'Get on Ball' To Organize Own League

The adage, "The early bird catches the worm," reversed its effect this year on kegling hopefuls in the KP Time Office who didn't feel equal to competition in larger leagues. Frustrated in their efforts to obtain alleys in '47, Time Office girls this year started early in their quest. Results: a league boasting four teams of six keggers each meets from 7 to 9 every Thursday evening at the Charlotte Bowling Hall.

The girls, the majority of whom are new at the game, maintain a continual spirit of friendly rivalry. Sewer balls are not frowned upon, for each one must be accounted for by a penny contribution to the prize and banquet fund.

More than half of the women hold averages below 100. High game of 190 this season was rolled by Doris Redder, who has an average of 124. Jean Ward, a 114-average bowler, has high three-game total of 474.

Team captains are Betty Smith, Evelyn Schumacher, Alice Herman and Ruth Whitcomb, who with Rose Gasser, treasurer, and Connie Howard, secretary, compose the executive committee.

Smart in Smocks—Margaret Quinn and Janet Carpenter, Sales Dept. mail clerks and messengers, to prevent soiling blouses with loads of mail, decided to buy smocks. After a two-hour, fruitless search for the businesslike style, they bought patterns and made ones of navy blue, embroidering their names on the pockets.

parts. Cut off roots and any tough stems. Wash thoroughly.

The first wash should be rather warm to remove sand and dirt. Let kale drain after last wash, sprinkle with salt; put in kettle with one-half inch water. Cover. Steam or cook until tender . . . about 10 to 20 minutes. While kale is steaming, fry bacon until crisp. Crumble and mix bacon and drippings with kale leaves. Serve.

Eat 'A' In Kale, Says Nutritionist

Kale never has had a promoter like Popeye! In spite of its large Vitamin A content, the curly cabbage-like vegetable often is ignored at the vegetable counter.

No apparent reason has been given for this condition . . . it tastes good and is good for you.

But just to make the green more attractive at the dinner table, Nutrition Adviser Wintress D. Murray has recommended an appealing Kale & Bacon recipe.

- 1 package of kale
- 4 strips of bacon

Examine leaves of kale and remove all discolored and bruised

Color Shots Interest Scotty

From Montana—Scotty Kleinschmidt, shown with a Kodaslide Projector, Master Model, joined KO's Stenographic Dept. to learn more about photography.

Color photography has brought to Rochester a Montana couple who met in a high school camera club.

Scotty Kleinschmidt joined KO's Stenographic Dept. to learn husband is enrolled in RIT's three-year color course.

Together they have a collection of 500 Kodachrome transparencies, exposed in their Bantam Special.

These Scotty has shown at meetings of the farm bureau, 4-H Club, ski groups, and ladies' clubs in Bozeman, Mont.

Winter Playtime—Helene Lingel is poised to return a snowball, as she models a trim, gabardine snowsuit from Edwards. The outfit can be had in two color combinations—white and navy blue or red and navy blue. Helen, who hails from Buffalo, is assistant dietitian in Camera Works Cafeteria. By the way, when she lets down her neatly braided, blond hair, it measures 16 inches.

The Market Place

KODAKERY ads are accepted on a first-come, first-served basis. Department correspondents in each Kodak Division are supplied with ad blanks which, when your ad is typed or printed on them in 25 words or less, are put in the Company mail addressed to "KODAKERY," or handed in to your plant editor. All ads should be received by KODAKERY before 10 a.m., Tuesday, of the week preceding issue. HOME PHONE NUMBERS OR ADDRESSES MUST BE USED IN ADS. KODAKERY reserves the right to refuse ads and to limit the number of words used. Suggested types are: FOR SALE, FOR RENT, WANTED, WANTED TO RENT, LOST AND FOUND, SWAPS. KODAKERY READERS ARE ASKED TO PLACE ADS ONLY FOR THEMSELVES AND HOUSEHOLD—NOT FOR FRIENDS OR RELATIVES. TO DO THIS IS TO DENY SPACE TO THE PEOPLE OF KODAK FOR WHOM THIS SPACE IS RESERVED.

Marge Sale's 235 Sets Season Record for Women

642 Series By Jasper Tops Men

Marge Sale, a member of the Kodakettes in the KPAA Girls' 16-Team League, fashioned a 235 solo Jan. 12 at Ridge to rack up a new season's single mark for Kodak's feminine bowlers.

Marge broke loose in her second game when she piled on seven consecutive strikes. She left the 7-pin in the eighth frame, struck in the ninth and finished with a split.

Marion Ellis, a teammate, has a 231 solo to her credit this season.

Jack Jasper paced the men's pin parade with a 642. In posting the week's high six-ply count, the CW Supervisors' League kegler also crayoned top solo, a hefty 262.

League secretaries are again reminded to include first names on the weekly score sheets turned in for publication in KODAKERY.)

KPAA Basketeers Lose Exhibitions

Kodak Park's cagers dropped an exhibition contest to the Glens Falls town team, 43-34, on Jan. 10. The down-state outfit is managed by Ray Young, formerly of Hawk-Eye. The Kaypees enjoyed a stop-over in Albany where "Hank" Brauner, a native son, treated his teammates to a sight-seeing tour of the capital city. . . . Coach Jack Brightman took his hoopsters to the River Campus Palestra last Saturday evening where they lost to the U. of R. frosh forces in a preliminary to the Rochester-Oberlin fracas, 56-52.

High Single—Marge Sale, above, rolled a 235 single, highest this season in EK women's pin circles.

11 Straight For Bldg. 23 In KP Wheel

Displaying a well-oiled scoring attack, Syd Gamlen's Engineering quint registered two easy wins last week to move into second place in the National division of the KPAA departmental hoop league. The Engineers rolled over the Cafeteria, 51-11, as Gamlen and Tom Page connected for 15 points apiece, and humbled the Emcos, 54-22, with long Jim Griffin tossing in 15.

Bldg. 23 cagers chalked up their 11th consecutive victory in the National division, defeating Bldg. 58, 45-32, as forward Murray Bell-nap rang up 11 points. Ed Iles tallied 10 for the losers.

Bldg. 30 Wins

In the American division, Bldg. 30 annexed a 56-49 decision over Bldg. 12 to strengthen their hold on first place. Wilson Pask, with 5 field goals and 5 free throws, paced scorers for both teams.

Jim Moyer's Synthetic Chemistry outfit took over the runner-up spot, tacking a 30-24 defeat on Emulsion Research as Jerry Rauber again ran wild, scoring 18 points. Ed Terlynck and Jim Shepherd looked best for the losers.

Standings as of Jan. 14:

Office, Stock Quintets Win at KO

KEN MASON'S 21 points sparked the Office Penpushers to their seventh victory in eight starts against Repair, 47-34, and Rochester Branch Stock remained on the leaders' heels with a 43-30 conquest of Shipping last week in the KO Intraplant loop.

Jim Arnold, Office center, clicked for 10 points to aid Mason in the Penpushers' victory. Repair grabbed a 22-17 lead in the first half, but in the stretch drive Mason, Arnold, Sid Nichols and Dick Mayberry collaborated in the

rally that overcame the Fixers' lead. Chuck Reiner, with 13, was high for Repair.

Stock grabbed an early lead against the Shipping quint and was never headed. At half-time the Branch basketmen owned a 22-17 margin. Art Frantz hit the bulls-eye for 17 points for the winners.

KP Billiard Artist Once Defeated Willie Hoppe

"I JUST OUTLUCKED him," says Frank Malley of Kodak Park's Time Office in describing his victory over the redoubtable Willie Hoppe in a three-cushion exhibition back in 1942.

Frank, who has been propelling cue balls since he was 14, started while in high school in Ithaca where an amateur golf champ from Chicago, adept at the table-top pastime, volunteered to give him instruction. He caught on fast and soon was taking part in YMCA tournaments. Later, while working in New York, he began to enter Class A amateur events where he managed to do okay against well-known balkline specialists.

Returning to Ithaca, Malley stayed long enough to participate in several exhibitions with Erich Hagenlacher, Hoppe and Jay Bozeman. Eventually he moved to Wilmington, Del., where he became acquainted with Jimmy Caras, famed for his pool exploits, and capable of holding his own against his billiard brethren. Here he

Frank Malley

crossed cues with Jake Schaefer,

Kaypees Cop Third In a Row

Kodak Park made it three in a row Monday night in the Interplant Basketball League, thumping Hawk-Eye 39-23. Jack Brightman's charges now have vanquished every team in the league, and have piled up a 129 point total, as against 85 for the opposition in the three tilts.

Bernie Messmer's Camera Works quint, previously deadlocked with Kodak Office for the runnerup spot, broke the tie with a hard-earned 37-26 decision over KO.

Three new faces dotted the Kaypees' lineup. Of the trio Jack Solen was high with 8 points. Sharing scoring honors with him were Al McIntee and Ralph Taccone, the Kaypee veterans, each of whom also collected 8.

Art Frantz sparked the KO bid against CW, threading the nets for 13. Bob Keegan of the winners had 11. The league's individual scoring leaders follow:

KP	W L
CW	3 0/KO 1 2
	2 1/H-E 0 3

Games Monday, Jan. 26, pit H-E against CW in the 7:30 fracas, with the Kaypees facing KO in the second half of the twin bill. Basketball fans are reminded that dancing follows the last game, and that the only admission charge is presentation of KPAA, CWRC, HEAA or KORC membership cards. Members are invited to bring guests. The Kodak Office Auditorium is the scene of the weekly basketball cards and dances.

Odds and Ends

Kodak Badminton Club's exhibition of stars is scheduled for 2 p.m. Saturday, Jan. 24, in the Kodak Office Auditorium. Headlining the card will be Ethel Marshall, National Women's single champion.

With the Kodak Park team entered in the Four Point Gun Club's March of Dimes Benefit shoot, the KPAA Gun Club layout will be closed Jan. 25. Charlie Jutsum and Howard VanAuken, with 48's, paced the Kaypee shooters last Sunday.
