

Tiny Cutter Does Major Job at CW

A tiny cutter, about the size of a wooden match, is doing the work of hundreds of steel files in helping to produce Kodascopes at Camera Works.

They call the device a selective profiling machine in the CW Production Engineering Lab, where it was produced. But the cutter really is the featured part of the small, compact machine.

Made of cemented tungsten carbide, the cutter ranks in hardness next to the sapphire and diamond.

The best steel file previously used on the operation had a life of about three hours. Already the new cutter has outlasted hundreds of such files. Spinning at the rate of 65,000 revolutions per minute, the tiny cutter is capable of slicing through the hardest steel file in a matter of minutes.

Machines Claw Shoes

Job of the new cutter is to machine the laminated phenolic shoes of the pull-down claws for the Kodascopes to a precision fit with the cams that drive them. These shoes are extremely difficult to machine, and the hardest steel tools soon lost their keen edge when cutting them. This made it difficult to hold exact dimensions.

For about a quarter of a century the fitting job on the shoes was done mostly by hand. It required a high degree of skill on the part of the operator to obtain the correct setting for the cam which operates the pull-down claws.

The selective profiling machine is about the size of the Kodak All-Metal Printer. Inside the machine is a maze of control cams and levers, and about 1½ inches of the cutting tool protrudes through an opening in the top.

The operator sets the pull-down claw on a series of pins which locate the part with respect to the cutter. Then he gives the lever a

Eastman House — Ted Moore, center, architect, and Bob Sheridan, right, construction engineer, both of the E&M Dept. at KP, check over blueprints with Adam Mrzywka, foreman for A. W. Hopeman & Son, contractors making the alterations at the Eastman House Inc. which will be transformed into a world photographic center.

Tons of German Documents Transferred to Microfilm

Millions of German technical documents on miles and miles of film . . . that's the story of the gigantic postwar microfilming operation in which Recordak equipment has played a vital part.

The big job of collecting all German technical knowledge and putting it on film was assigned to FIAT (Field Information Agency Technical), a War Department group.

number of turns, and the cutter, operated by compressed air, moves in a set pattern, trimming down the shoes to proper size.

A much greater degree of accuracy is obtained on the operation with the semiautomatic cutter than possibly could be obtained with a file in the hands of a highly-skilled operator. And the mortality of files is greatly lessened.

Tons of factory records, research records of universities and institutions, German governmental agencies, patents, journals, etc., have been screened, then microfilmed for use by technical organizations—industrial, academic or governmental.

Big List Compiled

To start the huge project, a roster of all German industrial plants, research institutes, universities and governmental agencies was compiled, each being systematically reconnoitered for important records. Material deemed of value to Allied agencies was selected by document analysts for microfilming. Portable Recordak microfilming machines were set up on the spot to do the job.

Checked on Readers

After development, the film was checked on Recordak Readers for duplications and unwanted material and an abstract made of its contents to facilitate ready reference by interested groups.

Film which underwent this preliminary processing was shipped to the U.S. where it was made available to interested individuals and governmental agencies.

Thousands of Feet

Thousands of feet of film now hold a veritable storehouse of information from enemy and liberated countries concerning German scientific, industrial and technological processes, inventions, methods, devices, improvements and

(Continued on Page 4)

Vets Deadline July 31 On No-Exam Policies

Kodak war veterans are reminded by the Veterans Administration that they have only until July 31 to renew their lapsed National Service Life Insurance policies without physical examinations. After that date such examinations will be required before reinstatement.

TEC's Antioxidants To Save Your Food

Two new antioxidants, announced by Tennessee Eastman Corp., are expected to prove a boon to the housewife. They are Tenox HQ and Tenox BHA. Their use soon may make rancid potato chips, soda crackers and cocktail snacks a thing of the past and the housewife can use lard for deep-fat frying over and over again without fear of it becoming "strong."

Added to fats and oils during processing, very small percentages of Tenox HQ and Tenox BHA combat effectively the commonest type of rancidity, which is caused by the action of oxygen in the atmosphere. Indications are that these compounds, used separately or in combination, will stabilize fats and oils for almost every conceivable edible use, throughout the normal time of processing, distribution and consumption.

Thorough toxicity tests have shown these products to be safe for human consumption when used in the prescribed proportions. Neither do they impair the nutritional value of food and they are economical to use.

Highly Purified

Tenox HQ, a highly purified form of hydroquinone, is an effective stabilizer for salad oils, cooking oils, margarine, peanut butter, orange and lemon oil extracts and dried milk. It is applicable to vitamin A oils, preventing loss of available vitamin A during storage.

Tenox BHA, chemically known as butylated hydroxy anisole, is of special value in stabilizing animal fats, particularly lard. Investigations by the American Meat Institute have shown that a combination of Tenox BHA and Tenox HQ, plus a synergist such as citric acid, provides an adequate answer to the stabilization of lard for all uses, including deep-fat frying of potato chips and doughnuts and the baking of crackers or pastry.

Introduction of Tenox fills a need for effective antioxidants in pure enough form for the fat and oil industries. The housewife now, through use of Tenox, can utilize fats and oils more fully, thereby stretching a tight supply of these essential foodstuffs and helping to make them available at less cost to the consuming public.

Monkeyography

It's no easy trick to photograph a spider monkey even for a noted pet photographer such as Georgia Engelhard, because it's difficult to get it to hold still for even a split second.

She tried one day and had no success until the monkey became interested in her Kodak Reflex Camera (which incidentally is one of her favorites). Then, by simply putting a nut in the focusing hood, she got this cute shot.

Mountain and mountain-climbing photography are other specialties of Georgia's. A free lance, she has done work for Life, Look, Pic, American Home and other well-known magazines. Besides liking her Reflex very much, Georgia also prefers Kodak's Super-XX and Super Panchro Press Type B films and uses them almost exclusively.

Keen Cutter — Ida Ciccolone operates the selective profiling machine in Dept. 37 at Camera Works while Merv Barons, left, foreman, and Fred Powell, in charge of CW's Production Engineering Lab, check its efficiency. The little machine, produced by the lab, does a job on which hundreds of files formerly were used.

Recordak Reader — Don Bush of the Recordak Assembly Dept. 75 at Hawk-Eye makes a final adjustment in a Recordak Reader, Model C. Similar machines are being used to check miles of microfilm on which German technical documents have been copied.

You Say It's Hot Here? Cairo Really Sizzles

The summer heat holds no terrors for Bart Stiles of the Paper Mill. He recently returned from faraway Cairo in Egypt where the hot desert sands bake the ancient ruins. Bart and his wife covered

Cavorting in Cairo— Bart Stiles of the Park's Paper Mill, left, and his son, Herb, a TWA navigator, took a camel ride while Bart and his wife were in Cairo to visit the younger Stiles.

a good share of the globe on their air jaunt which included stops in several countries and afforded them a several weeks' visit with their son, Herbert, a navigator with TWA, who has been in the Near East since the end of the war.

Flying halfway around the world can be as uneventful as rolling off a log, says Stiles, whose plane touched airports in Ireland, Scotland, Italy and Greece on the round-trip flight.

Cairo offers an interesting comparison between old and new civilizations, he reports, money changers mingling freely with diplomats in front of Shepheard's Hotel, one of the city's showplaces. A building boom is now on in the metropolis, he adds, many modern apartment houses rising within a stone's throw of the Nile.

Visit Pyramids

Bart and his wife made several visits to the pyramids of Giza, exploring the interior of one of the larger ones which they found "surprisingly empty." The current unrest between the Arabs and Jews was evident during their stay in the Egyptian capital, many young Arab men being drilled for military duty in Palestine.

While waiting at the Athens airport for his plane to refuel on the return trip, Bart said he could hear cannon booming in the nearby hills where guerrillas were fighting the Greek Nationalists. After a round of sight-seeing in historic Rome, the Stileses flew to Geneva, Switzerland, where they encountered marvelous weather and a profusion of spring flowers.

Some of the worst journey conditions of the entire journey were encountered when his plane reached New York. A bank of heavy fog enveloped LaGuardia Airport, and the plane spent more than two hours circling the region before putting down for a landing.

While in Cairo Bart met J. H. Deenik, Kodak's Near East representative, who extended to him all the courtesies of Kodak House. The Great Pyramids see many daily users of Kodak film and cameras, said Deenik.

Photo Patter

Get Good Snaps and Have Fun, Too, By Using Animal Pets for Subjects

Pets and animals make excellent picture subjects. That's because they have almost universal appeal. Everyone gets a big kick out of seeing kittens playing on the rug, or puppies gamboling in the yard. It's not hard to make good snapshots with such subjects, either. Not if you picture them when they're in action.

Technically, there are just two things to remember. First, always use a shutter speed that will be fast enough to stop any sudden movement of the animal. A shutter speed of at least 1/100 second is recommended. Second, for best results, take your pictures from a low viewpoint. That's very important if you want to make your subject look "right" against the background you choose.

Low Viewpoint

Take today's illustration, for instance. This fine picture was a national prize winner in last year's Newspaper National Snapshot Awards. It's effective because the picture taker took the shot from a low point of view. This made his subjects stand out clearly against the sky and made them look big and important, picturewise.

Imagine what this picture might have looked like if the photographer had snapped the goats from an ordinary eye-level or waist-level viewpoint, while they were standing in their pen. By looking down on his subjects he'd have made them look small and less im-

portant. And the chances are the background would have been less pleasing, too.

Many of the animal pictures which have won prizes in previous

Kidnapping — The photographer chose a low point of view for his camera to take this excellent snapshot of the two goats. Animal pictures like this have great appeal.

Third Placers — Here are the winners of third prizes in the Third Annual 1948 National High School Photographic Awards, sponsored by Kodak, with a prize list of \$3500. Down the left side: "Rub-A-Dub-Dub," by Kenneth Langhout, Norwood, Ohio; "Northern Twilight," by Jordan Dombrowski, Evanston, Ill.; "Dandy Snow," by H. Bruce Dull, Connellsville, Pa. Down the right side: "Double or Nothing," by Bob Polk, Lake Geneva, Wis.; "Confusing," by Reed Bethke, Trenton, N.J.

Winners All

'TO EACH HIS OWN'

"I've been watching that mechanic for the last 15 minutes. There's a man who really knows his business.

"He didn't spill a drop of oil on the car. He put down the hood gently, fastened it securely and left no fingerprints on it. He wiped his hands on clean tissue before opening the door, spread a clean cloth over the upholstery, meshed the gears noiselessly and then drove carefully out into the street."

"Yeah. That's his own car."

One - Piece Plane —

Using Tennessee Eastman's plastic—Tenite—a Chicago manufacturer casts this model plane all in one piece. Scaled to 1/4 inch, the parts are packed in a kit and are assembled by the hobbyist with cement.

Newspaper National Snapshot Awards prove the same point. There was a splendid picture of a pup peeking around a corner that was taken almost at ground level. It won a major prize. A snap of two kittens playing with a pencil caught under a door, and photographed at almost the same level, caught the judges' eye and won a big cash prize. Other snaps of birds, monkeys, calves, lambs and colts taken from a low viewpoint have come home in the winner's position, contest results show.

So, when you start taking animal pictures don't hesitate to get down to your subject's level. It's not too much effort for a picture you'll treasure for years to come.

Dry Mount Press Ready for Trade

The Kodak Dry Mounting Press—complete with Kodak Tacking Iron—is again available after an absence of several years.

This efficient, easy-to-use press—for mounts up to 33 inches wide—features a built-in thermometer and a "high-low" switch for platen temperature control. Both the press and tacking iron may be operated on either AC or DC with an approximate consumption of 1200 watts on high and 300 watts on low temperature.

(Answer on Page 4)

This is a:

- Kodak Portable Miniature Enlarger.
- Kodak Autofocus Enlarger.
- Suspended Brownie Target Six-20 Camera for snapping small objects.

402 Okayed Suggestions Earn \$4335 During 6th Period at Kodak Park

\$350 Dollars for Trio — Walter VanEpps, left, received \$150 for his idea which was approved in sixth period at the Park. At right, are Robert Bee, left, and Norman Lung, who collaborated on a suggestion which earned \$200 for them.

Park Power Expert Dined On 40th Year with Kodak

Oscar V. Sprague, assistant superintendent of the Power Dept., whose name is synonymous with much of Kodak Park's progress in industrial power development, received the plaudits of his friends on July 7. A large group assembled in Powers Hotel ballroom that evening to celebrate his 40th service anniversary with EK.

Oscar represents the second generation of Spragues at Kodak. His father, Harry, at one time was associated with George Eastman as head of the Testing Dept., at State Street. The elder Sprague also had charge of Kodak's exhibit at the Chicago World's Fair in 1892, one of its earliest advertising ventures.

Before joining KP at the age of 16, Oscar attended Mechanics Institute on a three-year scholarship, graduating in 1908. Because Mr. Eastman was a friend of the family, Sprague sought his advice in regard to obtaining a job with Kodak. He was recommended to John F. Ancona, then chief draftsman at Kodak Park.

Takes P. G. Course

Eager to bring as much knowledge as possible to his work, he returned to Mechanics Institute for a three-year postgraduate night school course in general science, electrical engineering and steam engineering, meanwhile serving as draftsman and assistant service engineer in the E&M Dept.

In 1914 he joined the Power Dept. where he took charge of power tests, instruments, efficiency studies and other technical duties. At the same time he supervised the installation of various turbo-

generators and other power units.

Since 1908 the Power Dept. has made great strides, recalls Sprague, comparing its present electric generating capacity of 40,000 KW with its original 2000 KW limit. Of the plant's three tall chimneys, the first, or north chimney, went into operation in 1908, the same year that he came to the Park. Since that time the KP Power Dept., so far as can be determined, has developed the largest interconnected refrigeration plant in the world. It contains many difficult systems ranging from plus 40 degrees to minus 85 degrees Fahrenheit. The department also boasts a water supply station located on Lake Ontario which soon will be capable of delivering up to 33 million gallons of water per day to KP. This figure is comparable with the some 40 million gallon maximum capacity of the city system.

Keenly interested in athletics, Sprague annexed the plant tennis championship in 1914 and in 1915.

He is a member of the American Society of Mechanical Engineers and for a number of years has represented industry on a New York State Labor Dept. advisory committee on codes for power boilers and other equipment. Sprague also is chairman of the Rochester Chamber of Commerce committee on this and similar subjects.

Kodak Park suggesters realized a cash total of \$4335 in the sixth period. These awards were paid on 402 of 419 suggestions reviewed, and the \$4335 brings to well over \$50,000 the amount received by Kodak Park men and women during the first six periods of 1948.

Two members of the Paper Service Dept., Norman Lung and Robert Bee, collaborated to earn the period's high award of \$200. Their idea involves the use of a portable holding tank in the Chemical Mix section of the department. The use of the tank makes it possible to salvage more chemicals.

A check for \$150 went to Walter VanEpps, Film Emulsion Coating Shop, who proposed an application for a speed differential indicator. He designed it for use in the Kodapak Dept., a modification of which aids in controlling the slippage of sensitized paper during the coating process.

F. J. Brown Earns \$120

Fred J. Brown, Cine-Kodak Processing, was awarded \$120 for proposing the use of a different type film for making one of the routine tests conducted in the department, thus reducing costs.

Five others received checks for \$100. They are Herbert French, Kodacolor Paper Print Processing; John Biehler, Tool Room; Martin Bierworth, Roll Coating; Velma Bouchard, E&M, and James Knowles, also of Kodacolor Paper Print Processing.

A substantial saving in printer bulbs results from French's suggestion to modify the printer equipment. Knowles proposed a method whereby graphs used for plotting printer checks and charts can be made on a different type paper, thus precluding the need of purchasing special graph paper.

Waste Reducer

A modification to the paper skiving machinery used in the Roll Film Dept., effecting a reduction in waste by increasing accuracy, was recommended by Biehler. Bierworth designed a new part, used in some of the film casting machines, which corrects one of the causes of waste product. Velma's idea concerns a different filing system which has simplified the keeping of records for E&M Field Division personnel.

Two Metal Shop men, Victor Scheid and Joseph Cieslinski, pooled their efforts to earn \$70. Employing an adjustable pin gage on offset dies, more accuracy and uniformity are obtained in the fabrication of metal pieces.

Awards of \$50 were posted by Walter Schoeneman, Roll Film Panchromatic Spooling, and James Coughlin, Paper Sensitizing Coating. The tax withholding tables and payroll deduction schedule which currently appear on plant bulletin boards were the result of the adoption of Schoeneman's suggestion. This idea also has been extended to the Company's units in Rochester. Some confusion has been avoided by the adoption of Coughlin's suggestion to alter the present procedure for shutting down coating machines.

Troop 50 Scouts Enjoy Camp Stay

Enjoying their annual stay at Camp Cutler on Lake Ontario July 10-24 are 24 members of the Park's Boy Scout Troop 50, under direction of Scoutmaster Lester (Buck) Brown, Bldg. 34, and Bernard Galvin and Raymond Tobin, junior assistants. A full daily schedule of camping, swimming and hiking is listed, together with advancement trials.

On July 18 a family picnic will be held on the Ganega campsite, at which time parents of the scouts will inspect the quarters and review some of the activities. Members of the scouts' families also are invited to attend a campfire and special Court of Honor ceremonies to be held at the camp July 21.

It's in the Park

Mert's New 'Waltz King' ... Score: 43-41 in Third Inning

When Mabel Demchuck, Power, rounded out 35 years' association with Kodak June 19, J. H. Cather, superintendent, and Oscar Sprague, assistant-superintendent, were on hand to congratulate her and to make a gift presentation. Mabel was married July 3 to Leo Schmalz, brother of Charlie, a member of the KP Yard Dept.

J. H. Cather, superintendent of the Power Dept., presents one of several gifts which Mabel Demchuck received recently when she observed her 35th anniversary with Kodak. Oscar Sprague, assistant superintendent of Power, at right, offered congratulations.

Members of the Kodascope Dept., held their annual picnic at Durand-Eastman Park July 1. . . . Annette Faulkner, Roll Coating, has returned to her duties after eight weeks' absence due to illness. . . . Meri Snook, Plant Protection, is wearing the mantle of "Waltz King" following his ballroom exhibition with Ann Smith at a party given for Herb Harper June 28 at Crescent Beach Hotel. . . . The Suggestion Office in Bldg. 99 is answering to two additional telephone numbers. They are Exts. 2284 and 6214. . . . Eva Wolff, Cafeteria, reports that Carl Raymond and Robert Carl Wolff, her 1½-year-old twin grandsons, provided the center of attraction at a family gathering held July 4 at Port Bay in Wolcott, N.Y. Eva's brother-in-law, Frank Wolff also is employed in the Cafeteria.

Esther Johnson has replaced Dorothea Marsh as KODAKERY correspondent in the Department of Manufacturing Experiments. . . . Hot dogs and potato salad were much in evidence at the second annual picnic of the P&S Dept. June 24 at Mendon Ponds. . . . Harold Casperson Reel Mfg. Dept., Bldg. 48, received his 25-year service anniversary medal June 18. . . .

Alice Ann Scott, daughter of Ronald S. Scott, superintendent of the Cine Processing Dept., has returned to her duties in the Kodapak Laboratory after completing another year as a history major at Smith College. Alice reports that it seems strange to be wearing skirts again after donning "pedal-pushers" throughout most of the school year. . . . Close to 150 members enjoyed the 25th annual picnic of the Engineering Dept., at Corbett's Glen June 20. A picnic lunch was followed by a hot baseball game (the weather that is) between Dick Mosburger's Marauders and Dave Harris' Hellcats. The contest was called at the end of the third inning with the score at 43-41, because of the proximity of the refreshment stand. George Lynch and Ray Frenz served capably as chairmen of the arrangements committee. . . . Frank A. Curtis, retired member of the Machine Shop, has returned to Rochester after wintering in Orlando, Fla., and plans to look up his old acquaintances at the Park. . . . A deep curtsy in the direction of Arold Watkins, Engineering, who recently won a new vacuum cleaner for penning a winning limerick for the Arthur Godfrey radio show. . . . Associates and friends of Seward Smith, Industrial Engineering, gave a reception and party in his honor at Hotel Rochester July 1. An alumnus of the University of Michigan and an honorary member of Sigma Xi, Smith is retiring after completing 25 years of service in the Wage Standards section of the Industrial Engineering Dept. George Gustat, assistant superintendent, presented the honored guest with a gift.

Esther Johnson

He's All Power — Oscar Sprague, assistant superintendent of the Power Dept., even took time out to discuss a power project with G. T. Lane, left, assistant manager of Kodak Park, and J. H. Cather, superintendent of the Power Dept., at the dinner party celebrating Sprague's 40 years of service at KP. Of course the party was at the Powers (Hotel).

Here's part of the gathering that honored Seward Smith recently at his retirement and 25-year party. From left, Stan Kowalski, Barbara Smith, Mrs. Smith, Gabe Fyfe, George Gustat, Maynard Lee, Seward Smith, Ray Farnen, Al Dickhaut, Gerould T. Lane and Ed Plant.

Shooting — Millions of pages of German scientific documents have been micro-filmed as is being done here.

Reading — After the microfilm has been processed, it is checked in readers to see that frames are perfect. Retakes are ordered, and, after checking, are spliced in. Readers are operated by German girls under Allied supervision.

Abstracting — German specialists, some high in prewar industry and science, scan the finished microfilm in Recordak Readers, to reduce articles and whole technical books to a German language abstract. These later are translated into English and accompany the microfilm to the U.S. to facilitate classification.

2 Outstanding Prints Added To Camera Club's Collection

"WARMTH OF THE WINTER SUN"

Frank R. Fraprie

Two new prints were acquired recently by the Kodak Camera Club for its permanent collection, according to Glenn Matthews, KP, curator. They are "Warmth of the Winter Sun" by Frank R. Fraprie and "Progeny" by John H. Vondell, both recognized as experts of the photographic art. The Camera Club's collection is augmented from time to time by pictures taken by leading U.S. lensmen.

"Warmth in the Sun," Fraprie's most successful print, is a simple but finely balanced study of an old peasant woman in Taormina, Sicily, made while he was visiting there before the war. Two years of effort went into the search for this one picture, Fraprie claims, but the result was a negative that required no dodging or cropping.

The print has been hung 130 times to date in exhibitions all over the country, it is estimated.

Edits American Photography

A graduate of Harvard, Fraprie did postgraduate work in Europe and has edited American Photography for more than 40 years. He has been a consistent contributor to salons since 1925 and has enjoyed over 2500 acceptances in 1000 shows up to 1948.

An assistant professor in resident teaching at Massachusetts State College, Vondell specializes in poultry husbandry, and his prize-winning print, "Progeny," is the direct result of his application of photography to the subject. It shows two small chicks nestling around the foot of an adult bird.

German Data Microfilmed

(Continued from Page 1)
advances covering the years 1939 to 1946.

Demand for the microfilm copies has been extremely great because they present in compact form a full technical report as well as drawings, flow charts, etc., which would be much too bulky to handle by any other means.

The number of pages of documents microfilmed at various plants ranges from 1000 pages to 1,018,000 pages filmed at the Patent Office, Berlin.

Cross Country...

Win Green, of the Boston Store, was considerably embarrassed recently over the catch of a young fisherman. The catch took place during Win's subway ride to work; the youngster's hook attached to the pole he was holding, became firmly attached to the seat of Win's pants. Detachment took place only when a piece was cut out of the trousers to free the hook. . . . **Howard Scott**, of the Govt. Sales office in Washington, placed 17th in the 136-mile Hudson River motorboat race from Albany to New York. His time was 4 hours, 18 minutes, 55 seconds, with average speed 31 m.p.h. . . . The **Lehman** family is really Kodak-minded. **Jimmy**, shift foreman at the Washington Laboratory, has just completed 20 years service, and his father, **Jim sr.**, has recently retired from Kodak in New York City after 25 years. Then there's **Howie**, a Recordak inspector in New York, and **Dick**, with Recordak in Chicago. . . . Marking his 25th year in Chicago was **Bill Gust**, general foreman of the Cine Production Dept. at the Chicago Lab, who celebrated at a surprise dinner party staged by lab folks. Bill, who has trained at different times in Panama and Rochester says he's "kinda curious" about what's ahead in the next 25 years!

KP Leads Shoetossers

Kodak Park and Camera Works are staging a real battle for the Rochester Industrial Horseshoe League leadership. Harold Freer's Kaypees led by a slender margin at the time the following standings were released:

	W	L	Pct.
Kodak Park	166	59	.738
Camera Works	151	74	.671
Balcos	131	69	.655
Gleason	116	109	.515
Ritter	114	111	.507
Products	111	139	.444
Taylor	78	147	.347
DPI	60	131	.314
Hawk-Eye	39	127	.237

Kodakwiz

ANSWER

(Question on Page 2)

It is a Kodak Portable Miniature Enlarger. It is particularly used for 35mm. and Bantam negatives. It comes with an accessory Carryall Case.

Kodak Camera Club News

Wright Joins Club's Staff . . . Beck's Color Slide Tops List

The appointment of Melvin Wright to the staff of the Kodak Camera Club has been announced by the KP Industrial Relations Dept. A native of Peoria, Ill., where he was formerly associated

with the Caterpillar Tractor Company, Wright was a member of the class of 1948 at Rochester Institute of Technology, completing a course of studies in the Photographic Day School. During World War II he served as a bombardier with the Air Force.

While attending RIT he modelled at Kodak Office in his spare time. Although golf ranks high among his hobbies, his first love is quartet singing, a pastime endorsed by the SPEBSQSA.

Wright

New One — New equipment is constantly being made available to Kodak Camera Club members. Among the new Kodak cameras recently added to the club's loan list are Bantams, 35mm., and Six-20 Vigilants, as well as the Tourist Six-20, the first of which is being inspected by **Neva Newman**, a summertime member of the club's staff.

John R. Beck, KP, finished first in the recent color slide competition held for members of the Kodak Camera Club's Color Exposure and Composition class.

Beck's "Man on Stairs" was judged ahead of "Gas Works," submitted by Bryce Alberty, CW, and "Lady and Dog," entered by J. F. Beau, KP.

Honorable mention awards went to Walter J. Strasser, KP; J. H. Altman, KP; Phillip Schluckebier, CW; Vernon E. Mesick, KP; Albert H. Allard, KP; and Margaret Richards, KO.

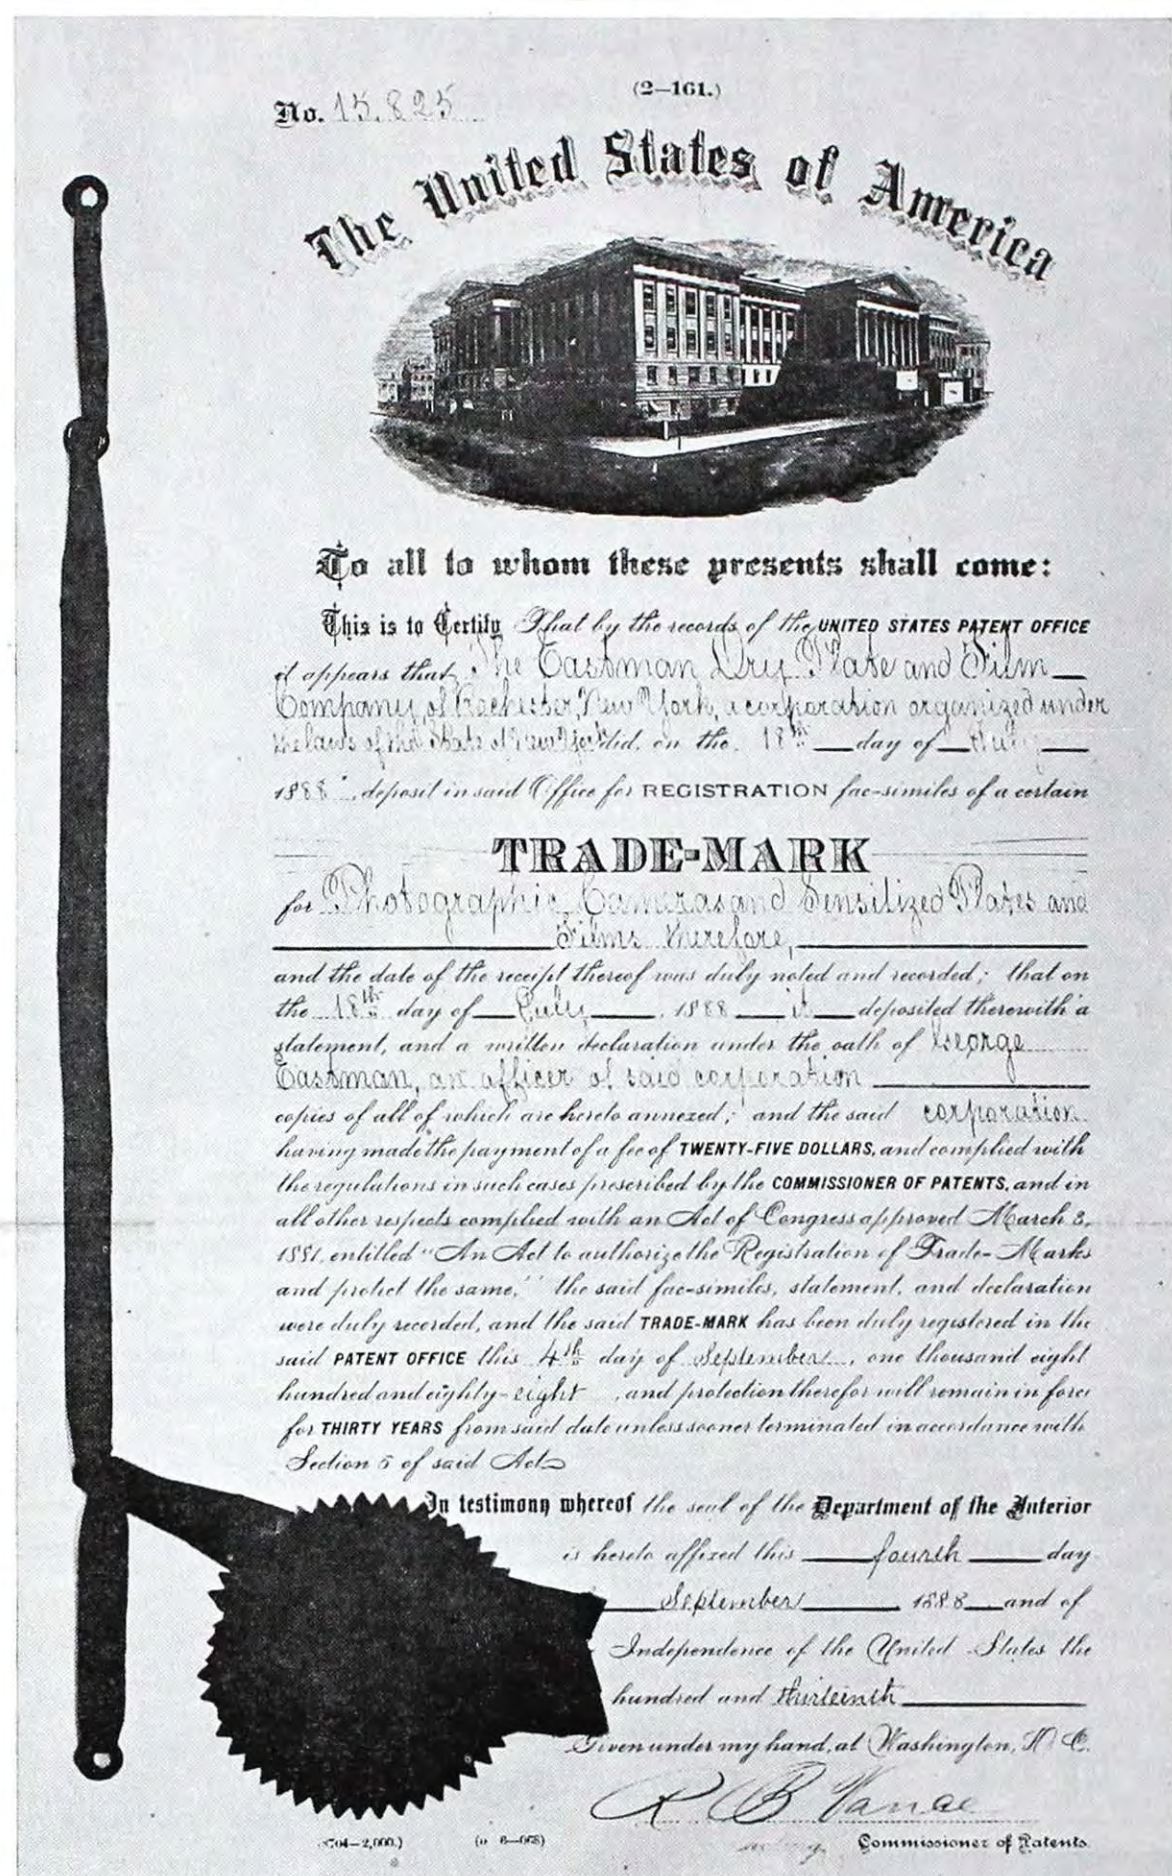

Hash Says 'No' — Bill Sweeney, KO Shipping, misses "first choose" by a narrow margin as Andy Vogel, KP Shipping, wins out. Hash McNeil, KO Receiving, who has charge of the sports program of the 49th annual picnic of the Shipping, Receiving and Traffic Depts. of KO, KP, CW, H-E and NOD, restrains Sweeney with "whole hand or none." The two shipping departments will play ball, with Sweeney and Vogel, picnic cochairmen, captaining teams. The picnic's set for Saturday, July 31, at Bay View Hotel.

Speaking of Television — The mysteries of video transmission came in for discussion at Kodak Park recently when Dr. Alfred Goldsmith, right, nationally recognized consultant on television, radio and sound films, visited the Research Laboratories. Shown conferring with Dr. Goldsmith are, from left, Dr. Cyril Staud, director of the Research Laboratories; Donald Hyndman, manager of EK's N.Y. Office of Motion Picture Film Dept., and Gentry Veal of the Lab's Physics Dept. Dr. Goldsmith is past president of the Institute of Radio Engineers and the Society of Motion Picture Engineers and was vice-president and general engineer of RCA.

1888—July 18 . . . Kodak Milestone—1948

Anniversary — It was just 60 years ago, come next Sunday—July 18, 1888—that application was made for the Kodak trade-mark. It was granted a month and a half later, as this document attests.

Anything for a Laugh . . .

"Why is the little fellow crying?"
"B-b-cause he can't have a holiday."
"Why can't he have a holiday?"
"Because he don't go to school yet."

"I am very disappointed in the way your son Jimmy talks. Only today he said: 'I ain't never went nowhere.'"

Jimmy's father: "He ain't, ain't he? Why, the young whelp's done traveled twicet as far as most kids his age."

"You wrote a policy on a 92-year-old man!" gasped the insurance branch manager.

"Sure," replied the new and elated salesman, "our statistics show that few men die after 92."

"Do you know what one little toe said to the other little toe?"

"No, what?"

"Don't look now, but I think we are being followed by a couple of heels!"

In her school essay on "Parents" a little girl wrote: "We get our parents when they are so old that it is impossible to change their habits."

"I had a swell hunch at the races the other day. It was the seventh day of the seventh month, my wife and I had been married exactly seven years and it was the seventh race, so I played horse No. 7."

"And he won?"
"Nope, came in seventh."

Courtesy Aetna Casualty and Surety Co.
"I SEE BY THE PAPER"
... then "whammo" and he never saw a thing again!"

Kodak Transparencies Attract at Exhibition

Weston Work—This represents one of the first serious color efforts of Edward Weston, widely recognized in the black-and-white field. A large transparency of this is attracting much comment at the New York Museum of Modern Art.

By Adams—

In full color, this picture taken by Ansel Adams of Jackson Hole, Wyo., showing the Snake River with the Grand Teton Mountains in the background, is one of his best works.

The four 30x40 color transparencies made from Kodachrome films—blow-ups of photographs used in Kodak's advertising—are attracting a lot of attention in the "In and Out of Focus" exhibition now being staged in the New York Museum of Modern Science.

They were selected by Edward J. Steichen, wartime director of the Naval Photographic Institute, and now director of the museum's Photography Dept., as outstanding examples of contemporary color work.

Two each of the original Kodachrome films were taken by Edward Weston and Ansel Adams, two of the leading photographers of the present day, who were commissioned to take the pictures by the Company.

The show is the first large exhibition arranged by Steichen at the museum. It contains the works of "name" photographers as well as newcomers and emphasizes the fact that abstract photography, soft focus, out-of-focus and sharply focused photographs all have their places in today's photography.

A lifelong devotee to black-and-white photography, the pictures by Weston are even more unusual since they represent his first serious work in color. Since Kodak commissioned him to take the pictures for its advertising, Weston has become deeply interested in color photography.

Adams, who specializes in scenes, with some of his better works represented in the exhibition, has a Guggenheim Fellowship to portray on film, both in color and black-and-white, the scenic beauties and wonders of our national parks.

EK People Save \$35,220 Through RHS Membership

Kodak members of Rochester Hospital Service received \$35,220 in hospital credit during May, according to an RHS report just issued.

The claims, days covered and hospital credit, by divisions are: Kodak Park, 205 claims; 1567 days; \$20,423 credit; Camera Works, 80 claims; 612 days; \$8237 credit; Hawk-Eye, 43 claims, 336 days, \$4445 credit; Kodak Office, 16 claims, 188 days, \$2115 credit.

Among outstanding cases cited was that of a Kodak Park man who received \$523 hospital credit for one claim after being a member only five months. A Kodak Office man has received \$438 on two claims; a Camera Works man \$307 for one claim and a Hawk-Eye man, \$363 on four claims.

Lost Your Pen?

If you have (1) lost a fountain pen and (2) have been in the Kodak plane recently, Jane Fleming of the KO Traffic Dept., would like for you to get in touch with her. Jane has an Eversharp ball-point pen which was found on the plane, and, although she has made scores of calls to possible pen-losers, she hasn't found the owner. Are you the one she's looking for?

Ex-Roommates Fulfill Hawaii Vacation Hopes

Tropical Togs — When Mary Loucks of CW Dept. 68 learned she was at last going to Hawaii, she carefully planned a wardrobe that would suit her needs. Three of her choices appear above superimposed on a map of the Hawaiian Islands she now explores. At left is a waffle pique dinner dress of delicate pink. A graceful leaf design in white is applied at shoulders and on the skirt top. Mary especially likes the sleeves, because they are perky enough to require no shoulder pads. Center, the green and white striped evening gown with solid green midriff is a summery cotton featuring a feminine bodice gathered in soft pleats around the shoulders. For play, Mary decided upon a string-made gray and white pull-over to wear with sharp tailor-made slacks.

Six Girls Find Sewing Circle Fun, Helpful

Mary Loucks, CW Selects Wardrobe

Two young women drew a long, deep breath of delight yesterday as they arrived in the Hawaiian Islands.

Mary Loucks of CW Dept. 68 and her former roommate in New York City, Mary Mulligan, had wanted to take a six-week vacation to the tropical islands for the past two years. It now is being realized.

Five months ago they learned that the boat accommodations they desired had been obtained to take them from Portland, Ore., to Hawaii. The ocean voyage was just as important in their plans as plane-ing and motoring about the various islands upon arrival.

To Stay at Hotel

The first eight days of their stay there is being spent in the beautiful Royal Hawaiian Hotel on Waikiki Beach, Oahu. They also plan to stay on the Island of Hawaii at the Hana Ranch, reputed to be the largest ranch in the world.

Planning a wardrobe for the tropical vacation and cool evenings on shipboard presented a problem to the girls. The Kodaker had a unique problem of her own, because finding a wide selection of clothes in size 7 is a difficult job. This is the reason Mary spent a shopping-good time one weekend in New York City. Having lived there seven years, she knew the stores in which she'd find what she wanted.

What She'll Wear

Included in her wardrobe are the two long dresses and slack outfit pictured above. She also purchased a smart bolero sunback of raw silk, a pink cotton trimmed with white tating and a gray linen. She is especially fond of an unusual silk print with orchid, black and brown flowers on a white background. Two shorts outfits, two bathing suits with matching beach robe for one and several sweater sets are among the apparel she will sport.

The Kodak girl claimed, "I'm going to see all the scenery through a view finder." Although a comparative novice with a camera, Mary hopes to come back with a fine collection of Kodachrome movies and slides. She took with her an overnight bag entirely filled with photographic supplies . . . which merely augments her statement. Friends look forward to seeing Hawaii as Mary and her travelling companion are seeing it now.

Gray and Green—Esther Johnson, KP, models the first dress she has ever made herself. It is a two-piece gray chambray with which she wears a gay, green print scarf, green purse and green lizard shoes and belt. She has previously put together a terry cloth beach robe and sport shorts, but her first dressmaking project should be an incentive to those who shy from the sewing machine.

The old-time sewing circle has been revived in the Manufacturing Experiments Dept. at Kodak Park. Since last fall, six girls in the department have been meeting once a week at one of the girls' homes. Each brings with her a sewing project, which at this time of year is a cotton dress or skirt.

The group being informal, anyone in the department interested in sewing is welcome to join. Those who now meet are Mildred Foster, Esther Johnson, Rita Knauf, Fern Proctor, Mary Upchurch and Betty Wheeler.

It provides a good opportunity to have hems hung, dresses fitted and to pick up valuable advice and ideas. The more experienced sewers help those who are a bit greener in the technique.

The girls enjoy the get-togethers too, because it makes a social occasion of an otherwise completely home job.

tions accompanying it, as there are several methods of application.

WEEDS

The best way to eliminate weeds is to remove completely from the garden, but first soak the area to be weeded. With a small garden trowel remove roots entirely. If the weed is an annual, as many of them are, it is sufficient to nip off the top, so that it will not go to seed. This method, however, leaves an unattractive appearance.

Send garden questions to KODAKERY, 343 State St.

DAFFYNITION—Fascist nation: One where they name a street after you one day, and chase you down it the next.

SPOTTING LIPSTICK — To remove lipstick, try cleaning fluid followed by soap and water treatment. The former takes out the oils; the latter removes the rouge in it.

Three Seconds to Roll Pie Crust at KP

Most women would like to try making a pie in the kitchen of Kodak Park's Bldg. 28, where the rolling pin has become extinct. A remarkable machine there rolls out a pie crust every three seconds, 20 every minute.

Henry Hansen, kitchen supervisor, told how the great timesaver works. A one-pound chunk of pie dough, which has been mixed by hand and cut to that weight by machine, is placed on a conveyor belt of the pie-crust roller. It is whisked to the first roller, horizontal in position; then it is picked up by the second roller, which crushes the dough vertically. Presto, a pie crust!

It's Plenty of Dough

A mere six months old, the tricky machine provides crusts for all the pies consumed in the 11 Kodak Park cafeterias. Per day that's 550 double crust pies and 400 soft pies or those without a top crust.

Herman Van Brummelen, an expert baker at the Park for 29 years, has worked the pie-crust roller since its installation half a year ago. The man who usually works with him is Leslie Mort, who was enjoying his vacation at the time the picture was taken. Responsible for pie fillings is Charles Bertie.

And It Comes Out Here — Herman Van Brummelen, left, and Charles Bertie show how the pie crust roller in Bldg. 28 at the Park produces a crust in three seconds. Pie dough is placed on the conveyor belt, which starts it on its journey through the machine. In a blink of the eye it shoots out on the tray below, is picked up and placed on the tin, ready for the fill of cherry, apple, chocolate, peach, apricot or what have you.

Garden Gab

ANNUALS

If disappointed in the progress of your annual seedlings, try watering with one teaspoon of household ammonia to one quart of water. Do not apply to the foliage, but water the earth at least one inch from the base of the plant.

LAWN

Brown spots in your lawn? Now is the time of year when they are present in either an established or new lawn. They appear either in the form of a small brown circle usually the size of a half dollar or as a large brown patch that may cover an area three feet in diameter.

Caused by a fungus growth, brown spots are controlled by two methods:

1. Remove all dead grass and burn. Spade the area and reseed.
2. Very satisfactory in this part of the country is the use of silver nitrate in a commercial form. It sometimes is sold under various trade names and can be obtained at any garden store. Follow direc-

The Market Place

KODAKERY ads are accepted on a first-come, first-served basis. Department correspondents in each Kodak Division are supplied with ad blanks which, when your ad is typed or printed on them in 25 words or less, are put in the Company mail addressed to "KODAKERY," or handed in to your plant editor. All ads should be received by KODAKERY before 10 a.m., Tuesday, of the week preceding issue. HOME PHONE NUMBERS OR ADDRESSES MUST BE USED IN ADS. KODAKERY reserves the right to refuse ads and limit the number of words used. Suggested types are: FOR SALE, FOR RENT, WANTED, WANTED TO RENT, LOST AND FOUND, SWAPS. KODAKERY READERS ARE ASKED TO PLACE ADS ONLY FOR THEMSELVES AND HOUSEHOLD—NOT FOR FRIENDS OR RELATIVES. TO DO THIS IS TO DENY SPACE TO THE PEOPLE OF KODAK FOR WHOM THIS SPACE IS RESERVED.

FOUND—Change purse on Dewey Ave., near Clay. Contact Cashiers' Office, Bldg. 26, Kodak Park.

KP Dusties Eye Pennants in Two Softball Leagues

O'Rourke Hits At .432 Clip; Hurlers Shine

Bolstered by standout hurling and hitting, Mike Farrell's Kodak Park Dusties are making a strong bid for top spots in both the Champion Industrial and the Rochester Industrial Softball Leagues.

O'Rourke

In the Champion circuit, the Kaypees are tied with Bonds for second place, sporting four wins against a single loss. The two outfits were slated to clash in a crucial battle July 13 at School No. 41. The Park aggregation is currently holding down the runner-up spot in the Rochester Industrial wheel with 7 victories against two losses and is anxiously awaiting an important meeting with the Balcos on July 30.

Howie Hurls 2-Hitter

Howie Niedermaier annexed his fifth triumph of the campaign on July 2 when he let down the Rochester Button crew with 2 hits, both of them four-baggers, as the Kaypees notched a 5-3 decision. Big Sid Dilworth provided the victory punch for Farrell's lads when he homered with two mates aboard.

Sharing mound duties with Niedermaier is speedballer Joe Snook who has a record of five wins and one setback to his credit.

Corky O'Rourke, star shortstop, is the team's leading hitter with a lousy .432 average. The KP nine boasts a team batting average of .306.

Individual batting averages are listed in column 3.

... hitting .381

KP Increases League Lead

Kodak Park increased its first-place hold in the Major Industrial Softball League last Monday night, shutting out Delco, 7-0. Bud Oister pitched two-hit ball and struck out seven.

Tommy Castle got the first of five successive singles in the opening canto, which before the shelling ended resulted in five runs. Two more runs in the sixth completed the Kaypees' run production. League standings:

	W	L	Pct.	GB
Kodak Park	9	2	.727	1 1/2
Balcos	8	4	.667	1
Wollensak	10	5	.667	1
Ritter	5	3	.625	2 1/2
Delco	5	5	.500	3 1/2
Products	6	7	.462	4 1/2
Graflex	4	6	.400	4 1/2
Camera Works	4	7	.364	5
Gleason	3	7	.300	5 1/2
Hawk-Eye	3	10	.231	7

GAMES NEXT WEEK

Friday, July 16—8:15 p.m., Gleason vs. Products; 9:30 p.m., Hawk-Eye vs. Delco.

Monday, July 19—8:15 p.m., Camera Works vs. Bausch & Lomb; 9:30 p.m., Wollensak vs. Ritter.

Tuesday, July 20—8:15 p.m., Hawk-Eye vs. Gleason; 9:30 p.m., Graflex vs. Delco.

Wednesday, July 21—8:15 p.m., Ritter vs. Bausch & Lomb; 9:30 p.m., Rochester Products vs. Kodak Park.

Thursday, July 22—8:15 p.m., Gleason vs. Delco; 9:30 p.m., Camera Works vs. Wollensak.

Park Netters Annex 2 Wins

Kodak Park's tennis team had a big weekend, sweeping aside two Rochester Industrial Tennis League foes to fatten its first-place margin. In other singles matches Kodak Office downed Hawk-Eye, 8-4, and Camera Works bowed to Bausch & Lomb, 8-0.

Capt. Ike Shynook's Kaypees, winners in the league's doubles derby, thumped Rochester Products, 10-2, and blanked Wollensak, 12-0. The league leaders suffered their only setback when George Wentis, Products' No. 1 entry, upset Cliff Schmidt in straight sets, 6-2, 6-2.

Next week the Kaypees face Strombergs July 20, with KO tackling the Balcos July 21. On Thursday Hawk-Eye and Camera Works clash. League standings:

	W	L	Pt		W	L	Pt
Kodak Pk	30	3	60	Camera Wk	9	16	18
Balcos	20	4	40	Strombergs	9	17	18
Kodak Off.	18	9	36	Roch Prod	5	16	10
Hawk-Eye	16	11	32	Wollensak	3	24	6

RESULTS LAST WEEK

July 6—Kodak Office 8, Hawk-Eye 4
July 7—Balcos 8, Camera Works 0
July 8—Strombergs 10, Wollensak 2
July 9—Kodak Park 10, Products 2
July 12—Kodak Park 12, Wollensak 0

Greens Gossip

Eugenia Schied's 52 Tops Girls

Eugenia Schied's nine-hole 52 won low gross honors in the first KPAA girls' golf tournament of the season last Saturday at Lake Shore.

Runnerup honors went to Bert Bowersock, who carded a 53. A field of 29 competed in the handicap event.

Blind bogey awards had not been made at this writing, but eligible for the bogey drawing were: Gert Roberts, Marge Sale, Doris Whitbeck, Thelma Lay, Janice Gray, Gloria Benson, Lucille Rice, Karen Jensen and Dorothy Sorg.

Serving on the committee arranging the affair were Eunice Sehm, Marge Sale, Lucille Rice,

Jean Ester, Kay Sullivan, Dorothy Sorg, Jane Mutrie, Thelma Lay, Claire Hogan, Barbara Coleman, Dot Shubert and Miriam Alden.

By popular demand, Harry Irwin is conducting another Scotch twosome for the KORC's golfing guys and gals Friday evening, July 16, at Lake Shore. The first four-some will tee off at 5:30 p.m.

The Mongrels continued their winning ways in the National Division of the H-E Twilight Golf League last week by downing the second-place Question Marks, 12-3. In the American loop, the Accounting linksmen moved into a

first place tie with Charlie Graves' Painters, when they took the measure of Recordak, 16 1/2-1 1/2. The Painters were limited to 13 1/2 points by Production.

For the third straight week, Joe Garafol turned in the low gross round of 74. Blind bogey winners were: Mike Gunn, Hank Bauman, Ralph DeRoo, Ed Casey, Walt Drojarski, Earl Hill, Jerry Roth, Verne Merle, Bernie Ostrander and Bill Hutchings. League stand-

Ridge All-Stars Win, 6-0

In an exhibition game on the School 41 diamond last Friday, the Ridge Noon-Hour All-Stars blanked Charley Frazier's All-Stars, 6-0. Roy Sill held the losers to one hit.

2nd Half Starts After Bears Win Runaway Ridge Race

The Bears clawed their way to a first-half victory in the KPAA Ridge Noon-Hour League last week, defeating the Royals, 3-1, for their 10th win in 11 starts. Abe VerCrouse's boys amassed a total of 20 points to beat out Harold Humby's Wings who finished in the runner-up position, 9 points behind the leaders.

Little or no excitement marked the Bears' last stand on the first-half schedule, with Roy Sill besting Walt Bock in a mound duel.

The Wings put up one of their best attacks of the season July 7 when they stopped the Bisons, 8-2, as Oren Forrester and Jim Mahar toiled on the mound, with Phil Elliott, Bill France and Spike Spiegel serving them up for the Bisons.

"Red" Warner's circuit clout for the losers featured the hitting. The Bisons were victimized again on July 8 when they bowed to Roger Hall's Royals, 3-0, with Herb Carpenter fanning six batsmen and allowing only one to reach first base. Don Mattis, Royals, contributed a sensational catch.

The second-half race swung into action last Monday with the Bears meeting the Bisons. Final first-half standings:

	W	L	T	Pts
Bears	10	1	0	20
Wings	5	5	1	11
Royals	4	7	1	9
Bisons	3	9	0	6

Branch Scares Penpushers

A rejuvenated Rochester Branch softball team gave the first-half champion Penpushers a real scare last week, but lost out, 6-5, when Ken Mason's outfit pushed across two runs in the final frame.

John Scheible's Stockmen, with Eddie Goetzman pitching a steady game, led 5-4 prior to the Penpushers' seventh-inning uprising. Successive hits by Mason, Norm Hyldahl and Jack Robinson produced the payoff tallies.

Repair beat Shipping, 7-4, in the other KO Intraplant League contest last week. Carl Ziobrowski drove in two runs in the sixth to clinch the verdict for Herb Lounder, the winning pitcher.

KO Men Golfers Await Tourney

A blind bogey tournament for KORC men has been scheduled for Saturday, July 24, at Midvale. In addition to blind bogey awards, there will be prizes for low gross in each class. Entries may be filed at the KORC Office by July 21.

You can't build a reputation on what you're going to do.
