New Features Offered On Cine-Kodak Special

A new type of lens turret and improved reflex, eye-level, and peepsight viewfinders now are featured on the famous Cine-Kodak Special Camera. It also has been announced that the Cine-Kodak Special II Camera will have the new Kodak Cine Ektar 25mm. f/1.4 Lens as standard.

The newly designed lens turret—which is the most apparent outward change in the camera—is equipped with integral adapters which make possible the direct acceptance of the full line of Cine-

Closeup—Here's a closeup view of the improved Cine-Kodak Special II Camera, showing some of the features newly added.

Kodak interchangeable lenses. The adapters are of ball-bearing construction and lenses, once seated, are locked securely in position. The lens block is angled to prevent the second lens from interfering with the first—either physically or optically—when the first is in picture-taking position. Any two current Cine-Kodak accessory lenses—regardless of speed or focal length—can be used in combination and with interchangeability.

An improvement in the internal mechanism results in the area viewed through the reflex finder being almost exactly that which will be seen on the screen. An improved viewing lens has been installed, and a sharply defined black border placed around the ground glass. This results in far greater ease and precision in through-the-lens focusing and framing.

Changes also have been made in the eye-level finder system. A separate front-finder element now is made for each of the full line of Cine-Kodak lenses. These finders

snap onto the turret, and, because they provide a large view of the subject, make for greater convenience in eye-level finding.

Improvements in the peepsight are such that the sight now can be adjusted to correct for parallax at film-to-subject distances ranging from 2 feet to infinity. Thus greater accuracy is possible in eye-level framing of subjects.

New Tools Used

Internally the mechanism is from new tools and the camera and magazine bodies are from new molds. This should insure improved mechanical performance.

Aside from those changes and the adoption of the Kodak Cine Ektar 25mm. f/1.4 Lens as standard, the Cine-Kodak Special II Camera is similar to its predecessor.

Owners of Cine-Kodak Special Cameras who wish to have their cameras converted to the new model may do so through the Kodak Repair Dept., it was announced. Conversion will include installation of the complete new turret, and, if needed, the new

(Continued on Page 4)

Suggesters Get \$73,178, Highest for Six Periods

Idea at Work—William Zimmer, left, supervisor of Suggestion Dept. at Camera Works, and Robert Schreiner of CW's Dept. 73 watch as Mary Sowinski, Dept. 43, employs Schreiner's idea. Fixture holds camera parts, allowing use of ratchet screwdriver.

\$10,979.60 Ahead Of 1947 Figures

\$73,178.10 for suggestions!

That's the total amount which Kodak people earned on their ideas considered by the Suggestion Departments at the Company divisions in Rochester during the first six periods of 1948.

This represents the outstanding accomplishment of Kodakers to date and gives promise of a record year in which the 50th anniversary of the Suggestion System is being celebrated at Kodak.

The awards to date for '48 are \$10,979.60 ahead of the same six periods of 1947 when a previous all-time record had been set on the basis of \$62,193.50 earned.

13,012 Ideas

Increasing use of the Suggestion System by EK folks is shown by the 13,012 ideas considered in the first six periods of this year. The total is more than 1000 over the 11,996 reported for the comparable periods of 1947.

Thus far in 1948 the ideas on which awards have been made total 4209 against 3867 for the first half of 1947—an increase of 342 for this year.

Another new record was set in 1948 when Bernard H. Holman of the Paper Mill at Kodak Park received \$2500. It was the highest initial award to an individual. Holman's idea resulted in an increase in the amount of silver recovered from scrap sensitized paper. The \$2500 check was presented in the fourth period.

The CW report for the first six periods of the year shows fine progress. The Suggestion Office there listed 3098 ideas submitted, with 625 approvals on which \$18,406 was awarded. These figures compared with 2546 suggestions, 526 approvals and \$11,537 awarded in the similar 1947 periods. Thus CW set three new marks.

\$49,705 for KP

Kodak Park's figures show \$49,705.50 in awards on 3223 suggestions for '48 when 8430 ideas were submitted. The 1947 figures show \$45,609.50 paid on 3053 suggestions with a total of 8102 submitted. The cash totals include additional amounts paid on suggestions previously approved. Also, the totals on approved suggestions include ideas reopened for the purpose of paying the added amounts.

Hawk-Eye reported 752 ideas submitted in 1948 with 200 approvals that earned awards totaling \$3377.60. In the first six periods of '47 the totals were 816 ideas presented, 183 approved and \$2,914.50 in awards. The total of cash awards thus far in '48 topped that of the previous year despite the fact that a high single award of \$1250 was made in 1947. The high thus far in '48 has been \$250.

At Kodak Office this year's awards reach \$1689 on 161 ideas okayed of 732 submitted. The comparable 1947 figures show \$2137.50 awarded on 105 approvals of 532 ideas submitted. A single award of \$1000 at KO swelled the 1947 total in awards, whereas the top check this year has been \$150.

Building for Kodak Cubana Slated to Open Next Spring

Spring of next year will see Kodak Cubana, Ltd., in Havana installed in a brand-new building, announced Ivo Moneda, its manager, in a visit to Kodak Office last week.

Cobb Aids on Handbook

Allen L. Cobb, Kodak Park director of safety, is one of five members of the committee which handled the preparation of the Tenth Edition of the National Fire Protection Association's Handbook of Fire Protection recently published.

The first revised edition of the book to be made since 1941, the text includes new and up-to-date information, much of which represents developments made in industry, in fire prevention and fire extinguishment during the war.

Moneda came to Rochester to discuss with R. B. DeMallie and A. S. Baltzer of KO some final details for the lease of the building, which is to be erected especially for Kodak Cubana.

The greatly enlarged space which this building provides will make room for a larger black-and-white cine processing laboratory, repair department and offices, as well as giving more warehouse space. Provision also will be made for installation of a color processing laboratory sometime in the future. Moneda pointed out that keen interest in color work is becoming increasingly apparent among Cuban photographers.

Tour Country

The Monedas' trip to this country has been a delightful eye-opener, he said, since on previous trips they had never been west of Buffalo. This time they came with a group of 135 Cubans on an organized trip sponsored by the Cuban and American governments. The trip from Havana to Miami was made by steamer, and then a special train carried the party west to Phoenix, the Grand Canyon, Los Angeles, San Francisco, Salt Lake City, Colorado Springs and Chicago. There the Monedas left the party to come to Rochester. They will rejoin the Cubans this week to vacation in New York before returning to Havana.

Visits to the Los Angeles, San Francisco and Chicago Branches are extremely happy memories of his trip, Moneda declared. In Los Angeles he was entertained by Manager James A. Smith, and in San Francisco by J. R. Allendorf, branch manager, and Eric Sitzenstatter. A. W. Achterhof of Taprell Loomis Division showed them the sights of Chicago.

Clearer View With Tenite II

Tennessee Eastman announces the availability of Tenite II (cellulose acetate butyrate) in a new crystal-clear transparency.

Crystal Tenite II is expected to broaden the applications of that plastic to include products which require transparency approaching optical clarity. Since Tenite II is compatible with lacquers, combination of the crystal-clear plastic with lacquers should see the introduction of many innovations in package and product design.

Tenite II crystal is made by a new process which also has made possible paler, more delicate tints of transparent colors of Tenite II than ever before. Color matches in Tenite II henceforth will be more accurate, with greater uniformity.

Cubana Confab—Ivo Moneda, left, manager of Kodak Cubana, Ltd., confers with Armin S. Baltzer, center, and W. F. Shepard on details of the lease of Kodak Cubana's new building in Havana.

The Special—Charles Fitter of Dept. 64, Special Products Division of Camera Works, makes a final inspection of the Cine-Kodak Special II Camera which now is equipped with several new features, including a new type of lens turret.

French General's Widow Brings Tales of Paris to KP Girl's Home

Former Parisian — Madame Athena Mortier shows to Mary Ambrose, left, of KP's Paper Planning, a picture of Mary's uncle, the late Gen. Auguste Mortier of the French Army. Mme. Mortier now is residing at the home of her brother, who is Mary's father, their first meeting in 30 years.

Photo Patter

Album of Wedding Pictures Perfect Gift to Couple

Offhand it's hard to think of a nicer wedding gift for a summer bride than a dozen or so enlargements from snapshots made at her wedding reception. It's a gift any bride will cherish for years, particularly when it's packaged nicely. Pick out the best of the snaps, make enlargements and mount them in their own individual album for the bride.

Naturally, such a gift requires forethought on the picture taker's part. He must know well in advance of the ceremony what he wants to shoot. Sometimes, at home or garden weddings, he may take shots of the marriage ceremony. Where the clergyman has no objection, he might even make them at a church. But even when the last can't be arranged there's always a fine picture waiting as the newlyweds leave the church.

Reception's the Time

Most wedding pictures can best be made at the reception. Here's the place for grand unposed shots. The bride and groom cutting the wedding cake; the families in the receiving line; one of the flower girls, pink and pretty, happily eating a dish of ice cream.

There's virtually no limit to the number of pictures that can be taken. Advance planning will suggest any number of possible shots to you. And once you know the pictures you want, plan ahead just how you will get them.

Check Your Film Supply

Make sure that you've plenty of film so you can make enough shots to get 10 or 12 very good ones. Depending on whether or not the reception is indoors or out, decide whether you need to use flash for your snaps. And figure your exposures ahead of time. If you're working indoors, plan what exposure you'll use for shots at various distances.

Then "shoot" when ready. Mix your pictures. Make closeups and make shots from medium distances, such as 12 to 15 feet. Try to get the bride or groom in every picture. But strive for variation. Tell the whole story in pictures.

Never yawn before a guest. Let the guest yawn first.

A stalwart New Englander was being interviewed on reaching the age of 100.

"I suppose," said the reporter, "that you have seen a lot of changes in your time."

"Yep," replied the centenarian, "and I've been agin every one of them."

White Bread Like Pastry, She Claims

If Mary Ambrose, Paper Planning, Bldg. 57 at KP, is sprinkling her conversation with French phrases these days, it's because she is a good listener. Her aunt, Athena Mortier, recently came to Rochester to make her home with her brother, Mary's father. It was the first meeting of brother and sister in more than 30 years.

The widow of Gen. Auguste Mortier, Mme. Mortier lived for some time in the French colonies of North Africa and in the Near East where her husband was stationed for many years. Much of her life was spent in Paris, which still holds a sentimental charm for her, she says.

After living through the German occupation, the Anglo-American bombings of Nice, and finally the American liberation, the personable French lady has many nice things to say about Rochester and its beautiful parks and buildings.

About food she has even more to report, unhampered now by the rigors of the strict rationing which has prevailed in Paris since the early days of the war.

Cup of Coffee per Month

"One cup of coffee and one pat of butter per month is the average for the postwar Parisian," said Mme. Mortier through Mary, her interpreter, "and your white bread tastes like pastry compared with the dark bread of the French."

While food is scarce, other items are readily available—if you have the price. Among the gifts which she brought to her relatives here are a leather hassock, handmade by the Arabs of Tunis and embroidered in gold, red and green. And there is jewelry from Paris and Nice. For her brother she brought a carnelian ring which had once belonged to the Turkish ruler, Abdul III. It had been given to her husband by a dervish whose life he saved during a revolution in Morocco.

Although she speaks very little English, the genial 63-year-old French widow gets along fine with her American cousins. She already has talked before several French-speaking groups, and plans to learn the English language gradually by dint of reading and listening to the radio. Acting as her tutor will be Mary's mother, who speaks seven languages fluently.

Kodakwiz

(Answer on Page 4)

This is a:

- Jiffy Kodak Camera. Six-20.
- Kodak 35 Camera.
- Kodak Flash Bantam Camera.

Her Wedding Day — Any bride would welcome a snapshot such as this taken at her reception. An album of enlargements from wedding pictures makes a fine gift to newlyweds.

Egyptian Movie Producer — Mohamed Ezze El Arab, center, who produces documentary and amusement films for Egyptian audiences, looks over photographic literature acquired at KO. With him are Ken Edwards, left, EK adviser on non-theatrical films, and Gordon Chambers, Motion Picture Films Dept.

Movies Earn Important Role In Egypt's Teaching Plans

Movies have become an integral part of the Egyptian student's life, according to Mohamed Ezze El Arab. A member of the film department of the Egyptian Ministry of Education, Ezze also is a motion picture producer.

At KO recently, he is on a mission for his government which will take him to Encyclopedia Britannica Films Inc. in Chicago and to Hollywood.

Every school has a 16mm. projector, he declared. The majority, 1500, have silent projectors, and 400 schools already are equipped with sound machines.

A government library for films, he continued, now has 2000 different documentary films with 10 or 15 copies of each. Some of these have been made in Egypt, and others have been imported.

About 100 companies, working in nine studios, produce 100 films for the amusement theaters and about 50 for the schools each year.

ES&L Ranks 14th in Size In N.Y. State

The Eastman Savings and Loan Association ranks 14th in size among the 238 savings and loans in the State of New York, according to figures recently compiled as of the end of 1947. The New York State Commerce Review, in its June issue, discloses that there are close to a million members of savings and loans in the state, with over a billion dollars in assets. Of these the ES&L claims 28,386 members saving money through its facilities and has over \$19,000,000 in assets.

Rapid Growth

The Review calls savings and loans "an integral part of our financial facilities," making a fourth of all small mortgage loans on owner-occupied urban homes and "growing more rapidly than other types of savings institutions in the state."

In existence 112 years, the savings and loans, the Review says, are the outgrowths of small neighborhood would-be homeowners who pooled their assets on a volunteer part-time basis. Today they are real banking organizations with professional full-time managers providing safe investments for savers and supplying capital for home ownership.

According to the most popular method of repayment, the borrower makes a fixed monthly payment and interest is computed only on the unpaid balance. Savings and loans have been pioneers in long-term amortized mortgages, the easiest for the homeowner to pay.

Over 2800 Kodak men and women currently are financing their homes through ES&L mortgages to a total of nearly 9½ mil-

lion dollars and, in addition, the ES&L has approximately \$400,000 in modernization loans outstanding. Payroll deduction payments are features of ES&L mortgages and modernization loans.

Plenty of Food, Fun Planned For Girls' Picnic on Aug. 12

Plans have been completed for the annual KPAA Girls' Picnic to be held Thursday evening, Aug. 12, at Willow Point Park. Plenty in the way of activity is promised for those who attend.

Supper will be served immediately upon arrival, it was announced. Many of the amusements, including miniature golf, table tennis, badminton and tennis, will be available until 11 p.m. at no extra charge. Dancing to the music of Jack Nunn and his orchestra will be enjoyed from 9 to 12, with husbands and boy friends invited to join the party after 9.

Since chartered buses are not scheduled to leave Kodak Park until after 6 p.m., all girls driving are requested to accommodate other girls from the same department. Tickets, priced at \$1.10 each, may be obtained now at the KPAA Office, Bldg. 28. Also, the special guest tickets for the invited males are available.

It's Aug. 12 — Betty Dawes of KP looks over poster heralding the KPAA Girls' Picnic slated for Aug. 12 at Willow Point Park.

Herb Dean Transfers to Post at KO

The KP Time Office will lose a popular staff member July 30 when Herb Dean transfers to the Office Methods Group at KO. He will be associated with Larry Isaacson, formerly a supervisor in the KP Time Office.

Herb received his B. S. degree in business administration from Syracuse University in 1939. That same year he joined KP and, after spending some time in the Office Methods Dept., Bldg. 26, he entered military service in May 1942. A captain in the Air Transport Command, he returned to civilian status in 1946, rejoining the Time Office. Since that time he has han-

dled various job assignments, recently serving on the Time Office staff under Ed Wallace.

Herb's a trustee of the Kodak Park Athletic Association. Plans have been completed for a farewell party in his honor July 30 at Point Pleasant Hotel.

KP Provides Quick Snacks

The first of several snack bars to be set up by the Cafeteria Dept. for the benefit of Kodak Park people made its appearance last week at the East Hanford Gate. Immediately it was voted a hit by its patrons.

The stand has been installed in the south wing of the gatehouse, formerly occupied by turnstiles, and is readily accessible to those entering and leaving the plant. It was explained that persons desiring to leave the premises for various reasons during the noon hour and consequently unable to patronize the cafeteria now can refresh themselves at the snack bar. It offers a varied list of items including sandwiches, milk, ice cream specialties, cakes, potato chips, etc. The stand will be open Monday through Friday from 11 to 1 until further notice.

Similar stands will be opened at other gates and locations in Kodak Park, it was announced. Additional items will be made available as the demand indicates.

Snack Bar — Chris Potye of Cafeteria Staff serves, from left, Jack Ford, Joe Sweet, Charles Lammel and Don Way at new Snack Bar at the East Hanford Gate. Others are to be provided at Park entrances and locations at KP.

Greetings Go To 27 Joining KP Pioneers

The Kodak Park Pioneers' Club will add 27 new names to its growing roster in August when 26 men and one woman mark 25th service anniversaries with the Company.

In addition to Mabel Stallman, X-ray Sheet Film, the list includes Ronald S. Scott, superintendent of the Cine Processing Dept.; Henry B. Quirin, Testing; Peter Geldof, Paper Sens.; Herman W. McCamman, Testing; William A. Riker, Film Emulsion; Gabriel Fyfe, Wage Stds.; Clarence C. Cross, E&M Stock; Earl M. Lowry, Research Laboratories; Henry E. Herbert, Roll Coating; Richard H. Graham, Dope Dept.; Ralph C. Lusk, Paper Sens.; Warner W. Drought, Paper Service Lab; Thomas McGregor, Roll Film Paper Slitting; George A. Earl, Recovery; Bernard B. McGrane, Testing; Henry W. Pease, Film Emulsion; Theophile VanWaes, Gelatine; Herman A. Zeitvogel, Printing; Everett A. Ernise, Roll Coating; Edward J. Franklin, Film Emulsion; Frank W. Guenther, Cine Slitting; Wilfred B. Snyder, Dope Dept.; Coe S. Barnes, Roll Coating; Alphonse Boucquaert, Reel Mfg.; James E. Richards, Distilling; and John N. Powell, Synthetic Chemistry.

Benefit by Blood Program — A couple who have experienced the convenience of the new Rochester Regional Blood Program are the William K. Akroyds, seen here with their youngest. Husband Bill, a member of the KP Chemical Plant Laboratory, had been summoned to give a pint of blood upon the birth of their first three children. When the fourth, Kenneth, arrived May 7, Mrs. Akroyd again required a transfusion. It was pretty wonderful to know that the emergency call could be handled with ease by merely taking a bottle of that precious fluid from the shelf.

It's in the Park: Drop Line to Audrey... Bill Counts Costs Tommy Goes Deep-Sea Fishing

When Peg Driscoll, E&M Industrial Engineering, spent a weekend in Chicago visiting her brother, Dick, she appeared as a guest on Jim Ameche's Hollywood Open House program on which her brother was guest announcer. Dick is program director and manager of radio station WLIP in Kenosha, Wis.

An informal get-together in the Chicago studio followed the show. Formerly a member of the Rochester Summer Theater, Peg now is confining her stage activity to the Community Players.

Jean Augustine, Medical, spent the Fourth of July weekend in Toronto, Canada.

Sid Todd and Bill Thompson, retired members of the Film Emulsion Coating Dept., recently visited their old Park friends after spending the winter in Florida. Assisting with duties in the Cellulose Acetate Development Dept. during the summer months are the following collegians: James Fullerton, U. of R.; Walter Puterbaugh, Duke; Roscoe Pike, University of New Hampshire, and R. James Kern, University of Michigan. Chet Klippel, Bldg. 26, relays the information that his daughter, Audrey, KODAKERY,

Lee Edwards, left, and Dick Driscoll, right, brother of Peg Driscoll of E&M Industrial Engineering, interview Jim Ameche on the Hollywood Open House radio program in Chicago. Peg was a guest on the program while visiting her brother, an announcer.

is convalescing nicely from her illness of several months' duration. Audrey is particularly anxious to keep posted on activities of her friends at the Park, says Chet, and cards and letters are welcome. Address all communications to her home at 133 Leland Rd., Zone 5. Jim Lerkins, F.D. 4, and his wife, Barbara, Purchasing, are making a vacation motor trip through New England. Helen Beck, Sheet Film Packing, is vacationing at Daytona Beach, Fla. Elbert (Curley) Scramton has been transferred from Cellulose Acetate Development to the staff of the Dope Dept. Marion Matthews, KODAKERY, and her husband, Ralph, formerly of Camera Works, with many miles of travel throughout the United States behind them, stocked their trailer for a two weeks' trip to Georgian Bay and other points of interest in Canada.

A luncheon party was given by the Industrial Engineering Packaging Group in the new service dining room for Bill Jones, who has transferred to the Accounting

Dept. Ken Marvin, toastmaster, expressed the farewell sentiments and made several gift presenta-

Tom Davis, KODAKERY correspondent in the Film Emulsion Coating Dept., and his family are spending three weeks in Chatham, Mass., where Tommy hopes to get in some ocean bathing and deep-sea fishing along the Atlantic coast. Three members of the Sheet Film Packing Dept., Ken Lynn, Helen Beck and Margaret Egan, enjoyed recent vacations in the Adirondacks, Florida and Canada, respectively. Frank Malley and Jack Schoenwitz, Time Office, traveled to Endicott, N.Y., where they attended a course in business machine methods sponsored by IBM. Frozen assets in the amount of \$19 recently were thawed out when Bunny Ellsworth, KPAA Office, was returned her wallet which was lost more than a year ago. The discovery was made by the owner of a car in which Bunny had ridden to a wedding. The wallet had slipped down behind the rear seat cushion.

Bunny Ellsworth and her long-lost wallet.

Hostess: "I have a lonesome bachelor I'd like you girls to meet."

Athletic Girl: "What can he do?"

Chorus Girl: "How much money has he?"

Society Girl: "Who is his family?"

Religious Girl: "To what church does he belong?"

Secretary: "Where is he?"

Art Bahr, Roll Coating, and his wife, Gert, Roll Film & Cine Stock, have returned to their duties after spending an enjoyable vacation in Ontario, Canada. An idea for Kodak's new look in shipping cases, erroneously attributed to a member of the Chicago Branch (KODAKERY, July 8), is really the brainchild of A. W. Crittenden, Emulsion Melting, who received a suggestion award for his effort. "Whit" will observe his 44th anniversary with the Company Aug. 30.

English Chemist, Mineralogist Pay Visit To Research Laboratories at Kodak Park

Scientific Stuff—Dr. F. A. Bannister, head of the Mineralogical Section of the British Museum of Natural History, had much to say about the mysteries of minerals while recently visiting the Research Laboratories. Here Dr. Bannister (left) and Dr. Maurice L. Huggins, research chemist for the British Rubber Producers' Research Association, examine a model of a crystal structure, the characteristics of which can be deduced by the X-ray diffraction unit shown in the background.

Kodakwiz

ANSWER

(Question on Page 2)
This is a Kodak Flash Bantam Camera. It is simple to operate and produces excellent pictures.

New Features For 'Special'

(Continued from Page 1)

standard lens. The Company has stated that it will increase production to the greatest extent compatible with high quality standards to make available as many Cine-Kodak Special II Cameras as possible in the future. Since the cameras largely are the product of highly skilled individual workmanship, however, the Company expects that, for the present, supply will not meet demand.

The Cine-Kodak Special II Camera is priced at \$860, plus tax.

Color Control Ties Leaders

The league-leading Bldg. 65 girls played a 16-16 tie with Color Control in the KPAA Girls' Twilight Softball League last week. Betty Shaw, Color Control shortstop, homered in both the first and second innings to feature.

In the other game, Reel Manufacturing posted a 25-8 win over Medical to take over the runner-up spot in the standings. Doris Shaw clouted a home run for the Reels in the second canto, with Jean Augustine banging out a three-bagger for Medical in the first inning. Standings:

	W	L	Color Control	W	L
Bldg. 65	3	0	1	2	
Reel Mfg.	3	1	1	0	4

A policeman stopped a man coming down the street in a barrel. "Look here," the officer said, "What's the idea of the barrel. Are you a poker player?"

"No sir," the man replied. "But I just spent a couple of hours with some guys who are."

Camera Club Lists Winners

Winners in the final judging of prints turned in by students of the Elementary Photography classes at the Kodak Camera Club were recently announced. They are George Aid, KP, first prize; Raymond Shaw, KP, second prize, and Jane Fleming, KO, third prize.

Honorable mention awards went to Nancy McClure, KP; Elizabeth Cass, CW; Marjorie Lund, KO, and C. A. Bauman, KP.

The club's annual picnic will be held at Seneca Park on Saturday, Aug. 21, from 2 to 6 p.m., with a full program of events listed. More details will be announced later.

The education committee of the club recently held its first meeting of the year to begin planning for the fall program of instruction, the following courses to be presented starting Sept. 20: Elementary Photography, Color Exposure and Composition, Hand Coloring, Elementary Pictorialism, and Aerial Photographs and Their Application.

Two distinguished visitors from England, each representing a divergent professional interest, were at Kodak Park's Research Laboratories, Bldg. 59, last week. They were the personal guests of their mutual friend of long standing, Dr. Maurice L. Huggins. The visitors were Dr. Leslie Bateman, research chemist for the British Rubber Producers' Research Association, and Dr. F. A. Bannister, head of the Mineralogical Section of the British Museum of Natural History.

Studies in the deterioration of rubber are the immediate objective of Dr. Bateman, whose association, staffed by some 40 scientists, is located 20 miles north of London. It is supported by an international fund which collects a levy on all rubber sold by British, French, and Dutch producers.

Rubber Progress Made

Rapid progress in the development of synthetic rubber is cutting heavily into the demand for natural rubber, he explained, stressing the fact that only constant research will keep the industry as a whole in a healthy state.

Dr. Bateman attended a research conference sponsored by the American Association for the Advancement of Science and held in New Hampshire recently. He is now visiting industrial and institutional laboratories in Akron, Chicago, Minneapolis and New York.

Dr. Bannister pointed out that his first visit to Kodak Park is among the scheduled stops at large industries in U. S. cities. His itinerary also includes geological institutions in Washington and Philadelphia.

The British Museum of Natural History, founded many years ago by Queen Anne's personal physician, today is recognized as one of the finest of its kind in the world, he said. Dr. Bannister added that its mineralogical collection is unsurpassed. While at the Park he discussed and exchanged ideas along scientific lines with staff members of the X-ray Diffraction Group of the Chemistry Dept.

Dog Etiquette—While Pete Braal, KO Photographic Illustrations Division, and son, Pete, look on, their dog gets a check-up from Scott Coates, ex-Marine, who's the "prof" of the local Dog Obedience Training Center at Edgerton Park.

Kodakers' Dogs Learn New Tricks, Disproving Old Adage

If you see some Kodak people and their dogs heading for the Fire College building at Edgerton Park some Tuesday night, they're going to school . . . dog school, that is.

That's where the Dog Obedience Training Center holds forth, and it numbers quite a few Kodak dogs among its "pupils."

Heading the school is Scott Coates, an ex-Marine, who's been especially fond of dogs—Doberman pinschers in particular—ever since one saved his life on Okinawa.

Some 30 dogs are "enrolled," Kodak owners including Pete Braal and Ralph Amdursky of the Photographic Illustrations Division, KO; Dorothy Freeman, Bldg. 65, KP; Robert Hoppe, Bldg. 23, KP; John Barhite, P&S, KP; Francis Blaesi and Herb Bryant, Dept. 89, CW; Helen Tobey, Export Sales, KO; Lucille Woods, Rochester Branch.

The dogs are being taught the fundamentals of obedience—to stay under their master's control at all times without leash, to walk at their master's left side and stop when their master does. They are taught to obey hand signals and spoken commands, to make jumps, retrieve, etc.

The canines—all thoroughbreds—represent all kinds of breeds, all shapes and sizes. They're all ages, too, disproving the old adage, "You can't teach an old dog new tricks."

London Doctor Studies EK's Photo Equipment, Technique

Eyes the Eye—Lou Gibson, Medical Sales Div., acts as the patient as Charlie Brownell, right, of the same division, explains to Dr. Peter Hansell, director of medical photography at Westminster Hospital's Medical School, London, how the equipment photographs the eyes or teeth. It consists of the camera components of a Kodak Precision Enlarger mounted on a B&L ophthalmoscope.

Poorly illustrated textbooks led Dr. Peter Hansell to his present position as director of medical photography at Westminster Hospital's Medical School, London.

As a med student and amateur photographer, it struck him that medical teaching could be readily improved by the use of more and better motion pictures, slides and illustrations.

At KO recently to study equipment and technique, he was particularly impressed with the Master View Camera which seemed to him ideal for medical photography.

His trip to the States to visit leading medical centers is being sponsored by the Nuffield Provincial Hospital Trust which is concerned with hospital administration and medical research.

A Fellow and on the council of the Royal Photographic Society, he helped form its medical section two years ago.

His present aim is to improve

Cornell Committee Elects P. S. Wilcox

Perley S. Wilcox, Kodak chairman of the board, has been elected a member of the Greater Cornell Committee which is responsible for the immediate and long-range developments of the university. Mr. Wilcox was graduated from Cornell in 1897 with a degree in mechanical engineering.

textbook illustrations, to obtain better slides, greatly expand a motion picture program, and to teach the medical profession the proper use of photography.

Here and There...with The Folks of Kodak

'Frosh' Graduate — Last week the new EK Sales Training Center "graduated" its first class of students when a group of 17 Kodak dealer representatives concluded 10 days of study. Their course was for the purpose of instruction in Kodak amateur photographic products and how best to sell them. Above, vice-president and general sales manager James E. McGhee delivers parting remarks to the group, first of many expected to enroll.

According to Formula — More than 3000 different chemicals, supplied to colleges and industrial research establishments for testing and research purposes, are prepared by the Synthetic Chemistry Dept., a division of KP's Research Labs. Here Alma Bailey packages orders from stock.

Conference in Hollywood — Dr. Julian H. Webb and Harry E. Cleveland of Kodak Park are in Hollywood to discuss problems. Above they are shown with members of the West Coast Motion Picture Dept.: standing from left, Emery Huse, manager; Webb, Walter L. Farley, Cleveland, Dr. Norwood Simmons. Seated, Leo Chase.

Up She Goes! — The F.D. 10 hoisting crew at Kodak Park, headed by Bill Buckert, carried out one of its most successful operations recently when it lifted a 3½-ton coating machine 106 feet to the top floor of Bldg. 30.

Certificate Ceremony — Brig. Gen. Robert M. Cannon is shown presenting the President's Certificate to Dr. William D. Kennedy, TEC research chemist, left, and Herbert G. Stone, TEC vice-president and works manager, right, in a recent ceremony at Kingsport. The certificate is highest civilian award for work in the national defense program.

'Photography Days' — During a recent photo show sponsored by US Travel and Camera Magazine and the New Haven R.R. in New York's Grand Central Station, professional models posed against a seaside background for passing photo fans to "shoot." Among those working on the show were (kneeling) Bob Douglas, left, and Bill Armstrong, both of the New York EK Stores. They arranged lighting effects, advised photographers on exposure data.

*Snared * * Paired * * Heired * **

Fricassee the entire chicken in just enough water to cover. Add celery tops, onion and seasoning;

A FREE FOLDER — For hints on how you can plan and purchase your food, as well as utilize left-overs, obtain a free folder, "Food for Two," from Nutrition Adviser Wintress D. Murray, 343 State St., KO.

A black and white portrait of a woman with short, dark, curly hair. She is smiling broadly, showing her teeth. Her hands are clasped together, resting under her chin. She is wearing a light-colored, possibly white, top and a thin necklace. The background is a textured, mottled grey.

To mention a few, there are the

A technique is involved in making both the chignon and roll, with a rat as the mainstay of the hair. For the chignon a doughnut-shaped rat is used. The hair is pulled through and gently folded

Braiding hair is an art, too. You not only must perfect a neat braid, but must be able to part the hair straight in back. A little assistance is appreciated. Girls with thin hair like the attractive French braid.

Perfect for the beach is the pony

Mary Kay Scholl of the KP Research Lab proves in pictures above that cool coiffures look smart. Many require no "doing up" the night before either.

Dorothy Long, Dept. 49, to Charles Murray. . . . Theresa Procopio, Dept. 75, to Sam Russo. . . . Pauline Cannito, Dept. 87, NOD, to Joseph Cassata. . . .

Black velvet ribbon is run through the beading above the scalloped brim and ties in a bow at the back. Make this becoming hat of white pearl cotton. The free directions can be had in your KODAKERY Office or by writing KODAKERY, 343 State St.

Mr. and Mrs. John Parish, son.

Kill out by spraying with a good, strong solution of 24-D, preferably when the temperature is above 65 degrees.

Ruth Wagner

¼ c. sugar
 ¼ c. vinegar
 1 c. salad oil
 2 T. horseradish
 2 T. chili sauce
 1 T. prepared mustard
 1 t. celery seed
 1 t. paprika
 1 t. Worcestershire sauce
 ½ t. red pepper
 ½ t. salt
 juice of ½ lemon

Place sugar, vinegar and ½ cup of salad oil in measuring cup and mix. Put this, plus all other ingredients, in a fruit jar or any other convenient container and shake vigorously until the dressing is blended smoothly. Use as desired for tossed, chef and other salad favorites requiring dressing.

The Market Place

KODAKERY ads are accepted on a first-come, first-served basis. Department correspondents in each Kodak Division are supplied with ad blanks which, when your ad is typed or printed on them in 25 words or less, are put in the Company mail addressed to "KODAKERY," or handed in to your plant editor. All ads should be received by KODAKERY before 10 a.m., Tuesday, of the week preceding issue. HOME PHONE NUMBERS OR ADDRESSES MUST BE USED IN ADS. KODAKERY reserves the right to refuse ads and limit the number of words used. Suggested types are: FOR SALE, FOR RENT, WANTED, WANTED TO RENT, LOST AND FOUND, SWAPS. KODAKERY READERS ARE ASKED TO PLACE ADS ONLY FOR THEMSELVES AND HOUSEHOLD—NOT FOR FRIENDS OR RELATIVES. TO DO THIS IS TO DENY SPACE TO THE PEOPLE OF KODAK FOR WHOM THIS SPACE IS RESERVED.

SWAP

HOUSE—Eight rooms, Burrows St., will exchange for 5- or 6-room bungalow, good locality, no dealers. Gen. 1729-W.

Hawks' Winning Run — Hawk-Eye came from behind with two runs in the sixth to beat Gleasons, 2-1, in the Major Industrial Softball League July 20. Joe DiBiase is shown above sliding into the plate with the winning run, with Gleason catcher Chuck Satterlie making a futile attempt to tag him out. Calling DiBiase "safe" is Ed Tarz, the plate umpire.

Hawks Tally 3 Triumphs in Row To Climb from League Basement

Scoring its third win in a row, Hawk-Eye emerged from the Major Industrial League cellar Monday night by downing Grafex, 7-2. Kodak Park continued to set the league pace by edging the Balcos, 4-3. Held to two hits Camera Works bowed to Ritters, 10-0.

The Hawk-Eye victory streak brought them from 10th to 6th place in the league standings.

The Hawks had to go an extra inning to edge Products, 3-2, even though Gene Bischoff hurled a four-hitter. Joe DiBiase provided the winning punch with a triple with a man on in the extra frame.

The Hawks trimmed Gleasons, 2-1, as Milt Glende tossed in a five-hitter. Walt Glucowitz singled home the winning markers.

Kodak Park shoved over a tally in the seventh to nose out Prod-

ucts, 4-3, behind the three-hit twirling of Joe Witzigman. His mates connected for six base knocks featured by the game-winning triple by Bill Doyle, which scored Tommy Castle.

A three-run splurge in the fourth inning, gave the Kaypees the victory margin over Grafex, 3-1. Tom Castle, Hack Krembel, Al Tinsmon and Al Smith singled in succession for the rally. Ken Busch tossed a five-hitter.

Uncorking a 13-hit barrage, the Cameras pounded out an 8-0 win over the Balcos, highlighted by round-trip smacks by Red Haight and Tony Callipare. Ed Mayer checked the losers.

Camera Works out-hit Wollensaks but lost nevertheless, 4-2. The Cameras rallied for their two tallies in the last of the seventh but the uprising fell short.

GAMES NEXT WEEK

Thursday, July 29—8:15 p.m., Ritter vs. Delco; 9:30 p.m., Bausch & Lomb vs. Camera Works.

Friday, July 30—7:30 p.m., Ritter vs. Grafex; 8:45 p.m., Gleason vs. Ritter; 10 p.m., Delco vs. Kodak Park.

Monday, Aug. 2—7:30 p.m., Bausch & Lomb vs. Ritter; 8:45 p.m., Grafex vs. Ritter; 10 p.m., Kodak Park vs. Grafex.

Tuesday, Aug. 3—8:15 p.m., Grafex vs. Ritter.

Production Wins Extra-Inning Tilt

In the only game played in the H-E Intraplant League last week, Recordak Assembly dropped an extra-inning verdict to the Production softballers, 9-8. Al Oswald's single behind Ollie Seebach's hit produced the winning tally in the bottom half of the ninth. Score:

Recrdk Assm. 4 1 3 0 0 0 0 0—8 13 0
Production ... 1 0 2 0 3 2 0 0 1—9 10 0
Marion and Barton; Schneider and Niedenbach.

Jack Lynch Paces KO Dusties To 5th Straight Victory, 8-1

Kodak Office softballers made it five straight and six out of seven for the season in Eastern Division play of the Champion Industrial League last week, thumping KeeLox, 8-1. The victory increased the KO nine's first-place lead to two full games. Paul Mastrella again turned in a scintillating mound performance, releasing only six hits. Jack Lynch paced an 11-hit KO attack, collecting three for four to bat in five runs. His blows included a triple and a home run. Bob Wallace and John Robinson each chipped in with two base knocks.

A five-run Kodak Office rally in the second sewed up the game. Ken Jamieson doubled to open the inning, and was singled home by Robinson. Three consecutive walks forced in another run, and with the bases still loaded Lynch came through with his three-ply swat.

Lynch clouted his circuit smash in the sixth with a mate aboard. Score by innings and batteries:

Kodak Office	0	5	0	1	0	2	0	—8	11	0
KeeLox	0	0	0	0	1	0	0	—1	6	1

Mastrella and Maccio; Guthrie and Cesserone.

Lynch

Close Races Mark KP Play

Close races marked activity in Kodak Park's three noon-hour softball leagues last week, with ties for top positions reported in both the KPAA Lake Avenue and Ridge circuits.

Jack Connolly's Yankees came off best in the Lake loop, gaining a win and a tie to boost their point total. Tommy Castle starred in the 1-1 deadlock with the Giants July 20, scampering home with the tying run when catcher Jim Dittman threw wild to second base. On July 22, the Yankees scored a 2-0 shut-out over the Dodgers, with Shifty Gears doing the twirling.

Dodgers Trim Birds

Earlier in the week the Dodgers banged out a 3-1 triumph over the Birds. On July 21 the two teams played to a scoreless tie.

The Royals and the Wings share the lead in the Ridge circuit where the Bears stole honors for the week by snaring two victories. On July 20 Abe VerCrouse's lads shellacked the Wings, 5-2, with Syd Gamlen and Ray Shutt providing the batting power. The Bears trounced the Bisons, 4-1. The Royals showed plenty of class in pummeling the Bisons, 9-0, with Ray Frederick besting Spike Spiegel on the mound. Home runs were chalked up by Bob Anderson, "Red" Pero and Charlie Frasher. On July 22 the Wings pounced on the Royals, 6-1.

Renegades Lead

Jim Moyer's Renegades head the feuding in the KPAA Kodak West wheel by a slim margin over George Kelch's F. D. 5 crew. The Renegades tied Synthetic Chemistry, 9-9, on July 19. Moyer homered with the bases loaded to feature the game. Howie Terhaar banged out a pair of doubles to bring in 3 runs as F. D. 5 stopped Wood Cellulose, 6-3, on July 20. Gene Warner homered twice. The Renegades defeated F. D. 5, 5-3, as both Dick Smith of the winners and Kelch of the losers homered.

Sports Roundup

2nd EK Pin Tourney Slated Dec. 11-18; Open to Women

Good news for the bowlers! The second annual Kodak singles handicap bowling tournament, staged for the first time last season, will be held Dec. 3-4 and 10-11, it was announced last week by Cap Carroll, tournament chairman. The women will have an opportunity to display their prowess on the alleys this year, with the Dec. 11 date being reserved exclusively for the keglerettes.

Last year's tournament, captured by Leo O'Halloran of KP with a handicap score of 695, drew a total of 804 keggers from the Kodak plants in Rochester. With the addition of the girls' division, this year's shelling is expected to attract at least 50 per cent more entrants than last year's, with a proportionate increase in prize money, Carroll points out.

Jim Archibald, KO co-captain, salvaged the only victory in the Office team's 5-1 loss to Bausch & Lomb last week in the Industrial Tennis League. Archibald subdued Bill Moffatt, the Balcos' No. 1 netter, in straight sets, 6-4, 6-3. In the No. 3 go George Eaton, KO, dropped a hard-fought decision to Gene Sliwoski, 4-6, 8-6, 9-7.

Three Kodak Park girls are members of the Russers' softball aggregation, which has won six of nine games to date. They are Lorraine Burke, Ruth White and Peg Wilson.

PARK PICKUPS—Sparky Zuber contributed a sparkling offensive and defensive game as the Kelly Celtics recently tied the Buffalo Becks, 4-4, in an intercity soccer league match. . . . John DeVey, KP Cafeteria golfer, who captured Class C honors in the KPAA event at Lake Shore July 17 with a net 61, took up the game only last year. . . . When Milt Alt's Finished Film team dropped a 5-0 decision to Charlie Frank's F.D. 10 outfit in the National division of the KPAA Twilight League recently, it marked their second reversal in two years.

Links Leaders Advance at H-E

Accounting widened its first-place margin over the Mongrels in the H-E Twilight Golf League to 10½ points last week by downing Walt Drojarski's Question Marks 12½-5½. The best golf of the season to date was played in the Mongrels-Estimators match with Mike Gunn, John Byrne and Joe Garafol posting gross scores of 75, 76 and 77, respectively.

Blind bogey winners were: George Meyers, Drojarski, Ed Dubiel, Errol Mews, Vic Hodkinson, Garafol, Mel Roth, Bill Hutchings and Ralph DeRoo. Standings: Accounting 71½, Personnel 45½, Mongrels 61, Question Marks 44, Paint Shop 57½, Supervisors 35, Dept. 42 51, Production 28½, Estimators 46½, Recordak 24½.

Hotshots Lead Skeet League

Clarence Autem, of the Hotshots, and Chuck Jutsum, Supers' captain, pace the KPAA Skeet League. Both boast perfect 75 records in three outings. Close behind with 73s are Bill Holland and Don Selkirk, also of the Hotshots, who topped last Wednesday's shoot with 121. Standings:

with 121. Standings:					
Hotshots	3	0	Supers	1	2
One BB's	2	1	Spark Plugs	1	2
Power Plus*	1	1	Royals	0	3

*Record includes one tie.

Sailor — Among the many Kodakers active in sailing circles is Gordon Killips, KP, shown above rigging his Comet "Skip It Too" for a sail around Honeoye Lake.

Hefferin Cops KO Tourney

Carding a five-over-par 76 on windblown Midvale Country Club, Tom Hefferin won low gross honors in the KORG golf tourney Saturday.

Tying for low gross for Class B were Harold Jensen and George Temnitz with 103.

Blind bogey winners with 72's were Barney Pilot, Al Stillson and Don Spital. One over bogey honors were won by Jim Archibald, Bud Spies, Bob McDonald, Bob McPherson and Chub Collins. Two over bogey prizes were taken by R. B. Murray and Frank Wakeley. Scranton Van Houten tallied one under bogey.

Hefferin shot an even par 35 on the back nine, scoring two birdies. Don Neufeglise and Clint Burns also got birds.
