Lab Simulates Sunlight To Test Rocket Films

The sun's rays as they are found 100 miles or so above the earth's surface are being simulated in EK Research Laboratories.

Purpose of the scientific project is to test photographic emulsions for use on film that Uncle Sam will send into the stratosphere. It's objective is to obtain better information on the atmosphere high above the earth. The Naval Research Laboratory in Washington is directing study of the rays with the aid of scientists in several leading labs of the country.

The film, with its special emulsion, and optical equipment, is shot in rockets up into the stratosphere and above to obtain spectrograms of the sun's light as it appears up there, Arthur L. Schoen, Kodak spectrographer, explained:

"The radiation from the sun at an altitude of 100 miles is very different from what we experience here. There is a great deal of in-

tense ultraviolet light that never reaches the earth because the air gets in the way. The ultraviolet rays, which have a shorter wavelength than the light we see, just can't push their way down through the atmosphere."

These rays are important, however, for when they plow into the upper air they cause a disturbance, according to Schoen. They push the gaseous atoms in the air around, knocking electrons off (a process known as ionization), and this affects our weather, our radio communications, and possibly our health, in ways that we do not yet know.

Many Scientists at Work

That's why the nation's scientists are trying to learn as much as they can about those ultraviolet rays high above the earth.

These Kodak films cannot be tested in the open air like ordinary ones because of the fact that the ultraviolet rays are soaked up by the air.

In order to eliminate this air obstruction to the rays, Kodak's scientists built a special torpedo-shaped device—about 16½ feet long and a foot in diameter—for the testing, which is done by Dr. E. S. Hodge under Schoen's direction.

Inside the tube are variations of standard spectrographic equipment—a high intensity spark at one end as a light source, a diffraction grating to break up the light into its various wave lengths at the other end. The light is focused on a holder for the photographic film.

In the middle of the tube they attached a vacuum pump. This supplies a means of pulling the air out of the tube until the pressure inside is less than one one-millionth of what it is outside.

This thins out the air to approximately the same consistency of that 100 miles above the earth's surface. As a result the ultraviolet light gets through it easily and is recorded on the photographic film being tested.

Here's Score For Safety

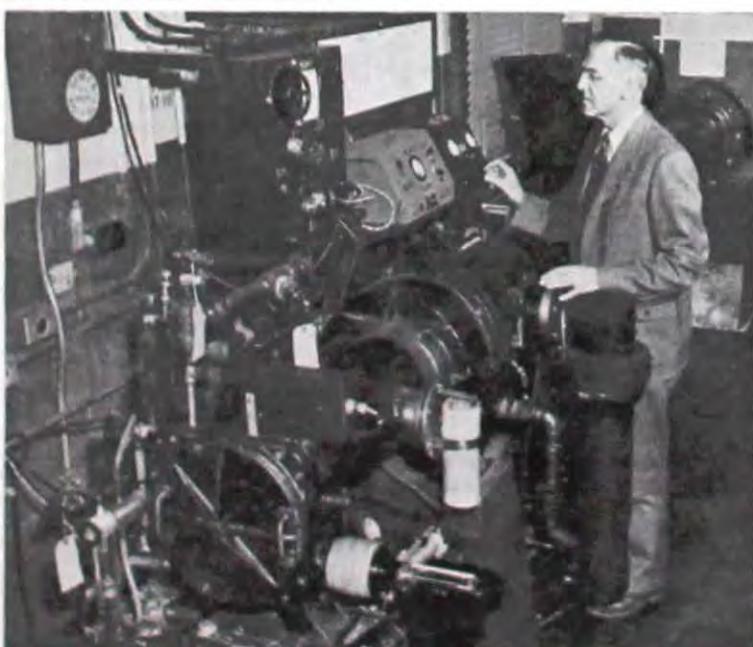

Here are the standings of the Kodak entries for the eighth week in the 13-week Accident Prevention Campaign sponsored by the Associated Industries of New York State:

KP Chemical Plant.....	98%
KP Roll Coating.....	100%
KP Film Emulsion.....	97%
KP Paper Division.....	98%
KP Paper Finishing.....	99%
KP Fin. Film & Sundries.....	100%
KP Yard Dept.....	99%
KP Service Deps.....	100%
E&M Shops, Eng. & Stores.....	99%
KP E&M Field Divs.....	96%
KP Emulsion Coating.....	96%
KP Cine Processing.....	100%
KP General.....	99%
KP Research Division.....	100%
Kodak Office.....	98%
Camera Works.....	92%
Hawk-Eye.....	99%
Navy Ordnance Division.....	100%

Your Phone Working?

Yes, there are Kodak people still looking for houses, apartments and rooms to rent . . . a glance at KODAKERY's Want Ad Page will prove that!

You can help, too, by giving one of them a ring if you hear of a vacancy in your neighborhood. Just pick out one of the "Wanted to Rent" ads that fits the vacancy.

Testing for Sun Shots — Arthur L. Schoen, Kodak spectrographer, operates the special vacuum spectrograph built at the Research Laboratories to test emulsions for films used to take pictures high above the earth in scientific studies.

Tough Task For Judges in Annual Show

Picking Best Prints — Here are the judges of the Nature Division in the Kodak International Salon of Photography as they select the top prints. From left, Dr. Gordon White, Port Colborne, Canada; Robert L. Roudabush, Rochester; Lou Quitt, Buffalo, and J. Lawrence Hill jr., KP, Nature Division chairman.

'Absurd', Hargrave's Comment On Keller-Dorian Corp. Claim

"In my opinion, this suit is without justification and the claim for damages is absurd."

That was the comment of T. J. Hargrave, Kodak president, in connection with the suit for \$300,000,000 filed against the Company by Keller-Dorian Corp., last week.

"Since the early days of motion pictures," he stated, "the Eastman

Company Gives \$1,250,000 For Hospital Fund

Kodak last week pledged a gift of \$1,250,000 to open the campaign of the Rochester Hospital Fund.

Announcement of the pledge, voted by the Company's Board of Directors, came from T. J. Hargrave, Kodak president and associate chairman of the campaign which seeks to raise \$6,940,000 to expand and modernize local hospital facilities.

Mr. Hargrave stated that the \$1,250,000 is not being paid in one sum but payments are being made over a three- or four-year period.

"Our Company feels a deep responsibility for the hospital needs of Kodak people in the community," Mr. Hargrave declared, "and this contribution is made to help provide the accommodations they and their families require."

After careful study as to the needs throughout the Rochester area, the Fund plans to provide: a new 120-bed community hospital at Ridge Rd. E. and Hudson, an area without facilities at present; a new 93-bed wing at Genesee Hospital to replace outworn facilities; a new 81-bed building at Highland to supplant 36-beds in obsolete quarters; alterations at Rochester General Hospital to handle 65 more patients; an outpatient structure at St. Mary's and clinical facilities at Strong.

Briton's Print Best In 14th Kodak Salon

Competing with Kodakers from all over the world, A. W. Doree of Middlesex, England, won the George Eastman Medal in the 14th Kodak International Salon of Photography. The medal is the premier award for the best pictorial print of the show.

Charles A. Kinsley, general chairman of the Salon, announced the winners at a banquet in the KP Service Dining Room after three groups of judges spent Saturday, Nov. 20, making the selections. Award donors, the judges, members of the Kodak Camera Club staff, committee members and others who aided in conducting the Salon attended the banquet at which Ralph Sutherland of KP, president of the Kodak Camera Club, presided. The Club was this year's sponsor of the Salon, the first since before the war.

Don McMaster, Kodak vice-president and assistant general manager, gave a history of the Salon from its origin. Sutherland presented the judges who had chosen the winners from 1726 entries from the United States and 15 other countries, including Pakistan, Czechoslovakia and So. Africa.

Judges were: Pictorial, A. Aubrey Bodine, Baltimore; David J. Stanley, Buffalo, and George Hoxie, Oxford, Ohio; Nature, Louis Quitt, Buffalo; Dr. Gordon B. White, (Continued on Page 4)

Harper Gets New EK Title

Newest of Kodak's assistant comptrollers is J. L. (Les) Harper, appointed by the Company's Board of Directors last week.

The Company's other assistant comptroller is T. J. McCarrick.

Born in LaGrange, Ill., Les joined Kodak's Men's Training Dept. upon graduation from the University of Illinois.

After about a year at the Kansas City Store and in various KO departments, he was transferred to the Tax Dept. as an accountant.

Harper has been assistant to the general comptroller, C. J. Van Niel, since January 1946.

Les, his wife and four children live on Sagamore Drive.

Lots of Luck Les — J. L. (Les) Harper, left, receives congratulations from C. J. Van Niel, general comptroller of Kodak, after Harper's appointment as assistant comptroller.

Welcome, Hu Yu — Hu Yu-Chang of the University of Nanking's Audio-Visual Centre is greeted by Ken Edwards, Kodak adviser on non-theatrical films, on a visit to Kodak.

Nanking University Feeds Educational Films to China

The principal source of non-theatrical films in China is the University of Nanking's Audio-Visual Education Department.

And its assistant director, Hu Yu-Chang, in the States on a 12-month Rockefeller Foundation fellowship, spent several days at Kodak recently.

He came to the States after completing a British Council fellowship and expects to study with the Canadian National Film Board and at the University of California.

Hu Yu is instructor in motion picture photography at the university, as well as assistant director of its film producing. During the war he made a series of shorts on Chinese industries for the National Resources Commission. He assisted in the training of projectionists for service with the Chinese army. Also he was in charge of the exhibition program in the Chungking area whereby documentary films were shown to about a million people a year.

Pioneered in 1930

Nanking University started its activities in audio-visual education in 1930 by showing teaching films in the university and to other schools. Since 1933 the university has been producing 16mm. educational motion pictures.

The Audio-Visual Center at present has an ambitious film-strip program in production. Film strips, rather than motion pictures, now are being used extensively because of the shortage of film. These movies and film strips treat a variety of subjects, including science, civics, health, religion, geography and culture.

This is a:

- a. Kodak Telescopic Lens with tube attachment.
- b. Kodak Siphon Set.
- c. Kodak Washing Assembly.

Indoor Shots Easier Now

A new Kodak book, "Picture Taking Indoors with Still Cameras," is described as making photography inside both easy and fun.

For the occasional snapshooter and the serious amateur photographer, it tells in easy-to-understand language just how to take indoor pictures.

The book is the product of the teamwork of Jack Debes and Sherm Nelson of KO's Sales Service Division. Ideas behind the cartoons and copy were contributed by both, with Jack doing the writing and Sherm the layout, cartoons and diagrams which give the book its colorful character.

Many Illustrations

Sprinkled from cover to cover are examples of good indoor pictures, each accompanied by detailed instructions, including lighting and exposure data, telling how a similar one can be made.

Photoflash, photoflood, pictures by daylight, and even pictures by ordinary home light are covered. The flash- and floodlight sections include taking color pictures, too. Directions tell how to get the picture whether the camera is a simple one or one which is equipped with adjustments.

The book may be obtained from Kodak dealers for 25 cents.

Fall Enchantment — A picture such as this of the hunter and his companion, after they have bagged the game with the aid of a good dog, keeps fall memories fresh always.

First Vincennes-Made Cameras Due To Reach Trade Before End of '48

The first 1000 of Kodak-Pathé-made cameras will be finished towards the end of this year, according to Lucien Vacher, manager of the Kodak-Pathé Vincennes Works, now in Rochester.

Known as the Vollenda camera, it is similar in appearance to the American Kodak Vigilant camera. Next year Vacher expects it will be in full production.

Heavy Demand

Asked about Kodak Vincennes' production in general, he happily stated that it is about 3½ times that of prewar. The domestic demand for photographic goods has increased tremendously, and the working force of Kodak-Pathé, including the Works, has nearly doubled, he said.

Kodachrome Cine Film, 16mm. and 8mm., also was manufactured for the first time this year at the Vincennes plant.

"It was too much of a success," he added. "The only complaint we received was 'why can't we get more?'" At present the factory is starting to manufacture 35mm. Kodachrome Film and Dye Transfer Paper.

Papers, Films Better

Vincennes also has improved the quality of its papers and films during the last two years.

"During the war," Vacher commented, "we couldn't keep up with advances made elsewhere, and it took time to catch up."

He believes the Marshall Plan will aid France tremendously. The dollars advanced under the Plan mostly are being used to buy machines and tools for French factories.

Kodak in Two Lands — C. K. Flint, general manager of Kodak Park, explains layout of KP to Lucien Vacher, manager of Kodak-Pathé Vincennes Works, who is holding a print showing his factory. Vacher is studying EK methods here.

tories. "This in the long run will make France more economically sound and self-supporting," he said.

France's economy is improving slowly, he observed. And greater production is the big factor which will better conditions, for, as he expressed it, a country's standard of living actually is its total production divided among its people.

Recovery has been slow, he continued, partially because at the end of the war France's shelves were bare. Warehouses and stores were practically empty, and there was no surplus.

With him on this visit to the States is his wife, Renee, who is

completely fascinated by the electrical labor-saving equipment in the American homes, particularly in their kitchens.

She is amazed also by the ease with which the American woman can buy food, often purchasing everything within one store.

Shop 2 Hours Daily

In France, Vacher commented, a housewife may spend as long as two hours in 10 or 12 shops locating food for one day. Prices for the same commodity differ greatly from store to store, he continued, and many a French working man finds he has to spend 80 per cent of his income on food alone.

Photo Patter

Camera Need Next to Gun In Planning Hunting Trip

PHOTOGRAPHY sometimes is called "the hobbyist's hobby." Meaning, of course, that whether a man's hobby is golf or model building, pictures are part of it.

Certainly this holds true for the sportsman. Pictures can show his catch while fishing or his full bag of game, keeping the memory fresh for the future.

Too often he may be content with just a straight record shot. Everyone knows this type—the somewhat embarrassed figure in checked shirt holding a pheasant aloft and staring into the camera.

The same story of a successful day in the field can be told much more interestingly. Today's illus-

tration is an example. A snap such as this not only offers visible proof of the bird, but also imparts a sense of the pleasure of gunning behind a good bird dog on a crisp autumn day.

There's no trick about making such a snapshot, either. It's simply a moderate closeup in which all the elements of the story—gun, dog, bird and companion—are shown in a natural grouping against the plain background of sky. Anyone with a good eye for pictures could make such a shot with any camera. And there are numerous picture possibilities in the woodlands these days. Think a bit and you'll have a dozen.

And if you haven't tried it already, how about making some shots in color? Almost any camera can be used to make color pictures.

Smiths, Berrys Beat Drums, Hills, Mills Top Lone Crumb

A perusal of names on the employment record at Camera Works offers many interesting sidelights.

The Smiths lead in number with 50, and Millers follow with 31 to their credit. The Johnsons and Williams each score 17.

In the battle of colors, the Browns win hands down, having 12 to their credit, closely followed by 10 Whites, 8 Greens, 6 Grays and 1 Black.

The record reveals that there are 8 Fishers, 1 Fish and a Pike. Ten Gardners, 1 Bloom, 2 Plants, 4 Berrys, 2 Bushes, 1 Rose, 1 Balsam and 1 Garlic would be of interest to the botanist.

A further search disclosed such names as 6 Hunts, 5 Foxes, 1 Badger, 2 Cranes and 2 Larks. There are 3 Fellows at CW, and 3 Gates,

Hills, Miles, Rivers, Brooks, Woods, Cases and Beaches.

The automotive field is represented by 9 Carrs, 10 Fords and 1 Lincoln. There are 9 Cooks and 11 Bakers in the plant, and two Bosses. A search for "royalty" showed 5 Kings, 2 Barons and 3 Knights.

Additional observations revealed that there are 2 Papas, a Piano, 6 Halls, a Hamburg, 5 Pecks, 6 Lanes, 2 Lawns, 2 Nickels, a Button, 2 Stockings and a Schoolmaster. Paris is represented, as well as Spain. A Castle, a Church, a Bell, 4 Bills, 2 Coffees, 2 Drums and a Crumb are recorded. Also a Bull.

who is with **Win Gordon** as a trainee for the Time Study training course. . . . **Ed Solarek**, E&M Tabulating Section, Time Office, has returned from two weeks' vacation at Lake Charles, La., his wife's home town.

Leona Gleffe, Sheet Film Packing, is vacationing in Washington, D.C. . . . **Robert Newell**, Recovery, his daughter, **Edith Gebhardt**, Accounting, and Mrs. Newell have returned from a visit with relatives and friends in England. Among the points of interest seen were Windsor Castle, Brighton Beach, London Tower, Westminster Abbey, the House of Parliament, St. Paul's Cathedral and London Zoo. The trio also toured Kodak's plant in Harrow, where they had dinner and tea in the Superintendents' Lunch Club. . . . **Roland Broadhurst**, retired member of the Machine Shop, is on the injured list again. His latest mishap occurred Oct. 19 while he was returning by train from Scranton, Pa. The train lurched while rounding a curve, throwing him to the floor and causing head and neck injuries. It was his fifth accident since retirement from KP in 1944.

Weekend football games in Syracuse and Ithaca have found numerous members of Bldg. 30 and their wives in attendance. They include **Frank Pearce**, **Ed Twardokus**, **Ken Bump**, **Ted Kelly**, **Al Van Houten** and **Al Hoeffer**. . . . **Emogene Zorn** and **Alice Herman**, E&M Clerical Group, Time Office, recently enjoyed a two-week vacation in Florida. . . . **Marge Sale**, Industrial Engineering, recently underwent her second operation in four years, and hopes this will be her last. . . . **Cecil** and **Marion Westfall**, Bldg. 30, are leaving the Company in December for Colorado, where Cecil will attend the University of Colorado.

Wesley Bahler, Bldg. 30, is back after completing a honeymoon trip to California by air. . . . Recently welcomed to the Finished Film Group of Industrial Engineering is **Jim Richardson**, a transfer from Camera Works. . . . Thirty-two male members of Bldg. 30 Office may be found every noon in the second floor cafeteria, where they concentrate on the intricacies of duplicate bridge. The budding Culbertsons are out to dethrone last year's champs, **C. Ellsworth Peitscher** and **William Wedemeyer jr.** . . . Recently hospitalized at St. Mary's were **Oscar Stoik** and **Marion Wegman** of the Plate Dept. Another member of the department, **Mary Kosko**, was discharged two weeks ago and is now convalescing at home. . . . **Mary Van Dyne**, Bldg. 48, and **Ethel Ostrom**, Bldg. 65, motored to Niagara Falls for the weekend of Oct. 30. . . . Members of the Chemical Plant Office, Bldg. 46, have welcomed back assistant superintendent **Richard Baybutt**, who was out for several months because of illness.

Carol Mykins was guest of honor recently at a luncheon given in the service dining room by the girls of the Film Waste and Quality Control Dept. prior to her marriage to **Don Webb**, a member of the same department. . . . A farewell dinner was held at the Sheraton Hotel Nov. 5 for **Gladys Orne**, who has left the Company. A corsage and gifts were presented by her associates in Bldg. 26. **Bernice Baybutt** was in charge of arrangements. . . . **Eleanor Judson**, Chemical Plant Office, Bldg. 46, has returned to her desk after a recent illness. . . . Not Irish but plenty lucky is **Charlie Butler**, KPAA, Bldg. 28, who won two tickets to a Notre Dame football game. And now Charlie can't use the ducats.

George Appleton, Garage, has acquired another item for his basement museum. It's supposedly the skull of some prehistoric animal and was sent to him by a friend

George Appleton displays what is supposed to be part of a skull of a prehistoric animal which he has added to his collection.

in California. **Bob Halpin** has been trying to identify it but thus far is convinced that it resembles nothing living or dead. . . . **Ike Shynook**, KP KODAKERY editor, rode the skyways to New York to catch a couple of shows and to give the Missus a glimpse of the sights in the Big City on his vacation last week.

Blood Unit Due Monday For 8-Day Stay at Park

When sickness strikes in your family, the blood donations of your friends and neighbors may be instrumental in saving a life.

That's the reminder being impressed upon KP people by the Red Cross as it prepares to send its Mobile Blood Collecting Unit to the plant for an eight-day stay beginning Monday, Nov. 28.

Registrations for donations are now being taken in the KP departments and by Vivian Granger in the Medical Dept., Ext. 311. The unit will be located in the sub-basement area of new Building 28.

Baby Gets Blood

Leo Keefe, F.D. 1, is among those who are enthusiastic about the Blood Bank and the work it is doing. During the past eight weeks, Leo's 10-month-old son, Michael, has undergone two operations and is living today, says Leo, "because blood was available." Baby Michael was given three transfusions during the first operation and five during the second.

Another loyal supporter of the program is **Charles Worboys**, Roll Coating, whose wife is now convalescing from two major operations, in both of which blood transfusions played an important part.

Dr. John L. Norris of the KP Medical Dept., which is directing

Thankful — Charles Worboys, Roll Coating, is shown with his wife whose convalescence after two major operations was aided by transfusions.

the Red Cross blood program at the plant, pointed out that the response of Park people last March to the appeal for blood was a heavy factor in getting the Rochester Regional Blood Bank off to an effective start.

"No one who needed blood in the 11-county area which the Rochester Regional Blood Bank supplies thus far has gone without it," he said. "This program must be a continuing affair. Whole blood is most useful for civilian needs during peace time. Since it cannot be kept beyond 30 days, it must be replaced continually. It is being used increasingly to prevent complications in surgical procedures in some illnesses and is used in both city and outlying hospitals to cut down the length of the hospital stay and the period of convalescence following surgery."

Got Your Ticket? — These members of the ticket committee for the annual dinner party of the KP Pioneers' Club are busy filling requests for the ducats. From left are **A. Lee McFarland**, Bldg. 29; **Walter Fox**, Chemical, and **William Russell**, Roll Coating. Dinner party is Wednesday, Dec. 8.

KP Pioneers' Big Powwow Opens with Dinner Dec. 8

The annual dinner party of the Kodak Park Pioneers' Club, made up of present and former KP members who have completed 25 years of active service with the Company, will be held in the new recreation building at 6 p.m. Wednesday, Dec. 8.

The \$2 dinner tickets may be obtained from any one of the committee members located in plant departments before Dec. 3.

A fine program of entertainment has been arranged, according to O. E. Zabel, president of the group. The club now numbers more than 2200 members, Zabel added, and a large attendance is expected at the annual get-together.

Collecting Stamps?

Are you interested in collecting stamps?

It has been suggested that a stamp collectors' club be organized at the Park to meet monthly and to enable members to exchange stamps, arrange exhibits, and enjoy an occasional speaker. All those in favor of the plan are requested to file their names and departments with the KPAA Office, Bldg. 28, Ext. 2193.

George Appleton, Garage, has

Meet Your Safety Leaders

Edmund Edmondson, Fred J. Newberg, and Lloyd Werth.

Edmondson started in Sundries Mfg. in April 1925, transferring to Film Storage one month later. In 1927 he joined Film Emulsion Coating where he still holds forth as safety engineer.

Newberg joined the Paper Service Lab in 1936, transferring to Paper Sensitizing Coating in 1938. He left for military service in 1941 and returned to Paper Sensitizing Coating in 1945, where he is now as assistant supervisor.

Werth began his career in 12-A Bldg. Design in 1929 and was transferred to DOP Packing in 1931. The latter is now known as Paper Finishing Dept. General, where he serves as supervisor of engineering and maintenance.

Col. Stevens Visits Company; Pioneered In Aerial Photos

Aerialist Drops In — Lt. Col. A. W. Stevens, noted for his aerial exploits and photographic adventures, chats with Dr. A. K. Chapman, vice-president and general manager of the Company, on his recent visit to Kodak. Stevens set world altitude record in a balloon.

A long-time friend of Kodak dropped in for a visit the other day. He is Lt. Col. A. W. Stevens, U.S. Army, retired, who many people will remember as the Captain Stevens famed for his aerial and photographic exploits a few years back.

Colonel Stevens' achievements were many during his quarter-century of service to the Air Force, but he probably is best known for his 1935 record-breaking ascent in a stratosphere balloon to the amazing height of 72,295 feet — a mark that still stands on the world's record books.

Photographic Record

Colonel Stevens and the now Maj. Gen. Orville Anderson took off from Rapid City, S.D., in a sealed cabin dangling from the balloon loaded down with photographic and scientific apparatus. Besides obtaining much atmospheric information, they took what were the highest pictures ever made, until the advent of rocket photography.

The pair also made the headlines the year before, when their excursion into the stratosphere met with failure after reaching a height of 60,000 feet. In trouble, the balloon was started downward. At 2000 feet it burst. At 700 feet the men parachuted to safety.

Aided Air Force

Colonel Stevens at one time also held the world record for a parachute jump of 24,000 feet, which stood up for some 10 years before being bettered. He developed much apparatus for the Air Force, some of which is still being used, including the detachable parachute.

The Colonel was a pioneer in Air Force photography and in his various capacities worked closely with Kodak, using its camera equipment, film, materials and accessories extensively. Among his outstanding photographic "firsts" was a picture of Mt. Shasta which he took from Salinas, Calif., 330 miles away, using Kodak Infrared Film.

"I always feel as if I am one of the family, whenever I come to Kodak," he said in relating his many contacts with the Company during his lengthy service in the Army.

Mees' Talk Beamed Abroad; Swedish Unit Awards Medal

Dr. C. E. K. Mees, Kodak vice-president in charge of research, broadcast to Europe a message of congratulation on the 60th anniversary of the Photographic Society of Sweden.

On the same day the society, which was founded in 1888, awarded to Dr. Mees the Adelskold's gold medal for his contributions to the progress of photography. The society is the largest organization of amateur photographers in Sweden.

The speech by Dr. Mees was sent by short-wave stations of the World Wide Broadcasting Foundation and beamed to Sweden, England, France and other countries.

ANSWER

(Question on Page 2)

This is a Kodak Washing Assembly, which is the simplest means of converting a sink into a circulating washer.

China Lecture Set by Club

Kodak Camera Club has booked what it believes will be one of the season's outstanding film-lectures. Scheduled for Wednesday night, Dec. 1, in the Kodak Park auditorium, it will feature Karl Robinson, one of the country's top platform personalities, in his all-color film story, "China Journey."

"Not just another documentary movie," according to club officials, Robinson's human-interest presentation of the story of modern postwar China is said to be fascinating, thrilling and amusing.

With a prewar residence of 10 years in the Far East, Robinson returned for six months of 1946, and despite the aftermath of World War II and a current Chinese civil war, managed to visit and film six provinces in both North and South China.

Tickets are not necessary for the lecture. The program is scheduled to start at 8 p.m.

of Western and Middle Europe. It also was heard on short-wave radios in Rochester.

The talk by the internationally known scientist is the first of a series on photography which Dr. Mees has been asked to record for broadcast to Europe. He reviewed 40 years of progress in the photographic industry and how it touches the lives of all.

CHEST TOUR: Kodakers Visit 3 Agencies

Red Feather visitors from Kodak Park's E&M Division found new appreciation of their own eyes in a trip to the Association for the Blind, and voiced emphatic admiration for the courage and skill of Rochester's sightless men and women as they studied the articles turned out by the blind workers.

The trip, eighth of a series of tours of E&M members to Community Chest agencies, included the Blind Kraft Shop, 439 Monroe Ave., and the offices of Family Service, 31 Gibbs St. The group included Kenneth Burpee, Edward Goeller, Emmett Philo, Eugene O'Brien, Alan Rocastle and George Schlaffer.

Miss H. Frances Lewis, executive director, was their guide at the Association for the Blind. She conducted them through the weaving room, where blind men, relying on supersensitive touch, were turning out colorful rugs; the basketry department, and the sewing room. All of the goods produced, the visitors found by close examination, were of professional quality. Miss Lewis explained that they have a ready sale, and the proceeds are turned back to the workers—both those in the shop and those who do sewing, knitting, etc., at home. Because of limited output, the revenue of the shop must be supplemented by a Chest appropriation, and about a third of the total operating cost comes from Chest contributors.

Watching a resident of the Association for the Blind weaving are (l. to r.) Alan Rocastle, Gene O'Brien, Ed Goeller, Bill Dingemanse, Emmett Philo.

The E&M men listened in on the monthly social meeting of the blind men of the community. The interest of the men's group, and the obvious pleasure and stimulation they were deriving from their session, drew this enthusiastic com-

ment from George Schlaffer: "These meetings are wonderful! The enjoyment they get from this discussion convinces me that the cost of a program like this is money well spent."

Schlaffer also observed that "the rugs, dresses, aprons, mittens and other items made and sold at the Blind Kraft Shop are certainly attractive."

At the Family Service office, the work of this Community Chest agency was explained by Miss Edith Holloway, executive director. Over 1100 families came to this Red Feather agency in the past year, Miss Holloway told the visitors. Over half of these were husbands or wives, or both, seeking counsel to help them solve marriage problems, or parents concerned about the behavior or care of young children, she said.

"Marriage counseling, she explained, is the most extensive of all of the agency's services. She termed it probably the most important, since the welfare of children is so largely dependent upon strong and happy family life.

With this the E&M men heartily agreed, and their impressions were thus summarized by Ken Burpee: "Family Service of Rochester is giving and can give something that hundreds of our fellow citizens ought to know about—for their own good."

Comment on Suit

(Continued from Page 1) requirements more easily and economically. Accordingly, use of the process for the amateur market was discontinued a good many years ago.

Nevertheless, Kodak has continued experimental work with the purpose of eventually making Lenticulated film commercially useful in the field of professional color motion pictures. As yet, the company has not arrived at results which, in its opinion, warrant the recommendation of such film for widespread use for professional motion pictures. This circumstance has no relation whatsoever to any agreements between the Eastman Kodak Company and Technicolor.

"Kodak has never prevented others from working in the Lenticular film field, but, on the contrary, has not only supplied the special film required for the purpose, but has also furnished considerable technical advice and assistance."

"At least two American motion-picture producers and a large European manufacturer have done a great deal of work and experimentation in this field over a considerable period of time. So far as we are aware, none of these efforts has yet met with commercial success."

"The Company is prepared to meet this suit and has turned the matter over to its attorneys for appropriate action."

J. E. McGhee Award for excellence in color photography (2 x 2 slides), Lawrence M. Spaven, KP; silver medal, Lou Parker, KO; bronze medal, Gordon A. Stevens, San Carlos, Calif.

Other awards and the winners:

J. J. Rouse Memorial Trophy for excellence in pictorial photography, E. Robertson, South Australia.

Kodak-Pathé Trophy for excellence in pictorial photography, R. L. Coles, Harrow; silver medal, Lou Parker, KO; bronze medal, Herbert Archer, KO.

T. J. Hargrave Award for best pictorial print by a beginner, N. L. Brook, Leeds, England; silver medal, Charles W. Fairbanks, KP; bronze medal, Roland Rapp, Lausanne, Switzerland.

Don McMaster Award for the three best prints by one contributor, John G. Mulder, KP; silver medal, Fernando Barcena, Madrid, Spain; bronze medal, E. Robertson, South Australia.

Kodak Park Superintendents' Cup for the best formal portrait, R. H. Sutherland, KP; silver medal, Ernest W. Johnson, Harrow; bronze medal, A. J. Sanarens, New Orleans.

C. F. Hutchison Trophy for the best commercial or advertising print, Virgil O. Smith, Los Angeles; silver medal, Stewart Comfort, KO; bronze medal, Lee Howick, KO.

Kodak Limited Trophy for excellence in nature photography (prints), H. Lou Gibson, KO.

E. S. Farrow Trophy for excellence in nature photography (prints), W. Arthur Young, H-E; silver medal, A. Leir Shuffrey, Hertfordshire, England; bronze medal, John G. Mulder, KP.

C. E. K. Mees Award for the best three-color print made entirely by contributor, Louis M. Condax, KP; silver medal, R. G. Rudd, KP; bronze medal, Leon C. Forgie, H-E.

C. J. Staud Award for the best three-color manufacturer's print, H. Lou Gibson, KO; silver medal, Bruce L. Kelley, H-E; bronze medal, H. Lou Gibson, KO.

W. T. Roach Award for the best hand-colored print, Anna Grum, KP; silver medal, Jeanne Hecker, KP; bronze medal, Anna Grum, KP.

A. K. Chapman Award for excellence in color photography (2x2 slides), Harriette D. Archer, KP.

E. P. Curtis Award for excellence in color photography (2 x 2 slides), H. R. Condit, KP.

C. K. Flint Award for excellence in nature photography (2 x 2 slides), Stan Everman, Dallas, Tex.

M. J. Hayes Award for excellence in nature photography, A. Leir Shuffrey, Hertfordshire, England; silver medal, Henry C. Staehle, KP; bronze medal, Edward H. Bourne, KP.

A list of those receiving certificates in each of the groups of awards will be published in the next edition of KODAKERY.

March of Time' Scenes Feature EK Treasurer

The current March of Time contains a sequence of pictures of Marion B. Folsom, Company treasurer.

The film, which deals with the problems of old age, was shown last week at the Paramount.

The scenes featuring Folsom were made as he spoke on "America's Town Meeting of the Air" on June 22.

Subject of the forum was "Are You Preparing to Grow Old Successfully?" Folsom discussed the spread of annuity plans among business concerns and the reasons why they are important. He also summed up the entire forum topic period, and the movie camera "caught" him at this time.

"The Company is prepared to meet this suit and has turned the matter over to its attorneys for appropriate action."

Two NODers Travel Near and Far To See Sights of Country Via Bus

Two NOD women, members of Dept. 87, are veteran travelers. Amy Massam and Madeline Jones met at Kodak during the war, discovered mutual delight in seeing the countryside, and so began their travels together.

Ready to Go — Settled comfortably in the seat of a bus, Madeline Jones, left, and Amy Massam anticipate their next cross-country sightseeing trip. It won't be next summer however, for Madeline plans to see Bermuda, and Amy will revisit England.

Mothers Warned of Shoes Improperly Fitted to Child

Your baby will refuse to walk if his shoes do not fit! In emphasizing proper size of children's shoes, Dr. Sarah Prindle of the KO Medical Dept. advises not to buy them too small or too large.

She explained that the child's sense of equilibrium is not fully

developed. This condition causes an unsteadiness when baby is in the learning-to-walk stage of life.

Shoes too large are a detriment to walking agility, she said. This mistake is made by many a parent who "economically" buys footwear into which the child will grow. Large shoes may rub and produce blisters, while small ones understandably prevent easy, free movement of the feet and toes.

Improper shoes may be the reason your little one refuses to walk. They should be fitted every two months, the approximate length of time a pair will last anyway.

The wrong size socks also hamper ideal walking conditions for baby. It's interesting to note that socks and shoes which are illfitted at an early age may result in pedal deformities later in life.

Determine a good fit by feeling the ends of the shoes while the child is standing, the doctor states, adding that an X-ray machine, often found in shoe stores and shoe departments, is another assurance.

Until baby is 20 months old, or thereabouts, he should wear high-laced shoes. They give good support to both feet and ankles.

Dr. Prindle's interest in babies' feet and shoes is more than professional. She is a frequent shopper herself for tiny-tot footgear. The shopping is done with her two-year-old daughter Lee.

Same Coat—Different Sizes

Like Mother, Like Daughter — Just out for a stroll in their matching toast-colored coats of St. Mary's fleece are Eloise Graham and towhead daughter Carolyn Jean, whose leggings match, and make a warm outfit. They model McCurdy fashions. Eloise, the wife of Robert V. Graham, KP Roll Coating Finishing Dept., is a former member of KP's Kodacolor Dept.

Ruth Begerow Likes to Write; Has Books, Plays to Credit

Active Author — Ruth Begerow has no slack in her day's time. When she's not working in KP's Die Sheet Dept., she often can be found at home typing material for a book or play.

A quiet room and good typewriter are the requisites of Ruth Begerow to write a play or book!

Ruth, who is a member of the Die Sheet Dept., KP Bldg. 36, is the author of several published works written under an assumed name. Her script, "The Lost Money," was enacted last summer on the nationwide Dr. Christian radio program, which stars radio-movie actor Jean Hersholt.

Has Written 28 Years

Her latest book, "Gloria's Inspiration," now is in the process of being edited prior to publication. "The Judge's Ward" was her first successful work. It was written in 1920. She's done a little writing for magazines and at one time won a prize for sheet music lyrics.

Ruth says that she can write about anything, once given the topic. She hastily adds that this is her one and only talent. "I can't do anything else," she maintains.

Once a stenographer, her ability to type is a great timesaver in producing material. To finish the first rough copy of "Gloria's Inspiration" took but two months, she said. Rewriting various parts,

The Way We Heard It

IT'S A FACT — A bit of sugar in the batter of pancakes makes them brown more readily.

SUEDE AND STEAM — Brushing suede shoes with a wire brush in the steam from a boiling kettle renews their life and looks.

IN THE DARK — Perfume should be kept in a dark place. Light causes oxidation, changes the formula and alters the scent.

A NEAT TRICK — A tablespoon of margarine in water will help keep macaroni or spaghetti from boiling over while cooking.

The Market Place

KODAKERY ads are accepted on a first-come, first-served basis. Department correspondents in each Kodak Division are supplied with ad blanks which, when your ad is typed or printed on them in 25 words or less, are put in the Company mail addressed to "KODAKERY," or handed in to your plant editor. All ads should be received by KODAKERY before 10 a.m., Tuesday, of the week preceding issue. HOME PHONE NUMBERS OR ADDRESSES MUST BE USED IN ADS. KODAKERY reserves the right to refuse ads and limit the number of words used. Suggested types are: FOR SALE, FOR RENT, WANTED, WANTED TO RENT, LOST AND FOUND, SWAPS. KODAKERY READERS ARE ASKED TO PLACE ADS ONLY FOR THEMSELVES AND HOUSEHOLD - NOT FOR FRIENDS OR RELATIVES. TO DO THIS IS TO DENY SPACE TO THE PEOPLE OF KODAK FOR WHOM THIS SPACE IS RESERVED.

Pin Turney Entries Close Monday

\$100 Award Tops Huge Prize List

If you're eyeing the pot o' gold at the end of the Kodak Men's Singles Handicap trail, keglers, better get that entry blank in! Cap Carroll, tournament chairman, sounds a reminder that entries close next Monday, Nov. 29.

The second annual interplant tenpin classic will be run off next weekend at Webber Hall. The dates are Saturday and Sunday, Dec. 4 and 5.

Sliced \$1125 Melon

In the first tournament last March more than 200 keglers sliced an \$1125 prize melon. The top award again will be \$100, but if current entries surpass last year's 804 total, there'll be more money for the other prize winners to divide. There are \$25 awards for the high bowlers from each plant.

Winning scores, of course, include the handicaps. This factor made the initial tournament the success it was, since the lower average bowler has as good a chance as the expert. The scratch average is 200, with the handicap based on 70 per cent of the difference between the bowler's average and that figure.

Application blanks and entry fees should be turned in to your plant recreation office no later than 5 p.m. next Monday.

Women Shoot Dec. 12

Interest in the Kodak Women's Handicap soared the past week, judging from the number of entries filed. The gals will roll Dec. 12 for a \$50 first prize and other awards.

Kaypees Face Products in Dusty Opener

Here Comes Al—

Al Cervi, above, playing coach of the Syracuse Nats, brings his ball club to Kodak Park's new gym for a National League game Dec. 3. The Waterloo Hawks will furnish the opposition. Rounding out the twin-bill will be a game between Kodak Park and RG&E quints of the Champion Industrial League.

Film Emulsion Edges F. D. 5

Film Emulsion, led by Art Steele, racked up its second victory of the infant season in the KPA Girls' Department League last week.

With Steele tossing in 13 points, the Film five thumped Field Division 5, 27-26. Bill Copenhagen's 12 tallies topped the losers' point-production.

Bldg. 65 eked out a 37-34 win over Bldg. 36 in a thriller, with Joe Elliott contributing 20 points to the winners' total. Frank Jenkins of the losers snagged 17. The teams were deadlocked at half-time, 14-14.

Bldg. 58 and Emulsion Research dented the win column in other games played Nov. 15. Charlie Zahn and Ralph Abel threaded the meshes for 11 and 10 points, respectively, as Bldg. 58 trounced Wood Cellulose, 40-26. Jim Scheppler notched 19 to help Emulsion Research beat Color Control, 52-41. Ed Tierlynck's 12 counters took runner-up honors, with Gerry Pschierer of the losers collecting 11. Standings:

Gun Club 4th In League Meet

Paced by Charley Jutsum and Ed Siebert, the KPA Gun Club won fourth place with a 234 total in the Finger Lakes Skeet League last Sunday. The Brooks Avenue club, with 245, won the shoot, held at the Kaypees' Beatty Road range.

Jutsum and Siebert hit for 48s, while Bob Schad, C. W. Smith and Howie Van Auken broke 46 apiece for the KPA.

In a challenge match at Glen Haven Gun Club Nov. 20, the KPA sharpshooters lost to the host team, 211-171. A return match is scheduled for the Beatty Road Range in December.

CW, H-E, KO May Sign Up In Industrial

A basketball version of the "new look" is in store for Kodak Park's court fans with the Kaypees set to launch the 1948-49 campaign next week. The Park team not only boasts a new coach, but will be playing in a new league with a lineup replete with new faces.

Harry Horn, who succeeds the veteran Jack Brightman at the helm, will send his first team into the cage wars at 8:45 p.m. Monday, Nov. 29, at the Ukrainian AC gym, 292 Hudson, in a Champion Industrial League tussle. Rochester Products will furnish the opposition. Admission is free.

It will be the first of three games next week. The following night, Nov. 30, Horn takes his hoopsters to Canandaigua for an exhibition against the local Legionnaires. On Friday, Dec. 3, the Kaypees meet RG&E in a non-league game at the new Park gym. It will be the first game of a twin bill which pits Al Cervi's Syracuse Nats against Waterloo, Ia., in a National Pro League contest.

Newcomers Impress Horn

While Horn had not decided on his starting lineup at this writing, three newcomers have impressed him in pre-season drills. They are Ronnie Overmyer and Chuck Nesbitt, forwards, and Alf (Fritz) Czerkas, 6-3 center. Together with two old standbys, Jack Ellison and Ralph Taccone at the guard posts, this trio may start.

Other newcomers include George Snelgrove, Reuben Michelson, and Pete Day. Holdovers, besides Horn, are Al McIntee, Stan Lojek and Jack Sloan.

Three other Kodak major clubs are contemplating entering the Rochester Industrial League. If and when the circuit finds a home, Camera Works, Hawk-Eye and Kodak Office will get loop franchises. A decision on the proposed use of public school gyms was to have been announced this week. An affirmative verdict would enable the league, idle last season, to resume action.

KO Cagers Open Fire Dec. 1; Branch Seen No. 1 Contender

The "we can beat you any night of the week" fraternity gets the acid test next Wednesday night. Which is another way of saying that the four-team KORC Intraplant Basketball League launches its second season Dec. 1.

In the 7:30 p.m. opener Tony Adams sends his Shipping quint against Dom DeFendis' Repair five, with Rochester Branch tackling the defending champion Office Penpushers at 9 p.m.

A keen rivalry has developed during the league's four-week pre-season training grind, and with three of the clubs definitely strengthened, the Penpushers are likely to find the going rugged.

Mason Confident

But Ken Mason, the Office team's playing coach, says he will again field a strong team. "Losses from last season's front-running squad are more than offset by new additions," Ken points out.

Among the Penpushers, newcomers are Vince Lisante, former Springfield College and RIT ball-hawk, and John Yaeger, former Coe College crack shot. Yaeger, a guard, stands 6 feet, 1 1/2 inches.

Back from last year's champions are Sid Nichols, Ken Kingston, Dick Mayberry and Ken Mason. The latter two are both six-footers.

Other additions to the Penpushers are John Baker, Bud Behnke, Andy MacDowell and Phil Peterson, all of whom show great promise.

John Scheible, whose Rochester Branch basketmen clash with the Penpushers in their lidlifter, is the most optimistic coach of the lot. "We made the Penpushers look pretty bad in a scrimmage last week," Scheible related, "and I honestly believe the Branch will be the next league champion."

Veteran-Studded Lineup

John's front-line men, all veterans, include Fran Biggs and Bobby Clarke, forwards; Tommy Allison and Boyd Losee, guards, and George Donaher. Another stalwart, Tommy Ioannone, who with Allison went to the Branch from Shipping, bolsters the ball club considerably.

Scheible is also banking on three rookies. They are Jim Manion, former Aquinas star who is bidding for the center berth; Ralph Hagen, a standout at John Marshall High several seasons back, and Bob Lawrence, 6-2 pivot operative, who gives the club much-needed height.

Ken Mason John Scheible

ding for the center berth; Ralph Hagen, a standout at John Marshall High several seasons back, and Bob Lawrence, 6-2 pivot operative, who gives the club much-needed height.

Madeline Hits Maples for 569

Madeline Lamb's 569 series sparked Finished Film to the season's high single and three-game totals last week in the KPA Girls 16-Team League. The record team series was 2616, including the high 888 single game.

Also contributing to the two marks established by the Film girls were Charlotte Rehberg, 532; Edna Usselman, 510, and Virginia Doane, 547. League Leaders last week:

Virginia Doane, KPA 16-Team... 201
Madeline Lamb, KPA 16-Team... 200
Charlotte Rehberg, KPA 16-Team... 189
Winifred Chivers, KO Girls..... 188
Ann Kalish, H-E Ridge..... 187
Olive Head, KPA 12-Team..... 187
Kay Flannigan, KO Girls..... 178
Ora Marshall, H-E Ridge..... 178

Connie Principe, bowling with the Production five in the H-E Girls' Ridge League, picked the 5-7-9 split last week. . . . Ed Sobier paced the H-E Ridge League keglers with a 609 series, garnered on games of 232-208-169. . . . The Tool Room five and the Grinders, both boasting records of 22 wins, are neck-and-neck for first place in the H-E Ridge loop. . . . The H-E Webber wheel is getting tighter than a drum, with only six games separating the third- and 15th-place teams.

* * *

Six KPA Girls' A League keglers won gobblers in the loop's annual turkey shoot, based on most pins over average. They were George Abrey, Norm Graham, Harold Bradbury, George Stoldt, Harold Niedermeyer and "Doc" Gress.

* * *

Strike Streaks — Franklin Forrest of the KPA Cine Processing League made the boys sit up and take notice when he tossed eight consecutive strikes at the Bowldrome. Forrest had visions of a perfect game until he came up with a split in the ninth. After a miss in the 10th, he settled for 243. . . . Herb Schumske, with six straight strikes at Franklin, sparked the KO American wheel. The Receiving kegler posted a 231 game.

Contest Winners Listed

The weekly list of \$10 award winners in the Old Topper Bowling contest includes Oneata (Billie) Leckie, Don Mossbrooks, Joe Scheid and Ed Thomas, all of Kodak Park.
