**E&M Lowers the Boom**— This 65-foot boom of the E&M Dept. at KP was sent to the scene of the \$200,000 fire at Commercial and Verona Sts. to push down weakened walls and to salvage wrecks of two trucks. Here the Kodak crane is lifting the Fire Dept.'s water tower. (Story on Page 4.)

## EK Feeds Millions of Gallons To Stretch Water for City

Kodak has been feeding some 20 million gallons of water weekly to bolster the city supply during the blistering heat wave. This auxiliary supply for the city has been poured in at a rate of 2 to 2½ million gallons daily. That rate has been maintained Monday through Friday. Close to 4 million gallons were directed into the city's Dewey Ave. Pumping Station over Saturday and Sunday, according to KP Power Dept. officials.

### Pumped from Lake

The water is taken from Lake Ontario by EK's expanded water plant at the lakeside.

"We diverted as much water as we could spare for public use," said Allen C. Bailey, KP water development engineer. Bailey

added that the city has been utilizing portions of Kodak's water resources since last April. The amounts were stepped up during the dry spell.

## Park's New Intercom System Goes on Air, Steps Up Efficiency of Plant's Mobile Units

"W-P-L-V to Yard tractor 29 — Contact crew at Bldg. 48 and unload truck at Bldg. 22 — W-P-L-V, 10:20 a.m."

The above order, sent out from the Yard Office, signaled the official opening last week of

Kodak Park's two-way radio intercommunication system. It was picked up by Robert Doyle, tractor operator, who was stationed north of Bldg. 64. The transmitters and receivers now installed in six of the Yard Dept.'s mobile units operate on a 152-162 megacycle band. The system affords coverage of an area approximating 15 miles.

Twelve licensed operators have been appointed in the Yard Office and Truck Service to handle dispatching duties. All have been briefed in the use of the new equipment. Serving as troubleshooter for the setup is Richard Scales, Electric Shop member. He holds a license of radio telephone operator, second class.

### 52 Calls in 3 Days

Although WPLV is heard on a shorter wave length than that utilized by city police, it may be monitored by the Federal Communications Commission at any time, it was explained. Fifty-two two-way calls were completed successfully during the first three days of the system's operation, a Yard Dept. spokesman said. That number will

(Continued on Page 4)

**Station WPLV Calling**— Carl Specht, licensed operator for KP's new two-way radio intercommunication system, sends out message from the Yard Office to Diesel No. 6 operating in Kodak West. The system went on air last week.

## Ad Drive Started in Daily Press

### EK Messages to Reach 22,000,000 Families

A concentrated advertising campaign is being conducted by Kodak in daily newspapers across the country.

Its purpose is double-barreled: to boost sales of Kodak cameras at the new low prices; to increase snapshooting in black and white and color.

The power-packed drive is designed to make people more conscious of the fun of picture-taking in the heart of the vacation season.

### 88 Key Cities

Ads have been placed with 134 leading papers in key sections all over the U. S. Of eye-catching size and content, they will be carried to more than 22,000,000 families by the dailies.

Kodak's Advertising Dept. selected the papers for their coverage of the 88 home cities and beyond to large trading areas around these key communities.

The campaign blankets metropolitan districts of 200,000 families and over from coast to coast. Kodak dealers in each of these areas have been alerted to the drive by broadsides giving details.

### Dealer Tie-In

Dealers within the trading areas served by the newspapers are tying in with the Company's ads so that they may attract customers and increase sales.

This comprehensive advertising program in the dailies comes in the midst of the gigantic campaign spreading Kodak's ads in the nation's leading magazines. These are in full color and in black and white. They are filled with appeal for picture takers. That drive began in April and will run through Dec. 17.

**Journalist of India** — Mahendra Meghani, left, looks over an edition of KODAKERY on visit to Kodak. He's shown here with Tom Robertson, head of EK's Public Relations Dept. Meghani, correspondent for the Janmabhoomi Group newspapers in Bombay, India, has been covering the United Nations sessions in New York for the past year. He visited KO and toured KP because "I use Kodak products and want to learn more about them."

## Don't Let It Happen to You

Planning on a motor trip over the long July 4th holiday? If you are, use care—make safety your watchword. In fact it's a good thing to remember in everything you do, whether driving, swimming or picnicking.

Each Fourth the National Safety Council predicts the probable death toll due to accidents. And they come pretty close to the actual number over the nation.

Most of these fatalities are due to carelessness—in driving, swimming or during celebrations. Let's not have YOU on the casualty list. We'd like to see you again on Tuesday.

## Here's a Dandy Color Picture

Reproductions of the picture of the cute little girl with the chickens which was in the Company's Annual Report may be obtained at your KODAKERY office.

In full color, 7½ by 9 inches, the pictures are suitable for framing. The supply is limited and distribution is on a first-come-first-served basis.

**Diesel No. 6** — Engineer Earl Finear in Diesel Engine No. 6 receives call while in operation at Kodak West. Finear listens to directions coming from the receiver at top left in engine cab. He holds the transmitter for reply.

## Transparent Tenite Lifts Mystery Of Auto Carburetor for Layman

**Inside Stuff** — At left is one of the model auto carburetors molded of Tenite plastic by Ontario Plastics, Inc. Through the clear plastic, all the carburetor's working parts can be plainly seen. Below, at the Ontario plant at 2503 Dewey Ave., Jack Grapenstetter pours Tenite pellets into the hopper of an injection molding machine. Operator Richard Fennessy prepares to remove completed parts from the mold.

Models of auto carburetors you can see through!

That's what Ontario Plastics, Inc., of Rochester, turned out recently with transparent Tenite.

Tenite is a cellulose acetate butyrate plastic, product of Tennessee Eastman.

The carburetors were produced by injection molding in the same dies used for actual metal carburetors, with only minor adaptations.

The plastic models thus are faithful replicas of the originals and can be used for instructional and engineering development. They also have proven effective for display and sales promotion.

### 7 Parts Molded

The Tenite model consists of seven separate parts, molded under high heat and pressure. The plastic has good dimensional stability and can be molded to close tolerances.

The clear plastic provides an excellent view of the carburetor's working parts, and the public as well as engineers can plainly see what "makes them tick."

Tenite, being extremely tough, lessens the possibility of breakage. Salesmen have found that the light weight of the plastic makes the models easy to carry about for demonstration purposes.

Ontario Plastics, by the way, is an extensive user of Tenite plastic. The firm custom molds literally hundreds of different items in all shapes, sizes and colors, for household and industrial use.

### 2 Kodak Men Elected To Head Numismatists

Two Kodak men have taken over offices in the Rochester Numismatic Association. John Pittman of Hawk-Eye is the newly installed president, and Lew Richards of Kodak Office is the new treasurer.

**PAYROLL SAVINGS GETS RESULTS!**

**Buy U.S. Savings Bonds REGULARLY**

## Problems Facing Photographic Business In Middle East Cited by Manager in Egypt

From packer in South Africa to managing director of Kodak's Middle East operations with headquarters in Egypt.

That, in brief, sums up the Kodak career of Jan H. Deenik, now in Rochester on his first visit.

Deenik first joined Kodak as a packer in Capetown, where he was born of Dutch parentage. Now he's stationed at Cairo, Egypt, where he's been for nine years. He's been around, though, serving the Company in the Dutch East Indies, India and Middle East.

His territory comprises what is known as "the Arab World"—Trans-Jordan, Anglo-Egyptian Sudan, Persian Gulf, Egypt, Cyprus, Israel, Syria, Lebanon, Iran, Iraq. In these countries there are four Kodak branches and six distribution outlets.

The ban on cameras throughout much of his territory, due to the war between the Jews and Arabs, reduced the amateur photographic business to practically nothing. People were afraid to be seen on the streets with a camera because practically everything was classified as a military objective and couldn't be photographed.

What picture taking was done was confined to within gardens and some on the beaches.

Amateur photography is gradually coming back in all these countries with the exception of Egypt, where the restrictions always were much more severe, he says. There are large numbers of camera enthusiasts in these countries un-

der normal conditions, he adds.

Photographic sales have been concentrated mostly in professional, commercial and industrial circles. The supplies are coming from Kodak Harrow in England and Kodak-Pathe in France. The Middle East countries lack dollars for Rochester goods and are in the sterling bloc of nations.

### Little Color Film in Egypt

Very little Kodachrome film is being sold in Egypt because of severe restrictions brought on by the state of tension between that country and Israel. Egypt looks with suspicion on all exposed but unprocessed film. The red tape involved in getting color film processed discourages its use. It takes seven months to get such film processing done, he says. First the film must be submitted to the Ministry of the Interior at Cairo. From there it is sent to the equivalent Egyptian bureau in London or Washington. Then it goes to the processing station, which returns it to the bureau, which sends it back to Egypt where it is closely examined. By this time seven months have elapsed.

Black-and-white movie film is processed in Cairo. Kodachrome facilities could be installed, too,

### Photo Patter

## Warm Weekends Abound With Snapshot Material

Whether you go away or stay close to home these summer weekends, you'll find many good picture possibilities.

Snapshots of a trip always are fun. So are snaps of the family and

friends in your own back yard. You can make a series of fine shots of the family almost any weekend when they're gathered in the garden or the yard for a picnic.

You'll find it's a good idea to follow three simple rules. They are:

1. Hold steady! Moving the camera when you shoot means a fuzzy negative. You can avoid camera movement by holding the camera against your cheek or chest. Then trip the shutter with a firm motion.

2. Check your focus and exposure. If you have a fixed-focus camera, both are fixed for you. But be careful not to get too close to your subject—no closer than 5 or 6 feet. If it's a focusing camera, you should check for proper focus and exposure.

3. Look carefully in the camera's viewfinder before you shoot. Many pictures are marred by a jumbled background. You can avoid this by studying the scene before you shoot.

**Picnic Snap**—You can get some dandy expressions on young and old folks when they're engaged in getting the food ready at a picnic. Keep your camera handy for such unposed shots.

## Chess Draws Lady Experts

One of the world's greatest women chess players, Gisela K. Gresser, of New York, will compete in the New York State Master Chess Tournament. It opens Aug. 27 at Kodak Park.

Mrs. Gresser's entry, cablegrammed from Paris, was received by Herman Helms, publicity chairman of the New York State Chess Association.

Mrs. Gresser won the U. S. women's championship in 1945, 1946 and 1947. At present she shares the honor with Mary Karf of New York. An invitation to come to Rochester is being extended to the latter in the hope that the local tournament may take on the flavor of a national title meeting.

While here Mrs. Gresser will resume her personal matches with Dr. Max Herzberger, local master and president of the State Association, whom she has yet to defeat.

## Ad Association Elects Christy

H. James Christy

H. James Christy of the EK Advertising Dept. is a new vice-president of the National Industrial Advertisers' Association. He was elected last week at the 27th annual conference in Buffalo.

The KO man will direct the Policies and Planning Committee of the NIAA. This committee will shape the destinies of the parent group in a five-year program.

Christy has been active in the organization for a number of years. He is a past president of the Rochester Chapter of the NIAA.

Jim became an EK trainee in 1934. He spent the next three years in EK Stores besides doing a stint at the exposition in San Diego in 1935. He returned to Rochester in 1937.

but dollars are unattainable for the equipment.

Deenik outdoes the Florida and California Chambers of Commerce in singing the praises of the Egyptian winters.

"We have the finest climate in the world in the winter from November to April," he claims.

He can't say so much for the summers, when temperatures average 105 from May through October.

**Brushing Up**—Al Clair of the Graphic Arts Studio explains to Jan H. Deenik, right, of Egypt the advantages of using Kodalith Fine Line Developer. Deenik's here on a visit.

**Boost Bond Drive** — Vocal and musical entertainment supplemented the appearance at Kodak Park and DPI of the '49ers Covered Wagon. At mike in above photo is Jack Schaeffer, general foreman of Kodak's Distribution Center. At left on truck platform is Jay Parker, KP Industrial Relations, who spoke on behalf of Opportunity Savings Bonds Drive.

## Two Complete 40 Years, Four Round Out 25

Two KP men are slated to complete 40 years' service with the Company during the month of July. They are Joseph E. Crane, E&M Planning, and Ray J. Scott, Power General.

Crane was a member of the Machine Shop for approximately 17 years before transferring to the Planning section in 1926.

Scott started in Electric Shop in 1909, where he has successfully held down positions of trick foreman, lubricating engineer and foreman. In 1929 he was appointed electrical foreman of the Power Dept., a post which he now holds.

Four men, all of the Research Laboratories, Bldg. 59, will mark 25-year service anniversaries during the same period. They are Dr. Cyril J. Staud, Research Laboratories director; Otto Sandvik, an assistant superintendent of the Physics Dept.; Raymond H. Lambert, and Kenneth E. Skinner.

J. E. Crane

## Engineers Elect 2 Kodak Park Men

Harold A. Mosher has been elected vice-president and Lloyd D. Jackson secretary of the Monroe County Chapter of Professional Engineers.

Past president Louis J. Sforzini, who was made chairman of the State Society's membership committee at an executive board meeting in Binghamton recently, becomes a member of the board of directors. Edwin K. Haas continues in a similar capacity.

All are in Kodak Park's E&M Dept.

## Vacation Notes

While vacationing in New York City, Charley Goldey, Industrial Engineering, and Mrs. Goldey visited a session of the United Nations at Lake Success.

John Ricey, Film Planning & Record, back from a fishing trip in Canada, admits that the big ones got away.

Della Russell, Bldg. 65, and her husband enjoyed a vacation in the Adirondacks. Two other Bldg. 65 members, Betty Ives and June Gmelin, traveled by boat to Kingston, Ont., and the Thousand Islands.

## Bldg. 50 Man Buys Little Red Schoolhouse

Harold Tebo, Bldg. 50, is going back to school.

That's not news, except for the fact that reading, writing and arithmetic have nothing to do with his future plans. He's going back to school for keeps, this time to call it home.

Tebo, who now resides in Spencerport, was high bidder at a recent auction whereby he acquired a vacated schoolhouse in Long Pond Rd. previously used by Greece School District 1. Still intact at the time of the sale were desks, blackboards, pictures and other furnishings, most of which were purchased by former pupils as mementos of their school days.

The new owner plans to remodel the one-story frame building into a modern dwelling of his own design. The project calls for alterations to the roof and windows and a partitioning of rooms. Court action to settle title to the property was recently completed by Tebo, who added that there had been no deed since the school district acquired the site 95 years ago.

## June Festival Attracts 400

Approximately 400 Engineering Dept. members and guests attended a gala June Festival held in the Bldg. 28 gym recently.

Tap dancing, singing and magic acts made up the entertainment, following which strawberry shortcake and coffee were served in the cafeteria. Dancing to the music of Jack Nunn and his orchestra rounded out the festivities on a happy key.

Prizes were awarded, with Hervey Bennett and the wife of John T. Hoffman sharing the awards.

An Engineering Dept. members' committee, headed by George Lynch, completed arrangements for the affair.

## E&M Group Has Annual Picnic

Plenty of fun was reported by members of E&M Stores Warehouse, Bldgs. 203 and 204, who held their third annual picnic Saturday, June 18, at Hamlin Beach Park.

On hand as guests were assistant superintendent Louis McManus, Jack Murray and Ed Thaney, all of Bldg. 49. Softball, horseshoes and cards were enjoyed, and all present availed themselves of plenty to eat and drink.

Arrangements were capably handled by Frank Crego, chairman of the entertainment committee, assisted by Whitey Groth, Lloyd Fuller, Mike Lestorti and Earl Bennett.

## Go in' Places and Do in' Things . . .

James Appleton, Bldg. 12, and his wife, the former Dorothy Newman of Paper Finishing, Bldg. 42, enjoyed a Florida honeymoon. They report that the ocean swimming at Daytona Beach was marvelous. . . . A grand time was voted by all who attended the Roll Film Packaging Dept.'s picnic at Ellison Park June 11. . . . Gerard Stapley, Research Laboratories, recently was awarded third place in the color print section of the Eleventh International Salon of Nature Photography conducted by "Hobbies," the magazine of the Buffalo Museum of Science. Gerard is a member of the Kodak Camera Club.

Jeanne Marie Schiefen, Purchasing, B-26, is displaying a diamond after announcing her engagement to Stanford Murray, an alumnus of Notre Dame. . . . Elsie Garvin, Research Laboratories librarian, attended the national convention of librarians recently held in Los Angeles, combining business with a vacation. . . . Gertrude Melville Hart was guest of honor at a recent luncheon and shower given by the girls of the Statistical and Materials Planning Depts. in the service dining room. . . . Members of the Portrait Sheet Film Dept. entertained Edmund Hunt and Mrs. Hunt at Turners' Hall, honoring his completion of 25 years' service with the Company. . . . Orville Bauer, Cine Processing, recently was elected secretary of the Rochester Amateur Radio Association. . . . Walter Puterbaugh jr. is back in the Cellulose Acetate Development Dept. . . . Pat Hallett has returned to the Film Planning and Record Dept.

Clayt displays fishing tackle he received from National Industrial Recreation Association.

program, with Esther Cross completing the arrangements. John Emerson took pictures of the affair. . . . Art Davidson, Film Emulsion Coating Office, Bldg. 29, is recovering from an ankle injury suffered while playing softball.

Redfield Zittel, Paper Sens., Bldg. 57, donned his Navy uniform for a week. During that period he served at the Bureau of Naval Ordnance in Washington. . . . The Plate Dept. has welcomed back Kathryn Gutzmer after an illness of several months. . . . Members and guests of the Statistical and Materials Planning Depts. held their annual picnic June 2 at Powder Mill Park. After the traditional ball game, a picnic supper was served. Evening entertainment included a showing by George Oest of Kodachrome slides taken during his recent motor trip through the Southwest. On the committee in charge of arrangements were John Harrington, Gene Samuel, Al Adams, Carl Lieber, Paul Kramer, Carl Liner and Bill Hosley. . . . Ed Solarek and Gordon Smith, together with their wives, traveled to Montreal over a recent weekend to watch the Red Wings in a diamond doubleheader. . . . Hilda Connor, Roll Film Packaging, has left Rochester to make her home in Pennsylvania.

A bridal shower was given in honor of Elaine Farley by the girls of Sundries Press Div., Bldg. 48. Elaine cut the cake and passed out the ice cream. . . . Charles Steele, Purchasing, has returned to his desk after a 12-week absence. . . . Kay Murphy, Paper Sensitizing, Bldg. 57, is showing her friends some fine Kodachrome slides taken on a recent 7000-mile motor trip through the Southwest into Mexico. . . . Edward Pysztak, Research Laboratories, who left last April to visit relatives and friends in his native Poland, re-

turned to America on the same ship on which Gerhart Eisler had been a stowaway. Edward reports that the situation in Poland is still very bad, food and clothing being at a premium. . . . Steve Pool, Chemical Plant Laboratory, is back from a motor trip to Phoenix, Ariz., where he saw his parents for the first time in 19 years. Steve and his family drove some 6400 miles, visiting Carlsbad Caverns, Grand Canyon, Petrified Forest and other scenic spots en route. High spot of the junket was a meeting with a rattlesnake which they had to kill with a spade. Coming out of the Navajo Indian country over a "short-cut" route, the Pools' new car almost bogged down in 18 inches of water near Mexican Hat, Utah.

Neva Newman, formerly of the Camera Club staff in Bldg. 4, was president of the graduating class at Keuka College which received diplomas June 13. Neva's picture appeared in both Rochester newspapers. . . . Clayt Benson, director of KP employee activities, is proudly displaying a new glass rod and other fishing equipment, a gift from the National Industrial Recreation Association officers at the group's annual convention held recently in Detroit. Clayt served as president for the past year.

Ben Luce and Barney Moore, Industrial Engineering, were among those who received their diplomas and awards on completion of a salesmanship training course at RBL. . . . A dinner was held at the Mayfair in honor of seven Time Office girls. They are Dorothy Dusetz and Ruth Foley, who are leaving this month; Agnes Caselli, a recent transfer to domestic duties; Elsie Wells, Eloise Richardson and Janet Porrey, all of whom will be married soon, and Marie Tonti. Marie was to have left today by plane for Italy, where she will visit relatives and friends. She hopes to visit Florence, Venice, Rome, the Alps and other points of interest before sailing for home Aug. 24. Arrangements for the dinner were completed by Phyllis DiBartolo, assisted by Ruth Dickens, Mary Lou Egan, Betty Lynn and Gerry Canne.

Twelve girls of the Industrial Engineering Dept. recently drove to Doris Lochte's home in Bristol

for a surprise picnic supper and shower. Doris formerly was in the Wage Standards Section. . . . Members of the X-ray Sheet Film Dept. recently extended congratulations to Helen Fink on her 25th wedding anniversary. . . . Oscar Zabel, a KP member since 1919, is the safety leader in the Drafting Dept. Oscar serves as engineering consultant. . . . Dorothy Izard, Projection Lab, Bldg. 46, was feted by her associates at several parties prior to her marriage to Paul Sigl. Bldg. 46 girls arranged a party for Dottie in the service dining room, and a spaghetti luncheon at which Art Loomis presented gifts.

Oscar Zabel

Al Lauterbach, Bldg. 120 Lab, has added a new tractor to his gardening equipment, while Jim Richards is the proud owner of a new television receiver. . . . Esther Russell, X-ray Sheet Film, was tendered a surprise shower by her department friends. Esther has left the Park to stay at home. . . . Stan Kowalski, KP assistant comptroller; Charlie Wahl, Industrial Engineering, and Irv Howland, Cine Processing, attended the National Office Management Conference and Office Equipment Exposition in Philadelphia recently. . . . Julia Hoff, Roll Film Packaging, has returned from a New York City vacation. . . . Jean Quick, Research Laboratories, is back at her desk after visiting friends and relatives in England during the past eight weeks. Jean also paid a visit to Kodak's Harrow plant.

**Don't Risk It** — The Safety Dept. warns KP folks using plant thoroughfares not to walk behind trucks backing up to platforms. To avert accidents, walk around in front of vehicles, it is urged. Above, Joan Solarek of the Yard Dept. Office shows how not to pass trucks. The driver is Purcell Steele of KP Truck Service.

# KP Boom Levels Walls For City to End Hazard

(Picture on Page 1)

Kodak Park's E&M Dept., whose duties run the gamut of versatility, played an important role in community cooperation last week. It was after the \$200,000 fire had wrecked a four-story building at Commercial and Verona Sts.

A 20-ton mobile crane was dispatched to the scene of the blaze to demolish the partial walls of the building. The city's request for aid was carried to Kodak by Councilman William A. Doane, an E&M member himself.

## Weakened by Fire, Water

The walls, weakened by the inferno and streams of water played on them, were deemed a hazard by the Fire Dept. They were ordered torn down.

The crane is one of five operated by the Park's Field Dept. 10. It arrived on the scene around 11:30 a.m. By 3 p.m. the crew reported "mission accomplished." In addition to its demolition chores, the 65-foot boom of "No. 6" hovered over the scene long enough to salvage the wreckage of the Fire Dept.'s water tower and the Protectives' truck. Both were buried by a wall that fell during the fire.

George LaBorie was in charge of the operations, with Bill Buckert directing the details.

## Former Marine Now Travels as EK Salesman

It came about quite naturally that Richard E. Down should represent Kodak in the sales field. He was born within the shadow of its buildings and became intrigued with its vast operation at an early age.

Dick counts the years since his boyhood days by fours — graduation after four years at the University of Buffalo; service for four years with the Marines on the island of Guam (receiving the rank of first lieutenant), and associated with Kodak for four years.

He received his early training with Buffalo camera shops. Later he was assigned by Kodak to a southern territory in North Carolina and in an area around Petersburg, Va. A fluent speaker, alert and friendly, Dick made friends easily with the Southerners, and speaks well of their hospitality.

It was quite a change for Dick to be transferred to a northern territory which includes Minneapolis and the Land of Ten Thousand Lakes. Now he enjoys driving in the Arrowhead country around Duluth, and at times he dips into North Dakota. Dick may miss the sunny South when the northern winter sets in, but he does like the cold crisp air.

Eastman representatives are trained to meet any emergency, it seems. And so this story would not be complete without relating the experience Dick went through on his wedding day, while he was in service.

## Bride Was Waiting

There was just one thought in his mind that morning — he must reach Kenmore, a suburb of Buffalo, in time for the wedding at 2 o'clock that afternoon. His lovely bride, Margaret Murray, would be waiting with the assembled guests.

"I boarded a plane early that morning," said Dick, "and soon we were zooming through space. Just 200 miles from Kenmore, something went wrong and the plane crash-landed in a cornfield." Both pilots were rushed to the hospital, and Dick, after a terrific contact with the seat ahead which loosened several teeth, picked himself up and in a dazed condition sought emergency means of continuing his journey.

Three hours later another plane took off for Buffalo. And at 8 o'clock that night, trying bravely to smile through loosened teeth, Dick was married.

Since he was granted only a few hours for the occasion, he was soon speeding back to his base on a priority flight. Fifteen hours later his pretty wife joined him.

Now the Downs live happily in Minneapolis with their two children, Daryl, 3½, and Larry, 2.

## Park's on the Air

(Continued from Page 1)

be stepped up as vehicle personnel familiarize themselves with its use. "We're more than pleased with the results attained by the introduction of radio to our working schedule," said E. L. Cook, Yard Dept. head. "As we improve in its day-to-day application, we hope to be able to report even greater savings in time and effort."

**20-Year Service Folk** — The Kansas City Store marked its 20th anniversary recently, and boasts 12 original members who are still with the store. Above are those who have completed 20 years with the Company. Seated, from left, are Minnie Adams, Vera Simms, Lyle Bruce Ebling, Emily Erickson, Elizabeth Carey and Lena Pickard. Standing are Frances Smock, Frederick Merwin, John Bode, William Hooper, John Fenelon, Joseph Swain and Sam Anello.

## Dr. Goff Rigs Up Gadgets To 'Shoot' Birds in Full Color

When it comes to taking color pictures, Dr. Milton Goff of KP's Dept. of Mfg. Experiments will tell you that birds make fascinating but fleeting subjects.

Some years ago he borrowed his sister's box camera and attached a string with which to trip the shutter to snap a bird. The results were far from satisfactory, but it was the birth of his hobby.

## 100 Kodachromes

He has since taken about 100 bird pictures in Kodachrome. Some have been used in magazines. Included in his collection are close-ups of bluebirds, great horned owls, yellow warblers, robins, crested flycatchers, killdeer and humming birds.

While patience is essential in taking good bird pictures, Dr. Goff believes that some mechanical ingenuity helps. For his woodland junkets he has rigged up a portable, high-speed, electric flash attachment. It's powered by a motorcycle battery enclosed in a waterproof knapsack. He carries this on his back. It weighs 55 pounds but could be lightened, Goff believes.

## Aims Higher

Having studied bird habits closely during the past few years, he is trying now for pictures of the feathered folk in flight. For this purpose he has built a frame. This holds his camera (a 4x5 view type), lighting equipment and background in a fixed position. A simple press of a button sets off an electric current which does the rest.

His first objective is a king-

**Bird Shots** — Dr. Milton Goff of KP looks over some of his collection of birds captured in full color on Kodachrome film.

fisher. One nesting in a sand bank is providing the main scene of the operation. Although local parks furnish plenty of material for his explorations, he prefers wooded areas on private property.

Milton contributed several articles and pictures to the magazine, "Bird Lore," now out of print. He also has had several of his prints accepted for exhibition by the Rochester International Salon. On occasion he gives illustrated lectures on the technique of bird photography.

## Trio at KO Takes Course

Three Kodak Office men were among 11 EK dealer representatives from throughout the country who attended recent classes in the 22nd Kodak Retail Photographic Salesmen's Training Conference. They are Nicholas D'Ecsery, Export Sales Dept., and Charles Kinsley and Allan Vokes, Sales Service Div.

Howard Kalbfus was at the helm for the five-day training course. Those who attended are Harry Adler, United Cigar-Whelan Stores Corp., New York City; Grace K. Kasul, People's Drug Stores, Inc., Washington, D.C., and Richard Foate and George Kirsch, People's Drug Stores, Youngstown, Ohio.

Others in the course were Harry Vaughan, People's Drug Stores, Roanoke, Va.; Frank Keating, Walgreen Drug Stores, Chicago; Harry Mount, Cramer Drug Co., Rochester, and Loron Williams, Rennebohm Drug Stores, Madison, Wis.

## EK Man Elected To UN's Board

William A. Withus of Kodak Office has been elected to the board of directors of the American Association for the United Nations.

His appointment comes in recognition of his work in the local and national UN groups. He is vice-chairman of the board of directors of the Rochester Association for the United Nations. Last year he was an observer at the World Federation of United Nations meeting in Geneva, Switzerland. He also attended the UN General Assembly sessions in Paris.

He will take an active part in the Association's affairs, especially its organization and publicity work.

In taking over the board appointment, Withus will join many outstanding Americans, already members.

## Coast to Coast

Recent visitors to the Philadelphia Stores were Technical Representatives Fred Church and Ralph Bray who conducted lectures and demonstrations at Witherspoon Hall on the Kodak Pola-Lights and Kodatron Studio Speedlamps. . . . Manager E. J. Lorch, New Orleans Store, was elected first vice-president of the Executive Club of New Orleans.

It's a long climb up the ladder to the 40-year mark. But Jerry Sullivan of the New York Branch claims there's nothing to it. Sullivan was born near the spot where the branch stands. He remembers an old sawmill that was on the site. In a ceremony at the office, Adolph Stuber, EK vice-president in charge of sales and advertising, presented Jerry his 40-year pin.

From National Safety News  
Published by  
The National Safety Council

"Would you mind repeating the part that comes between 'Dear Sir' and 'Yours truly'?"

From poplar tree to Kodak's Brownie Target Cameras . . . that's the shutter board story.

Setting for this story is the Wood Machine Dept. at Camera Works. It's one of the plant's oldest departments, and, years ago before the

evolution to metal and plastic cases, produced the wooden camera boxes.

It isn't a short story, either. One shutter board goes through 33 different operations, from the time the wood is received in long lengths,

## Shutter Board Story

until it is ready for assembly. They're cut, grooved, notched, punched, bored and stained, to mention just a few.

The men turning out these shutter boards are skilled in almost every phase of wood-working. Many are veterans

at the business.

Here are a few of the "chapters" in the story of the shutter boards for the Six-16 and Six-20 Brownie Cameras . . . a story that well might be titled—"From Tree to Camera."

**Long to Short**—Shutter boards start out as well-seasoned lumber, 12 to 15 feet long. Here the first cut is made to working lengths for the Wood Machine Dept. At the saw is Frank Lawrenz. John Cummings puts the wood in stacks.

**Sticky Step**—Pieces that are not the required width are glued together and then put through the sawing operation again. Edward Keenan is at the glue press, hammering glued boards flat after clamping them.

**Versatile Machine**—Knives and saw blades hit the boards from all sides in this machine, cutting them to correct size, making side grooves and diaphragm opening. Albert Tyrell piles boards. George Topel "feeds" machine.

**Cut to Size**—George Kraus cuts the 22 to 23-inch pieces down to size of 4 3/4 inches, actual depth of the shutter board. He cuts off 27 blocks of wood at once. George has a 42-year service record at CW.

**In There Punching**—With this operation you see many more impressions on the shutter board. The punch press embosses and pierces it in one contact. Nail holes, a groove, a notch and another hole are made. John Lessord, 33-year man, is at work.

**Boring**—The boring machine drills right through the center of the shutter board and is one of the three operations in making the lens hole. Albert Geren is running 'em off, while Foreman Charles Aulbach checks the bore with a depth gauge.

**Groove to You**—A rabbet is a kind of groove. Rabbeting is the operation being performed by Herbert Scheuch, who "polishes off" 30 rabbets in one fell swoop.

**Black as Pitch**—The last step is staining. Then shutter boards dry for half an hour. Joseph Geraci is seen in action.

**On to Assembly**—The shutter board, stained and inspected, is all set for assembly in Dept. 49. Inserting the lens, as Theresa Cardoni does, is the first step.

**Camera Complete**—The shutter board is no longer visible. Sue Marullo is setting aside Brownie Targets for shipping.

**Smart for Summer**—This dotted swiss (blue) is among the old-fashioned cotton sheers that have been mighty popular this season. The dress is a McCurdy's frock modeled by Jeanne Seyba DaBoll, KO. It's prettily trimmed with white organdy and tiny fabric flowers. Outstanding feature is its low standup collar restrained by a crosswise strip.

## CWer Likes to Rejuvenate, Stencil Old Rocking Chairs

Harriett McLaughlin Ward, CW Dept. 95, likes to rejuvenate old rockers.

It's a hobby that goes back to a day in the country. On that day she happened upon a dilapidated, ready-to-be discarded chair. Having a good imagination and the desire to try "something new," the CWer grasped at the opportunity to buy and do it over.

### What She Did

She glued and sanded. That took a long time. Then she applied paint and stencil . . . also "easier said than done," says she. Doing the stencil is the most exacting

work. In brief, it must be rubbed with velvet or plush material, she told. A bronze powder is used in so doing, some parts of the pattern requiring more pressure than others. She learned the technique from Mrs. Dorr Redman, well-known Home Bureau teacher.

This first endeavor a success, Harriett has lost little time in starting another, a Hitchcock rocker. It will be a pale green color. She did take a short leave from her hobby recently. But getting married and honeymooning in Florida was the good reason.

## H-E Girl, Brother Take Long-Planned Trip to Europe

A 20-year dream to revisit Europe came true for Hawk-Eye's Mae Bruno last week when she and her brother, Anthony, sailed from New York harbor on the Queen Mary bound for England.

The Hawk-Eye girl visited the Continent when she was a child and has been looking forward to a return trip ever since. "We planned the itinerary every year," said Mae, "but something always seemed to hold us back. This time we just went ahead with everything."

Several weeks ago, passports and visas were obtained, and plans for the trip soon were well under way. Routes were mapped for them to visit England, France, Switzerland and Italy. In Italy, they'll stay with relatives. Anthony, who teaches at the Eastman School of Music, has friends in France whom they hope to visit too.

Mae and her brother plan to make one central city their pivotal point and to travel from that location in each direction before moving on.

"You can be sure we're taking plenty of film along," Mae stated. Their picture-taking provisions include over 1000 feet of color movie film and much film for snapshots. "Now that the trip is definite and we're really going, we want to be sure of a permanent record."

### Pride and Joy —

While finishing up one rocker, a Lady Boston, Harriett Ward looks forward to painting and stenciling another, the Hitchcock in foreground.

## KP Woman Chemist Helps Keep Kodak's Photographic Film on Top

Mary Louise Curtiss could not decide whether to be a doctor or chemist. She ended up by marrying a doctor and becoming a chemist.

Judy, as her friends call her, is a member of KP's Roll Coating Development Div., Bldg. 13; in fact, she's the only woman chemist in the division.

In a nutshell, Judy's job is experimenting with photographic film prior to the application of the emulsion. That is, she works with the many materials used as anti-halation and antistatic backings on film support.

A particular problem might be solved by first testing some of these materials in the laboratory. This could be done by dissolving the material in a solvent to form a syrup-like solution. It is spread out on a glass plate and allowed to dry. The dried coating should be smooth and clear.

From this step, she does further work on experimental machines, and if successful, the film is sent to Bldg. 29 for emulsion coating.

Afterwards, Judy follows the testing results on the finished film. These tests are designed to show the effect of the experimental backing on the photographic film under actual use.

The KP girl indeed has an interesting job, but leading an interesting life has been a habit with her. The daughter of an Army officer, she has lived in no less than eight states. When it came time for her to enter college, her home was in the Canal Zone. Thus, she attended the Canal Zone Junior College.

Her two years there were followed by two years at Denison University in Granville, Ohio. This is where she met her husband, Fred, now a doctor in training at the Rochester General Hospital. They were married in June 1945, two years after she joined Kodak.

As for hobbies, Judy claims that, like many Rochesterians, photography is her favorite. She also enjoys fishing and pistol shooting. All of this still leaves some time for knitting and sewing.

Chemist Mary Louise Curtiss . . . experimenting.

## Star-Spangled Pie for Your 4th of July

Want something festive for Fourth of July dinner? Try a chiffon pie studded with stars of canned cranberry jelly. This Fourth of July treat is one of those feathery-light, delicately-flavored desserts . . . so suited to summer

eating. Unflavored gelatin is the key ingredient.

### 4th of JULY CHIFFON PIE

1 envelope unflavored gelatin, ¼ c. cold water, 4 eggs separated, ½ c. sugar, ½ c. milk, ¼ t. salt, 1 t. vanilla, ½ c. shredded coconut, 1 9-inch baked pastry shell or cookie crust.

Soften gelatin in cold water. Beat egg yolks with ¼ c. sugar; add milk and salt. Cook, stirring constantly, over hot water until mixture coats a metal spoon. Remove from heat; add softened gelatin, vanilla and ¼ c. coconut. Cool. Beat egg whites until stiff; gradually beat in remaining ¼ c. sugar. Fold into gelatin mixture. Turn into baked pastry shell or cookie crust and sprinkle with remaining ¼ c. coconut. Chill until firm. Top pie with stars cut from slices of canned cranberry jelly or other fruit jelly. Crust may also be lined with crushed jelly if desired.

## The Market Place

KODAKERY ads are accepted on a first-come, first-served basis. Department correspondents in each Kodak Division are supplied with ad blanks which, when your ad is typed or printed on them in 25 words or less, are put in the Company mail addressed to "KODAKERY," or handed in to your plant editor. All ads should be received by KODAKERY before 10 a.m., Tuesday, of the week preceding issue. HOME PHONE NUMBERS OR ADDRESSES MUST BE USED IN ADS. KODAKERY reserves the right to refuse ads and limit the number of words used. Suggested types are: FOR SALE, FOR RENT, WANTED, WANTED TO RENT, LOST AND FOUND, SWAPS. KODAKERY READERS ARE ASKED TO PLACE ADS ONLY FOR THEMSELVES AND HOUSEHOLD NOT FOR FRIENDS OR RELATIVES. TO DO THIS IS TO DENY SPACE TO THE PEOPLE OF KODAK FOR WHOM THIS SPACE IS RESERVED.

LOST — Gold Ronson lighter, initial "S", June 15, reward. KP Ext. 2311, Sta. 42.

## Sports Roundup: CW Plans Golf Loop... Pero Wins Best-Ball

GOLFERS interested in joining a CWRC Golf League are invited to sign up at the Recreation Club Offices. The loop opener is set for July 6. Play will continue through July and August on Wednesday evenings, with all matches at Braemar Country Club. A nightly \$1 fee will apply toward greens fees and prizes. Two-man teams will compete, playing 14-hole matches. The Chicago handicap system will be used.

Pete Pero, H-E linkster, teamed with Chuck Frachel to win the first annual Ridgemont two-man best ball handicap invitation tournament. The duo carded a 36-hole 63-65—128, 16 under par.

Teams in the H-E Intraplant Softball League are jockeying for playoff positions. At the present writing, Recordak is showing the way with a record of 5 wins.

Jim Gallagher, president of the Kaypees' 36-40 Club, says the group will have a picnic Sunday,

July 24, at Hickory Grove in Webster.

Mel Roth, above, recently turned in hole-in-one on Lake Shore's sixth hole in HEAA Twilight competition.

**BITS ABOUT 'EM** — Manager John Rosequist of the Wood Cellulose Terminals in the KPAA Kodak West Noon-Hour League has devised a novel system of keeping his team in line. Offenders are fined cokes for rules infractions.

The KPAA Ridge Noon-Hour League recently held its first annual tryout for new talent with a game between the "Fumblers" and the "Mumblers" which ended in a 6-6 tie. Taking part were Clarence Pearce, Jack Johnson, Bill Fess, Art Vicinus, Clarence Auten, George Lauth, Art Muhr, Norm Davis, Charlie Schmaltz, Bob Glass, Joe Southcott, John Quistorf, George Van Grol, Russ Street, Pete Ras, Bill Price, Fred Hartleben and Ray Pepper.

The Duffers golf team, paced by Walt Drojarski and Ed Casey, are showing their heels to the rest of the league in the H-E Twilight Golf League. Chasing them in second place are the Estimators, followed by Mike Gunn's Mongrels. Joe Garafol came up with the hottest round to date when he carded a one-over-par 74 last week. Joe was consistency personified as he toured the Lake Shore layout in 17 pars and one bogey.

Hawk-Eye and Kodak Park are tied for first place in the Indus-

trial Horseshoe League. Stan Marshall, KP, with 9 straight wins, leads the individual standings, followed closely by teammate Charles Kester, 8-0. Charlie Graves, H-E, and Al Smith, KP, are undefeated.

**Barney Pilot**, chairman of the KORC golfing committee, says the third KO men's tournament of the season will be run off July 23 at LeRoy Country Club.

A former ring champ, Vincent Matteoli, of NOD, recalls that a boyhood street fight paved the way for his professional career. Fighting under the cognomen of "Tony Vincent," Matteoli won the local lightweight championship in 1917. He held it four years, during which span he also won the Western and Central New York championships. World War I found Tony in the 36th Infantry. Fighting under the AEF banner the CW man won the championship of the 1st, 2nd, 3rd and 5th Divisions. His career was culminated July 4,

1919, when he won the grand championship of Europe, defeating one "Battling" Strayer.

When a neighborhood kid tried to take Tony's ball glove away

Vincent Matteoli... still keeps in trim.

from him he promptly gave his bigger assailant a good going over. A spectator to the street melee commented on Matteoli's possibilities. Vincent did the rest.

## Camera Works Grabs Dusty Tennis League Lead

### Kaypees Gain 6th Shutout, KO Wins, Dusty Streak Ends

With the venerable "Shifty" Gears making his 1949 Major Industrial debut a successful one, Leo Gallagher's Kaypees came up with their sixth successive shutout last week. Gleasons were Gears' victims in a 3-0 one-hit bout. "Shifty" pitched no-hit ball for four innings.

Adding lustre to his performance were nine strikeouts and perfect control. Nary a Gleason batsman received free transportation. Collaborating with Gears was his ol' batterymate, Al Tinsmon, who

came out of "retirement" for the fray.

Also notching victories last week were the KP Dusties and Kodak Office. Mike Farrell's gang beat American Laundry, 2-1, in the Major wheel, but later saw their 11-game over-all win streak snapped by Post Office, 6-5, in the Champion Industrial League.

Bob Forbush was returned the winner over the laundrymen when Sid Dilworth scored in the seventh on Art Steele's smash to left. Bob Werth batted in the first run. Two Post Office runs in the eighth beat Joe Snook in the Champion circuit. Bill Finucane had three for five.

Ralph Hagen gained his first mound win of the season as KO trounced Rochester Products, 5-2. Ralph set his erstwhile mates down with six hits.

Two runs in the fifth clinched the KO win, with Manager Ken Mason's double down the left-field line scoring Bob Wallace and John Gorecke. Wallace, who had hit safely, also banged out a timely triple in the third, on which occasion KO took a 2-1 lead. The fifth and final tally came in the seventh.

### Bldgs. 65, 101 Grab 2nd Wins

Bldgs. 65 and 101 are deadlocked for the lead in the KPAA Girls' Twilight Softball League. Both turned in their second wins of the season last week on the School No. 41 diamond.

Bldg. 101 defeated Testing, 8-6. Ella Ellers homered in the first inning for the losers. Lucy Scheiber starred in Bldg. 65's 17-6 win over Bldg. 12, banging out a round-tripper in the fifth inning.

	W	L	T	Pts
Yankees	7	4	1	15
Dodgers	6	3	3	15
Birds	4	7	1	9
Giants	4	7	1	9

**Kaypee Aces** — Brunt of the Kaypees' pitching burden this season is being shared by Bud Oister, left, and Herb Jennings. Bud has won three shutouts, giving up only five hits, while Jennings boasts two no-run victories. Herb has released four hits.

### Red-Hot Race Looms at West

Top spot in the KPAA Kodak West Noon-Hour Softball League is shared currently by the Renegades and F.D. 5.

The Renegades, recovering from a 14-0 shellacking at the hands of Wood Cellulose, stopped F.D. 5, 2-1, to retain their high standing. Jay Warner's circuit clout with two on base featured the Wood Cellulose triumph.

George Kelch's hustling F.D. 5 outfit posted two wins, defeating Synthetic Chemistry, 5-2, and topping Wood Cellulose, 3-1. Kelch noled out a homer with one mate aboard to sink the Termites.

**Jerry Braz was on the mound** as Synthetic Chemistry blanked Wood Cellulose, 7-0. Al Schwaderer wielded a heavy bat for the winners, banging out a double and a triple. Standings:

	W	L	T	Pts
Renegades	7	6	1	15
F.D. 5	7	6	1	15
Syn. Chem.	6	7	1	13
Wood Cellulose	6	7	1	13

### Branch Takes KO Top Spot

Rochester Branch took undisputed possession of first place in the KO Intraplant League last week, outlasting the Penpushers, in a 10-9 slugfest.

Fran Biggs homered for the winners, and Sid Nichols and Sam

### Dodge Tops Trick Tourney

Herb Dodge, Harry Simms and Wayne Ernest shared top honors in the recent KPAA Trickworkers' Golf Tournament at Lake Shore.

Dodge captured low net in Class A with a 76-14—62 card. Simms and Ernest topped Classes B and C, respectively, with 60 nets. Simms used a 24 handicap, and Ernest received a 35 spot.

Other winners, by classes, and their net scores:

**Class A**—Irving McCone 63, Ed Behrmdt 65, Frank Arioli 67, Kenneth Weiser 70, Mike Culhane 70, J. J. O'Connell 70.

**Class B**—James Engle 65, Ralph Bennett 68, Fred Southworth 69, Marvin Bott 69, Fred Lutz 70.

**Class C**—E. R. Fenner 60, Al Nicholas 68, Bob Johnson 72, J. T. Donnelly 73.

### E & M Golf Standings

Kunkel-Kaiser	22½
Horn-Jenkinson	22
Patterson-Gallagher	22
Hayes-Mross	21½
Weigand-Benson	21
Gerhardt-Gunderson	19½

Shannon hit four-baggers for the Penpushers.

Dick Maccio's Shipping nine drubbed Repair, 10-1, to climb into a second-place tie with the Office.

	W	L	Pts
Roch. Branch	3	1	Penpushers
Shipping	2	2	Repair

### Subdues H-E, Wins 1 Match From Kaypees

Camera Works netters, strengthened by the addition of John Hanna of NOD to their lineup, led the Rochester Industrial Tennis League race by a slim margin after two hard tilts last week on the U. of R. River Campus courts.

The CW racqueteers went into first place by defeating Hawk-Eye, 2-1, but dropped some of their margin by losing to Kodak Park, 2-1.

Hanna, paired with Dave Flint, turned in a sparkling performance in his loop debut, decisively trouncing the Kaypee pair of John Schilling and Ike Shypook, 6-1, 6-2.

Joe Rorick turned in his best effort of the campaign to spark the KP drive. Rorick, teamed with Jack Englert, turned back the strong tandem of Ted Mosher and Ben Morgan in a thriller, 10-8, 6-3. Jim Van Allan and Vern Thayer accounted for the second KP win, downing Ed Topel and Ed Kindig, 6-2, 6-3. For Thayer, who joined the squad this season, it was his third triumph in as many starts.

#### League standings:

	W	L	Pts
Camera Works	11	4	22
Kodak Park	10	2	20
Bausch & Lomb	9	6	18
Hawk-Eye	5	4	10
Kodak Office	5	7	10
Wollensak	4	8	8
Roch. Products	1	14	2

Results last week: Camera Works 2, Hawk-Eye 1; Balcos 3, Rochester Products 0; Kodak Office 2, Wollensak 1; Kodak Park 2, Camera Works 1.
