July 20, 1950

'VV' Gives Color View Before You Order Meal

Blanks Ready To Enter 16th Kodak Salon

Reading the Rules — Robert Edgerton of Bldg. 57 at Kodak Park looks over blank for 16th Kodak International Salon.

Kodak men and women from all over the world are receiving their entry blanks for the 16th Kodak International Salon of Photography.

The salon, which is being held in Australia this year, is open to everybody with Kodak and its subsidiaries.

Blanks at Park

Kodakers in Rochester may obtain their blanks at the Kodak Camera Club at Kodak Park or by calling KP 2385.

Everybody with the Company is eligible to send in prints. Entering is simple. Details are given on the entry form.

Since the judging will take place in Australia, it will be necessary that all entries leave here by Sept. 11. Kodak people in Rochester should send their entries to the Kodak Camera Club at Kodak Park, which is acting as a receiving point. They will be forwarded to Australia from there.

Eastman Medal Tops

Most coveted award is the George Eastman Medal, given for the best pictorial print of the show. It was won last year by Art Young of Hawk-Eye. Awards and trophies, sponsored by Company officials, as well as silver and bronze medals and certificates, are other prizes.

There are five sections to the salon, covering both black-and-white and color for beginners as well as advanced photographers.

Keast Burke of Kodak Australasia is salon chairman this year. He has obtained the services of outstanding photographic authorities in Australia to do the judging.

Building Starts On TEC Addition

Construction began last week on an addition to Tennessee Eastman Corporation's plant for the manufacture of cellulose acetate filament yarn.

It is estimated that production from the new equipment will not be realized until the spring of 1951. Upon completion, TEC's current capacity for the production of acetate filament yarn and staple will be increased about 5 per cent.

Biggest Camera It Was 20 Feet Long...

This is the story of the world's largest camera. . . It goes back to 1899 when the Chicago and Alton Railroad put a new train—the Alton Limited—into service. The C&A was mighty proud of the train, six cars long.

Love's Labor Lost for Don

Shakespeare's observation that "a rose by any other name would smell as sweet" carries a special implication for Don Sullivan of the Distribution Center, Bldg. 205. Some time ago Don's parents left on a trip to Florida. His mother had cautioned him to see that her house plants were watered regularly. For a time the plants prospered and Don felt mighty proud. Then other duties preoccupied him and his ministrations slackened. One by one the plants withered and died until just one remained fresh-looking.

Pleased to think that he still had this green reminder of his family trust, he faithfully tended it and marveled at its healthful appearance. When his parents returned, they were naturally disappointed to learn that so many of the plants had died, but Don tried to console them with the fact that at least one was thriving.

Imagine his chagrin, then, to learn that the object of his doting fondness was an artificial ivy, needing no water and just about as much attention!

The passenger traffic manager wanted a picture, not an ordinary one, but a big one.

Large direct prints were no novelty in those days. Some negatives measured three by four feet. So, George Lawrence, the C&A official photographer, suggested making the picture from two or three matched plates.

Nothing doing. The traffic manager complained the splices would show.

Lawrence then proposed the big camera, the like of which never had been seen. It was to be a folding bellows type, with an extended length of 20 feet. The plate holder was to be large enough to take a negative measuring 4½x8 feet.

It took two and one-half months to build the huge camera. It weighed 1400 pounds, the plate holder alone 500 pounds.

Once built, they had to wait for the weather. When the big day came, the camera was loaded on a flat car and, with 15 photographic experts and a boy, it was hauled away.

They had to back it a quarter of a mile away to get the train's full length in the camera's field of vision.

Before the picture was taken, one expert climbed inside the bellows and dusted off the plate with a camel's hair brush to be sure there was no dust. The plate turned out perfectly.

The first three prints were hustled to the Paris Exposition.

Whatever became of the huge plate, nobody seems to know. The camera itself was dismantled around 1905.

The only print known to exist now hangs on the wall of the Alton's general offices in Chicago. It still looks good.

Beaumont Newhall of George Eastman House had heard of Lawrence and his big camera. He said the plates cost about \$150 apiece. The Eastman House had a dry plate of New York that is five feet long, and a contact print made in Rochester.

(Continued on Page 4)

Now comes the "Viand Visualizer" to help you select a mouth-watering meal in full color.

You just peep into the "VV" and there on a Kodachrome slide is a preview of the delicious meal you've been considering.

The novel idea has been introduced at Keen's English Chop House in New York City. It's located at 72 West 36th St.

Saw Possibilities

Herman Zuch, proprietor of the chop house, saw possibilities of the "VV" for his restaurant after inspecting a viewer used in the garment industry for showing a new line of ladies' apparel. The viewer is a compact adaptation of the old stereoptic viewer. The idea for its use in the chop house resulted from observation that guests unfamiliar with specialties of Keen's often seem to have difficulty in making a choice from the dishes listed on the menu.

"Visual suggestion will result in greater satisfaction for the patrons," said Zuch.

Menus Go With Viewers

Menus are provided along with the viewer. The waiter hands the "VV" to the patron and inserts the Kodachrome slides. The patron presses a button to illuminate the interior of the viewer. When he looks through the eyepiece he beholds a mouth-watering, three-dimensional, life-like roast or chop. Steaming and juicy, it is flanked by a baked potato on which a lump of butter seems to melt before his eyes.

While the patron is holding the viewer and pressing the light button with one hand, he also can turn a knob to adjust the focus and clarity of the appetizing sight. The waiter substitutes slides until a choice of food is made.

Hailed As Forward Step

"This is a milestone in restaurant service," said Paul Henkel, president of the Society of Restaurateurs in New York, after using the "Viand Visualizer."

"It is a new feature that diners will like and talk about. I believe it will be widely adopted and used by well-known restaurants in New York City and elsewhere."

At present Keen's has 10 viewers with 10 Kodachromes for each. The slides were carefully prepared by a local photographer in New York. Each represents a specialty of the chop house.

Preview of a Meal—

The lady at top, left, is choosing a meal through the use of the "Viand Visualizer" at Keen's English Chop House in New York City. Looking over the menu is Paul Henkel, president of the Society of Restaurateurs. Taking their order is Herman Zuch, proprietor of Keen's. Kodachrome slides are used in the "VV." Above is a black-and-white picture of what the lady is viewing.

H. W. Scott Dies; EK Road Man

Howard W. Scott, Kodak technical representative in the Washington, D.C., area, died July 9. His home was in Alexandria, Va. A powerboat racing enthusiast, Scott had just completed one run in the Baltimore regatta at the time of his death.

He began with Kodak Jan. 1, 1939, and was assigned to the Washington territory, calling on government, Army, Navy and Marine photographers.

Born in Flint, Mich., Scott's early photographic experience included positions as production manager of Craine's Studios, Inc., Detroit, Mich., and assistant manager of Baker's Art Gallery, Columbus, Ohio.

He served with a machine gun company in World War I and was injured in line of duty.

He leaves his wife and a son.

H. W. Scott

Snazzy, eh? — Lillian Foggetti of the Stationery Dept. at KO uses the new Kodak telephone directory. The brown permanent ring binder cover with gold lettering combines the directories of all Rochester EK plants. When the need arises, a revised directory for any one plant can be printed separately and inserted in the binder. This will eliminate the time and cost of printing a complete directory.

Practicing Their Picnic Roles

Oo la la!—Rehearsing their roles for the annual summer picnic of the Kodak Camera Club, to be held in Lower Seneca Park Saturday, Aug. 12, are these members of the committee in charge of food and refreshments. From left, Ken Brenner, Bldg. 23, club president; Ray Englert, Bldg. 23, general chairman of the picnic committee; Estelle Morrison, formerly of Bldg. 3, who is serving as cateress for the event, and Robert Gell and Betty Perry of the Paper Mill, both members of the refreshments committee. Props in the picture are through courtesy of the KP Cafeteria Dept.

W. B. Potter Heads Board Of New Advertising Council

W. B. Potter, director of Kodak's advertising operations, has been made chairman of the board of the newly-formed Advertising Council of Rochester, N.Y., Inc. He also is a member of the executive committee.

W. B. Potter

The organization will pool talent and services of advertising men "to help solve local problems and to make democracy work better through the medium of public service advertising campaigns."

Comprised of 150 members, the local council includes representatives from advertising agencies and the graphic arts, industrial and retail advertising managers, media representatives and public relations officers.

The council will operate as a clearinghouse through which voluntary work done by advertising men for the public good will be channeled.

In this connection, a public policy committee, manned by 20 leading citizens in the fields of education, health, business, labor and religion, will be organized within the council. The committee will advise on the merits of requests for public service advertising campaigns in the locality.

Photo Potter

Vets Dividend Delay Cited

The Veterans Administration has notified 300,000 veterans that their National Service Life Insurance dividends have not been mailed yet, according to information received at the Veterans Service Office in Bldg. 28 at Kodak Park. The VA is holding 50,000 checks and 10,000 acknowledgment cards returned due to insufficient addresses.

Veterans who have not received checks or notification from VA should write immediately to E. G. Joseph, Director, Special Insurance Projects Service, Veterans Administration, Washington 25, D.C. Be sure to include complete identifying information.

5 Years Ago

(Kodakery, July 17, 1945)

Large numbers of the M-10 Tank Periscope manufactured at Hawk-Eye are ordered by the Rochester Ordnance District. The M-10 is more accurate and has a higher power than its predecessors. It permits accurate aiming at targets up to several thousand yards.

Forty-three more Kodakids arrive safely in England for reunion with their families. This is the third large group to depart since V-E Day.

Filter Adds Professional Touch To Your Special Pictures

Using the proper filter at the right time can do more than any other single thing to give your pictures a professional touch.

Let's take a K2 yellow filter, for example. Its most common use is to make sky and clouds stand out in their natural tones.

The K2 transmits all colors in equal amounts except blue, which is partially absorbed. Therefore

Up in the Clouds—Beautiful sky effects are easy to capture when you slip a filter over camera lens.

Valued Books, Photos Given To Institute

An outstanding collection of photographs, apparatus, books and documents pertaining to the history of photography has been given George Eastman House by Alden Scott Boyer of Chicago.

The gift was announced at the recent annual meeting of the Eastman House board of trustees. Official presentation will take place in January 1951.

"This magnificent gift is the largest and most important addition to the Eastman House collections," said Beaumont Newhall, curator.

"Mr. Boyer has, during the past 10 years, built up a unique collection of the pioneers of photography, a splendid photographic library of some 7000 volumes, and a quantity of unique pieces of historical apparatus which will greatly enrich our exhibits."

The Boyer collection now is housed in a concrete fireproof building of 10,000 square feet in Chicago. It will be moved to Rochester during the next few months.

"It is my hope that this gift will be followed by others large and small so that the Eastman House, already the world's most important repository for material showing the history and development of photography, will be even more complete," Boyer said.

Activities since Eastman House was opened to the public on Nov. 9, 1949, were described to the trustees at the annual meeting by Oscar N. Solbert, director of the photographic center.

EK Trainee's Son, 4½, Already a 'Linguist,' Speaks Finnish, Swedish and Now English

Frank, who is 4½ years old, speaks Finnish and Swedish and now he's tackling English. He has to!

His dad, Gus Lonnquist, a Kodak trainee, explained it this way:

"Finland has two native languages, Finnish and Swedish. My language is Swedish, my wife's is Finnish. The languages are very different," he added, "and one has to study both in school. My wife and I speak the two languages and sometimes combine them. That's what Frank does most of the time. English goes right into the mixture, too, for Frank."

Gus is the son of the manager of Oy Valovarjo Ac., sole distribu-

tor of Kodak products in Finland. Its headquarters are in Helsingfors (that's the Swedish), or Helsinki (that's the Finnish for it).

He arrived in Rochester last November to begin a two-year training period. "It's necessary that someone in Finland be well acquainted with the latest Kodak processes," he added, "for competition is strong."

His wife, Karen, and children, Frank and Susanne, 1½, followed him here in March.

Asked what surprised him most in the States, he declared, "Your world maps. They all give the impression that Finland is a satellite of the Reds. True, it borders

on Russia, but we have fought numerous wars with that country. In fact, we're paying a war debt to her now. That's why our taxes are higher than in the U.S.

"Finland," he declared, "is a democracy where one may vote in truly free elections, as well as say and read what he wishes."

Another difference he has noted is that in the States most people live in individual houses. In Finland, most people dwell in apartment houses. One reason for this, he explained, is that all fuel has to be imported, and less fuel is required to heat multiple units than many small houses.

The Finns, he continued, like sports and live much of their lives outdoors. The babies begin skiing when they begin to walk. The whole Finnish Army skis.

'Terve, Isa,' 'Hej, Pappa,' or 'Hi, Dad'—When Gus Lonnquist arrives home from Kodak each evening, 4-year-old Frank greets him in one of three languages—Finnish, Swedish or English. Gus, a Kodak trainee, will spend several months in Rochester before returning to Finland. Above, wife Karen, daughter Susanne and Frank welcome him home.

It's in the Park

Bits and Stuff About Doings Of KP Men and Women

Bill Lincoln, Ind. Eng., Bldg. 23, has joined the Tool Engineering Dept. at Hawk-Eye. At a party held in his honor at Lake Shore, W. T. Davis, assistant department head, presented Bill a gift on behalf of his KP associates. . . . John

John Schilling, Bill Davis, Bill Lincoln and George Gustaf . . . Lincoln leaves

Mildred and Hull Wilder, Bldg. 12, have returned from a trip through the New England States and Canada. . . . Ralph Fallesen, Sheet Film Packing, and his family are vacationing in Canada. . . . Girls of the Power Dept. entertained Harriet Dunham in the service dining room and presented her with several gifts. Harriet is leaving to devote her full time to household duties. . . . Henry Byers, John Byers, Neil Chapman and Edward Allardice have joined the Distilling and Solvent Storage Dept. . . . Fay Thompson, Paper Mill, Bldg. 50, is one of 40 members of the Brockport V.F.W. Drum and Bugle Corps which won the New York State championship July 4 in Aquinas Stadium. The corps earned the right to compete in the national competition to be held next

John Wilder, fourth from left, top row . . . honored by "the gang"

Wilder, Industrial Engineering, who recently transferred from Wage Standards to the Purchasing Dept., Bldg. 26, was guest of honor at a dinner held June 14 at the Greece-Ridge Exempt. . . . Eric Lewis, Bldg. 30, has returned from a trip to California where he attended a national convention. While there he reports meeting Jack and Shirley Carr, one-time Kodak Parkers. . . . Dawson Dickson, Bldg. 30, has returned from a vacation in Canada.

Ray Raufesen, Bldg. 204, Mrs. Raufesen and Ray Jr., Messenger Service, motored to Champaign and Urbana, Ill., recently. Ray Jr. will enter the University of Illinois in Urbana this fall. On the return trip the Raufesens toured the River Rouge plant of the Ford Motor Company in Detroit. . . . Roy Vokes, Power, spent his vacation touring the Great Lakes country in Canada near James Bay. He stopped off in Minnesota to visit relatives on the way home. . . . Marion Matthews, Veterans Service, and her husband, Ralph, Camera Works, left July 15 for a six-week motor-trailer tour through Western and Southwestern states. They will revisit many points of interest which they enjoyed seeing on their two previous trips.

An enjoyable reunion was held recently at the Park when Doug LaBudde, Ind. Eng., met Harold Reebel of New York City, who is associated with the Advertising Dept. of Tennessee Eastman. Both were stationed in India with the Army during World War II.

Harold Reebel, TEC, and Doug LaBudde . . . "old home week"

Donald Warfield, Distribution Center, Bldg. 205, has returned from two weeks of training duty with the Naval Reserve in Norfolk, Va. Side trips to Ocean View and Virginia Beach made the stay pleasant. . . . Two new murder mysteries have been added to the KPAA lending library in Bldg. 28: "Murder at Arrowways" by Helen Reilly and "Nightmare in Manhattan" by Thomas Walsh. . . . Beatrice Oliphant, Distribution Center, Bldg. 205, and several other couples spent the Fourth of July weekend in New York City. Gloria Martin of the same department spent her holiday spare time in Brockville, Canada.

Paul Fox, Stores, Bldg. 203, was a member of a local fishing party which recently returned from Canadian waters with a record haul of pike. . . . On the sick list is Arnold Frank, Solvent Storage. . . . Among those recently completing service at KP are Thomas Steele,

Pin for Harry — Gerry Lane, right, assistant general manager of Kodak Park, made it official when Harry Lee noted his 40th service anniversary by putting a 40-year pin in his lapel. On hand for the occasion were K. J. Mackenzie, left, superintendent of the Paper Mills, and D. B. Kimball, general superintendent of the Paper Divisions.

250 Turn Out For Picnic

A turnout of approximately 250 Metal Shop members and their families attended a basket picnic Saturday, June 24, at Powder Mill Park.

Games of all kinds were featured for the youngsters, and soft drinks, candy, peanuts and ice cream kept the refreshments committee busy throughout the afternoon. In a nip-and-tuck tug of war, the huskies of Bldg. 60 shaded their rivals from Bldg. E-36.

William Smart was chairman of the committee in charge of the highly successful affair. He was assisted by Roger Hall, Ed Van-Wicklin, Richard Marriott, Thomas Reddy, Jack Nightengale, John DeKoker, George Schlaffer, Harold Morley, Thomas Carney, Richard Forward, George Mandery, Fred Ritz and Allan Eddy.

A smaller group of Emulsion Coating Dept. Office personnel held their annual picnic at Willow Point Park on June 26. A program of games was followed by dancing, with Ralph Sutherland and June Matteo featuring an exhibition.

Serving on the committee in charge were W. Burke Atkinson, Charles Lombard, Betty Lou Dawes and Margaret Stowell.

2 Retired KP Men Claimed by Death

Two Kodak Park retired men were claimed by death recently. They are William Stahlhut and James Swanton, who passed away July 9 and July 8, respectively.

Stahlhut started in the Emulsion Melting Dept. in 1915 and left the Company in 1939. Swanton, who retired from the Chemical Plant in 1936, had been at the Park since 1913. A niece, Frances Shannon, is a member of the Statistical Dept.

Dope Dept., and Herbert Gill, E&M. . . . Back from a motor trip to the South are Betty Frey, Power, and her husband, Richard. The couple visited the Marineland Studios and drank from the "Fountain of Youth" in St. Augustine, but passed up an ocean swim when they learned that a small shark had been caught in the vicinity. While passing through Kentucky, they visited Diamond Caverns and Calumet Farms.

Paul Fox, left, and friends.

Kodak 'Birthday' for Jack

40-Year Smiles — Jack Schaeffer, seated, general foreman of the Distribution Center, Bldg. 205, is observing his 40th Kodak anniversary next month and this brought forth some of his associates with a 40-year emblem of their own. From left are Louis Goetzman, warehousing foreman; L. H. McGlashan, manager of distribution, warehousing and shipping; Helen Schreiner, Distribution Center office; Joe Stutz, foreman of Export Packing Dept., and Bob Newman, foreman of shipping. Jack has been at KP for 39 years.

Schaeffer Notes 40th Year; 17 Reach 25th Anniversary

John C. Schaeffer (he's better known as Jack) is celebrating his 40th Kodak anniversary in August. Now general foreman of the Distribution Center, Bldg. 205, he started at Kodak Office in 1910, going to the KP Branch Shipping Dept. a year later.

Seventeen others will round out 25-year periods to become eligible for membership in the Pioneers' Club.

They are: Cornelius Bommelje, E&M; Edward F. Brower, Yard; Joseph Capernhorn, Gelatine; William A. Raab, Paper Sens.; Raymond L. Clauss, Film Planning & Record; Edward J. Keller, E&M; Frank W. Wolters, Recovery; Charles J. Arnold, Film Emulsion Coating; Katherine M. Donahue, Time & Payroll; Fred E. Cridger, Chemical Plant; Joseph F. Fleming, E&M Stores; Frederick L. Coddington, Paper Finishing; Alexander C. Johnston, Film Storage; Kenneth A. Butler, 16mm. Processing; Fred C. Andrus, E&M; Karl Dunning, Film Emulsion Coating; Emil Stanzil, Baryta Dept.

stay and thus was able to see much of the continent. After driving through Belgium, Dick visited Utah Beach, where he landed with the U.S. assault forces. Most of the debris has been salvaged, he reports, and the French government is maintaining the entire area as a national shrine.

Continuing the trip into Germany, the party motored through the scenic Ahr Valley to the Rhine. In France, their route took them through Rouen and other old cathedral cities, and Dick renewed many of his wartime friendships with French villagers. One day of his itinerary was spent in Vincennes, where he toured the Kodak-Pathe plant.

Of all the countries caught in the throes of the war, Holland has shown the greatest recovery, Dick thinks. "There are a few bombed-out buildings remaining and the industrious Dutch are doing a stupendous job of reclaiming fertile land from the waters of the Zuyder Zee," he said. "Neither Belgium nor France is back to normal but I saw many American-made automobiles being unloaded at Antwerp. Germany is anything but a tourist's paradise, but the food is adequate and wine is abundant."

Dick had the use of his father-in-law's automobile during his

Wed in Holland

His wife, whom he married in Heerlen, Holland, in 1946, together with their children, Peter, 3½, and Diane, 2, went by boat while Dick flew over. Their Holland host was her father, Peter de Haart, inspector-general of mines for the Netherlands.

On Guard—It's easy to see why little Gail Ann Beyor made such a hit with the Plant Protection Staff in Bldg. 28, Kodak Park, when she visited there recently. She's "helping" her grandfather, Ed Schlosser. Gail Ann's dad is Arthur Beyor of Bldg. 12, KP.

EK Plane Gets New Copilot, Flew Big Bombers in War II

The Kodak plane has a new copilot, Jim Murphy. He has flown since 1940, when he obtained his private pilot's license. When war broke out, he enlisted and became a heavy-bomber pilot, flying B-24's and B-17's.

Based in England with the 8th Air Force, he and his crew flew 30 missions before returning to the States on Christmas Day, 1944.

Piloted C-54's

For almost a year, he flew C-54's for the Air Transport Command. Returning to civilian life, he went in the used-car business and then became an instructor at the Rochester Airport. Since 1948, he has been flying with Capital Airlines.

Originally a Rochesterian, his home now is in Batavia, where he has an operating interest in the airport.

Married, he has three youngsters a girl 6, a boy 2½, and a 12-week-old girl.

The former copilot, Ed Knitter, now is flying with a commercial airline.

A small business man and his partner closed their office at noon one Saturday and went to the movies. When they were seated, one of them nudged the other and gasped: "Gosh, Joe, we forgot to close the safe!"

"What's the difference?" answered the other. "We're both here, ain't we?"

Orientation — Joe Clemow, left, pilot of the Kodak plane, checks over the controls with his new copilot, Jim Murphy. The plane recently has been overhauled and the top painted white to keep its cabin cooler this summer. Since the Company obtained the plane four years ago, it has been flown 321,050 miles.

New Dietitians—Eight new members of Kodak's administrative internship in industrial nutrition got their first view of a Kodak cafeteria when Wintress Murray, left, EK nutrition adviser and program director, took them to the KO cafeteria for lunch. The girls, who were graduated from colleges across the nation in June, will train for a year in Kodak's Medical Depts. and cafeterias. The interns, from second at left, are Dorothy King, Indianapolis, Ind., Purdue University; Jo Ann Lounsbury, Arlington, Wash., Washington State College; Shirley Mae Hornburg, Oconomowoc, Wis., University of Wisconsin; Nancy Penn, Roanoke, Va., Madison College; Jean Vertovec, Elmhurst, Ill., University of Illinois; Wanda Gumprecht, Toponas, Colo., Colorado A&M; Marybeth Burgess, Hamden, Conn., Skidmore College, and Janet Hatch, Rexford, N. Y., Cornell University. Marybeth Burgess has been elected chairman of the class.

Educator to Cite Kodak Training Program As Model for Industrialists in Germany

Karl Belz hopes to incorporate parts of Kodak's training programs in the education system of Germany.

The German educator is one of 72 chosen from the Allied Zones to study education in the U. S. The group is sponsored by the Department of State's Office of Education.

After visiting Kodak's Photographic Training Dept., its Sales Training Center, Camera Club and School Service and learning of the supervisory training program, he was certain of one thing.

He was going to tell German industrialists about this training and attempt to persuade them to offer similar training to employees, dealers and students.

Visits Research Lab

Belz also visited KP's Research Lab and H-E's optics and lens-manufacturing departments.

He was very much interested in the fact that industries often give vocational guidance and work with schools, pointing out RIT as an example.

"You have a wonderful country. Your young people have so many educational opportunities both in schools and in industry," he declared. He was surprised at the wide variety of practical subjects offered by high schools.

Belz is a teacher of optics and precision mechanics at the Fobst Vocational and Technical School in Stuttgart.

Questioned about schools in Ger-

Get-Acquainted Info—Karl Belz, left, looks over some of the literature Kodak presents new members to acquaint them with EK. Explaining the book is William Schade of H-E's Optical Design Dept. Schade is from Berlin. Belz also met an H-E man who remembered him in Stuttgart. He is Herman Mueller, foreman of H-E's Dept. 60. Belz took messages with him for Mueller's 81-year-old parents.

many today, he used Stuttgart as a typical example. Almost 40 schools were badly damaged there. Some of these have been and can be repaired. There is a shortage of schools, books, equipment and teachers.

Attend in Shifts

Children go to school in shifts, some go mornings, some afternoons and others at night. This necessitates much home study, he said.

The school system differs from the American, he added. A youngster has the choice of taking a straight eight-year elementary

course or of taking a four-year elementary course topped by six or nine more years of schooling.

When many students reach 16, they become apprentices, working five days a week in a shop or factory and studying theory at school on the sixth day. Apprenticeships last about four years.

Equipment Destroyed

His own school's optics equipment and precision machines were destroyed during the war. He has managed to assemble some equipment, but said it was rather poor.

Crowding the schools even further are young people who can't find employment in upset Germany. Rather than just sit, they attend school. Some of his students commute 75 miles by train.

"We have no such veterans' program as yours, you know," he continued. "Yours is a wonderful one."

Capt. Lee Schoen Flies MacArthur

Very much in the picture of embattled Korea is Capt. Lee G. Schoen, who left Kodak Park to enter military service.

Captain Schoen is a member of the crew of Gen. Douglas MacArthur's plane, The Bataan. It is believed he was aboard the ship on the general's recent trip from Tokyo to Korea.

The 27-year-old pilot was in Cine Processing, Bldg. 6, at Kodak Park when he left Feb. 23, 1942, for service. The captain flew 65 missions over the Hump. On these missions and subsequent flights to and from Paris while stationed at Westover Field, Mass., after the war, Captain Schoen logged over 5000 hours in the air.

The young airman last visited Rochester in 1948 before going to Tokyo, where he has been since with his wife and two children.

Largest Camera Built Back in 1899

(Continued from Page 1)

ester by J. H. Kent in 1876 that measures 25x40 inches. Even these giants are dwarfed by the negative of Lawrence.

Today, the picture could have been taken with an ordinary camera and the negative could have been blown up to any size the traffic manager's heart desired.

But, that was 50 years ago . . . photography has come a long way.

Good Neighbors

Clifford Newman, CW Dept. 7, had purchased green paint to do his Benwell Rd. house when he found he needed an operation. The evening after he went to St. Mary's Hospital, his neighbors took over. When Cliff arrived home, he found the house completely painted except for one shingle. Above, he applies the finishing touch. This purposely had been left so he could say he had a finger in the pie. The good neighbors were Art Klimm, Al Vermeulen and Jack Flynn, all of KP; Fred Kern of H-E, and Herman Hartman, Al Beideck and Pete Morris.

Scouting the Park

Boy Scouts streamed into Kodak Park recently. Seventeen hundred of them . . . some en route to the big national jamboree at Valley Forge, others on their way back. They stopped in Rochester especially to visit Kodak.

After a briefing on Kodak by means of color slides and talks, Scouts were divided into small groups and KP men, acting as guides, showed them around.

A good many, toting their own cameras, were enthusiastic photography fans. They were eager to see how the film they used in their cameras was made. They saw film spools being punched out by the hundreds. With wide eyes, they watched colorful Kodachrome transparencies being inspected and mounted. And numerous other things caught their interest.

Many miles separated these Boy Scouts from their homes. Some were from Hawaii, others from Utah, Nevada and California. But the largest group—650 strong—was from Tacoma and Seattle, Wash.

(1) This threesome is intent upon Kodachrome mounting operation as shown to them by Elsie Herkimer, Bldg. 6-A. (2) Chow time. (3) George Eastman memorial catches interest of group of West Coast boys. (4 and 5) Gerould T. Lane, left, assistant manager of KP, and Clayton Alt, acting head of KP Public Relations Dept., get Hawaiian floral leis. (6) Bus tour begins. (7) Ed Carstens points out reel welding in Bldg. 48. (8) Cliff Schmidt shows Utah boys paper slitting in Bldg. 25. (9) Hawaiians entertain hosts with dance stunt. (10) Bill O'Neill begins tour through Bldg. 25.

DPler Turns Upstairs Into Ideal Boys Room

Most young boys dream some time or other of a knotty pine room all their own, with bunk beds and places for all the paraphernalia of the cops 'n' robbers age. For the three sons of Walt Statucki, DPI Vacuum Equipment Dept., that room is a reality.

Gary, 10, Dick, 7, and Dale, 6,

moved in six weeks ago. Each sleeps in his own bunk, stores his toys in roomy cupboards underneath it, and has his own closet where, believe it or not, he neatly hangs his clothes. When Walt completes his original plans, each boy also will have his own built-in desk and bookshelves.

Home's in Greece

Last December Walt and his wife, Barbara, set to work on the sloping second story of their modified Cape Cod type house on Ronald Dr. in Greece. They had a setback when Barbara injured herself lifting lumber that was delivered one day when she couldn't reach Walt. But after a few weeks they were ready to begin again.

Walt laid new flooring, covering it later with 9-inch rubber tile sections in red and white. He ran pipes up from the furnace and cut two registers in the floor. The walls of knotty pine went up, each board sanded by hand. Here Barbara took over with shellac and varnish. A ceiling of off-white squares was added.

Only part of the project the Statuckis didn't do themselves was the wiring. An electrician installed outlets, fluorescent lamps in the ceiling and matching bronze-finish fixtures over each bed and at the head of the stairs.

Color Added

For an extra dash of color, Barbara bought two double-size chenille bedspreads in royal blue and cut them into two pairs of curtains and three spreads for the bunks. Each bunk was bordered at the top with decorative cornice, easily cut out of short lengths of pine.

With the bunks and desk filling in under the eaves, there's generous floor space in the middle of the room. Ventilation is good, too, with a breeze sweeping through between the two windows, one at either end of the house. Yet when the boys are asleep in their bunks they are out of drafts.

Final additions will be the two desks at one end under the window and a row of built-in drawers at the head of the stairs.

The room's professional look bespeaks the fact that carpentry is just a hobby for Walt. On the job, he is foreman of DPI's Welding Shop.

The Way We Heard It

ABOUT CHEESE—Gram for gram, cottage cheese, popular warm-weather food, is higher in protein, phosphorous and riboflavin than whole milk.

UMMM, MILK — Milk has been called "nature's most nearly perfect food." It contains protein, fats, sugar, minerals and vitamins.

A black-and-white photo doesn't do justice to this colorful room designed and built by DPI's Walt Statucki, below, for his three young sons. The walls are warm knotty pine, the flooring of gay red and white rubber tile, the curtains and spreads of blue chenille. Opposite this bunk are two more, and at the right of 7-year-old Dick, who sits at his desk, are built-in bookshelves. Details include a cornice over each bunk, bronze-finish light fixtures and old-style black hardware on closets and cupboards. See how room looked, prior to redoing, in picture at left.

Coffee, Egg, Sweetbreads Get 'Once Over Lightly'

—by Wintress D. Murray
EK Nutrition Adviser

Is coffee dehydrating?

Coffee contains caffeine which has a definite diuretic action. For that reason, it might be considered somewhat dehydrating.

Is there any use for cauliflower stalks and leaves?

I do not know of any way to use them.

Which has more food value . . . the white or the yolk of an egg?

The white has slightly more protein, but the yolk contains more calories, minerals and vitamins.

How much iodine should one have in his diet?

About 45 micrograms. An average serving of oysters provides about 54 micrograms. The regular use of iodized salt will supply the body's need for this important mineral.

Should a person reducing do extra exercise for fitness or would that work up his appetite too much?

Strenuous exercise usually stimulates the appetite and causes a person to eat more than usual. Certain exercises will help to tone the muscles so that they are less

About the Model

A vivacious, pretty girl, Dorothy Seguin is a member of Paper Planning in KP Bldg. 57, where she does tabulating. She's the wife of Vincent Seguin, better known as "Zeke," a member of the Testing Dept. in KP Bldg. 6-A.

Interests include knitting, bridge, sewing (she's now in the process of restyling several dresses), and a novice's enthusiasm for fishing. She also is getting a big thrill out of the first garden she and Zeke have had. It's in the back yard of their new home located off Bay Rd., Webster.

Among Us Girls

Wedding bells rang twice as loud Saturday, July 1, when the double wedding of Ella Smith and her sister, Elizabeth, took place in St. Monica's Church. Ella, who is in CW Dept. 98, became the bride of Don Fowley, while Elizabeth and Eugene McGuire, both of Hawk-Eye Dept. 23, became husband and wife. . . . Rose Giralico, KP Kodacolor, has returned from a trip abroad. She visited her grandparents in Rome, Italy, for the first time. . . . "More fun," according to reports

from Violet White, Jeanette Fisher, Connie Iaia, Audrey Frisch, Elizabeth Weber, Connie Principe, Dorothy Cherry and Lucille Sadler after an outing June 20 at Sea Breeze Amusement Park. All eight are in the H-E Production Control Dept. . . . Edna Pearson, Ind. Lab, KP Bldg. 23, is back home after a vacation tour of several Western states. Accompanied by her mother, Hilda David, KP Bldg. 6, and her father, Edward David, KP Bldg. 53, she stopped off in Cleveland, Ohio; visited Lincoln's tomb in Springfield, Ill., and saw President Truman's home in Independence, Mo. Continuing westward, the party took Kodachrome pictures of Colorado Springs, Pike's Peak, Garden of the Gods, Will Rogers' Shrine, and Rocky Mountain National and Estes Parks in Colorado. In South Dakota, they toured Custer State Park and viewed the Rushmore Memorial. The return trip included a stop at Western State College in Gunnison, Colo., where Edna's sister attended classes, thence home by way of Denver and Chicago.

The Distribution Center has two new recruits from the KO Rochester Branch—Florence Epke and Winifred Flynn.

Stunning Silk—Fetching feature of this print silk dress is its softly draped neckline, also dipping down in back. The skirt swings into a side drape on the left side. Colors are lovely . . . black on white with shocks of Chinese red and royal blue. Dorothy Seguin of Kodak Park is our model. She poses in her own back yard. The dress is from Sibley's.

The Market Place

FOUND—Woman's eye glasses in wash-room, Bldg. No. 5. KP Ext. 2569.

LOST—Black print umbrella morning of Wednesday, June 21, in or near Bldg. 99, keepsake, name and address on handle. Glen. 6755-M.

LOST—Black leather keycase, approximately 10-12 keys, between KP parking station and Bldg. 5. KP Ext. 2569.

LOST—Gold bracelet between Bldg. 28 and Bldg. 56 on July 5. Miss Egan, KP Ext. 8245 or Gen. 6861-M.

LOST—Key for 1950 Studebaker between Dewey Ave. and KP, July 5. Ray Nickel, 3rd floor, Bldg. 48, KP.

About the Professor—Cap Carroll probably can beat a lot of Kodakers' bowling averages by rolling his ball down the sidewalk, like he says. He's a pretty tough customer on the alleys, even though he claims he "retired" back in 1939. That was when he took a job with Brunswick, bowling equipment maker, and didn't have time for bowling. The year before, however, Cap carried averages of 210, 208 and 204 in three leagues. He has five 300 games to his credit, several others in the high 290's, plus a high series of 759. Before he joined Kodak in 1943, he supervised installation of the 56 alleys at Samson Naval Training Station, and got the sailors there started. He's still doing pretty good. Last year, for instance, bowling just once a week, he carried a 180 average, which isn't bad at all. He's confident he can help a lot of Kodakers get their averages up that high, at least, if they'll listen real closely at his bowling school and do what he and his staff of instructors tell them.

DPI, CW Nines Rack Up Industrial Softball Wins

The high-flying DPI and Camera Works nines continued their winning ways in local industrial softball leagues last week.

DPI walloped Stromberg's, 20-2, and trounced Hawk-Eye, 6-1, in the Major wheel, while Camera Works racked up two wins in the Rochester Industrial League.

Coia's Hit Wins Game

After blanking Hickok's, 3-0, the Cameras edged Grafex, 4-3, in extra innings. John Coia drove in the winning run with an eighth-inning single. Hap Chandler pitched both games, allowing but three hits in each tussle. DPI bowed to Post Office, 9-8, in a Champion League contest.

Rog Pfundtner not only held Hawk-Eye to two hits, but banged out a brace of doubles as DPI subdued Pete Mistretta's boys. Gordie Allardice also rapped out two hits. Camera Works now leads the Rochester Industrial League with a 7-and-3 record. DPI advanced to within a half game of Delco in the American Division of the Major loop.

Ritter's Upend KP

Kodak Park's Majors dropped a notch in the National Division race when Ritter's blanked them, 2-0. Bud Oister allowed the winners only four hits, but the Kaypees managed only three on his behalf. Rain kept the KP Dusties idle last week. Mike Farrell will send his charges against the Kaypees at 9:30 tonight. These two teams are in a virtual tie for second place in the National Division of the Major Industrial League.

PAPER SERVICE LEAGUE

Six matches have been completed in the Paper Service Department Golf League this season. Standings as of July 11 follow:

League "A"—Kelly-Robinson, 30 pts.; Milne-Jordan, 27½; Mahone-Murnighan, 26; Bloom-Tellier, 25½; G. Davis-Cooke, 25; Borden-Culhane, 22; Kubica-Miller, 22; S. Smith-Marshall, 19½; Koller-Spry, 18½.

League "B"—Burnham-Chambers, 31½ pts.; Lowry-Littwitz, 31½; T. Davis-Heard, 27½; Mason-H. Smith, 25½; Spindler-Secrist, 25; Eddy-Waasdorp, 22; Kern-McNeil, 21½; Edgerton-Woodward, 16; Bourcy-Fox, 15½.

Want to learn to bowl?

Want to improve your game? Then Cap Carroll's your man!

The "old grey fox" of the HEAA is going to hold a bowling school for Kodakers in all plants. Beginners and those with low averages, even those with higher averages are eligible for his Kegler's Kollege.

The school is for gals and men alike.

The school bell rings Aug. 14 at 8 p.m. in the Kodak Park auditorium.

Cap will talk about fundamentals of the game. He'll have a bowling alley "taped out" on the floor to demonstrate what he's saying.

He'll show you how to pick spares, hit the pocket for strikes, the best footwork for beginners, how to grip the ball, the stance and other fine points of the game.

He'll Answer Your Questions

After he's through talking, he'll answer any and all questions tossed at him.

For the rest of the week, the sessions will switch to the Ridge Bowling Hall, where Kodakers can try out the things Cap tells them. This they'll do under the watchful eyes of Cap and a big staff of other topnotch Kodak bowlers who will be in constant attendance, each taking a couple of alleys. They'll watch the bowlers and tell them where they're making their mistakes and show them how to correct them.

The school's free. The only cost to the "pupils" will be for the games they roll at the Ridge. You can sign up on Aug. 14 for the night or nights you'd like to go to the alleys.

Cap is an avid exponent of the technique known in kegling circles as "spot bowling."

He teaches bowlers to pick out a spot about 15 feet down the alleys where the maple and pine boards join. He contends it's easier to see 15 feet away than 60 and claims you can hit the pocket better and pick spares more easily.

Cap has the cooperation of all

Jack Cannan Wins

Jack Cannan's 75 won low gross in the second KPAA Golf Tourney Saturday at Lake Shore. A field of 200 took part. George Gustat and Von Christoff tied for low net with 69's in Class A. Al Walker and W. R. Bronson had 65 nets in Class B and R. Punnett topped Class C with a 66.

HO HUM! THEY DID IT AGAIN

Still undefeated for the season, Kodak Park's entry in the Major Industrial Horseshoe League racked up its 8th straight victory of the season last week by stopping Taylors 20-5, at Edgerton Park.

Bob Schrader and Charlie Kester led the Kaypees with four wins apiece, Gord Malin turning in three and Cosmo Bianchi and Ken Raleigh two each.

CW stayed close behind, wallowing Lawyers Co-op., 23-2, for a 6 won, 1 lost record.

Baseball Trip's Family Affair

Say, that special baseball excursion to Cleveland on Sunday, July 30, is a family affair, did you know it?

The cost for adults is \$13.50 and for kids under 12, it's \$7.50. That includes reserved seats for the doubleheader between Cleveland and Boston, plus train fare. All airconditioned equipment has been promised for the trip.

The train leaves Rochester at 7:30 a.m. and gets back at 11:25 p.m.

Tickets are available at the KPAA, CWRC, HEAA, KORC and DPI Vita-Vac offices. Better sign up NOW!

So You'd Like to Learn to Bowl?

Kodak recreation clubs—KPAA, CWRC, KORC and the DPI Vita-Vac Club. If the interest is sufficient, there's a good possibility an all-Kodak beginner's league may come out of the school.

So that Cap can make plans for handling as many as are interested,

and so that he can order enough ABC Bowlers Manuals to go around, he'd like to have all those interested fill out the accompanying blank and send it along to Cap through the Company mail, or you can send it to your own recreation club office, if you wish.

Sign Me Up . . .

I'd like to learn to bowl or improve my game. Put me down for Cap Carroll's Kegling Kollege on Aug. 14.

Name _____

Plant _____

(Fill this blank out and send it through the Company mail to Cap Carroll, HEAA Office, Hawk-Eye).

'Pushers' Beat Branch, 9-8

Despite Bill Losee's clouting out two homers for the Roch. Br. in the KO Intraplant League, the Penpushers won 9-8 last week.

The Pushers went wild in the first inning, carding 8 runs. Bob Sullivan scored the winning run for the home team in the last of the 6th.

The Branch loss cost it the league lead. Ironically, the Branch has suffered 2 of its 3 defeats from the Pushers, the cellar dwellers who have won but 2 games this season. Repair is now ahead by half a game.

Saturday, Aug. 5, at Stafford Country Club.

Jack and His Guns To Be Seen on TV

A pistol-packin' photographer will be guest-star on Bob Turner's Sports Show over WHAM-TV at 7:30 p.m. Tuesday.

Jack Collins, of KO's Photographic Illustrations Div., will be interviewed and display part of his collection. He ranks high up in the realm of gun collectors and marksmen.

His collection of rare guns boasts rifles, pistols, revolvers and muskets of present and bygone days—all in working order. His interest in them is from the artistic, mechanical and historical standpoint.

Orioles Win 1st Half In Noon-Hour Game

The Orioles are the first half champions of the KPAA Ridge Noon-Hour League.

Spike Spiegel's club shut out the Wings, 2-0, and spanked the Royals, 4-2, last week for the title. Merritt Groth and Red Warner homered for the winners against the Royals.

The second-place Bears also annexed a pair of wins, defeating the Royals, 2-1, and blanking the Wings, 9-0. Stan Gorszczinski homered for the Bears.

F.D. 5 Gets 3 Wins To Top KP West

F.D. 5 softballers scored three victories last week to drive to the top of the KPAA West Kodak loop race.

They gained a 3-1 decision over the Renegades, followed up with a 10-1 batting spree over Syn. Chemistry and added a 7-2 triumph over Wood Cellulose.

The Renegades came through with a double win, defeating Wood Cellulose, 11-1, and trouncing Syn. Chemistry, 8-3.

Yankees, Dodgers Tied

The second half race in the KPAA Lake Ave. Noon-Hour wheel got off to a good start last week with the Dodgers and Yankees knotted for the lead.

The Yankees, first half winners, beat the Birds, 5-1, and the Giants, 4-1. The Dodgers edged the Giants, 2-1, and the Birds, 10-1. The Dodgers and Yankees played each other to a scoreless tie.

	W	L	T	Pts.
