

New KODAK LS Pan Film- ASA 50

• *Strobe speed* • *Long toe* • *KODAK ESTAR Base*

NEW!

KODAK LS Pan Film

ASA 50—ideal for use with electronic flash. No reciprocity failure.

Exceptional shadow-holding ability — brilliant highlights too.

Excellent sharpness and fine grain — better than KODAK PANATOMIC-X Film.

Coated on incredibly tough KODAK ESTAR Base. Won't kink, abrade, or desensitize. Dries fast and flat. Process in a KODAK VERSAMAT PROCESSOR, in KODAK POLYDOL Developer, or KODAK HC-110 Developer.

Sheet and 3½-inch roll sizes, on KODAK ESTAR Thick Base.

ALSO: 70mm on .004" ESTAR Base.
