

*A sheet film you'll be  
feeling a lot of...*

**Exciting, New  
KODAK TRI-X Pan Film**

# **Just look at these improvements**

- An upswept curve that emphasizes brilliance.
- More shadow detail.
- Easy-to-control contrast.
- Improved retouching characteristics.
- No speedlight reciprocity problems.
- Improved handling characteristics.
- Can be pushed when necessary.

Can be developed in KODAK POLYDOL Developer, or, if you want more contrast and faster processing, use KODAK HC-110 Developer. Or you can gallop it through a KODAK VERSAMAT Processor at 7 to 8 feet per minute. Comes in all popular sheet sizes and 3½" bulk rolls. Try it.
