KODAK TRI-X Ortho Film

New highlight brilliance, shadow detail, sharpness for your men's portraits. Ruddy look pleases your customers. Versatile ASA 320 daylight speed (200 tungsten), fast-and-flat drying, KODAK ESTAR Thick Base, two-sided retouchability.

new

KODAK EKTALURE Paper, Y Surface

New white base for snowy wedding gowns, good-looking borders. Luxurious silk surface will delight your brides.

Stable image tone with hot drum drying, emulsion compatible with all popular toners. Great, too, for snow scenes, seascapes, greeting cards.

new

KODAK Dye Transfer Film, SO-351

“Day-Night” dye transfer prints!

Put it in a light box, it's a transparency.

Turn off the light, it's a print.

Works just like dye transfer paper.

Great new business idea for advertising displays in restaurants, banks, trade shows, reception rooms.

new

15-minute EKTACHROME Prints

Now you can make prints direct from KODACHROME and EKTACHROME transparencies, and process them in 15 minutes on a KODAK Rapid Color Processor! No internegative needed — you use KODAK EKTACHROME Paper. See us soon for full details.
