

**Kodak papers
are different
because they're
always the same**

The prints you deliver can be no better than the paper you use. Kodak black-and-white papers always deliver the same dependable high quality—sheet after sheet, box after box.

Whatever the job calls for: whatever the speed, whatever the size, the surface, the grade, the tint, the stock. Whatever you need, Kodak makes over 175 combinations.

And Kodak has designed processing chemistry to maximize the built-in quality of every one.
