

**open
and pour,
that's all.**

***Bottled time-savers eliminate waste.
The convenience of Kodak liquid
chemistry is only a drop away.***

Say goodbye to the drudgery of powder-handling and blending. Use the new, all-liquid, no-powder, no-mixing systems—Kodak liquid chemical concentrates. Simply add to water and you're ready for films and papers. Processing has never been easier, faster, or more economical.

KODAK Liquid Concentrates

KODAK HC-110 Developer for films: highly active, with broad development latitude and stable shelf-life. Cuts processing time, maintains film speed, produces sharp images, gives maximum shadow detail. And for added economy there's a liquid replenisher.

KODAK EKTAFLU Chemicals

Chemicals for papers: easy to use, fast to prepare, uniform for consistent results. Type 1 developer for cold-tone papers. Type 2 for warm-tone papers. An indicator Stop Bath and a Fixer complete the family of time-savers. Compact Cubitainers® store these long-lasting liquid concentrates for added convenience.
