

# KODAK EKTACOLOR Film is Confidence— ON ANY JOB!

*It's fast—will do most anything!  
Gives great color  
—for great prints!*

# KODAK EKTACOLOR Professional Films

▶ Shoot outdoors, with blue flash, or electronic flash with the fast KODAK EKTACOLOR Professional Film, Type S. Up to 60 seconds under tungsten with the Type L.

▶ Make prints in color or black-and-white from the same negative. Make your own color adjustments. Make color transparencies, including slides.

▶ Process with companion KODAK C-22 Chemistry—finely tuned to the EKTACOLOR Film family. KODAK EKTACOLOR Professional Paper is matched to its own KODAK EKTAPRINT C Chemicals. Or use the KODAK Rapid Color Processor with its exactly paired KODAK CP-5 Chemistry.

▶ All by Kodak. All made together to work better together—for you.
